

Nature And Culture In The Northern Forest Region Heritage And Environment In The Rural Northeast

[#northern forest region](#) [#rural northeast heritage](#) [#nature and culture](#) [#environmental conservation](#) [#cultural landscapes](#)

Explore the rich interplay of nature and culture within the northern forest region, where deeply rooted heritage and environmental concerns in the rural northeast shape unique landscapes and communities. This area highlights the critical balance required to preserve both ecological integrity and cultural identity for future generations.

Nature and Culture in the Northern Forest

Nearly 30 million acres of the Northern Forest stretch across New York, Vermont, New Hampshire, and Maine. Within this broad area live roughly a million residents whose lives are intimately associated with the forest ecosystem and whose individual stories are closely linked to the region's cultural and environmental history. The fourteen engaging essays in *Nature and Culture in the Northern Forest* effectively explore the relationships among place, work, and community in this complex landscape. Together they serve as a stimulating introduction to the interdisciplinary study of this unique region. Each of the four sections views through a different lens the interconnections between place and people. The essayists in "Encounters" have their hiking boots on as they focus on personal encounters with flora and fauna of the region. The energizing accounts in "Teaching and Learning" question our assumptions about education and scholarship by proposing invigorating collaborations between teachers and students in ways determined by the land itself, not by the abstractions of pedagogy. With the freshness of Thoreau's irreverence, the authors in "Rethinking Place" look at key figures in the forest's literary and cultural development to help us think about the affiliations between place and citizenship. In "Nature as Commodity," three essayists consider the ways that writers from the nineteenth and early twentieth centuries thought about nature as a product and, thus, how their conclusions bear on the contemporary retailing of place. The writers in *Nature and Culture in the Northern Forest* reveal the rich affinities between a specific place and the literature, thought, and other cultural expressions it has nurtured. Their insightful and stimulating connections exemplify adventurous bioregional thinking that encompasses both natural and cultural realities while staying rooted in the particular landscape of some of the Northeast's wildest forests and oldest settlements.

The Bioregional Imagination

Bioregionalism is an innovative way of thinking about place and planet from an ecological perspective. Although bioregional ideas occur regularly in ecocritical writing, until now no systematic effort has been made to outline the principles of bioregional literary criticism and to use it as a way to read, write, understand, and teach literature. The twenty-four original essays here are written by an outstanding selection of international scholars. The range of bioregions covered is global and includes such diverse places as British Columbia's Meldrum Creek and Italy's Po River Valley, the Arctic and the Outback. There are even forays into cyberspace and outer space. In their comprehensive introduction, the editors map the terrain of the bioregional movement, including its history and potential to inspire and invigorate place-based and environmental literary criticism. Responding to bioregional tenets, this volume is divided into four sections. The essays in the "Reinhabiting" section narrate experiments in living-in-place and restoring damaged environments. The "Rereading" essays practice bioregional literary criticism, both by examining texts with strong ties to bioregional paradigms and by opening other, less-obvious texts to bioregional analysis. In "Reimagining," the essays push bioregionalism to evolve—by expanding its corpus of texts, coupling its perspectives with other approaches, or challenging its core constructs. Essays in the "Renewal" section address bioregional pedagogy, beginning with local habitat studies and concluding with musings about the Internet. In response to the environmental crisis, we must reimagine our relationship to the places we inhabit. This volume shows how literature and literary studies are fundamental tools to such a reimagining.

Proving Ground

"The Appalachian Mountains attracted an endless stream of visitors in the twentieth century, each bearing visions of the realm that they would encounter on high. The name "Appalachia" became shorthand for a series of moral and economic calculations and pop culture references. Well before large numbers of tourists took to the mountains in the latter half of the century, however, networks of missionaries, sociologists, folklorists, doctors, artists, and conservationists made Appalachia their primary site for fieldwork. Proving Ground studies a collection of these professionals in transit to show that the travelers' tales were the foundation of powerful forms of insider knowledge. The visitors represented occupational and recreational groups that used Appalachia to gain precious expertise, and it was to these groups that they became insiders. They were not immersing themselves in a regional culture, but rather in their own professional cultures. These were people who used the mountains to help themselves. Proving Ground is a cultural history of expertise, an environmental history of the Appalachian Mountains, and a historical geography of spaces and places in the twentieth century. By using these frameworks to analyze the personal papers, professional records, and popular works of these budding experts, the book presents mountain landscapes as a fluid combination of embodied sensation, narrative fantasy, and class privilege. It will attract students of Appalachian Studies who are interested in the phenomena of cultural and environmental intervention, environmental historians concerned with the construction of hybrid landscapes, and mobility scholars who recognize the organizational power derived from access and movement"--

