Paladin

The History of Science Fiction traces the origin and development of science fiction from Ancient Greece up to the present day. The author is both an academic literary critic and acclaimed creative writer of the genre. Written in lively, accessible prose it is specifically designed to bridge the worlds of academic criticism and SF fandom.

Take off for an intergalactic adventure with swashbuckling entrepreneur Marc "Blackie" DuQuesne. In Skylark Three, the second volume in Edward E. Smith's popular Skylark series, DuQuesne is coming into his own as a powerful businessman and decides to explore outer space in search of the wisdom of other inhabitants of the universe.

Across the Universe

The Nebula-Award winning novel from the multi-award winning SF master Jack McDevitt. Also a Campbell Award finalist. Third in the acclaimed Alex Benedict series. When Alex Benedict, interstellar dealer of antiquities, examines a seemingly unremarkable artefact, he is convinced it is from the infamous Seeker - a transport ship which fled the religious dictatorship in 27th century America. With the help of his pilot, Chase Kolpath, he follows a deadly trail to the Seeker, now strangely adrift in a system barren of habitable worlds. But their discovery raises far more questions than it answers, drawing Alex and Chase into the very heart of danger.

This book explores the formative period of British television drama, concentrating on the years 1936-55. It examines the continuities and changes of early television drama, and the impact this had upon the subsequent 'golden age'. In particular, it questions the caricature of early television drama as 'photographed stage plays' and argues that early television pioneers in fact produced a diverse range of innovative drama productions, using a wide range of techniques.

Seeker (Alex Benedict - Book 3)

When Jelena Marchenko learns that her parents have incurred a huge debt due to her previous actions, she's determined to find a way to pay it off. But running cargo doesn't pay anything off quickly. She comes up with a scheme to turn herself and her eclectic crewmates into mercenaries, at least for long enough to make some money. Unfortunately, Jelena has no interest in maiming, killing, or otherwise tormenting people, the typical things mercenaries are hired to do. She's relieved when, with Prince Thorian's help, she finds a mission that seems perfectly suited to her team: rescuing prisoners of war. But what was supposed to be a quick way to earn money soon turns into something devastating and deadly. Caught between two sides in a war fueled by centuries of resentment, Jelena must choose between her needs and the needs of a planet. No matter which choice she makes, she risks her ship and the lives of her team. Does she truly have what it takes to be a mercenary?

Aliens kidnap Manhattan; read all about it. Manhattan is taken away and placed under a huge clear dome, through which the trapped residents can see dozens of similarly trapped alien cities. First published in 1993. Very much in the same spirit and scope as the 1996 film, Independence Day. Echoed in a small way by the 1996 Star Trek: Voyager episode "Displaced." Science Fiction Book Club selection. Reached the preliminary Nebula Award ballot. On the Science Fiction Chronicle best of year list. Rockies Award winner. HOMer Award nominee. Hugo Award Honorable Mention. Seiun Award nominee (Japan). La Tour Eiffel nominee (France). Reviews "Some ideas are just too good to pass up... the pleasure is in the nonstop action and the problem the characters must solve." -- New York Review of Science Fiction. "Considerable ingenuity... Think of it as a visually spectacular movie... and a really outstanding, imaginative, and professional production staff and special effects crew working to bring off the big set--pieces and guarantee the thrills." -- Locus "How can you possibly resist"... Written with care, intelligence, and grace, [Aristoi] depicts a future society based on highly developed computers and biological engineering, the key skills of which are controlled by an elite known as the Aristoi. This world is depicted meticulously and vividly, and so is the near war of all against all that is unleashed when one of the Aristoi falls prey to the corruption of power. A fine, thoughtful work, highly recommended; Williams seems to grow with each book. ---Roland Green, Chicago Sun-Times Beneath the facade of universal prosperity, however, lurks a tide of dissension and madness that can only be fought from within. Williams tests the borders of imagination in a novel that combines brilliant hard science and speculative vision with a firm grip on the central humanity of his characters. A priority purchase for sf collections. ---Library Journal In this complex and rewarding novel, Williams has created a future which features many of the wonders SF has been promising us for years: virtual reality, genetic engineering, faster-than-light travel, artificial intelligence, nanotechnology, telepathic links with computers, and more. ---Publishers Weekly Gabriel is one of the Aristoi, the elite class that hold dominion over a glittering interstellar culture, their rule more absolute than that of any Old Earth tyrant. When another of the Aristoi is murdered, Gabriel finds that the foundations of his civilization are tottering, and that his own power may have its roots in the greatest lie in all history. In order to defend himself and the interstellar order, Gabriel must go on a quest into the heart of barbarism and chaos, and discover within himself his own lost, tattered humanity.

