Being a Historian

Considers what aspiring and mature historians need to know about the discipline of history in the United States today.

Mind of Napoleon

This collection of written and spoken statements of Napoleon serves not as an historical record or analysis, but as insight into the mind and character of a fascinating historical figure. It demonstrates the luminous strength and almost supernatural power of Napoleon's mind, displaying an exceptional energy in thought as well as action. The selections are edited and organized topically to offer a broad range of subjects—from "The Human Heart" to "The Art of War"—and to establish a coherent, unified pattern, providing a fresh perspective on the genius of Napoleon. The sources used fall into three categories: (1) Napoleon's writings, including autograph manuscripts and dictations of letters, orders, decisions, bulletins, proclamations, newspaper articles, memoirs, commentaries, etc.; (2) Napoleon's oral opinions as given at the Conseil d'Etat, including stenographic transcripts, official minutes, and unofficial notes taken by various councilors; (3) recorded conversations and reminiscences of Napoleon's contemporaries from about 1800 to 1821.

Writing a History and Physical

Central to providing excellent patient care is excellent communication, for which a well-written History and Physical is crucial. This book is a step-by-step guide to help medical students, nurse practitioners, physician assistants, etc. write a comprehensive, clear, and useful History and Physical. Writing an effective History and Physical is as much an art as science, and this handy guide provides a roadmap for organizing facts in a logical and well-constructed fashion. The text also presents an abridged version for quick reference and a valuable section on how to write daily progress notes. The author's tips, pearls, and advice help the reader navigate the principles and goals of the History and Physical. Contains more explanations, tips and advice than existing books for what to include and why. Memorable good and bad examples reinforce themes in the text.

The Pocket Guide to Writing in History 6th Ed + the 9/11 Commission Report With Related Documents

Historians not only have knowledge of history, but by writing about it and engaging with other historians from the past and present, they make history themselves. This companion offers young historians clear guidelines for the different phases of historical research; how do you get a good historical question? How do you engage with the literature? How do you work with sources from the past, from archives to imagery and objects, art, or landscapes? What is the influence of digitalisation of the historical craft? Broad in scope, *Writing History!* also addresses historians' traditional support of policy makers and their activity in fields of public history, such as museums, the media, and the leisure sector, and offers support for developing the necessary skills for this wide range of professions.

Writing History!

This is not a book on how to write historical fiction. It is a book on how not to write historical fiction. If you love history and you're hard at work writing your first historical novel, but you're wondering if your medieval Irishmen would live on potatoes, if your 17th-century pirate would use a revolver, or if your hero would be able to offer Marie-Antoinette a box of chocolate bonbons . . . (The answer to all these is "Absolutely not!"). . . then *Medieval Underpants and Other Blunders* is the book for you. *Medieval Underpants* will guide you through the factual mistakes that writers of historical fiction—both beginners and seasoned professionals—often make, and show you how to avoid them. From fictional characters crossing streets that wouldn't exist for another sixty (or two thousand) years, to 1990s slang in the mouths of 1940s characters, to South American foods on ancient Roman tables, acclaimed historical novelist Susanne Alleyn exposes the often hilarious, always painful goofs that turn up most frequently in fiction set in the past. Alleyn stresses the hazards to writers of assuming too much about details of life in past centuries, providing numerous examples of mistakes that could easily have been avoided. She also explores commonly-confused topics and provides simple guidelines for getting them right. In a wide assortment of chapters including Food and Plants; Money; Hygiene; Dialogue; Attitudes; Research; and, of course, Ladies' Underpants (there weren't any), she offers tips on how to avoid errors and anachronisms while continually reminding writers of the necessity of meticulous historical research. Third edition, revised and expanded

Medieval Underpants and Other Blunders

Drawn from decades of experience, this is a concise and highly practical guide to writing history. Aimed at all kinds of people who write history—academic historians, public historians, professional historians, family historians and students of all levels—the book includes a wide range of examples from many genres and styles.

How to Write History that People Want to Read

What is the point of history? Why has the study of the past been so important for so long? Why History? *A History* contemplates two and a half thousand years of historianship to establish how very different thinkers in diverse contexts have conceived their activities, and to illustrate the purposes that their historical investigations have served. Whether considering Herodotus, medieval religious exegesis, or twentieth-century cultural history, at the core of this work is the way that the present has been conceived to relate to the past. Alongside many changes in technique and philosophy, Donald Bloxham's book reveals striking long-term continuities in justifications for the discipline.

Why History?

Acclaimed historian Margaret MacMillan explores here the many ways in which history affects us all. She shows how a deeper engagement with history, both as individuals and in the sphere of public debate, can help us understand ourselves and the world better. But she also warns that history can be misused and lead to misunderstanding. History is used to justify religious movements and political campaigns alike. Dictators may suppress history because it undermines their ideas, agendas, or claims to absolute authority. Nationalists may tell false, one-sided, or misleading stories about the past. Political leaders might mobilize their people by telling lies. It is imperative that we have an understanding of the past and avoid these and other common traps in thinking to which many fall prey. This brilliantly reasoned work, alive with incident and figures both great and infamous, will compel us to examine history anew—and skillfully illuminates why it is important to treat the past with care.