American Learned Men and Women with Czechoslovak Roots

Apart from a few articles, no comprehensive study has been written about the learned men and women in America with Czechoslovak roots. That's what this compendium is all about, with the focus on immigration from the period of mass migration and beyond, irrespective whether they were born in their European ancestral homes or whether they have descended from them. Czech and Slovak immigrants, including Bohemian Jews, have brought to the New World their talents, their ingenuity, their technical skills, their scientific knowhow, and their humanistic and spiritual upbringing, reflecting upon the richness of their culture and traditions, developed throughout centuries in their ancestral home. This accounts for the remarkable success and achievements of these settlers in their new home, transcending through their descendants, as this monograph demonstrates. The monograph has been organized into sections by subject areas, i.e., Scholars, Social Scientists, Biological Scientists, and Physical Scientists. Each individual entry is usually accompanied with literature, and additional biographical sources for readers who wish to pursue a deeper study. The selection of individuals has been strictly based on geographical ground, without regards to their native language or ethnic background. This was because under the Habsburg rule the official language was German and any nationalistic aspirations were not tolerated. Consequently, it would be virtually impossible to determine their innate ethnic roots or how the respective individuals felt. Doing it in any other way would be a mere guessing, and, thus, less objective.

Encyclopedia of Bohemian and Czech-American Biography

As the Czech ambassador to the United States, H. E. Petr Gandalovic noted in his foreword to this book that Mla Rechcgl has written a monumental work representing a culmination of his life achievement as a historian of Czech America. The Encyclopedia of Bohemian and Czech American Biography is a unique and unparalleled publication. The enormity of this undertaking is reflected in the fact that it covers a universe, starting a few decades after the discovery of the New World, through the escapades and significant contributions of Bohemian Jesuits and Moravian brethren in the seventeenth and eighteenth centuries, the mass migration of the Czechs after the revolutionary year of 1848, and up to the early years of the twentieth century and the influx of refugees from Nazism and communism. The encyclopedia has been planned as a representative, a comprehensive and authoritative reference tool, encompassing over 7,500 biographies. This prodigious and unparalleled encyclopedic vade mecum, reflecting enduring contributions of notable Americans with Czech roots, is not only an invaluable tool for all researchers and students of Czech American history but is also a carte blanche for the Czech Republic, which considers Czech Americans as their own and as a part of its magnificent cultural history.

Exploring Southern New Hampshire

Walkers, bikers, paddlers and snowshoers can encounter relics of the past and their incredible tales from Keene to the Seacoast. "Exploring Southern New Hampshire" takes history off the page, out of the car and into the welcoming pine-scented woods and pristine waters of the Granite State. Hike Mount Monadnock, paddle the Nashua River and retrace Lincoln's footsteps down Exeter's streets. Experience the legacy of a women's sawmill at Turkey Pond from the waters that powered it. Visit Cathedral of the Pines, a beautiful outdoor altar built with stones from historic sites around the world. Set sail on the Piscataqua River onboard a gundalow and learn about the region's rich maritime history. Local history explorer and nature lover Lucie Bryar leads readers through the Monadnock, Merrimack Valley and Seacoast regions. Granite State natives and transplants alike will explore trails and waterways to gain a new appreciation for the history hidden in natural New Hampshire.

Water Projects and Technologies in Asia

This book is a collection of highly refined articles on historical water projects and traditional water technologies of international interest in the Asian region, addressing information on past water projects (mostly before the 20th century) in the Asian regions that are technically and culturally of interest and educationally valuable. This book explores historical water projects in these regions, presenting technologies used at the time, including calculation and forecasting methods, measurement, material, labor, methodologies, and even water culture. It is expected that the old Asian wisdom of "reviewing the old and learning the new" would be realized to a certain extent in modern planning and practice of water projects. This book will enable the reader to understand historical water projects and technologies in the Asian region. It can be used as a one-stop resource to source notable Asian water projects and their relevance to modern-day technology. In this regard, this book is expected to be of interest to a variety of audiences, including the corresponding Asian regions and other international audiences interested in Asian water history from an engineering perspective.

