Edited by two renowned specialists in CSR in the Middle East, this book features contributions from leading CSR scholars in the region. Each chapter provides a comprehensive and up-to-date discussion of the most pertinent issues within the subject area, and also includes a number of real life case studies addressing emerging and timely CSR topics facing organizations in the Middle East. The book is intended for researchers and students of CSR, providing a state-of-the-art overview of the key themes, best practices and current debates focused upon the Middle East.

CSR in the Middle East

The practice of corporate social responsibility (CSR) in the Middle East is explored in this volume, through a unique compilation of data and perspectives from authors living and working in the region. The authors demonstrate how the long-entrenched traditions of philanthropy and generosity in Arab culture have been reinvigorated in recent years and are starting to cross-fertilize with new and more institutionalized forms of giving, advocated through advances pertaining to CSR. Using a variety of cases, this book ponders the multiple facets of CSR in the region, including philanthropy, strategic giving, social entrepreneurship, internal CSR and responsible human resource management practices, effective CSR integration in SMEs, corporate environmental responsibility and its evolution, CSR reporting and lingering challenges in this respect. It also considers the relevance and applicability of CSR to a wider spectrum of societal actors and institutions. The contributions nicely capture and reiterate commitment to CSR in the Middle East.

Contemporary Perspectives in Corporate Social Performance and Policy

The book Contemporary Perspectives in Corporate Social Performance and Policy - The Middle Eastern Perspective is our endeavor to deepen the current discussion about business and institutional activity in Middle Eastern countries and disseminate the new perspective of the scientific inquiry in the responsibility of various organization operating in this part of the world. Business and Social Media in the Middle East

This book discusses the effectiveness of Western organizations' social media strategies in the Middle East. Social media has changed the rules of doing business, but the exact impacts vary across regions. In the context of Middle Eastern societies, social media is seen as a way for individuals and communities to communicate with each other and is generally not viewed as a means for brands to interact with individuals. Examining how the use of social media in the Middle East is shaped by the region's culture, authors discuss the factors that businesses need to consider when creating digital marketing strategies targeted there. Including case studies of Middle Eastern companies, this book provides a comprehensive analysis of the rise of social media in the MENA region and the often-neglected role of culture in research in this area. It will provide researchers and practitioners with a deeper understanding of conducting business in the Middle East through the effective and efficient use of social media.

Ethics, CSR and Sustainability (ECSRS) Education in the Middle East and North Africa (MENA) Region

The Middle East and North Africa (MENA) region is undergoing significant socio-political and developmental transition. Although interest in corporate social responsibility (CSR) in the region is growing, little research has addressed corporate social responsibility education and its potential impact. CSR has an important role to play in the socio-economic development of the Middle East and North Africa due to the volatility and developmental needs of the region. Recent research has highlighted that the vitality of the institutional environment and the needs of multiple stakeholders in CSR are not necessarily consistent with the notion of CSR in the West. This book compiles conceptual, contextual, and empirical research that addresses the concepts of CSR, ethics, and sustainability education in the MENA region, with a special emphasis on how educators can bridge to the Giving Voice to Values approach. This book presents a much-needed portfolio of articles from authors based in Egypt, Morocco, the Sultanate of Oman, Qatar, and the United Arab Emirates (UAE), highlighting first an overview of the topic and its

corresponding publications in the MENA region, then presenting several exemplary cases related to ECSRS application in various countries.

Corporate Social Responsibility

It is an essential read for everybody interested in the dialectics of global homogenization and local adaptation of CSR-related management practices. Dirk Matten, York University, Toronto, Canada Professor Mallin has edited a remarkable range of studies, illustrating how companies across the world regard and respond to their social responsibilities. Her book will prove an invaluable source of information for everyone interested in comparative corporate social responsibility, aided by the admirable learning points and questions following each case study. It will also be turned to for guidance by investors concerned to promote corporate social values internationally. Sir Adrian Cadbury, Aston University Business School, Birmingham, UK Corporate Social Responsibility (CSR) is an area of increasing global interest with companies taking CSR issues more seriously, devoting more resources to such issues and acknowledging the benefits of CSR activities. This insightful book provides a comprehensive analysis of the development of CSR in a diverse range of countries including the UK, Italy, Poland, Turkey, the USA, the Middle East, Australia, Japan and Korea. Management in the MENA Region