Dangerous Games

Leading historian Lynn Hunt rethinks why history matters in today's global world and how it should be written. Globalization is emerging as a major economic, cultural, and political force. In *Writing History in the Global Era*, historian Lynn Hunt examines whether globalization can reinvigorate the telling of history. She looks toward scholars from the East and West collaborating in new ways as they share their ideas. She proposes a sweeping reevaluation of individuals' active role and their place in society as the keys to understanding the way people and ideas interact. Hunt also reveals how surprising new perspectives on society and the self offer promising new ways of thinking about the meaning and purpose of history in our time.

Writing History in the Global Era

A critique of the greatest reallocation of resources in the history of the world and an analysis of its effects on indigenous peoples, the growth of property rights, and the evolution of ideas that make up the foundation of the modern world.

History Matters + The Pocket Guide to Writing in History 5th Ed

"A harrowing account of the profoundly consequential decisions American universities made about refugee scholars from Nazi-dominated Europe. The United States' role in saving Europe's intellectual elite from the Nazis is often told as a tale of triumph, which in many ways it was. America welcomed Albert Einstein and Enrico Fermi, Hannah Arendt and Herbert Marcuse, Rudolf Carnap and Richard Courant, among hundreds of other physicists, philosophers, mathematicians, historians, chemists, and linguists who transformed the American academy. Yet for every scholar who survived and thrived, many, many more did not. To be hired by an American university, a refugee scholar had to be world-class and well connected, not too old and not too young, not too right and not too left and, most important, not too Jewish. Those who were unable to flee were left to face the horrors of the Holocaust. In this rigorously researched book, Laurel Leff rescues from obscurity scholars who were deemed "not worth saving" and tells the riveting, full story of the hiring decisions universities made during the Nazi era."--Provided by publisher.

Great Land Rush and the Making of the Modern World, 1650-1900

New to this Edition * New Chapter 10 on how to critically evaluate and work with statistics and data * Thoroughly updated and expanded discussion of electronic resources available, including Google Books, Google Scholar, Hathi Trust, GIS, Flickr, YouTube, e-journals, and blogs * Expanded coverage of photography, newsreels, and documentaries * Added emphasis on writing research papers, including using citation management software such as Zotero and Refworks and a sample student paper as a case study

The Pocket Guide to Writing in History 6th Ed + Lyndon B. Johnson and American Liberalism + the 9/11 Commission Report + Violence in the West

The essential handbook for doing historical research in the twenty-first century *The Princeton Guide to Historical Research* provides students, scholars, and professionals with the skills they need to practice the historian's craft in the digital age, while never losing sight of the fundamental values and techniques that have defined historical scholarship for centuries. Zachary Schrag begins by explaining how to ask good questions and then guides readers step-by-step through all phases of historical research, from narrowing a topic and locating sources to taking notes, crafting a narrative, and connecting one's work to existing scholarship. He shows how researchers extract knowledge from the widest range of sources, such as government documents, newspapers, unpublished manuscripts, images, interviews, and datasets. He demonstrates how to use archives and libraries, read sources critically, present claims supported by evidence, tell compelling stories, and much more. Featuring a wealth of examples that illustrate the methods used by seasoned experts, *The Princeton Guide to Historical Research* reveals that, however varied the subject matter and sources, historians share basic tools in the quest to understand people and the choices they made. Offers practical step-by-step guidance on how to do historical research, taking readers from initial questions to final publication Connects new digital

technologies to the traditional skills of the historian Draws on hundreds of examples from a broad range of historical topics and approaches Shares tips for researchers at every skill level

Well Worth Saving

What distinguishes history as a discipline from other fields of study? That's the animating question of Sarah Maza's *Thinking About History*, a general introduction to the field of history that revels in its eclecticism and highlights the inherent tensions and controversies that shape it. Designed for the classroom, *Thinking About History* is organized around big questions: Whose history do we write, and how does that affect what stories get told and how they are told? How did we come to view the nation as the inevitable context for history, and what happens when we move outside those boundaries? What is the relation among popular, academic, and public history, and how should we evaluate sources? What is the difference between description and interpretation, and how do we balance them? Maza provides choice examples in place of definitive answers, and the result is a book that will spark classroom discussion and offer students a view of history as a vibrant, ever-changing field of inquiry that is thoroughly relevant to our daily lives.

This introduction to the Ancient Near East includes coverage of Egypt and a balance of political, social, and cultural coverage. Organized by the periods, kingdoms, and empires generally used in Near Eastern political history, the text interlaces social and cultural history with the political narrative. This combination allows students to get a rounded introduction to the subject of Ancient Near Eastern history. An emphasis on problems and areas of uncertainty helps students understand how evidence is used to create interpretations and allows them to realize that several different interpretations of the same evidence are possible. This introduction to the Ancient Near East includes coverage of Egypt and a balance of political, social, and cultural coverage.

