Written by the world's foremost authorities, this volume provides comprehensive coverage of current approaches to the prevention, diagnosis, and management of atherothrombosis and its coronary and noncoronary complications. This edition has been thoroughly updated, sharply focused on clinical information, and trimmed to one manageable volume. Coverage begins with a review of risk factors and prevention, emphasizing lipid abnormalities, hypertension, smoking, diabetes, and obesity. Subsequent sections examine the pathogenesis of atherosclerosis, markers and imaging, acute coronary

syndromes, chronic stable angina, and noncoronary atherothrombosis. Clinical presentations, medical management, and the latest interventional strategies are included.

Excerpta Medica

In the tradition of Andrew Weil's bestseller Spontaneous Healing, this is a physician's breakthrough medical program for the brain designed to diminish the effect of memory impairment caused by stress, aging, and Alzheimer's disease. As we grow older and experience the stresses of life, at about age 40 many of us begin to have trouble remembering things, concentrating, and generally staying mentally sharp. This book contains a four-part program including nutritional, stress-relieving, pharmacological, and mind-body exercise therapies to help people overcome the undesirable effects of normal brain "aging". By controlling cortisol, a hormone that is toxic to the brain and present in excessive levels as we age, Dr. Khalsa's plan can help improve memory and emotional zest. This is the first book to: Describe a program that may diminish age-associated memory impairment Feature a clinical method that can promote memory functioning impaired by Alzheimer's disease Detail the physical damage done to the brain by stress, how it adversely affects memory and our other mental abilities, and what can be done about it.
