Mathpower Eight

For 160 years, North American children have been subject to compulsory schooling. Formal education has evolved some over that time, but the end result of said evolution is an educational system which is dysfunctional, inefficient, and ultimately incapable of delivering on its professed mandates. Frank Pace is an educator with years of diverse experience. In *System vs. Culture: North American Education and Society in the Balance*, he looks at the current state of compulsory North American education and sees a system in crisis. He examines the history of modern education and dissects the root causes of its profound dysfunction. *System vs. Culture: North American Education and Society in the Balance* offers some insight into how an alternative model of education might operate and how it would better serve the needs of a changing society and better achieve its purported goals. Frank Pace has many important things to say about the state of North American education. His arguments are persuasive and lucid and backed up by solid scholarship. While the topic is complicated he does a good job breaking it down in a way that is readable and compelling for both education professionals and anyone interested in education and learning.

Committed to Excellence. This edition continues the evolution of Raven & Johnson's Biology. The author team is committed to continually improving the text, keeping the student and learning foremost. We have integrated new pedagogical features to guide the student through the learning process. This latest edition of the text maintains the clear, accessible, and engaging writing style of past editions with the solid framework of pedagogy that highlights an emphasis on evolution and scientific inquiry that have made this a leading textbook for students majoring in biology. This emphasis on the organizing power of evolution is combined with an integration of the importance of cellular, molecular biology and genomics to offer our readers a text that is student friendly and current. Our author team is committed to producing the best possible text for both student and faculty. The lead author, Kenneth Mason, University of Iowa, has taught majors biology at three different major public universities for more than fifteen years. Jonathan Losos, Harvard University, is at the cutting edge of evolutionary biology research, and Susan Singer, Carleton College, has been involved in science education policy issues on a national level.