Manhattan Transfer

The enemy spacefleet arrowed toward the armored mountain--nerve center of the Galactic Patrol. The Patrol battle cruisers swerved to meet them, and a miles-long cone of pure energy ravaged out at the invaders, destroying whatever it touched. But the moment before the force beam struck, thousands of tiny objects dropped from the enemy fleet and, faster than light, flashed straight at their target--each one an atom bomb powerful enough to destroy Patrol Headquarters by itself! The Galactic Patrol—and civilization itself—had seconds to live. Unless a miracle happened....

From the New York Times #1 bestselling author, Ilona Andrews, comes a new tale from the Innkeeper Chronicles "Ilona Andrews's books are guaranteed good reads."—Patricia Briggs, #1 New York Times bestselling author of Fire Touched Dina Demille may run the nicest Bed and Breakfast in Red Deer, Texas, but she caters to a very particular kind of guest... the kind that no one on Earth is supposed to know about. Guests like a former intergalactic tyrant with an impressive bounty on her head, the Lord Marshal of a powerful vampire clan, and a displaced-and-superhot werewolf; so don't stand too close, or you may be collateral damage. But what passes for Dina's normal life is about to be thrown into chaos. First, she must rescue her long-distant older sister, Maud, who's been exiled with her family to a planet that functions as the most lawless penal colony since Botany Bay. Then she agrees to help a guest whose last chance at saving his civilization could bring death and disaster to all Dina holds dear. Now Gertrude Hunt is under siege by a clan of assassins. To keep her guests safe and to find her missing parents, Dina will risk everything, even if she has to pay the ultimate price. Though Sean may have something to say about that!

The Nine Billion Names of God

Without deifying its subject, this biography looks at the life of Nelson Mandela, placing his awe-inspiring political accomplishments into historical context for young readers.

One Fell Sweep

"In 1970s America, politicians began "getting tough" on drugs, crime, and welfare. These campaigns helped expand the nation's penal system, discredit welfare programs, and cast blame for the era's social upheaval on racialized deviants that the state was not accountable to serve or represent. Getting Tough sheds light on how this unprecedented growth of the penal system and the evisceration of the nation's welfare programs developed hand in hand. Julily Kohler-Hausmann shows that these historical events were animated by struggles over how to interpret and respond to the inequality and disorder that crested during this period."--Page 4 of cover

Teaching Science Fiction is the first text in thirty years to explore the pedagogic potential of that most intellectually stimulating and provocative form of popular literature: science fiction. Innovative and academically lively, it offers valuable insights into how SF can be taught historically, culturally and practically at university level.

Getting Tough

Planets are for leaving. That's an old saying in the Explorers. But for every Explorer there is somewhere a planet he will not leave. For some, the cause is love. For others, the desire to give up the strange roving life of the star wanderers who live outside of planet-time. Even for the ones who love the metal ships that are their only home there is still a planet waiting, a planet that will hold them forever - in the final clasp of death. But until then, life is adventure and wonders undreamed of by mere planet dwellers, an Endless Universe of the unknown.