Heritage Values in Site Management

The analysis of the four historic sites featured in this publication-Grosse Ile and the Irish Memorial National Historic Site in Canada, Chaco Culture National Historical Park in the United States, Port Arthur Historic Site in Australia, and Hadrian's Wall World Heritage Site in the United Kingdom-provides valuable insight into the creation and management of heritage values. Each case study articulates how values are identified and assessed by the governing bodies; where (and with whom) the values reside; how the values are implemented into management policies and objectives; and the impact that these decisions have on the sites themselves. This book will be a vital tool for institutions and individuals engaged in the study or practice of site management, conservation planning, and/or historic preservation. Also included is a CD-ROM that contains supplemental management and planning documents created and used by the site-management authorities."

Living in a Dynamic Tropical Forest Landscape

This book brings together a wealth of scientific findings and ecological knowledge to survey what we have learned about the "Wet Tropics" rainforests of North Queensland, Australia. This interdisciplinary text is the first book to provide such a holistic view of any tropical forest environment, including the social and economic dimensions. The most thorough assessment of a tropical forest landscape to date. Explores significant scientific breakthroughs in areas including conservation genetics, vegetation modeling, agroforestry and revegetation techniques, biodiversity assessment and modeling, impacts of climate change, and the integration of science in natural resource management. Research achieved, in part, due to the Cooperative Research Centre for Tropical Rainforest Ecology and Management (the Rainforest CRC). Written by a number of distinguished international experts, contains chapter summaries and section commentaries.

The Geography of Albania

This book is the first to give a comprehensive and detailed overview of the complete geography of Albania in English. It highlights the most important and manifold potentials of nature, society and economy of Albania as well as development problems during different time periods. One focus lies on Albania's perspectives and challenges for the future. Besides natural aspects also topics such as migration, poverty, social situation, economy, urban development, regional disparities among others are discussed. This book appeals to academics and researchers of geography, regional development and related disciplines as well as teachers and students of geography, geology, natural sciences, social sciences, economics. The book is also attractive for media representatives, tourists and other interested individuals travelling to Albania.

Index to 35mm Educational Filmstrips

All life forms on earth are complementary to each other; the existence and survival of one depend on the existence of another, and vice versa. However, no life forms are more dependent on others than human beings. Human survival is conditioned by the existence of the natural environment and the living things within it. One aspect of this interaction is the central and inescapable role played by human culture in defining the human-nature relationship. This book emphasises that environmental conservation is a matter of moral and cultural ethics. It stresses the fact that existing environmental conservation methods need to accommodate traditional environmental knowledge and practices of different indigenous cultures in order to re-build and restore the bond between humans and nature.

Bulletin of the Atomic Scientists

This unique book addresses the issue of sustainability from the point of view of landscape architecture, dealing with professional practices of planners, designers and landscape managers. This second edition contains updated and new material reflecting developments during the last five years and comprehensively addresses the relationship between landscape architecture and sustainability. Much in the text is underpinned by landscape ecology, in contrast to the idea of landscape as only appealing to the eye or aspiring cerebrally to be fine art. Landscape and Sustainability establishes that the sustainability agenda needs a new mindset among professionals: the driving question must always be 'is it sustainable?' Developing theory into practice, from the global to the local scale and from issues of policy and planning through to detailed design and implementation and on to long-term maintenance and management, the contributors raise and re-examine a complex array of research, policy and professional issues and agendas to contribute to the necessary ongoing debate about the future of both landscape and sustainability.

IAS Mains Paper 1 Indian Heritage & Culture History & Geography of the world & Society 2021

The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security. Founded by Manhattan Project Scientists, the Bulletin's iconic "Doomsday Clock" stimulates solutions for a safer world.

Environment-cultural Interaction and the Tribes of North-East India

Sacred Natural Sites are the world's oldest protected places. This book focuses on a wide spread of both iconic and lesser known examples such as sacred groves of the Western Ghats (India), Sagarmatha / Chomolungma (Mt Everest, Nepal, Tibet - and China), the Golden Mountains of Altai (Russia), Holy Island of Lindisfarne (UK) and the sacred lakes of the Niger Delta (Nigeria). The book illustrates

that sacred natural sites, although often under threat, exist within and outside formally recognised protected areas, heritage sites. Sacred natural sites may well be some of the last strongholds for building resilient networks of connected landscapes. They also form important nodes for maintaining a dynamic socio-cultural fabric in the face of global change. The diverse authors bridge the gap between approaches to the conservation of cultural and biological diversity by taking into account cultural and spiritual values together with the socio-economic interests of the custodian communities and other relevant stakeholders.