The Information-literate Historian

The classic historical mystery about Richard III and the Princes in the Tower - voted the Best Crime Novel of All Time by the CWA 'As interesting and enjoyable a book as you will meet in a month of Sundays' Observer Who really killed the princes in the tower? Was Richard III truly the ogre of legend and Shakespeare's play? A wicked uncle who murdered his nephews to steal the crown of England? Inspector Alan Grant is not so sure. Laid up in hospital with a broken leg, he becomes obsessed with unravelling this most enduring of historical mysteries. As he investigates with the help of an enthusiastic young American scholar, he unearths long-buried intrigues and comes to a startling conclusion.

The Princeton Guide to Historical Research

The new "nonfiction"—the adaptation of storytelling techniques to journalistic articles in the manner of Truman Capote, Tom Wolfe, and John McPhee—is an innovative genre that has been awarded virtually every Pulitzer Prize for literary journalism since 1979. And now Jon Franklin, himself a two-time Pulitzer Prize winner and undisputed master of the great American nonfiction short story, shares the secrets of his success. Franklin shows how to make factual pieces come alive by applying the literary techniques of complication/resolution, flashback, foreshadowing, and pace. He illustrates his points with a close analysis and annotation of two of his most acclaimed stories, so that the reader can see, step-by-step, just how they were created. This lively, easy-to-follow guide combines readability and excitement with the best of expository prose and illuminates the techniques that beginning journalists—and more experienced ones, too—will find immensely helpful: Stalking the true short story Drafting an effective outline Structuring the rough copy Polishing like a pro and the tips, tools, and techniques that will put your stories on the cutting edge

Delve into the exciting narrative that is the story of the Church's own history. This well-researched, educational, and invaluable reference is sure to inform members of the clergy, DREs, teachers and history buffs. Church history is the story of faith handed on, of how fallible human people, given by God to be members of the Body of Christ in the Church, have struggled to live out the Gospel in the very concrete circumstances of their lives for nearly two thousand years. If we stand within the Church, if we are the Church, then it is our story. And when we learn the story of our struggles, triumphs, and failures, we come to know more about who and what we are as a community of faith. --From the introduction

Catholic Basics: A Pastoral Ministry Series offers an in-depth yet accessible understanding of the fundamentals of the Catholic faith for adults, both those preparing for lay ministry and those interested in the topics for their own personal growth. The series helps readers explore the Catholic tradition and apply what they have learned to their lives and ministry situations. Each title offers a reliable introduction to a specific topic and provides a foundational understanding of the concepts. Each book in the series presents a Catholic understanding of its topic as found in Scripture and the teachings of the Church. Each of the authors has paid special attention to the documents of the Second Vatican Council and the Catechism of the Catholic Church, so that further learning can be guided by these core resources. Chapters conclude with study questions that may be used for small group review or for individual reflection. Additionally, suggestions for further reading offer dependable guides for extra study. The initiative of the National Conference of Catechetical Leadership led to the development of an earlier version of this series. The indispensable contribution of the series editor, Dr. Thomas Walters, helped ensure that the concepts and ideas presented here are easily accessible to a wide audience.

Across a wide range of programs in international higher education, students prepare themselves for a career in their professional field. Learning how to communicate as a professional is an essential part of that preparation. In order to carry out their communication tasks, professionals must possess a large repertoire of knowledge and skills. They also must be able to decide what best suits the situation and the goals they want to achieve. Already during their training, students come across a variety of communication tasks that are largely new to them. For these tasks, too, they need a broad knowledge and skills repertoire from which they can make the right choices. 'Communicate as a Professional' offers a solid foundation for students to develop the communication knowledge and skills they need, both when working as a professional after they have graduated and when following an educational program that prepares them for this future.

Augmented Reality Art

Written by a team of world-renowned artists, researchers and practitioners - all pioneers in using augmented reality based creative works and installations as a new form of art - this is the first book to explore the exciting new field of augmented reality art and its enabling technologies. As well as investigating augmented reality as a novel artistic medium the book covers cultural, social, spatial and cognitive facets of augmented reality art. Intended as a starting point for exploring this new fascinating area of research and creative practice it will be essential reading not only for artists, researchers and technology developers, but also for students (graduates and undergraduates) and all those interested in emerging augmented reality technology and its current and future applications in art.

Hands on Media History

Hands on Media History explores the whole range of hands on media history techniques for the first time, offering both practical guides and general perspectives. It covers both analogue and digital media; film, television, video, gaming, photography and recorded sound. Understanding media means understanding the technologies involved. The hands on history approach can open our minds to new perceptions of how media technologies work and how we work with them. Essays in this collection explore the difficult questions of reconstruction and historical memory, and the issues of equipment degradation and loss. Hands on Media History is concerned with both the professional and the amateur, the producers and the users, providing a new perspective on one of the modern era's most urgent questions: what is the relationship between people and the technologies they use every day? Engaging and enlightening, this collection is a key reference for students and scholars of media studies, digital humanities, and for those interested in models of museum and research practice.

