Is there an Infinite Mind? | Donald Hoffman | The Case Against Reality - Is there an Infinite Mind?
| Donald Hoffman | The Case Against Reality by metaRising 188,146 views 4 years ago 1 hour,
19 minutes - Is consciousness the fundamental nature of reality? Neuroscientist Donald Hoffman
discusses his theory of "conscious agents" on ...

Donald Hoffman

Perception

Why Would Our Minds Conceal Reality from Us

What Is the Deeper Reality behind Space-Time

The Hard Problem of Consciousness

Conscious Realism

Psychophysics

So There Are Physical Things like Electrons and Protons That Have Genuine Physical Properties
but They Also Have Genuine Non-Physical Properties Namely these Conscious Experiences Then
that's a Form of Dualism and Most Scientists Don't Like Dualism We Want To Avoid Dualism and
the Theory That I'M Proposing of Conscious Realism Is Not Dualistic It's a Monist Theory It's Saying
Consciousness Is Fundamental and the Only Kind of Stuff There Is Is Consciousness Space Time
and Matter Are Simply Forms of Conscious Experiences They'Re Not Something Independent of
Consciousness the Form of Pan'psychism That I Just Described Would Be a Form of Dualism
I Can Begin To Answer that Question It Turns Out that There Are Ways for Example When Two
Conscious Agents Interact and You Write Down the Mathematics of Their Interaction and Look at
It the Mathematics of Their Interaction Also Satisfies the Definition of Being a Conscious Agent So
but the Theory Is Saying Then Is the Dynamics of Interacting Conscious Agents Is Also a Conscious
Agent and I Expected as I in My Colleagues Look at this Mathematics More More Carefully We'LI
Find that There Are Many Many Different Ways That Conscious Agents Can Interact and Combine
To Create New New Consciousness

And I Want To Explore with You What these Greater Minds Might Be Like but Just in Order To
Understand this Sort of Sequence of Minds Coming Together Is It Your View that You Know Our Two
Minds Interacting Now Are Creating a New Conscious Agent and if Not What Do You Think Is the the
Necessary Level of Interaction Where a New Mind or a New Conscious Agent Becomes Instantiated
I Think that It's a Plausible Hypothesis that the Two Consciousnesses of the Two Hemispheres in
Normal Human Beings with no Corpus Callosum Damage or Coordinating Together To Form a Single
Consciousness and a Single Unified Person That Doesn't Destroy the Separate Consciousnesses of
the Two Hemispheres Independently under Their Two Personalities

Because You Know as You Said What Is God if Not an Infinite Mind and but the Interesting Thing
about this Specific Approach of Yours Is that It Leads to Us Potentially Being Able To Say Precise
Things about What an Infinite Mind Might Be like So for Example You'Ve Suggested Omnipotence
and Omniscience Are Not Necessarily Attributes of an Infinite Mind Which of Course Have Been
Traditionally Attributed to God but Also nor Would an Infinite Mind Need To Be as You'Ve Said Alone
in Its Infinity so There May Be Many Infinite Minds so Donald Could You Perhaps Talk a Bit about
How You Arrive at these Kinds of Conclusions Right So When You Start Combining Agents To Create
Agents with More and More Conscious Experiences More and More Complexity of Their Dynamics
The Idea that There's a Reason for Me To Think that these Conscious Agents the Infinite Conscious
Agents Won't Know Everything and Something Called Girdle's Theorem It's a Complicated Theorem
but What It Entails Is that There Is Endless Mathematical Structure and No Matter How Much Ex-
ploration One Does of Mathematical Structure All the Mathematical Structure That You Ever Explore
Will Only Be a Subset of All the Structures That Are There I Mentioned before that all Conscious
Experiences Are Structured and So There's Not a Divorce between Mathematical Structure and
Conscious Experiences

What this Means Is that Girdles Theorem Is Telling Us that There's an Infinite Variety of Structures
and Therefore of Forms of Consciousness To Be Explored and in Principle this Exploration Will Never
Stop and It's Impossible Literally Impossible for any Agent To Ever Know It all and So Even these
Infinite Conscious Agents Will Always Be in the Process of Exploring and if I if I Had To Guess There's
a Big Question What Is It all about and What Is Consciousness up to What if We'Re GonNa Propose
a Dynamics of Consciousness