Landscape and Sustainability

The state of Meghalaya, formed on 21 January 1972, is a state of fascinating socio-cultural significance. Its heritage can be traced from the prehistoric times of Stone Age up to the present. Though comprising mainly of the matrilineal Khasi, Garo, and Jaintia tribes – the state also houses many other lesser known communities such as the Hajong, Sakachep, Biate, Koch, Dalu, Margnar and the Nepali. All these communities find voice in this volume. This book looks at the state of Meghalaya exhaustively from the perspective of heritage documentation and maintenance. The 38 chapters written by anthropologists and independent researchers, present the rich traditions found in the region. This volume will be of great help to academicians, researchers, students, and laymen interested in a comprehensive study of the region. Please note: This title is co-published with Manohar Publishers, New Delhi. Taylor & Francis does not sell or distribute the Hardback in South Asia.

Interior, Environment, and Related Agencies Appropriations for 2018: Supplemental oversight, U.S. Forest Service; Supplemental oversight, Department of the Interior

Bhutan is a small landlocked country situated in the eastern Himalayas. It is bordered by India to the south, east and west, and China to the north. Bhutan is known for its unique approach towards measuring progress through the Gross National Happiness (GNH) index, rather than the Gross Domestic Product (GDP). The index measures happiness and well-being in areas such as community vitality, cultural diversity, environmental conservation, and good governance. Buddhism is the predominant religion in Bhutan, and it is deeply ingrained in the country's culture. The government has also placed emphasis on preserving the country's cultural heritage, and Bhutan is known for its architecture, art, dances, and festivals. Visitors to Bhutan can explore ancient dzongs (fortresses) and monasteries, hike the stunning Himalayan mountains, and experience unique cultural events such as the Paro Tsechu (festival). With its focus on sustainable development and preservation of its cultural heritage, Bhutan offers an unforgettable and enriching travel experience.

Bulletin of the Atomic Scientists

Over 3,000 organizations and agencies.

Sacred Natural Sites

Our environment is affected by several factors; namely: physiographic, biotic and climatic. Across the globe, we are witnessing several climatic events. Although the climate is a common concern of humankind but human activities itself, have been substantially contributing to the enhancement of concentrations of greenhouse gases. The change in climate is attributed directly as well as indirectly to human actions, affecting the totality of the biosphere. This book is a humble attempt to bring some of the multidisciplinary aspects relating to Climate Change. An effort has been made to maintain the original plan of this first environmental law publication and its distinctive qualities of explaining several multidisciplinary facets of Climate Change. It is hoped that this first publication of Centre for Environmental Law, National Law University and Judicial Academy will occupy a premier status as an unrivalled classic on the cross-disciplinary areas relating to Climate Change. This book, not only highlights the legal dimension of climate change (ranging from international to national & municipal frames) but also socio-economic aspects of Climate Change. The editors hope that the readers will find this book enriching and informative.

The Cultural Heritage of Meghalaya

This collection brings together original, small-scale, ethnographic research on minorities and communities contesting heritage, livelihood, language, and citizenship in Thailand. The case studies included here look at the rights of communities to manage their own cultural and natural resources across a

range of settings including ethnic Khmer communities in the Northeast, migrant groups in metropolitan Bangkok, and hill tribe communities in the North of Thailand. The studies individually and collectively draw attention to conditions that are conducive to rights claiming, and they explore how and in what situations community leaders choose to negotiate with the state using other discourses. Readers interested in the limits and possibilities of invoking rights in the pursuit of diversity and pluralism will find in this book critically-minded, conceptually nuanced, and empirically grounded explorations of the interrelationship between culture and rights. The book's theoretical and analytic insights contribute to the anthropology of rights as well as heritage studies by raising questions about the possibilities and limitations of rights-informed approaches to policy. Rights to Culture will appeal to students, scholars, and practitioners of cultural heritage in Thailand and Southeast Asia, as well as globally. What others are saying "Rights To Culture explores one of the most important and conceptually difficult topics in current heritage studies through case studies located in a nation of significant ethnic diversity and political complexity. The authors masterfully interweave history, environment, and cultural policy in deeply nuanced ethnographic analyses of communities that range in scale from rural villages to the pulsating urban capital of Bangkok. Rights To Culture is an outstanding contribution to debates about culture and rights globally."—Helaine Silverman, University of Illinois at Urbana-Champaign "This book illustrates how the complex processes of transculturation are experienced by heterogeneous groups of people who are always excluded as "other" in so-called homogeneous Thai society... Most important of all is the central argument that culture and rights have provided a negotiating space for these invisible people in their politics of identity to allow them to fully participate in development."—Anan Ganjanapan, Emeritus, Chiang Mai University.