Affective Health and Masculinities in South Africa explores how different masculinities modulate substance use, interpersonal violence, suicidality, and AIDS as well as recovery cross-culturally. With a focus on three male protagonists living in very distinct urban areas of Cape Town, this comparative ethnography shows that men's struggles to become invulnerable increase vulnerability. Through an analysis of masculinities as social assemblages, the study shows how affective health problems are tied to modern individualism rather than African 'tradition' that has become a cliché in Eurocentric gender studies. Affective health is conceptualized as a balancing act between autonomy and connectivity that after colonialism and apartheid has become compromised through the imperative of self-reliance. This book provides a rare perspective on young men's vulnerability in everyday life that may affect the reader and spark discussion about how masculinities in relationships shape physical and psychological health. Moreover, it shows how men change in the face of distress in ways that may look different than global health and gender-transformative approaches envision. Thick descriptions of actual events over the life course make the study accessible to both graduate and undergraduate students in the social sciences. Contributing to current debates on mental health and masculinity, this volume will be of interest to scholars from various disciplines including anthropology, gender studies, African studies, psychology, and global health.

Affective Health and Masculinities in South Africa

The Alliance has toppled the tyrannical empire. It should be a time for celebration, but not for fighter pilot Captain Alisa Marchenko. After barely surviving a crash in the final battle for freedom, she's stranded on a dustball of a planet, billions of miles from her young daughter. She has no money or resources, and there are no transports heading to Perun, her former home and the last imperial stronghold. But she has a plan. Steal a dilapidated and malfunctioning freighter from a junkyard full of lawless savages. Slightly suicidal, but she believes she can do it. Her plan, however, does not account for the elite cyborg soldier squatting in the freighter, intending to use it for his own purposes. As an imperial soldier, he has no love for Alliance pilots. In fact, he's quite fond of killing them. Alisa has more problems than she can count, but she can't let cyborgs, savages, or ancient malfunctioning ships stand in her way. If she does, she'll never see her daughter again. Fans of Firefly and Star Wars should enjoy this fun, fast-paced space opera series from USA Today best-selling author, Lindsay Buroker. If you like to wait and binge-read, the series is now complete at eight novels.

The Annals of the Heechee

After spending four years fighting for the Alliance, fighter pilot Alisa Marchenko only wants one thing: to reunite with her young daughter. But this involves a journey to her former home world, which has become the last imperial stronghold. Since the imperials have a lot of reasons to loathe members of the Alliance right now, just getting down to the planet will be a challenge, and it doesn't help that her passengers are stirring up trouble of their own... Even if Alisa is able to land, she may find that more questions await her than answers, and that her late husband kept a startling secret from her, one that could change her life forever. Star Nomad (Fallen Empire, Book 1)

Works of science fiction and fantasy increasingly explore gender issues, feature women as central characters, and are written by women writers. This book examines women's contributions to science fiction and fantasy across a range of media and genres, such as fiction, nonfiction, film, television, art, comics, graphic novels, and music. The first volume offers survey essays on major topics, such as sexual identities, fandom, women's writing groups, and feminist spirituality; the second provides

alphabetically arranged entries on more specific subjects, such as Hindu mythology, Toni Morrison, magical realism, and Margaret Atwood. Entries are written by expert contributors and cite works for further reading, and the set closes with a selected, general bibliography. Students and general readers love science fiction and fantasy. And science fiction and fantasy works increasingly explore gender issues, feature women as central characters, and are written by women writers. Older works demonstrate attitudes toward women in times past, while more recent works grapple with contemporary social issues. This book helps students use science fiction and fantasy to understand the contributions of women writers, the representation of women in the media, and the experiences of women in society.

