The Best of Jules Verne

The Jules Verne Collection includes five novels; *Around the World in 80 Days*, *20,000 Leagues Under the Sea*, *Journey to the Center of the Earth*, *From the Earth to the Moon*, and *Around the Moon*. In *Around the World in 80 Days*, Jules Verne helped make the world seem a little smaller, and accessible to young adventurers, spurring many to attempt a voyage around the world. In *20,000 Leagues Under the Sea*, the description of Nemo's ship, called the *Nautilus*, was considered ahead of its time, as it accurately describes features on submarines, which at the time were very primitive vessels. In *Journey to the Center of the Earth*, readers were brought face to face with prehistoric creatures deep within the bowels of the Earth. In *From the Earth to the Moon*, many of Verne's calculations in launching a projectile into space were surprisingly accurate, and his placement of a launch site in Florida predated the Kennedy Space Center's construction in Florida by almost 100 years. In *Around the Moon*, Verne describes how the gravitational force of a large asteroid can change the course of a space ship, and encouraged readers to dream about the wonders of the Moon's surface.

The H. G. Wells Collection

First published in 1990. Although one of Jules Verne's lesser known novels, as part of his 'Extraordinary Voyages' collection, there is still much to enjoy about *'The Floating Island'**. Written in 1895 towards the end of his career this is an adventure novel with elements of sci-fi. A French string quartet traveling from San Francisco to their next engagement in San Diego, is diverted to Standard Island. Standard Island is an immense man-made island designed to travel the waters of the Pacific Ocean. The wealth of residents of the island can only be measured in millions. The quartet is hired to play a number of concerts for the residents during their tour of the islands (Sandwich, Cook, Society, etc.) of the South Pacific. The island seems an idyllic paradise; however, it is an island divided in two. The left half's population is led by Jem Tankerton and is known as the Larboardites. The right half's population is led by Nat Coverley and is known as the Starboardites. Despite the obstacles encountered on their journey, the two parties have a disagreement that threatens the future of the island itself.

The contents of a shark's stomach contains a bottle that holds notes written in three different languages. Much of the notes are indecipherable; however, together they may reveal the location of the whereabouts of Captain Harry Grant, whose ship the *Britannia* was lost over two years ago. While the latitude of Grant is known from the note, the longitude is a mystery. Clues from the notes point to the South American coast as the probable location of the shipwreck. Lord Glenarvan makes it his quest to find Grant; together with his wife, Harry Grant's children (Mary and Robert) and the crew of his yacht the *Duncan* they set off on the chase. An unexpected passenger in the form of French geographer Jacques Paganel joins the search. The search takes them where the 37th degree of south latitude crosses the South American continent. Crossing the continent from west to east, they travel through Chile and Argentina (Patagonia), with no luck, when Paganel realizes that part of the clue must actually mean Australia. So they go to where the 37th degree begins crossing Australia, there by chance they meet a man who claims his name is Thomas Ayrton, former quartermaster of the *Britannia*. Ayrton takes them across the Australian continent, with plans of his own to seize control of the *Duncan*. Ayrton's treachery makes the party believe that he has gained control of the *Duncan*. Dejected that their search of Australia did not turn up Captain Grant, the adventurers travel to New Zealand via a ship that barely seems sea-worthy. The vessel wrecks along the New Zealand coast. The party's attempt to get to Auckland gets them captured by the Maoris, a tribe of cannibals at war with the English and disinterested in keeping the prisoners alive.

Over time, as women gained more social and political freedom, these works have reemerged as subjects that are considered to be worthy of closer study. Classic Works from Women Writers is a collection of more than thirty novels, short stories, poems, and essays by prominent and lesser-known female writers since the 17th century. Included in this volume are groundbreaking works such as Mary Shelley's *Frankenstein*; Agatha Christie's *The Mysterious Affair at Styles*, the first Hercule Poirot novel; Charlotte Perkins Gilman's short story "The Yellow Wallpaper" and her follow-up essay; and poetry from the likes of Christina Rossetti, Amy Lowell, and Sara Teasdale. The words of these authors offer a multitude of perspectives on different issues that affect not only women but the wider world as well.

From the Earth to the Moon

After escaping from their captors in a giant air balloon, five prisoners of the Civil War find themselves stranded on a deserted island. Despite their different backgrounds, they decide to band together and combine their talents to live on the island, which they named Lincoln Island. Cyrus is a railroad engineer, Gideon is a journalist, Neb is a man who escaped slavery, Pencroff is a sailor, and Harbert is Pencroff's protégé and son. Each man uses their skills in a different way, building houses, making inventions, and finding creative ways to live off of the island. One day, Gideon, the reporter desperate for human contact, decided to send a message via a bird. After a long period of isolation with no contact from the outside world, the men accept that they will likely spend the rest of their life on the island. Now, two and a half years later, the group finally spot a ship sailing nearby—a fantasy sight. Hopeful that it is the way off their island, the group of survivors work to gain the attention of the ship, fighting off pirates and braving the rough environment to finally escape. However, as they fight to leave Lincoln Island, the survivors discover that it had been harboring a shocking secret all along. The Secret of the Island is the third and final installment of Jules Verne's *The Mysterious Island* adventure series. Following *The Mysterious Island* and *Abandoned*, this exciting and mysterious adventure novel concludes the popular trilogy. The Secret of the Island is full of shocking twists and even features a surprise appearance of a popular character from another famous Verne novel. With detailed prose and memorable characters, *The Secret of the Island* depicts the satisfying reveal of mysteries present throughout the trilogy. This edition of *The Secret of the Island* by Jules Verne features a new, eye-catching cover design and is

printed in a modern, easy-to-read font, crafting an accessible and enjoyable experience for modern readers.
