World Geography and Cultures Student Workbook

A world view from renowned authors World Geography and Cultures offers a fascinating view of the world enlivened by a meticulous presentation that focuses on the development of geographic literacy. Every region is studied in three parts: physical geography, cultural geography, and current events.

National Geographic World Cultures and Geography

Exploring Our World is a middle school program co-authored by National Geographic. This program introduces students to an enriched view of the interrelationships of geography, history, economics, government, citizenship, and current events in one compelling package. A strong geographic thread is interwoven with history, government, and current events to analyze different regions of the world and the issues they face. Suitable for a world geography or world cultures class, Exploring Our World is

available as a full survey; Eastern Hemisphere; and Western Hemisphere, Europe, and Russia. Explore the interrelationships of geography, history, government, and more in one rich package. Includes: Print Student Edition

World Geography and Cultures, Teacher Wraparound Edition

The student edition will take the students around the world, starting with physical geography, the earth's climate, and the people of the world. The first four units progress from North and South America and then on to Europe and Russia. Unit five will cover Africa and then units six and seven will cover Asia. The book will conclude in unit eight with Oceania and Antarctica. - Publisher.

World Geography and Cultures

Reading Essentials and Note-Taking Guide combines a concise version of the textbook with structured, two-column, note-taking support.

The World and Its People: Western Hemisphere, Europe, and Russia, Student Edition

Fouberg/Murphy: Human Geography: People, Place, and Culture, 12th Edition, teaches students to appreciate the diversity of people, places, and cultures, and understand the role people play in shaping our world. The goals of this edition are to provide geographic context to global, regional, national, and local issues and to teach students to think geographically and critically about these issues. Human Geography features beautifully designed maps, dozens of vibrant photographs taken by the author team, and author and guest field notes that help students see how geographers read cultural landscapes and use fieldwork to understand places. Fouberg's Human Geography, 12th Edition, now integrates Threshold Concepts to help students develop their ability to think geographically. Once they learn and apply one of these concepts in the context of a given place, students integrate it into their thinking and can draw from it as they learn new material and explore other places.

The World and Its People: Eastern Hemisphere, Student Edition

Grade levels 6-8.

World Geography and Cultures, Reading Essentials and Note-Taking Guide

First Published in 1998. Routledge is an imprint of Taylor & Francis, an informa company.

World Geography and Cultures Teachers Edition

Includes regional units relevant to Western Hemisphere curriculum. Students make inferences about their lives and the lives of students in other countries. Rich time lines provide a sense of ancient civilization.

Wc/g Student Edition Eastern Hemisphere (c) Update

Cultural Geography (3rd ed.) provides a survey of both geographic principles and every country of the world through a regional approach. Following the theme of a Grand Tour, students "travel" from continent to continent around the world studying the cultures, land forms, climates, resources, economy, religions, and government of each country. This new edition is filled with photographs, charts, maps, and first-person accounts that make this "virtual world tour" an exciting and stimulating experience. - Publisher.

World Geography and Cultures

Student Edition, Eastern Hemisphere

Wc/g Student Edition Western Hemisphere W/ Europe (c) Update

This little book is confined to very simple "reading lessons upon the Form and Motions of the Earth, the Points of the Compass, the Meaning of a Map: Definitions." The shape and motions of the earth are

fundamental ideas—however difficult to grasp. Geography should be learned chiefly from maps, and the child should begin the study by learning “the meaning of map,” and how to use it. These subjects are well fitted to form an attractive introduction to the study of Geography: some of them should awaken the delightful interest which attaches in a child’s mind to that which is wonderful—incomprehensible. The Map lessons should lead to mechanical efforts, equally delightful. It is only when presented to the child for the first time in the form of stale knowledge and foregone conclusions that the facts taught in these lessons appear dry and repulsive to him. An effort is made in the following pages to treat the subject with the sort of sympathetic interest and freshness which attracts children to a new study. A short summary of the chief points in each reading lesson is given in the form of questions and answers. Easy verses, illustrative of the various subjects, are introduced, in order that the children may connect pleasant poetic fancies with the phenomena upon which “Geography” so much depends. It is hoped that these reading lessons may afford intelligent teaching, even in the hands of a young teacher. The first ideas of Geography—the lessons on “Place”—which should make the child observant of local geography, of the features of his own neighbourhood, its heights and hollows and level lands, its streams and ponds—should be conveyed *viva voce*. At this stage, a class-book cannot take the place of an intelligent teacher. Children should go through the book twice, and should, after the second reading, be able to answer any of the questions from memory. Charlotte M. Mason

Human Geography

A visual approach to world geography.

World Cultures and Geography

World Regional Geography: Places, Peoples, and Cultures provides students with a fresh approach to the study of world geography through a topical exploration of ten major world regions. The text explores the landscapes and societies on Earth in order to appreciate the environmental diversity of the planet and the cultural richness of humanity from the interdisciplinary perspective of geography. The book is richly illustrated with maps, photos, and graphs. The book begins with a chapter introducing students to the geographic perspectives used to study places, people, and culture, including physical environment, human-environment interaction, population patterns and trends, systems of communication, systems of belief, political organization of space, and economic activities. Subsequent chapters build upon this knowledge and framework to help students explore North America, Europe, the Russian Realm, Southwestern Asia and Northern Africa, Sub-Saharan Africa, Latin America, East Asia, South Asia, Southeast Asia, and Australia and Oceania. Students study demographics, religion, linguistics, politics, agriculture, tourism, foreign and domestic policy, and more as they travel the world. In reading World Regional Geography, students gain a deeper understanding of the rich geography and cultural traditions of major regions around the globe. It is an excellent resource for undergraduate courses in geography, international studies, and related fields. Kazimierz J. Zaniewski earned his Ph.D. in geography from University of Wisconsin-Milwaukee and his M.A. and B.A. degrees in geography from Warsaw University in Poland. He is a professor of geography at the University of Wisconsin-Oshkosh. His research interests include population geography, thematic cartography, and electoral geography. Heike C. Alberts earned her Ph.D. in geography from the University of Minnesota and her M.A. degree from the Free University of Berlin in Germany. She is a professor of geography at the University of Wisconsin-Oshkosh. She has broad research interests including highly skilled migrations, urban development, and cultural geography. John T. Bowen earned his Ph.D. from the University of Kentucky and his B.A. from Dartmouth College. He is a professor of geography at Central Washington University. His areas of expertise include the airline industry, the aircraft industry, and Southeast Asia.
