Promoting Nonviolence in Early Adolescence

In preparation for role-play during a RIPP class, 6th grade students consider the following conflict situation: Sharon and Josie, who are good friends, tryout for the basketball team. Josie makes the team, but Sharon does not. The week after tryouts, Sharon tries to pick a fight with Josie, calling her a "cheater" and "some one the coach felt sorry for." Josie is in a bind; she wants to remain friends with Sharon, but she is really angry with Sharon for treating her so badly. What can Josie do in this situation? What type of self-talk will help her work out this problem with Sharon and keep the friendship? During the role-play, Sharon calls Josie a cheater. Then, before Josie responds, two students representing her positive and negative sides take turns whispering into her ear. Negative self-talk: "Boy, is she a loser! What if everyone believes her and thinks that I cheated to get on the team?!" Positive self-talk: "I know I worked hard to get on the team! Sharon must really be hurt that she didn't make it. I can talk to her later when she's cooled down, and maybe we can do something together after practice." Josie listens to the two voices, and decides that the best approach is to ignore Sharon's comments for now and to call her later that day to see if they can do something together. This description of students dealing with everyday conflicts is quite real.

Peer Justice and Youth Empowerment

Practical parenting ideas for kids from ages 13 to 19 Helping teenagers navigate the rocky years between childhood and adulthood has always been a parenting challenge--a challenge that has only grown more difficult in today's fast-paced society. Noted parenting author and psychologist James Windell knows teens. He interacts with them every day. In this book, he offers exercises and practical ideas on how parents can raise a well-adjusted teenager with a solid chance for a successful life. Unlike so many books on parenting and teens that focus on discipline, this book emphasizes the importance of goal-setting, communication, and the development of social skills during the teen years. It reveals how to develop teens' emotional intelligence by demonstrating to them how they can handle their own emotions and respond constructively to the emotions of others. James Windell, MA (Detroit, MI), is a juvenile court psychologist. He is the author of "Children Who Say No When You Want Them to Say Yes" and "Eight Weeks to a Well-Behaved Child." Windell has appeared on CNN and Donahue, and his work has appeared in many national newspapers and magazines, including Jane Brody's column in the New York Times.

Six Steps to an Emotionally Intelligent Teenager

* Serves as a guide to using ritual acts in peacebuilding efforts * Abundant with examples of symbolic acts that aided the peace process Conflict is dramatic. In theater, literature, story telling, and news reporting, it is a powerful mechanism that draws attention, heightens the senses and evokes emotion. Schirch argues that peacebuilding has the potential to do just the same. Examples of peacebuilding often center on the serious, rational negotiations and formal problem-solving efforts in conflict situations. Schirch argues, though, that what truly bonds adversaries and helps achieve peace are the symbolic, non-verbal ritual acts--shaking hands, sharing a meal, showing a photograph of a loved one. Yet these are often overlooked as deliberate components of peace negotiations. Ritual and Symbol in Peacebuilding underscores the importance of incorporating symbolic tools, including ritual, into traditional approaches to conflict. Ritual assists in solving complex, deep-rooted conflicts, and helps to confirm and transform worldviews, identities, and relationships. With theories and language to explain the symbolic dimensions of conflict, this text will be useful to scholars and practitioners active in the diverse field of peacebuilding.

Over its two editions, The New Oxford Textbook of Psychiatry has come to be regarded as one of the most popular and trusted standard psychiatry texts among psychiatrists and trainees. Bringing together 146 chapters from the leading figures in the discipline, it presents a comprehensive account of clinical psychiatry, with reference to its scientific basis and to the patient's perspective throughout. The New Oxford Textbook of Psychiatry, Third Edition has been extensively re-structured and streamlined to keep pace with the significant developments that have taken place in the fields of clinical psychiatry and neuroscience since publication of the second edition in 2009. The new edition has been updated throughout to include the most recent versions of the two main classification systems---the DSM-5 and the ICD-11---used throughout the world for the diagnosis of mental disorders. In the years since publication of the first edition, many new and exciting discoveries have occurred in the biological sciences, which are having a major impact on how we study and practise psychiatry. In addition, psychiatry has fostered closer ties with philosophy, and these are leading to healthy discussions about how we should diagnose and treat mental illness. This new edition recognises these and other developments. Throughout, accounts of clinical practice are linked to the underlying science, and to the evidence for the efficacy of treatments. Physical and psychological treatments, including psychodynamic approaches, are covered in depth. The history of psychiatry, ethics, public health aspects, and public attitudes to psychiatry and to patients are all given due attention.

Contemporary Trends in Conflict and Communication: Technology and Social Media examines the myriad ways conflict communication occurs in mediated spaces, whether through social media platforms such as Twitter, Facebook, and Instagram, on private social enterprise spaces, or through formal online dispute resolution (ODR) technologies. We were experiencing the increase of conflict communication in hybrid spaces prior to the COVID-19 pandemic, yet the global lockdown that shifted everyone to remote teaching, learning, and working heightened our attention to the impact of technology and social media on conflict dynamics. While social media is often implicated in the spread of alternative facts, false news, and intimidation, technology and new media also have the capacity to enhance and transform conflict communication in education, workplace, and socio-political settings. The contributors to this volume showcase cutting-edge research that helps us make sense of the times we are living in and is organized in three sections: (1) Using technology to promote dialogue and collaboration, (2) Conflict communication on social media, (3) Online conflict management in education, training, and practice. This collection is relevant to scholars of conflict studies as it highlights key trends and areas for future research to improve conflict communication, dialogue, and collaboration and proposes ideas for using technology and social media to transform and connect rather than polarize and divide.
