The Photographer's Wife

Barbara - a child of the Blitz - has more secrets than she cares to admit. She has protected her children from the harsh realities of life and told them little of the poverty of her childhood, nor of the darker side of her marriage to one of Britain's most famous photographers. With such an incomplete picture, her youngest, Sophie, has struggled to understand who her parents really are, and in turn, Barbara

sometimes worries, to build her own identity. When Sophie decides to organise a vast retrospective exhibition of her adored father's work, old photos are pulled from dusty boxes. But with them tumble stories from the past, stories and secrets that will challenge every aspect of how Sophie sees her parents.

The Nova Reader

The definitive monograph of American photographer Vivian Maier, exploring the full range and brilliance of her work and the mystery of her life, written and edited by noted photography curator and writer Marvin Heiferman; featuring 250 black-and-white images, color work, and other materials never seen before; and a foreword by New York Times bestselling author Laura Lippman. Vivian Maier's story—the secretive nanny-photographer during her life who becomes a popular sensation shortly after her death—has, to date, been pieced together only from previously seen or known images she made and the handful of facts that have surfaced about her life. During her lifetime she shot more than 100,000 images, which she kept hidden from the world. In 2007, two years before her death, Chicago historic preservationist John Maloof discovered a trove of negatives, and roll upon roll of undeveloped film in a storage locker he bought at auction. They revealed a surprising and accomplished artist and a stunning body of work, which Maloof championed and brought to worldwide acclaim. Vivian Maier presents the most comprehensive collection and largest selection of the photographer's work—created during the 1950s through the 1970s in New York, Chicago, and on her travels around the country—almost exclusively unpublished and including her previously unknown color work. It features images of and excerpts from Maier's personal artifacts, memorabilia, and audiotapes, made available for the first time. This remarkable volume draws upon recently conducted interviews with people who knew Maier, which shed new light on Maier's photographic skill and her life.

What if there is much more to the Harry Potter saga than a simple tale of adventure and fantasy for kids? "Yes, there is much more," is the guiding premise of the annual, academic gatherings at Edinboro University known as The Ravenclaw Conferences. Since 2011, faculty and students have met in Edinboro to deliver papers and discuss the many intellectual and ethical issues raised in this story of an orphan boy's journey from being a nobody to becoming the Chosen One of prophecy. In The Ravenclaw Chronicles, the reader will find select articles developed from these conferences, most from professors, but a few from student presenters. There is even one original short story of Harry Potter fan fiction. These reflections come from diverse perspectives: namely, philosophy, history, English literature, media studies, and world languages.

The Ravenclaw Chronicles

Curwen, a young medical doctor, documented his impressions of the Labrador coast while distributing clothing and supplies as part of Grenfell's "mission." The journal entries are Victorian toned, and offer insights into the politics of the area, conditions of the fishing schooners, the lives of the settlers, the Moravian Brethren, and commentary on his captain, Grenfell, as well as the countryside they encountered. The editor has provided an introduction that places the journal in a historical context, and has added annotations, and official letters and reports written by Grenfell to supplement Curwen's account. Interesting photographs taken by the doctor accompany the text. Annotation copyright by Book News, Inc., Portland, OR

One hundred days have been identified by Getty and National Geographic to represent defining moments of the past 150 years. These moments are crystallised in images that leap from the page revealing joy, anger, despair and triumph. An insightful text by photography historian Nick Yapp supports these images, which are accompanied by journals, excerpts and 'on-site' notes that offer the backstory of the image and how it was captured. Major events that have shaped our era captured in the book include, from the Getty historic archive, the 1848-9 revolution and riots in Europe; President Lincoln's assassination in 1865; the construction of the Eiffel Tower in 1889; the Potemkin Mutiny (1905) that launched the Russian Revolution; the Easter Rising in Dublin in 1916; the Wall Street crash of 1929; Kristallnacht in Germany in 1938; the British leaving India in 1947; through to the dawn of the new millennium in 2000. The National Geographic archives are used to illustrate cultural geography, the changes in landscape, contemporary conflicts, Native America, and the civil rights movement among others, including the 1906 San Francisco earthquake, Scott and Amundsen reaching the South Pole in 1911; the Lascaux cave paintings discovered in 1940; the first heart transplant in 1967; the Chernobyl disaster of 1986; the cloning of sheep in 1997; the Twin Towers attack of 2001; and the global warming debate of 2007. The wonder of this book is in illustrating how an entire event or age can be captured in a single image - whether it be of a peasant's tears, two heads of state sharing a secret, or the triumph of an Olympic champion. Politics, war, crime, exploration, fashion and fads all make up these one hundred days: From the California Gold Rush of 1849 to the finished structure of the Three Gorges Dam in 2006.