Communication, Race, and Outdoor Spaces

Cincinnati Magazine taps into the DNA of the city, exploring shopping, dining, living, and culture and giving readers a ringside seat on the issues shaping the region.

Introduction to Bhutan

This book covers themes related to the geosphere, biosphere, sociosphere and ecosphere dealing with changing geographical, environmental and socio-economic realities to plan a sustainable future for the northeast region (NER) of India. The NER consists of eight states—Assam, Arunachal Pradesh, Tripura, Nagaland, Manipur, Mizoram, Meghalaya and Sikkim—and they carry political, economic and social importance. The book integrates the past, present and future of geospheric attributes incorporating progress towards the Sustainable Development Goals (SDGs) to meet the demands for improving human wellbeing under diverse and challenging socio-economic, political and environmental conditions. The key SDGs, as in food and agriculture, health, education, water, energy and other overarching goals of the region, have yet to incorporate providing sustainable jobs and promoting equality and inclusive development, although there have been a few studies in that regard. The challenges to achieve SDGs in the NER are formidable compared to the rest of India. The NER has put a great deal of effort into achieving the SDGs, mainly in poverty (SDG-1), good health (SDG-3), education (SDG-4), gender (SDG-5), decent work (SDG-8) and reduced inequalities (SDG-10), similar to the rest of the country. However, the standard development indicators such as road length, access to health care, power consumption and other measures are far below the national average. A multi-pronged strategy has played a pivotal role in the region, but development strategy to attain the SDGs 2030 must be more inclusive in empowering people with maximising self-governance, considering the resources, needs and aspirations of the people. This book evaluates the performance of the SDGs and fills in the gaps. It includes case studies focusing on different SDGs using advanced cartographic, statistical and GIS techniques and methods. It also provides unique findings that serve as valuable resources for planners and policy-makers so that a sustainable future in Northeast India can be achieved.

The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security. Founded by Manhattan Project Scientists, the Bulletin's iconic "Doomsday Clock" stimulates solutions for a safer world.

In Pursuit of Climate Resilience

Global Perspectives on Eco-Aesthetics and Eco-Ethics: A Green Critique focuses on the interface of the Anthropocene, sustainability, ecological aesthetics, multispecies relationality, and the environment

as reflected in literature and culture. This book examines how writers have addressed ecological crises and environmental challenges that transcend national, cultural, political, social, and linguistic borders. It demonstrates how, as the environmental humanities developed and emerged as a critical discipline, it generated a diverse range of interdisciplinary fields of study such as ecographics, ecodesign, ecocinema, ecotheology, ecofeminism, ethnobotany, ecolinguistics, and bioregionalism, and formed valuable, interdisciplinary networks of critique and advocacy—and its contemporary expansion is exceptionally salient to social, political, and public issues today.

Conservation Directory

This *Vast Book of Nature* is a careful, engaging, accessible, and wide-ranging account of the ways in which the White Mountains of northern New Hampshire---and, by implication, other wild places---have been written into being by different visitors, residents, and developers from the post-Revolutionary era to the days of high tourism at the beginning of the twentieth century. Drawing on tourist brochures, travel accounts, pictorial representations, fiction and poetry, local histories, journals, and newspapers, Pavel Cenkl gauges how Americans have arranged space for political and economic purposes and identified it as having value beyond the economic. Starting with an exploration of Jeremy Belknap's 1784 expedition to Mount Washington, which Cenkl links to the origins of tourism in the White Mountains, to the transformation of touristic and residential relationships to landscape, *This Vast Book of Nature* explores the ways competing visions of the landscape have transformed the White Mountains culturally and physically, through settlement, development, and---most recently---preservation, a process that continues today.

Rights to Culture

North East India is called nature's gift to India. It is mountainous, thickly forested, nourished by massive rainfall, has massive rivers, has a diverse wildlife, inhabited a number of forest dwellers called tribes who cherished environmentalist ethos. The region has been experiencing environmental depletion which was a result of colonial policies, exploitation of its ecological and mineral resources, large scale trans-border immigration and settlement of people, establishment of the plantation industry through deforestation and the dependence of the dairy industry on grazing and other factors. This book depicts the precariousness of the environmental situation and traces the history and politics of such degeneration with a view to raise the consciousness of the people of the region towards their environment and save it from further aggravation.