The Esoteric Secrets of Surrealism

A profound understanding of the surrealists' connections with alchemists and secret societies and the hermetic aspirations revealed in their works • Explains how surrealist paintings and poems employed mythology, gnostic principles, tarot, voodoo, alchemy, and other hermetic sciences to seek out unexplored regions of the mind and recover lost "psychic" and magical powers • Provides many examples of esoteric influence in surrealism, such as how Picasso's *Demoiselles d'Avignon* was originally titled *The Bath of the Philosophers* Not merely an artistic or literary movement as many believe, the surrealists rejected the labels of artist and author bestowed upon them by outsiders, accepting instead the titles of magician, alchemist, or--in the case of Leonora Carrington and Remedios Varo--witch. Their paintings, poems, and other works were created to seek out unexplored regions of the mind and recover lost "psychic" and magical powers. They used creative expression as the vehicle to attain what André Breton called the "supreme point," the point at which all opposites cease to be perceived as contradictions. This supreme point is found at the heart of all esoteric doctrines, including the Great Work of alchemy, and enables communication with higher states of being. Drawing on an extensive range of writings by the surrealists and those in their circle of influence, Patrick Lepetit shows how the surrealists employed mythology, gnostic principles, tarot, voodoo, and alchemy not simply as reference points but as significant elements of their ongoing investigations into the fundamental nature of consciousness. He provides many specific examples of esoteric influence among the surrealists, such as how Picasso's famous *Demoiselles d'Avignon* was originally titled *The Bath of the Philosophers*, how painter Victor Brauner drew from his father's spiritualist vocation as well as the Kabbalah and tarot, and how doctor and surrealist author Pierre Mabille was a Freemason focused on finding initiatory paths where "it is possible to feel a new system connecting man with the universe." Lepetit casts new light on the connection between key figures of the movement and the circle of adepts gathered around Fulcanelli. He also explores the relationship between surrealists and Freemasonry, Martinists, and the Elect Cohens as well as the Grail mythos and the Arthurian brotherhood.

The Idea of the Avant Garde

The concept of the avant garde is highly contested, whether one consigns it to history or claims it for present-day or future uses. The first volume of *The Idea of the Avant Garde--And What It Means Today* provided a lively forum on the kinds of radical art theory and partisan practices that are possible in today's world of global art markets and creative industry entrepreneurialism. This second volume presents the work of another fifty artists and writers, exploring the diverse ways that avant-gardism develops reflexive and experimental combinations of aesthetic and political praxis. The manifest strategies, temporalities, and genealogies of avant-garde art and politics are expressed through an international, intergenerational, and interdisciplinary convocation of ideas that covers the fields of film, video, architecture, visual art, art activism, literature, poetry, theater, performance, intermedia, and music.

Reframing Luchino Visconti

In this book, Ivo Blom offers unique insights into the visual vocabulary of Italian filmmaker Luchino Visconti (1906-76), whose cinematic masterpieces include canonical works like *Obsession*, *The Earth Trembles*, and *The Leopard*. Meticulously examining Visconti's use of European art in his set and costume design, *Reframing Luchino Visconti* also investigates his cinematography in terms of staging, framing, and mirroring, among other aspects, offering valuable contextualization for the optical splendor in Visconti's films and revealing their close ties to the other visual arts.

Robert Rauschenberg, a Retrospective

A retrospective of the artist's work.

Scenes of Parisian Modernity

Integrating the history of Paris with the history of consumption, the press, publicity, advertising and spectacle, this book traces the evolution of the urban core districts of consumption and explores elements of consumer culture such as the print media, publishing, retail techniques, tourism, city marketing, fashion, illustrated posters and Montmartre culture in the nineteenth century. Hahn emphasizes the tension between art and industry and between culture and commerce, a dynamic that significantly marked urban commercial modernity that spread new imaginary about consumption. She argues that Parisian consumer culture arose earlier than generally thought, and explores the intense commercialization Paris underwent.

Surrealism and the Occult

Surrealism and the Occult offers a fresh view of the debate whether Surrealism was involved with occultism and the esoteric or not, with special examination of the movement's leadership by its founder, André Breton.

Roman Baroque Sculpture

Draws on contemporary biographies and a wealth of hitherto unpublished archival material to illuminate the position and practice of the Baroque sculptor, to enable the reader to appreciate, understand and evaluate the sculptural monuments of the Roman Baroque.

Zoological Surrealism

An archive-based, in-depth analysis of the surreal nature and science movies of the pioneering French filmmaker Jean Painlevé. Before Jacques-Yves Cousteau, there was Jean Painlevé, a pioneering French scientific and nature filmmaker with a Surrealist's eye. Creator of more than two hundred films, his studies of strange animal worlds doubled as critical reimaginations of humanity. With an unerring eye for the uncanny and unexpected, Painlevé and his assistant Geneviève Hamon captured oneiric octopuses, metamorphic crustaceans, erotic seahorses, mythic vampire bats, and insatiable predatory insects. *Zoological Surrealism* draws from Painlevé's early oeuvre to rethink the entangled histories of cinema, Surrealism, and scientific research in interwar France. Delving deeply into Painlevé's archive, James Leo Cahill develops an account of "cinema's Copernican vocation"—how it was used to forge new scientific discoveries while also displacing and critiquing anthropocentric viewpoints. From Painlevé's engagements with Sergei Eisenstein, Georges Franju, and competing Surrealists to the historiographical dimensions of Jean Vigo's concept of social cinema, *Zoological Surrealism* taps never-before-examined sources to offer a completely original perspective on a cutting-edge filmmaker. The first extensive English-language study of Painlevé's early films and their contexts, it adds important new insight to our understanding of film while also contributing to contemporary investigations of the increasingly surreal landscapes of climate change and ecological emergency.