And that's What the Dynamics Is about and the Reason the Demux Hasn't Stopped and It Continues
and Will Continue Forever Is because Girdles Theorem Guarantees that There Is Complete Job
Security in this in this Endeavor That's Fascinating and It Always Evokes a Kind of Teleological
Nature to Reality Itself like as if It's Undergoing this Seeking Process this Infinite Process of Self
Understanding and Just this Idea of the Possibility of Minds That Could Exist outside of Our Realm

of Perception that Our Our Minds May Contribute to as Part of Our Instantiation
There Is a Kind of Spiritual Significance to that or if Not Spiritual Exactly but Transformative in Terms
of How We See Ourselves in Reality in the Universe You Know because if Conscious Agents Are
the Whole of Reality as You Said Then Reality Is like Us We Can See Ourselves As Much More at
Home in that Kind of a Universe than We Can in the Standard Materialist View We'Re Not Significant
as Humans but We Are Central as Conscious Beings to the Core Unfolding of Reality That's Right It
Does Lead to a Different View of Who We Are and Our Place in in the Universe

I Know that I'll Continue To Follow Your Work with Great Interest before We Finish Where Should
People Go To Find Out More about Your Research and Your Ideas Well I've Written a Book Recently
Called the Case against Reality and It's Published by a Penguin in the Uk and Norton in the Us and
so that's a Good Introduction to the Ideas about We'Re Not Seeing the Truth It's Just an Interface and
the Last Chapter Gives some Hints about this Idea of Conscious Agents I Do Have a Mathematical
Paper if for those Who Are Interested in the Mathematics if You Just Google Donald Hofmann and
the Name of the Paper Is Objects of Consciousness

#34 Bernardo Kastrup PHD - JUNG'S METAPHYSICS AND THE MIND AT LARGE HYPOTHESIS
- #34 Bernardo Kastrup PHD - JUNG'S METAPHYSICS AND THE MIND AT LARGE HYPOTHESIS
by Chasing Consciousness Podcast 53,088 views 1 year ago 2 hours, 17 minutes - What are the
implications of Jung's theories about the Collective Unconscious, Archetypes, Synchronicity and
Individuation?

Intro

Materialism VS the church: The history of Idealism

Materialism was a weapon against the church

The dissociative boundary between us and the mind at large

A field of mind

Split personality MRI scans are markedly different

Life is what dissociation looks like

Neural correlates + interacting across the dissociative boundary

Anaesthesia: Mistaking unresponsiveness for unconsciousness

Jung's Metaphysics

The unconscious is active and creative, not a passive container

'The light' of metacognition

Archetypes are primordial templates of manifestation

'The ego is a little boat floating on a raging ocean of psychic activity that it cannot control'

Was Jung an idealist?

Causality + synchronicity: Wolfgang Pauli and Jung

Individual quantum events are not causal, so they are governed by synchronicities

Causality itself is an aggregate effect of microscopic level synchronistic effects

There is an organising principle underlying nature, that you can't isolate under laboratory conditions

Active Imagination: Interacting with the imaginal field

The psyche is an 'Ousia': something in and of itself

James Hollis: One of the best Jungian analysts and authors

Bernardo's midlife crisis - the first and second half of life

Individuation explained

'The freedom of the Slave': The impersonal flow of nature channeled through you

The difference between the individuation in the second part of life and the eastern idea of renuncia-
tion, and 'leaving' the world

Etiology: spontaneous VS deliberate purpose

Individuation = bringing the unconscious into consciousness

Natures mind may not have cognitive planning abilities, be personal or have awareness

Interpreting quantum phenomena through an idealist, Jungian lens

Physical quantities only exist if you look, if you measure
Entanglement and materialism's difficulty
The states of the world are not physical but probabilistic states, physical states arise from measurement
The implication of the relativity of time regarding evolution
Space time is not fundamental, it's a cognitive instrument
Primordial truth beyond space time, is projected into space-time
Evolution is a spatio-temporal projection
Are Psi phenomena and military UAP experiencers manifestations of the unconscious?
Anomalous 'traffic' across the dissociative boundary
Whoever is behind UAP phenomena knows something about reality that we don't
Humility in the face of the unknown about the nature of reality
