The Williamson text provides a modern approach to macroeconomics in which core economic theory is explained with a focus on the microfoundations of macroeconomic theory using the fundamental concepts learned in microeconomics to understand macroeconomics.

Macroeconomics (Sol M)

Abel/Bernanke/Croushore/Kneebone is a well respected, Intermediate Macroeconomics text that takes a balanced Keynesian and Classical approach. Praised in its previous editions for giving students the tools they need to think critically and coherently about macroeconomics, Macroeconomics, Seventh Canadian Edition, has been revised to include new material to keep the text modern and up to date, while building on the strengths that underline the book's lasting appeal.

Macroeconomics, 3rd Ed. [by] McTaggart, Findlay, Parkin

Williamson's third Canadian edition of Macroeconomics builds macroeconomic models from microeconomic principles, an approach consistent with the way that macroeconomic research is conducted

today. This modern approach and emphasis on microeconomic foundations will better prepare students for advanced study in economics and is unlike any other text on the market.

Macroeconomics, Fourth Canadian Edition,

Iris Au and Jack Parkinson of the University of Toronto, Scarborough have "Canadianized" the Macroeconomics section of Krugman/Wells, Economics, Third Edition, maintaining the structure and spirit of the U.S. version but adapting it to reflect Canadian macroeconomic policies and to appeal more directly to Canadian instructors and students. In almost every instance, U.S. data sets, cases, research, and policy discussions have been supplanted by Canadian material.

Macroeconomics, Canadian Edition [by] Williamson. Instructor's Resource CD-ROM [electronic Resource]

Blanchard presents a unified and global view of macroeconomics, enabling students to see the connections between the short-run, medium-run, and long-run.

Macroeconomics, Seventh Canadian Edition

This print textbook is available for students to rent for their classes. The Pearson print rental program provides students with affordable access to learning materials, so they come to class ready to succeed. For intermediate courses in economics. A unified view of the latest macroeconomic events In Macroeconomics, Blanchard presents an integrated, global view of macroeconomics, enabling students to see the connections between goods markets, financial markets, and labor markets worldwide. Organized into two parts, the text contains a core section that focuses on short-, medium-, and long-run markets and two major extensions that offer more in-depth coverage of the issues at hand. From the major economic crisis that engulfed the world in the late 2000s, to monetary policy in the US, to the problems of the Euro area, and growth in China, the text helps students make sense not only of current macroeconomic events but also of those that may unfold in the future. Integrated, detailed boxes in the 8th Edition have been updated to convey the life of macroeconomics today, reinforce lessons from the models, and help students employ and develop their analytical and evaluative skills. Also available with MyLab Economics By combining trusted author content with digital tools and a flexible platform, MyLab personalizes the learning experience and improves results for each student.

Macroeconomics, Seventh Canadian Edition, Loose Leaf Version

"A rare blend of a well-organized, comprehensive guide to portfolio management and a deep, cutting-edge treatment of the key topics by distinguished authors who have all practiced what they preach. The subtitle, *A Dynamic Process*, points to the fresh, modern ideas that sparkle throughout this new edition. Just reading Peter Bernstein's thoughtful Foreword can move you forward in your thinking about this critical subject." —Martin L. Leibowitz, Morgan Stanley "Managing Investment Portfolios remains the definitive volume in explaining investment management as a process, providing organization and structure to a complex, multipart set of concepts and procedures. Anyone involved in the management of portfolios will benefit from a careful reading of this new edition." —Charles P. Jones, CFA, Edwin Gill Professor of Finance, College of Management, North Carolina State University

Macroeconomics, Fifth Canadian Edition, Loose Leaf Version

Macroeconomic policy is one of the most important policy domains, and the tools of macroeconomics are among the most valuable for policy makers. Yet there has been, up to now, a wide gulf between the level at which macroeconomics is taught at the undergraduate level and the level at which it is practiced. At the same time, doctoral-level textbooks are usually not targeted at a policy audience, making advanced macroeconomics less accessible to current and aspiring practitioners. This book, born out of the Masters course the authors taught for many years at the Harvard Kennedy School, fills this gap. It introduces the tools of dynamic optimization in the context of economic growth, and then applies them to a wide range of policy questions – ranging from pensions, consumption, investment and finance, to the most recent developments in fiscal and monetary policy. It does so with the requisite rigor, but also with a light touch, and an unyielding focus on their application to policy-making, as befits the authors' own practical experience. *Advanced Macroeconomics: An Easy Guide* is bound to become a great resource for graduate and advanced undergraduate students, and practitioners alike.