Magritte, Ideas and Images

Bernstein, a leading voice in American literary theory, writes an irreverent guide to modernist and contemporary poetics.

Pitch of Poetry

Now a major motion picture nominated for nine Academy Awards. Narrative of Solomon Northup, a Citizen of New-York, Kidnapped in Washington City in 1841, and Rescued in 1853. *Twelve Years a Slave* by Solomon Northup is a memoir of a black man who was born free in New York state but kidnapped, sold into slavery and kept in bondage for 12 years in Louisiana before the American Civil War. He provided details of slave markets in Washington, DC, as well as describing at length cotton cultivation on major plantations in Louisiana.

Twelve Years a Slave

Surrealist artist Max Ernst defined collage as the "alchemy of the visual image." Students of his work have often dismissed this comment as simply a metaphor for the transformative power of using found images in a new context. Taking a wholly different perspective on Ernst and alchemy, however, M. E. Warlick persuasively demonstrates that the artist had a profound and abiding interest in alchemical

philosophy and often used alchemical symbolism in works created throughout his career. A revival of interest in alchemy swept the artistic, psychoanalytic, historical, and scientific circles of the late nineteenth and early twentieth centuries, and Warlick sets Ernst's work squarely within this movement. Looking at both his art (many of the works she discusses are reproduced in the book) and his writings, she reveals how thoroughly alchemical philosophy and symbolism pervade his early Dadaist experiments, his foundational work in surrealism, and his many collages and paintings of women and landscapes, whose images exemplify the alchemical fusing of opposites. This pioneering research adds an essential key to understanding the multilayered complexity of Ernst's works, as it affirms his standing as one of Germany's most significant artists of the twentieth century.

This book collects together the two most vital "automatic" texts Surrealism. Breton's prefatory essay The Automatic Message relates this technique to the underlying concepts and aesthetic of the Surrealist movement. The Magnetic Fields (1919) was the first work of literary Surrealism and is thus one of the foundations of modern European thought and writing. This authorised translation is by the poet David Gascoyne, himself a member of the group and a friend of both authors. The Immaculate Conception (1930) traces the interior and exterior life of man from Conception and Intra-Uterine Life to Death and The Original Judgement. The central section is a celebrated series of "simulations" of various types of mental instability.

When a glamorous literary agent falls prey to a violent stalker, she discovers that the publishing biz can really be murder, for fans of The Spellman Files and Maisie Dobbs "Suspenseful . . . Barbara Rogan cleverly explores . . . our capacity for self-deception and weaves it into an absorbing mystery that keeps its secret until the very end." —NPR Jo Donovan always manages to come out on top. Originally from the backwoods of Appalachia, she forged a hard path to elegant lunches and parties among New York City's literati. At thirty-five, she's the widow of the renowned novelist (and notorious playboy) Hugo Donovan, the owner of one of the best literary agencies in town, and is one of the most sought-after agents in the business. But all this is about to fall apart, as a would-be client turns stalker, a hack shops around a proposal for an unauthorized tell-all biography of Hugo, and a handsome old flame shows up without warning. Both a seasoned author and a former literary agent herself, Barbara Rogan knows the publishing world from all angles. Fans of Lisa Lutz and Jaqueline Winspear will adore Jo Donovan and Rogan's wickedly sharp tale that skewers the dangerous fictions we read—and the dangerous fictions we tell ourselves.

Spiritus Magis

Paulhan's seminal work in English for the first time *Les Fleurs de Tarbes, ou la terreur dans les lettres*, first published as a single volume in 1941, was considered by Jean Paulhan to be the furthest-reaching expression of his thinking about literature and language. It is now recognized as a landmark text in the history of twentieth century literary criticism and in the emergence of contemporary literary theory. This is the first time it has been translated into English. The playful tone and quirky, casual style of Paulhan's writing mask a theoretical intent and seriousness of purpose that are extraordinarily prescient. In *The Flowers of Tarbes* Paulhan probes the relationship between language, meaning, context, intention and action with unremitting tenacity, and in so doing produces a major treatise on the nature of the literary act, and a meditation on what we might now call the responsibility or ethical imperative of literature itself.

A Dangerous Fiction

How do we experience a city in terms of the senses? What are the inter-relations between human experience and behaviour in urban space? This volume examines these questions in the context of European urban culture between the fifteenth and twentieth centuries, exploring the institutions and ideologies relating to the range of sensual experience and its interpretation. Spanning pre-industrial and modern cities in Britain, France, Germany and the United States, it enables the reader to establish major contrasts and continuities in what is still an evolving urban experience. Divided into sections corresponding to the five senses: noise, vision, taste, touch and smell, each section allows for comparisons which act as reminders that the experience of the city was a multi-sensual one, and that these experiences were as much intellectual as physical in their nature.