CSR in the Middle East

The practice of corporate social responsibility (CSR) in the Middle East is explored in this volume, through a unique compilation of data and perspectives from authors living and working in the region. The authors demonstrate how the long-entrenched traditions of philanthropy and generosity in Arab culture have been reinvigorated in recent years and are starting to cross-fertilize with new and more institutionalized forms of giving, advocated through advances pertaining to CSR. Using a variety of cases, this book ponders the multiple facets of CSR in the region, including philanthropy, strategic giving, social entrepreneurship, internal CSR and responsible human resource management practices, effective CSR integration in SMEs, corporate environmental responsibility and its evolution, CSR reporting and lingering challenges in this respect. It also considers the relevance and applicability of CSR to a wider spectrum of societal actors and institutions. The contributions nicely capture and reiterate commitment to CSR in the Middle East.

Business and Society in the Middle East

This book discusses the unique relationship between societies and businesses in the Mediterranean region, with contributions from public figures and academics from Middle Eastern and Arab societies, as well as from North America and Europe. This blend of expertise and knowledge focuses on common business practices and their effect on society in Mediterranean countries, and aims to create a bridge between the two. Considering the cultural, social, political, legal and economic impacts and variety, Business and Society in the Middle East is a contemporary and authentic view of how local and traditional aspects of society dictate diversity and homogeneity within businesses.

Business Politics in the Middle East

Although most Arab countries remain authoritarian, many have undergone a restructuring of state-society relations in which lower- and middle-class interest groups have lost ground while big business has benefited in terms of its integration into policy-making and the opening of economic sectors that used to be state-dominated. Arab businesses have also started taking on aspects of public service provision in health, media and education that used to be the domain of the state; they have also become increasingly active in philanthropy. The 'Arab Spring,' which is likely to lead to a more pluralistic political order, makes it all the more important to understand business interests in the Middle East, a segment of society that on the one hand has often been close to the ancien regime, but on the other will play a pivotal role in a future social contract. Among the topics addressed by the authors are the role of business in recent regime change; the political outlook of businessmen; the consequences of economic liberalisation on the composition of business elites in the Middle East; the role of the private sector in

orienting government policies; lobbying of government by business interests and the mechanisms by which governments seek to keep businesses dependent on them.

The chapters include many examples, case studies, activities, and illustrations that are customized to the Middle Eastern market, yet relevant to readers outside of the Middle East who want thorough insights about business behaviour in the region. A special module introduces the Arab Middle Eastern context that non-Arab readers will find valuable. The author addresses topics related to organizational culture, leadership, CSR, corporate governance, marketing, HR, accounting, finance, and production. This is accomplished with a deep attention to the cultural and contextual elements of the Middle East. Special attention is given to religious business ethics, while still deeply engaging the vast heritage of Western ethical systems. Corporate Community Involvement

There has been tremendous growth in CCI projects in recent years and the projects incorporated into some companies' strategy implementation are now so extensive that they are having a profound impact on community development. In *Corporate Community Involvement*, Bilge Uyan-Atay examines CCI as a distinct manifestation of CSR and the nature of the relationship between business and society. She asserts that CCI has been described in a piecemeal way and past research has been geographically narrow, failing to take account of different institutional contexts and uncover a more holistic perspective. Dr Uyan-Atay's systematic analysis of CCI behaviours in Turkey provides a comparative research context that is distinct from other environments within which CCI has hitherto been studied. She explores economic, strategic, cultural and institutional influences on CCI and goes a long way to clearing up ambiguity or confusion about where CCI sits as a manifestation of CSR in action.

Global Practices of Corporate Social Responsibility

Being socially responsible on the part of corporate entities is now no longer an option, it is part of their normal business obligations to all their stakeholders regardless of whether these are primary or secondary stakeholders. Modern societies around the world now expect corporate entities of all shapes and forms to be socially responsible in whatever they do; the "Global Practices of Corporate Social Responsibility" is a first attempt at bringing together in one book experts' accounts of how corporate entities in twenty independent nations around the world are dealing with the issue of CSR. The world today faces diverse social problems. These become apparent as one moves from one country to the next, interestingly, society now expects corporations to help in finding solutions to these problems. The problem of global warming affects us all; modern corporations can no longer continue to assume that the problem will go away, if nothing is done by them. We can all make a little difference by our actions.