Modern Macroeconomics, Third Edition. Instructor's Manual

This brand new EMEA edition of Robert Barro's popular text brings an EMEA perspective whilst also being fully updated to reflect the macroeconomics of a post-financial crisis world. Starting with long-run macroeconomics, this text explores some of the key theories and models in macroeconomics such as the Keynesian model and the business-cycle model, finishing with extending the equilibrium model to the open economy. This exciting new edition provides an accurate and unified presentation of current macroeconomic thought whilst maintaining Professor Barro's original vision for his textbook. This edition also comes with the optional extra of Aplia, a comprehensive online learning assessment tool with auto-graded randomised questions to test students' understanding.

Macroeconomics: Canadian Edition

This open access book covers the use of data science, including advanced machine learning, big data analytics, Semantic Web technologies, natural language processing, social media analysis, time series analysis, among others, for applications in economics and finance. In addition, it shows some successful applications of advanced data science solutions used to extract new knowledge from data in order to improve economic forecasting models. The book starts with an introduction on the use of data science technologies in economics and finance and is followed by thirteen chapters showing success stories of the application of specific data science methodologies, touching on particular topics related to novel big data sources and technologies for economic analysis (e.g. social media and news); big data models leveraging on supervised/unsupervised (deep) machine learning; natural language processing to build economic and financial indicators; and forecasting and nowcasting of economic variables through time series analysis. This book is relevant to all stakeholders involved in digital and data-intensive research in economics and finance, helping them to understand the main opportunities and challenges, become familiar with the latest methodological findings, and learn how to use and evaluate the performances of novel tools and frameworks. It primarily targets data scientists and business analysts exploiting data science technologies, and it will also be a useful resource to research students in disciplines and courses related to these topics. Overall, readers will learn modern and effective data science solutions to create tangible innovations for economic and financial applications.

Foundations of International Macroeconomics

Prominent economists reconsider the fundamentals of economic policy for a post-crisis world. In 2011, the International Monetary Fund invited prominent economists and economic policymakers to consider the brave new world of the post-crisis global economy. The result is a book that captures the state of macroeconomic thinking at a transformational moment. The crisis and the weak recovery that has followed raise fundamental questions concerning macroeconomics and economic policy. These top economists discuss future directions for monetary policy, fiscal policy, financial regulation, capital-account management, growth strategies, the international monetary system, and the economic models that should underpin thinking about critical policy choices. Contributors Olivier Blanchard, Ricardo Caballero, Charles Collyns, Arminio Fraga, Már Guðmundsson, Sri Mulyani Indrawati, Otmar Issing, Olivier Jeanne, Rakesh Mohan, Maurice Obstfeld, José Antonio Ocampo, Guillermo Ortiz, Y. V. Reddy, Dani Rodrik, David Romer, Paul Romer, Andrew Sheng, Hyun Song Shin, Parthasarathi Shome, Robert Solow, Michael Spence, Joseph Stiglitz, Adair Turner

Principles of Macroeconomics, Second Canadian Edition. Instructor's Resource Manual

This volume brings together many of the leading international figures in development studies, such as Jose Antonio Ocampo, Paul Krugman, Dani Rodrik, Joseph Stiglitz, Daniel Cohen, Olivier Blanchard, Deepak Nayyar and John Williamson to reconsider and propose alternative development policies to the Washington Consensus. Covering a wide range of issues from macro-stabilization to trade and the future of global governance, this important volume makes a real contribution to this important and ongoing debate. The volume begins by introducing the Washington Consensus, discussing how it was originally formulated, what it left out, and how it was later interpreted, and sets the stage for a formulation of a new development framework in the post-Washington Consensus era. It then goes on to analyze and offer differing perspectives and potential solutions to a number of key development issues, some which were addressed by the Washington Consensus and others which were not. The volume concludes by looking toward formulating new policy frameworks and offers possible reforms to the current system of global governance.

Solutions Manual for Use Mankiw:macroeconomics

A major new manifesto for the end of capitalism Neoliberalism isn't working. Austerity is forcing millions into poverty and many more into precarious work, while the left remains trapped in stagnant political practices that offer no respite. Inventing the Future is a bold new manifesto for life after capitalism. Against the confused understanding of our high-tech world by both the right and the left, this book claims that the emancipatory and future-oriented possibilities of our society can be reclaimed. Instead of running from a complex future, Nick Srnicek and Alex Williams demand a postcapitalist economy capable of advancing standards, liberating humanity from work and developing technologies that expand our freedoms. This new edition includes a new chapter where they respond to their various critics.