La vision des Andes

Pour la première fois dans l'histoire humaine, les découvertes scientifiques et les expériences spirituelles convergent pour nous offrir une vision différente de notre évolution. Si l'univers était en réalité un lieu intelligent et multidimensionnel où les hommes se laisseraient guider par leur intuition et les coïncidences ? Une sensibilité nouvelle au monde et aux autres pourrait ainsi transformer de l'intérieur la vie, la famille et les institutions. Prières, groupes d'entraide, rêves, synchronicités... James Redfield montre concrètement comment libérer notre potentiel intérieur et contribuer ainsi au bien-être collectif. Un livre d'avant-garde pour participer à la fabuleuse évolution de la planète et relever les défis du troisième millénaire.

La vision des Andes

In this step-by-step guide James Redfield begins his exploration of the emerging interest in spirituality around the globe. Beginning with a survey of the most common synchronistic experiences, he shows how those interested in broadening their spiritual perception can actually experience for themselves the shifts in consciousness that are changing the human world. Described as the most direct explanation of the new world vision presented in the phenomenally successful Celestine fiction series, this fascinating and illuminating book reveals the author's inside view of how we are discovering the transcendent in our everyday existence and interpreting our individual synchronicity to find our destined purpose in life. Based on James Redfield's own experiences and those reported to him from every corner of the world since the writing of The Celestine Prophecy and The Tenth Insight, this book describes the first-hand growth techniques Celestine fans everywhere are looking for - perfectly setting the stage for the next remarkable book in the Celestine series, The Eleventh Insight.

Celestine Vision

In The Celestine Vision, Redfield discusses for the first time the historical and philosophical background of the planetary awakening examined in his other titles, and guides readers through the strategies that can help them to recognize and explore their own vision for their lives. Boxed.

The Celestine Vision

El despertar de una nueva conciencia espiritual y universal hacia el nuevo milenio. Redfield nos guía a través de las estrategias que nos ayudan a reconocer y a explorar nuestra propia visión existencial y nos invita a explorar un nuevo universo de posibilidades.

La nueva visión espiritual

This book offers a new, art-historical interpretation of pre-contact Inca culture and power and includes over sixty color images.

Art and Vision in the Inca Empire

What similarities and differences do humans see between themselves and animals? Why do people commonly make metaphorical comparisons between human beings or social groups and animals, and to what degree are people's attitudes and beliefs about animals parallel to or contingent upon their attitudes and beliefs about human beings and human society? This collection of articles considers these issues. The issues are basic in any study of "totemism," or human and animal relationships, and they have been discussed in anthropological literature since the time of Lewis Henry Morgan's work on Iroquois social organization. The contributors to this anthology have not limited themselves to the notion that clans and moieties are the only sources and objects of metaphorical comparisons between humans and animals. They suggest a shift in perspective that has metaphorical comparisons generated by conceived similarities and differences between animals and particular types of human beings. Some examples of this include macaw fledglings as adolescents; pumas as fully initiated men, and foxes as young married men. With this shift of emphasis, a significantly different analytic focus in the study of human-animal relations is produced.

Sociétés des Andes

The present volume brings to North American Native Studies – with its rich tradition and accumulated expertise in the Central European region – the new complexities and challenges of contemporary Native reality. The umbrella theme 'Indigenous perspectives' brings together researchers from a great variety of disciplines, focusing on issues such as democracy and human rights, international law, multiculturalism, peace and security, economic and scientific development, sustainability, literature, and arts and culture, as well as religion. The thirty-five topical and thought-provoking articles written in English, French and Spanish offer a solid platform for further critical investigations and a useful tool for classroom discussions in a wide variety of academic fields.

Animal Myths and Metaphors in South America

Rival presents a comprehensive academic study of the Huaorani, correcting distorted portrayals of them by journalists, missionaries, environmentalists, and tour guides as 'Ecuador's last savages'.

la trilogie des andes

Man's symbiosis with plants is the most fundamental material fact of human life on the earth. Geographers, as well as botanists, anthropologists and other scientists, have long been interested in this aspect of the man-nature theme. In American geography, CARL O. SAUER emphasized a temporal as well as spatial perspective in the cultural understanding of man's relationship to biological phenomena. His researches and those of his associates in the 'Berkeley school' showed that the most fruitful possibilities for implementing this approach are in non industrial societies which have direct and pervasive links between plants and man (GADE, 1975). The study that follows is a geography of plant resources in an important Andean valley having great environmental diversity and a cultural constant, in so far as a non-literate, Quechua-speaking peasantry dominates through out the zone. My basic objective has been to understand the present use of plants, cultivated and wild, as they have varied from place to place and through time. Primary and secondary documents and local informants were important sources of historical information. Most of the contemporary data in this study were derived from over 20 months of empirical observations of the day-to-day existence of farming folk in their fields, homes and markets. The great natural beauty of the Vilcanota depression is matched only by the stark poverty which has been the lot of the majority of people who live there.