Honor's Flight

A spaceship hurled four billion years into the future faces dangers as it searches for home in this space opera adventure by a New York Times bestseller. Lord Commander Grayson St. Clair has guided the Tellus Ad Astra to a part of the universe no human—and possibly no race known to Man—has ever seen. Far from the worlds they know, the colony ship is on its own, facing . . . something that seems to have no weakness. Something whose sole purpose seems to be devouring civilizations. With both time and space as enemies, St. Clair must figure out a way to explore this new corner of space, maintain military order on a mission that was supposed to be civilian, and—somehow—bring the Tellus Ad Astra back to the Milky Way. Combining the drama and action you've come to expect from military science fiction master Ian Douglas, this follow up to *Altered Starscape* is bound to capture your imagination. Praise for *Darkness Falling* "Douglas' use of description is exceptional; readers vividly see the scenes as they unfold, just as if they were there. While being true to the classic sci-fi genre, *Darkness Falling* also tackles deep issues of ethics and morality. Fans of Douglas will love this series, and the latest installment does not disappoint." —RT Book Reviews

Women in Science Fiction and Fantasy [2 volumes]

After failing to catch up with her daughter Jelena so many times, Alisa's optimism is battered, but her determination has never waned. She, Leonidas, and their eclectic crew are hunting down a Starseer research station in the heart of the Kir Asteroid belt—Jelena's supposed location. Alisa vows that she will find her daughter if she has to search a million asteroids to do so. But Jelena and her close friend, Prince Thorian, have attracted the interest of many factions, and the Star Nomad isn't the only ship on the hunt... *Fallen Empire Reading Order Book 1: Star Nomad Book 2: Honor's Flight Book 3: Starseers Book 4: Relic of Sorrows Book 5: Cleon Moon Book 6: Arkadian Skies Book 7: Perilous Hunt Book 8: End Game Cyborg Legacy* p.p1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 25.0px 'Helvetica Neue'; -webkit-text-stroke: #000000} p.p2 {margin: 0.0px 0.0px 0.0px 0.0px; font: 25.0px 'Helvetica Neue'; -webkit-text-stroke: #000000; min-height: 30.0px} p.p3 {margin: 0.0px 0.0px 0.0px 0.0px; font: 12.0px 'Helvetica Neue'; -webkit-text-stroke: #000000} li.li3 {margin: 0.0px 0.0px 0.0px 0.0px; font: 12.0px 'Helvetica Neue'; -webkit-text-stroke: #000000} span.s1 {font-kerning: none} span.s2 {font: 24.0px 'Helvetica Neue'; font-kerning: none} ul.ul1 {list-style-type: disc}

Riding the Torch

The men of the Dorsai were the finest fighting soldiers in the universe, mercenary troops without equal. Their talents were devastatingly employed on Kultis, where a bloody little war raged between the Western Alliance and Eastern Coalition. But not even the Dorsai could anticipate the dramatic effect of Cletus Grahame's brilliant mind and the galaxy-shaking theory he called The Tactics of Mistake. This first book in the Dorsai sequence is the story of how Cletus Grahame risked his life, the fate of three worlds, and ultimately the whole of the Dorsai to prove that a mistake may remake worlds. A classic of science fiction.

Pathfinder Adventure Card Game

Young Rue Cassels of the Cycler Compact -- a civilization based around remote brown dwarf stars -- is running for her life from her bullying brother, Jentry, who has stolen her family inheritance and threatens to sell her into slavery. Fleeing in a shuttle spacecraft from the sparsely populated and austere comet-mining habitat she has lived in her whole life, she spots a distant, approaching object, and stakes a legal claim to it. It is not the valuable comet she hoped for but something even more wonderful, an abandoned Cycler starship. Since the discovery of a faster-than-light drive, unfortunately operable only between larger stars, the Cycler Compact civilization has gradually dwindled. It's much cheaper for the star-based civilizations of the new Rights Economy to bypass the stops that can't be made with the

new technology, and the civilizations of the brown stars are gradually sinking into anarchy and chaos. It has been decades since the last Cyclor ship passed anywhere near the system in which Rue grew up. Her discovery unleashes a fury of action, greed, and interstellar intrigue as many factions attempt to take advantage of the last great opportunity to revitalize-and perhaps control--the Compact. This is the story of Rue's quest to visit and claim this ship and its treasures, set against a background of warring empires, strange alien artifacts, and fantastic science. It is a story of hope and danger, of a strange and compelling religion, Permanence, unique to this star-faring age, and of the rebirth of life and belief in a place at the edge of forever. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.