Rene Magritte (1898-1967) did not keep copies of his letters, nor did he generally save those he received. But Harry Torczyner, Magritte's confidant, friend, and attorney, cherished the letters he received from the great Belgian Surrealist artist between 1957 and 1967, and kept them all - along with duplicates of his own responses. Here, selections from this lively correspondence are reproduced and set in context by Torczyner's notes. In his letters, Magritte dealt candidly with the daily concerns of his art. He revealed the workings of his own creative process in words and, frequently, in drawings. Although they belonged to different worlds, Magritte the painter and Torczyner the lawyer shared similar mental inclinations and a vivid curiosity. They were both hostile to obligatory sentiments; boredom was deemed to be the supreme menace, and they remained mutually critical in their correspondence and in their encounters - while remaining friends. The Magritte-Torczyner connection had its special tone, which this book faithfully reflects. Illustrated with reproductions of paintings mentioned in the letters, as well as with personal photographs of both men, this intriguing book offers fresh insights into the last ten years of Magritte's life and work.

This book gives an excellent overview of Flemish art from the Hermitage in St Petersburg. A large proportion was acquired in the eighteenth century by Catherine the Great, from superb collections such as those of Crozat and Brühl, which she bought up in their entirety. Many of these paintings originally hung in churches and monasteries in Antwerp and other European cities. Most attention focuses on the 'big three': Peter Paul Rubens, Anthony van Dyck and Jacob Jordaens. Rubens was the most important, the most talented, and the most influential seventeenth-century Flemish painter. He was also a phenomenon in his day, a true homo universalis. The portraits produced by Van Dyck for the court of King Charles I of England also share the limelight, along with impressive history paintings by Jordaens, exuding the vibrant atmosphere in which he excelled. Between 1850 and 1900 fashion in Paris became an art form in itself, its designers inspired to creations of ever greater elegance and exoticism by the examples of the Old Masters and the popular painters of the day. But as art inspired fashion, so fashion served as a muse for art: painters from Courbet to Whistler, from Manet to Vuillard borrowed the poses of their models from the fashion plates of the day, and embraced the intimate scene - a walk in the garden, a visit from a friend - so typical of the genre. The dialogue between fashion and art is illustrated here by some 120 paintings - works by Ingres, Tissot, Renoir, Manet, Monet, Seurat and Degas among them - and a clutch of hitherto unpublished photographs from the recently discovered archive of Disderi.

Ancient and Mediaeval Shorthand

This is the first comprehensive study of an ingenious number-notation from the Middle Ages that was devised by monks and mainly used in monasteries. A simple notation for representing any number up to 99 by a single cipher, somehow related to an ancient Greek shorthand, first appeared in early-13th-century England, brought from Athens by an English monk. A second, more useful version, due to Cistercian monks, is first attested in the late 13th century in what is today the border country between Belgium and France: with this any number up to 9999 can be represented by a single cipher. The ciphers were used in scriptoria - for the foliation of manuscripts, for writing year-numbers, preparing indexes and concordances, numbering sermons and the like, and outside the scriptoria - for marking the scales on an astronomical instrument, writing year-numbers in astronomical tables, and for incising volumes on wine-barrels. Related notations were used in medieval and Renaissance shorthands and coded scripts. This richly-illustrated book surveys the medieval manuscripts and Renaissance books in which the ciphers occur, and takes a close look at an intriguing astrolabe from 14th-century Picardy marked with ciphers. With Indices. "Mit Kings luzider Beschreibung und Bewertung der einzelnen Funde und ihrer Beziehungen wird zugleich die Forschungsgeschichte - die bis dato durch Widerspruechlichkeit und Diskontinuität geprýgt ist - umfassend aufgearbeitet." The Ciphers of the Monks

Latin books are among the most numerous surviving artifacts of the Late Antique, Mediaeval, and Renaissance periods in European history; written in a variety of formats and scripts, they preserve the literary, philosophical, scientific, and religious heritage of the West. The Oxford Handbook of Latin

Palaeography surveys these books, with special emphasis on the variety of scripts in which they were written. Palaeography, in the strictest sense, examines how the changing styles of script and the fluctuating shapes of individual letters allow the date and the place of production of books to be determined. More broadly conceived, palaeography examines the totality of early book production, ownership, dissemination, and use. The Oxford Handbook of Latin Palaeography includes essays on major types of script (Uncial, Insular, Beneventan, Visigothic, Gothic, etc.), describing what defines these distinct script types, and outlining when and where they were used. It expands on previous handbooks of the subject by incorporating select essays on less well-studied periods and regions, in particular late mediaeval Eastern Europe. The Oxford Handbook of Latin Palaeography is also distinguished from prior handbooks by its extensive focus on codicology and on the cultural settings and contexts of mediaeval books. Essays treat of various important features, formats, styles, and genres of mediaeval books, and of representative mediaeval libraries as intellectual centers. Additional studies explore questions of orality and the written word, the book trade, glossing and glossaries, and manuscript cataloguing. The extensive plates and figures in the volume will provide readers with clear illustrations of the major points, and the succinct bibliographies in each essay will direct them to more detailed works in the field.