Indigenous Perspectives of North America

Cet ouvrage met en relief le nouvel essor des expressions culturelles autochtones et les conditions de leur réception. Il s'appuie sur des études et des analyses qui mettent en relief la manière dont nos sociétés se transforment, grâce à une véritable renaissance des cultures autochtones ayant cours depuis quelques décennies, et les enjeux et les défis que cela représente du point de vue de leur reconnaissance. Ce sont avant tout les relations entre sociétés autochtones et non autochtones qui sont appelées à être reconsidérées dans ce contexte, à travers des expressions littéraires, ciné-

matographiques, théâtrales, performatives et politiques, qui appellent des interprétations susceptibles de changer les perceptions culturelles qui sont mises en cause des deux côtés de ces relations. Cet ouvrage table sur des rencontres qui permettent de nous reconnaître mutuellement selon de nouvelles avenues, plus respectueuses des conditions permettant de concevoir comment vivre en commun une expérience de réelle réconciliation.

Catalogue of Scientific Papers (1800-1863)

Offering an alternative narrative of the conquest of the Incas, Gonzalo Lamana both examines and shifts away from the colonial imprint that still permeates most accounts of the conquest. Lamana focuses on a key moment of transition: the years that bridged the first contact between Spanish conquistadores and Andean peoples in 1531 and the moment, around 1550, when a functioning colonial regime emerged. Using published accounts and array of archival sources, he focuses on questions of subalternization, meaning making, copying, and exotization, which proved crucial to both the Spaniards and the Incas. On the one hand, he re-inserts different epistemologies into the conquest narrative, making central to the plot often-dismissed, discrepant stories such as books that were expected to talk and year-long attacks that could only be launched under a full moon. On the other hand, he questions the dominant image of a clear distinction between Inca and Spaniard, showing instead that on the battlefield as much as in everyday arenas such as conversion, market exchanges, politics, and land tenure, the parties blurred into each other in repeated instances of mimicry. Lamana's redefinition of the order of things reveals that, contrary to the conquerors' accounts, what the Spaniards achieved was a "domination without dominance." This conclusion undermines common ideas of Spanish (and Western) superiority. It shows that casting order as a by-product of military action rests on a pervasive fallacy: the translation of military superiority into cultural superiority. In constant dialogue with critical thinking from different disciplines and traditions, Lamana illuminates how this new interpretation of the conquest of the Incas revises current understandings of Western colonialism and the emergence of still-current global configurations.

La visión cósmica de los Andes

This book explores the interaction between two of the most charged topics in the modern world, religion and politics. It shows the inextricable connection between religious attitudes and representations, and political activities. After an introductory chapter explores theoretically the religious articulations of political power, the authors examine the role played by religion in the current political situation in several countries. Approaching these cases as anthropologists, historians, sociologists, and political scientists, the authors make visible the dialectical relationship between religion and the pursuit of political power—on the one hand, the political significance of religious choices, and on the other, the almost unavoidable need to articulate in religious terms a group's attempt to acquire, maintain, or expand political power.

Trekking Through History

De quelle éducation avons-nous besoin au XXI^e siècle ? Quelles en devraient être les finalités dans le contexte actuel, où les sociétés sont en pleine mutation ? Comment l'éducation doit-elle être organisée ? Telles sont les questions qui ont inspiré les idées exposées dans cette publication. Elle rassemble les contributions de nombreux experts internationaux qui voient dans cette refondation de l'éducation une urgence face aux inégalités, à l'exclusion et à la violence qui ne cessent de croître dans le monde entier.

Plants, Man and the Land in the Vilcanota Valley of Peru

A comprehensive guide to the history, beliefs, concepts, practices, and major figures of religions past and present.