CSR in Private Enterprises in Developing Countries

After a brief introduction the book outlines the standards of Corporate Social Responsibility. It compares the trends in CSR practices both in developed and developing countries and then embarks on CSR practices in the private sector in Bangladesh to finally present a detailed analysis of CSR and its practices in the ready-made garment industry. The book not only compares developing countries with developed, but as well provides an assessment and analysis of different stages of CSR within the South Asian area.

The World Guide to CSR

The World Guide to CSR is the first book to provide comparable national profiles that describe the evolution and practice of Corporate Sustainability and Responsibility (CSR) for 58 countries and 5 global regions. The purpose of the book is to give CSR professionals (including managers, consultants, academics and NGOs focusing on the social, environmental and ethical responsibilities of business) a quick reference guide to CSR

in different regional and national contexts. The need for the book is premised on the fact that CSR professionals and researchers more often than not have a multinational remit and are required to benchmark performance internationally, but find that country-specific CSR information is ad hoc, limited or non-existent. Even where national CSR research exists, it is often hidden in academic journals that practitioners cannot access or do not have the time or inclination to read. The book is an edited volume, with expert contributors from around the world, all of whom have been screened and selected on the basis of their qualifications and experience in CSR. Each regional/country profile includes the following subsections: CSR in context Priority issues Trends Legislation and codes Organizations Case studies Educational institutions References This unique resource will be an essential acquisition for all organisations who need to benchmark their CSR strategies throughout different regions and cultures and want the best possible intelligence on the key issues and concerns relating to corporate social responsibility in all of the markets in which they operate.

There has been tremendous growth in Corporate Community Involvement (CCI) projects of all sizes in recent years. This has been encouraged by organisations such as Business in the Community in the UK, which provides information designed to motivate businesses and government to engage in CCI. In fact, the projects incorporated into some companies' strategy implementation are now so extensive that they are having a profound impact on community development. Corporate Community Involvement examines CCI as a distinct type of corporate social responsibility and the nature of the relationship between business and society. Bilge Uyan-Atay considers that CCI has been poorly described and researched, concentrating mainly on Western Europe and the USA, failing to consider different institutional contexts and to make the best use of available theory to uncover a more holistic perspective. The author's native Turkey is a secular, developing country with a growing economy. This provides a distinctive environment in which to study CCI. The author explores and analyses economic, strategic, cultural and institutional influences on CCI and its relationships to and differences from corporate social responsibility.

CSR, Sustainability, and Leadership

With the acceptance of CSR and Sustainability as important business performance indicators, it is timely now to assess the impact that leadership has on the development of these processes. CSR, Sustainability, and Leadership seeks to explore the integration of these three elements through an examination of concerns and trends in contemporary organisations. The authors discuss empirical and theoretical studies which focus on processes and practices which inform the field. Organisations wish not only to participate in responsible behaviour, but also actively lead within their local environments. However, businesses are failing in their execution of CSR because of ineffective leadership. Business leaders are central to an organisation's purpose in the world and this book will inform a robust discussion about social issues which are pressing to scholars, policymakers, not-for-profit organisations and students.

CSR Strategies in International Business. Concepts and Theories for a Competitive Edge

For decades, multinational corporations benefited from developing countries mainly as a source of cheap labour and weak regulations. Even when corporate social responsibility (CSR) was embraced it has been tailored to customers in the developed world. With the rise of the middle class in emerging economies and social media driven scrutiny of corporate conduct around the globe, CSR increasingly requires an international outlook. Adopting strategic CSR in international business provides multinational corporations with a competitive edge. An emerging field of research around international CSR points to global, local and transnational strategies as viable options. Considering impacting variables such as cultural distance, industry features and brand visibility, recommendations are derived for managers that advance the concept of shared value for business and society. In addition, a set of future research questions is outlined to further the academic discussion around this important aspect of business in the 21st century.

Corporate Social Responsibility, Public Relations and Community Engagement

Diverse in economic development, political and mass media systems, the countries in South East Asia cast a unique light on the parallels between development-cum-participative communication and corporate social responsibility. Focusing on six countries—Indonesia, Malaysia, the Philippines, Singapore, Thailand and Vietnam—the book discusses how PR and CSR discourse are constructed, interpreted, communicated and enacted in this diverse emerging region. By connecting the disparate disciplines of participatory and development communication with public relations and corporate social responsibility discourse, this innovative text explores the tensions between concepts of modernity and traditional values and their role in engendering creativity, compliance or resistance. This book will be of interest to researchers,

educators and advanced students in the fields of public relations, communication, corporate social responsibility, corporate communications and South East Asia studies.