Ancient and Mediaeval Shorthand

Originally published in 1915, this book presents an account of the use of abbreviations in Latin manuscripts of the early Minuscule period (circa 700-850 AD). Lindsay provides statistics on the actual use of symbols as abbreviations and lists of the 'notae' discussed, divided into their usage in sacred, legal or secular manuscripts. This book will be of value to anyone with an interest in palaeography or medieval Latin.

The Elements of Abbreviation in Medieval Latin Paleography

The Notory Art of Shorthand (*Ars notoria notarie*), an important yet understudied late medieval work, is newly edited here and presented for the first time in English translation along with an introduction and commentary. This unique treatise on shorthand writing is a hybrid of literary genres that sheds much light on late medieval scribal culture. Following in a medieval tradition of works such as the *Secret of Secrets*, the innovative *Ars notoria notarie* points forward to early modern hermetic writers such as Agrippa von Nettesheim and John Dee, the latter having owned one of the three manuscripts of the work. The *Ars notoria notarie* relates to disciplines ranging from paleography to magic. It has multiple identities: a unique branch of one of the most popular magic treatises of the Middle Ages, the *Ars notoria*; a rare report on medieval paleography and the notarial trade; an expose of a unique medieval cipher based on the famous Tironian notes; an eclectic university text bringing together authorities from Pliny and Aristotle to Donatus and Bede; a remarkable source for the liturgy of Thomas Becket; and, finally, a distinctive contribution to the epistolary genre known as the mirror for princes.

Notae Latinae

Intelligence activities have always been an integral part of statecraft. Ancient governments, like modern ones, realized that to keep their borders safe, control their populations, and keep abreast of political developments abroad, they needed a means to collect the intelligence which enabled them to make informed decisions. Today we are well aware of the damage spies can do. Here, for the first time, is a comprehensive guide to the literature of ancient intelligence. The entries present books and periodical articles in English, French, German, Italian, Spanish, Polish, and Dutch—with annotations in English. These works address such subjects as intelligence collection and analysis (political and military), counterintelligence, espionage, cryptology (Greek and Latin), tradecraft, covert action, and similar topics (it does not include general battle studies and general discussions of foreign policy). Sections are devoted to general espionage, intelligence related to road building, communication, and tradecraft, intelligence in Greece, during the reign of Alexander the Great and in the Hellenistic Age, in the Roman republic, the Roman empire, the Byzantine empire, the Muslim world, and in Russia, China, India, and Africa. The books can be located in libraries in the United States; in cases where volumes are in one library only, the author indicates where they may be found.

The Elements of Abbreviation in Medieval Latin Paleography

The Anglo-Saxon period stretches from the arrival of Germanic groups on British shores in the early 5th century to the Norman Conquest of 1066. During these centuries, the English language was used and written down for the first time, pagan populations were converted to Christianity, and the foundations of the kingdom of England were laid. This richly illustrated new book - which accompanies a landmark British Library exhibition - presents Anglo-Saxon England as the home of a highly sophisticated artistic and political culture, deeply connected with its continental neighbours. Leading specialists in early medieval history, literature and culture engage with the unique, original evidence from which we can piece together the story of the Anglo-Saxon kingdoms, examining outstanding and beautiful objects such as highlights from the Staffordshire hoard and the Sutton Hoo burial. At the heart of the book is the British Library's outstanding collection of Anglo-Saxon manuscripts, the richest source of evidence about Old English language and literature, including Beowulf and other poetry; the Lindisfarne Gospels, one of Britain's greatest artistic and religious treasures; the St Cuthbert Gospel, the earliest intact European book; and historical manuscripts such as Bede's Ecclesiastical History and the Anglo-Saxon Chronicle. These national treasures are discussed alongside other, internationally important literary and historical manuscripts held in major collections in Britain and Europe. This book, and the exhibition it accompanies, chart a fascinating and dynamic period in early medieval history, and will bring to life our understanding of these formative centuries.

Originally published in 1936, this book is intended to supplement W. M. Lindsay's *Notae Latinae* of 1915, which examined Latin abbreviations of the early minuscule period (circa 700-850 AD). Bains reviews symbols employed in the following two centuries, as well as a few which were developed more fully as a result of the rise of learning and science in the twelfth century. This book will be of value to anyone with an interest in palaeography.

Trying to identify abbreviated titles of journals and standard bibliographic works is a major difficulty facing researchers and librarians in the field of Classical Studies. This revised edition has been greatly expanded, with nearly twice the abbreviations (17,000) and bibliographic entries (12,400) as the first edition. Also, the Greek and Cyrillic abbreviations have increased by seven and four fold respectively. Abbreviations for internet sites are now included, as are those for associations in the broad area of Classical Studies. There are also more entries for Eastern European and regional archaeological publications. This revised volume is divided into two parts. Part One consists of an alphabetical listing of bibliographic abbreviations found in the scholarship of classical studies and related disciplines. Meanwhile, Part Two is an alphabetically arranged bibliographic descriptions for the works published in classical studies and related disciplines. Special efforts were made to increase the coverage in peripheral areas, making this new edition a useful reference tool for scholars in all subjects of study in the ancient and medieval world.

