Why do we find it hard to explain what happens when words are set to music? This study looks at the kind of language we use to describe word/music relations, both in the academic literature and in manuals for singers or programme notes prepared by professional musicians. Helen Abbott's critique of word/music relations interrogates overlaps emerging from a range of academic disciplines including translation theory, adaptation theory, word/music theory, as well as critical musicology, metricometrie, and cognitive neuroscience. It also draws on other resources-whether adhesion science or financial modelling-to inform a new approach to analysing song in a model proposed here as the assemblage model. The assemblage model has two key stages of analysis. The first stage examines the bonds formed between the multiple layers that make up a song setting (including metre/prosody, form/structure, sound repetition, semantics, and live performance options). The second stage considers the overall outcome of each song in terms of the intensity or stability of the words and music present in a song (accretion/dilution). Taking the work of the major nineteenth-century French poet Charles Baudelaire (1821-67) as its main impetus, the volume examines how Baudelaire's poetry has inspired composers of all genres across the globe, from the 1860s to the present day. The case studies focus on

Baudelaire song sets by European composers between 1880 and 1930, specifically Maurice Rollinat, Gustave Charpentier, Alexander Gretchaninov, Louis Vierne, and Alban Berg. Using this corpus, it tests out the assemblage model to uncover what happens to Baudelaire's poetry when it is set to music. It factors in the realities of song as a live performance genre, and reveals which parameters of song emerge as standard for French text-setting, and where composers diverge in their approach.

The Complete Works of Venerable Bede: Commentaries on the Scriptures

"In the heart of this world, the Lord of life, who loves us so much, is always present. He does not abandon us, he does not leave us alone, for he has united himself definitively to our earth, and his love constantly impels us to find new ways forward. Praise be to him!" – Pope Francis, Laudato Si' In his second encyclical, Laudato Si': On the Care of Our Common Home, Pope Francis draws all Christians into a dialogue with every person on the planet about our common home. We as human beings are united by the concern for our planet, and every living thing that dwells on it, especially the poorest and most vulnerable. Pope Francis' letter joins the body of the Church's social and moral teaching, draws on the best scientific research, providing the foundation for "the ethical and spiritual itinerary that follows." Laudato Si' outlines: The current state of our "common home" The Gospel message as seen through creation The human causes of the ecological crisis Ecology and the common good Pope Francis' call to action for each of us Our Sunday Visitor has included discussion questions, making it perfect for individual or group study, leading all Catholics and Christians into a deeper understanding of the importance of this teaching.

Tu Diras!

Virgil, Aeneid 8 provides the first full-scale commentary on one of the most important and popular books of the great epic of imperial Rome. The commentary is accompanied by a new critical text and a prose translation.

A Grammar of the French Tongue, Grounded Upon the Decisions of the French Academy .. By John Perrin. The Fourth Edition

Virgil became a school author in his own lifetime and the centre of the Western canon for the next 1800 years, exerting a major influence on European literature, art, and politics. This Companion is designed as an indispensable guide for anyone seeking a fuller understanding of an author critical to so many disciplines. It consists of essays by seventeen scholars from Britain, the USA, Ireland and Italy which offer a range of different perspectives both traditional and innovative on Virgil's works, and a renewed sense of why Virgil matters today. The Companion is divided into four main sections, focussing on reception, genre, context, and form. This ground-breaking book not only provides a wealth of material for an informed reading but also offers sophisticated insights which point to the shape of Virgilian scholarship and criticism to come.

Literature to Go

Les Fleurs du mal is a volume of French poetry by Charles Baudelaire. First published in 1857, it was important in the symbolist and modernist movements. The poems deal with themes relating to decadence and eroticism.

The Poetical Works of John Milton

Golden Age departures in historiography and theory of history in some ways prepared the ground for modern historical methods and ideas about historical factuality. At the same time, they fed into the period's own "aesthetic-historical culture" which amalgamated fact and fiction in ways modern historians would consider counterfactual: a culture where imaginative historical prose, poetry and drama self-consciously rivalled the accounts of royal chroniclers and the dispatches of diplomatic envoys; a culture dominated by a notion of truth in which skilful construction of the argument and exemplarity took precedence over factual accuracy. Literature and Historiography in the Spanish Golden Age: The Poetics of History investigates this grey area backdrop of modern ideas about history, delving into a variety of Golden Age aesthetic-historical works which cannot be satisfactorily described as either works of literature or works of historiography but which belong in between these later strictly separate categories. Baudelaire in Song

At the Periphery of the Center is the first comparison of two of France's most important twentieth-century authors, Julien Green and Marguerite Yourcenar. It examines textual elements in their plays and novels to draw conclusions about the ways that they represent homosexuality in their texts. Both Yourcenar and Green turned to drama to explore aspects of same-sex desire that they felt unable to express in their prose. The analysis of their plays shows that an emphasis on dialogue and action makes drama a particularly appropriate genre for writing about homosexuality because it affords an author distance and therefore protection from the "proclivities" of his characters. The chapters on the novel show, by contrast, how prose fiction allows an author to explain a character's sexuality with a degree of subtlety difficult to achieve in theatre. Variations in narration and paratext allow writers to avoid condemning discourses and to find an original means of expression instead. At the Periphery brings a new, textually centered approach to Green's and Yourcenar's works that is unlike the psychological analyses that often typify queer readings. It will be of great interest to scholars of twentieth-century French literature and of Gender Studies. The book will also appeal to non-academic readers, however, since it is about two French authors who were also American citizens and who wrote about US history and contemporary culture.