Browne's Phonographic Monthly and Reporters' Journal

With the prevalence of smartphones, massive data storage, and search engines, we might think of today as the height of the information age. In reality, every era has faced its own challenges of storing, organizing, and accessing information. While they lacked digital devices, our ancestors, when faced with information overload, utilized some of the same techniques that underlie our modern interfaces: they visualized and spatialized data, tying it to the emotional and sensory spaces of memory, thereby turning their minds into a visual interface for accessing information. In *Excavating the Memory Palace*, Seth David Long mines the history of Europe's arts of memory to find the origins of today's data visualizations, unearthing how ancient constructions of cognitive pathways paved the way for modern technological interfaces. Looking to techniques like the memory palace, he finds the ways that information has been tied to sensory and visual experience, turning raw data into lucid knowledge. From the icons of smart phone screens to massive network graphs, Long shows us the ancestry of the cyberscape and unveils the history of memory as a creative act.

Proceedings of the New York State Stenographers' Association

This is the first edition of a Latin text unlike any other surviving one : at first sight an extensive, jumbled list of words with explanations, on closer inspection a window on the teaching of Latin shorthand in North Africa c. AD 400, when we find *notarii*, those trained in shorthand, prominently employed everywhere in state and church. The text reveals in detail how that training could relate to literary Latin and the classical Roman past. The single manuscript of it in our possession descends from a copy that must have been in Anglo-Saxon England by AD 700, and we can see how it was used for the earliest Latin glossary from that context. The edition seeks to make this story accessible both in general and in detail, with copious indices for those who may wish to consult it from various viewpoints: classical and later Latin, linguistic and historical.

Ancient Lore in Medieval Latin Glossaries

This work, by the greatest living authority on medieval palaeography, offers the most comprehensive and up-to-date account in any language of the history of Latin script. It also contains a detailed account of the role of the book in cultural history from antiquity to the Renaissance, which outlines the history of book illumination. Designed as a textbook, it contains a full and updated bibliography. Because the volume sets the development of Latin script in its cultural context, it also provides an unrivalled introduction to the nature of medieval Latin culture. It will be used extensively in the teaching of latin palaeography, and is unlikely to be superseded.

The Phonographic Magazine

Latin paleography of the classical period and beyond the Carolingian era has been well studied and described. But from about 1100 onwards we find a period of increasing national divergence in the character of book-hands used for writing, formal MSS. In this book Professor Thomson provides 132 characteristic specimens of the period 1100–1500, reproduced by lithography (in all cases in the original size). He excludes curial or chancery hands. Opposite each plate is a transcription of several lines. Above this, Professor Thomson provides comments on the distinguishing characteristics of the script. Cumulatively, the effect of these analyses is to provide a method of dating late medieval MSS and ascribing them to their country of origin.

Medieval Studies

The almost invisible images of a hitherto unknown painter called Eusebius, who worked in San Vitale Ravenna and in Vivarium, are a gallery of portraits of his famous contemporaries such as Theodoric, Vitiges, Amalasunta and a visual commentary of Justinian's tyrannical behaviour. Living between two ages, without belonging to either, this solitary man represents the fullest embodiment of a type of cultural "hybridisation" that is well attested throughout history. Eusebius is a spiritual brother of those "hybrid" artists, who have left extraordinary examples of "grotesques" populated by fantastic beings. After having embodied for so long the unbiased tolerance which had been the core of his own life and those of his companions in Ravenna: that mixture of confidentiality, intelligence, pointed irony, fantasy, and – why not? – touch of madness which had helped him to navigate through the troubled waters of his age, always leaving at the margins the demons who haunted him.

The Cambridge Companion to French Music

"This book provides an orientation to the field of medieval manuscript studies. It will be of help to students in history, art history, literature, and religious studies who are encountering medieval manuscripts for the first time, while also appealing to advanced scholars and general readers interested in the history of the book before the age of print. Every chapter in this guidebook features numerous color plates that exemplify each aspect described in the text and are drawn primarily from the collections of the Newberry Library in Chicago and the Parker Library of Corpus Christi College, Cambridge."--Book jacket.

The Book Before Printing

"This compendium reflects the latest international research into the many and various uses of music in relation to Shakespeare's plays and poems, the contributors' lines of enquiry extending from the Bard's own time to the present day. The coverage is global in its scope, and includes studies of Shakespeare-related music in countries as diverse as China, the Czech Republic, France, Germany, India, Italy, Japan, Russia, South Africa, Sweden, and the Soviet Union, as well as the more familiar Anglophone musical and theatrical traditions of the UK and USA. The range of genres surveyed by the book's team of distinguished authors embraces music for theatre, opera, ballet, musicals, the concert hall, and film, in addition to Shakespeare's ongoing afterlives in folk music, jazz, and popular music. The authors take a range of diverse approaches: some investigate the evidence for performative practices in the Early Modern and later eras, while others offer detailed analyses of representative case studies, situating these firmly in their cultural contexts, or reflecting on the political and sociological ramifications of the music. As a whole, the volume provides a wide-ranging compendium of cutting-edge scholarship engaging with an extraordinarily rich body of music without parallel in the history of the global arts"--