Virgil, Aeneid 8

The Elder Pliny's Natural History provides a wide-ranging account of human achievement in the arts and sciences in the first century AD. This book re-examines Pliny's work for the first time since the 1920s. Modern experiments, simulating the techniques described by Pliny, and an in-depth study of his development of a technical language, confirm his unique contribution to our knowledge of science in early imperial Rome.

The Cambridge Companion to Virgil

Illustrated with 10 images. This book will be a descriptive grammar of the Esperanto language invented by L. L. Zamenhof, which will be complete and comprehensive in regards to a) the grammar of Esperanto as first outlined by Zamenhof in Fundamento de Esperanto and other foundational documents, and b) Esperanto as it is spoken today by the most committed Esperantists. (Proposed reforms to the Esperanto language will be discussed if they have serious support from a significant fraction of Esperanto enthusiasts). This book was started practically on a dare from the August 2006 issue of Bob's Poetry Magazine, in which Robert Happelberg boasted that he could print a complete and comprehensive grammar of Esperanto in just one 6 by 7 inch page. While this is obviously wrong, it's not too far off the mark. When completed, this book will require several standard size (8.5 by 11 in the USA) pages, but will still be much shorter than a complete grammar of a natural language like English or Slovene. In view of this goal, the number of examples provided for each concept will be kept to a bare minimum. Those wishing to build their Esperanto vocabularies are also referred to the Esperanto textbooks. It is acceptable in the beginning to word the text in an accessible manner like in a textbook, but the goal should be for all the text to be technical with a full command of linguistic jargon.

Books Out Loud

Taking authentic texts from a variety of sources - the human body on CD-ROM, a fish recipe, 'L'Etranger' and many others - this book uses them as a starting point for the illustration and explanation of key areas of French grammar. It includes a range of exercises, many of them text-based.

The Flowers of Evil

Literature and Historiography in the Spanish Golden Age

At the Periphery of the Center

Un demi?siècle s'est écoulé depuis l'invention du texte infini. L'hypertexte, qui structure l'accès à l'information, n'est nullement dépassé dans la « société numérique ». Cet ouvrage présente les techniques hypertextuelles et dresse un panorama des nouvelles technologies liées à la production, aux formes et à la réception des objets hypertextuels. Pluridisciplinaire, ce texte en sciences de l'information-communication, sociologie, littérature, sciences du langage, etc., propose une réflexion sur les évolutions du livre, de la fiction, du récit interactif, de l'objet sonore, mais également des jeux vidéo, des mobiles, des réseaux sociaux ou des cours en ligne. Au?delà d'un simple enjeu, il s'agit de proposer une éthique scientifique qui doit guider les recherches contemporaines.

Pliny the Elder on Science and Technology

Alan Turing is regarded as one of the greatest scientists of the 20th century. But who was Turing, and what did he achieve during his tragically short life of 41 years? Best known as the genius who broke Germany's most secret codes during the war of 1939-45, Turing was also the father of the modern computer. Today, all who 'click-to-open' are familiar with the impact of Turing's ideas. Here, B. Jack Copeland provides an account of Turing's life and work, exploring the key elements of his life-story in tandem with his leading ideas and contributions. The book highlights Turing's contributions to computing and to computer science, including Artificial Intelligence and Artificial Life, and the emphasis throughout is on the relevance of his work to modern developments. The story of his contributions to codebreaking during the Second World War is set in the context of his thinking about machines, as is the account of his work in the foundations of mathematics.

Secrets et manipulations rythment le quotidien de l'hôpital, tandis qu'une directrice adjointe tombe amoureuse du directeur, et que Ludmilla, la femme d'Éli, la protège des rumeurs… Pour combien de temps ? Après trois disparitions et la découverte d'un cadavre non identifié, un ciel d'ombres obscurcit l'atmosphère de l'hôpital. La Police judiciaire enquête. Une enquête longue, risquée, qui manipule le lecteur selon une logique défiant tous les scénarios et le maintient dans un suspense permanent. Une méthodologie implacable où rien n'est laissé au hasard.

Modern Art, 19th and 20th Centuries

In the early nineteenth century, the American commercial marketplace was a chaotic, unregulated environment in which knock-offs and outright frauds thrived. Appearances could be deceiving, and entrepreneurs often relied on their personal reputations to close deals and make sales. Rapid industrialization and expanding trade routes opened new markets with enormous potential, but how could distant merchants convince potential customers, whom they had never met, that they could be trusted? Through wide-ranging visual and textual evidence, including a robust selection of early advertisements, Branding Trust tells the story of how advertising evolved to meet these challenges, tracing the themes of character and class as they intertwined with and influenced graphic design, trademark law, and ideas about ethical business practice in the United States. As early as the 1830s, printers, advertising agents, and manufacturers collaborated to devise new ways to advertise goods. They used eye-catching designs and fonts to grab viewers' attention and wove together meaningful images and prose to gain the public's trust. At the same time, manufacturers took legal steps to safeguard their intellectual property, formulating new ways to protect their brands by taking legal action against counterfeits and frauds. By the end of the nineteenth century, these advertising and legal strategies came together to form the primary components of modern branding: demonstrating character, protecting goodwill, entertaining viewers to build rapport, and deploying the latest graphic innovations in print. Trademarks became the symbols that embodied these ideas—in print, in the law, and to the public. Branding Trust thus identifies and explains the visual rhetoric of trust and legitimacy that has come to reign over American capitalism. Though the 1920s has often been held up as the birth of modern advertising, Jennifer M. Black argues

that advertising professionals had in fact learned how to navigate public relations over the previous century by adapting the language, imagery, and ideas of the American middle class.