La renaissance des cultures autochtones

" La planète Terre ne peut acquérir une conscience spirituelle plus élevée que grâce à des individus comme vous, qui prennent du recul et décident que la vie est vraiment beaucoup plus mystérieuse que nous ne le croyions ; ils devront ensuite rompre avec leurs habitudes de scepticisme et de négation... pour découvrir la nature de leur propre mission et trouver une manière intuitive de contribuer à l'élévation spirituelle de ce monde. " La prophétie des Andes est un livre qui a changé la vie de

millions de personnes dans le monde. Ceux qui ont lu ce formidable roman initiatique ont découvert des coïncidences troublantes dans leur existence. Voici aujourd'hui le guide-compagnon du best-seller mondial de l'aventure spirituelle. A travers des explications précises et des exercices, James Redfield vous apprend à clarifier votre passé et vos idées, à améliorer vos relations avec les autres et à travailler avec les énergies positives.

Domination without Dominance

J'ai commencé à écrire ce livre, qui n'en était pas un en 2013. Ce n'était à l'époque que mon journal intime, mais pas seulement, c'était mon ami, mon confident. Il m'a permis de poser les choses, d'évacuer et parfois de comprendre les pratiques auxquelles je faisais face, tel que la clairvoyance, la clairsaudience, la lithothérapie, le pendule et la cartomancie. Plus j'avancais dans son écriture, plus l'envie d'un jour partager toutes mes expériences avec vous augmentait, jusqu'au jour où. Ce journal s'est transformé en témoignage, dans lequel vous vous retrouverez peut-être. Mon souhait est que chacun ne se sente plus seul dans les épreuves et ou découvertes "paranormales" que vous n'ayez plus peur et que vous trouviez des solutions qui je l'espère vous guideront.

Religion and Political Power

Une analyse des rites et de la tradition orale quechua sur les morts dans leur contexte social actuel, complétée d'un retour sur l'histoire de l'évangélisation pour aider à comprendre l'articulation entre héritages autochtones de l'ancienne religion et apports du catholicisme européen.

Repenser l'Éducation

Les Inca de Tintin en chair et en os ? En 2001, le président du Pérou Alejandro Toledo s'est fait introniser en Inca à Machu Picchu par des chamanes qui ont présenté des offrandes aux dieux des montagnes. Le président de Bolivie Evo Morales s'est fait introniser dans le temple de Tiwanaku habillé en Aymara. Jacques Galinier et Antoinette Molinié nous montrent comment le « néo-Indien » qui émerge en Amérique latine ne sort ni d'une monographie ethnographique, ni d'un métissage antiraciste. Mais de notre culture télévisuelle et de Disneyland. Il s'habille en prince aztèque ou en Inca les jours de fête, et ses vêtements traditionnels inspirent les stylistes californiens. Il ne danse plus pour la pluie, mais pour les touristes. Il pille les écrits des ethnologues pour découvrir ses rituels. Un phénomène déconcertant mélangeant tour-opérateurs, nouvelles spiritualités, ethnologie et altermondialisme. Jacques Galinier et Antoinette Molinié, ethnologues américanistes, sont directeurs de recherche du CNRS au Laboratoire d'ethnologie et de sociologie comparative à l'université Paris-X-Nanterre.

The Encyclopedia of Religion

Here are 80 articles on mythologies from around the world, including Native Americans, African, Celtic, Norse, and Slavic, and about such topics as fire, the cosmos, and creation. Also includes an overview of the Indo-Europeans and an essay on the religions and myths of Armenia. Illustrations.

Les leçons de vie de la prophétie des Andes

Le corps humain est une grande merveille. Pourtant, il y a des moments où cette merveille se détraque. La fatigue normale qui s'effaçait après une bonne nuit de sommeil se transforme en fatigue chronique. Des petits malaises apparaissent ici et là. L'effort physique devient plus pénible et l'activité mentale, plus lente. Que nous arrive-t-il ? Est-ce possible alors de retrouver notre vitalité d'avant ? Dans ce guide indispensable, Nicole Gratton nous apprend à reconnaître les facteurs qui influencent notre énergie physiologique et psychique, tels que : • Le sommeil • La respiration • L'alimentation • L'exercice • La méditation Elle nous propose également des stratégies judicieuses afin de mieux gérer notre banque énergétique, lesquelles passent par la diminution des comportements nuisibles, l'augmentation des actions tonifiantes et l'adoption d'habitudes saines. Découvrons les secrets de la vitalité, pour refaire le plein d'énergie... en toute simplicité !

Révélations

Existe-t-il une différence entre le HASARD et les COÏNCIDENCES? Oui certes, cette nuance est bien mince, mais elle existe. Le hasard fait l'objet d'une sorte de probabilité mathématique. Les coïncidences, quant à elles, apparaissent uniquement lorsque l'on s'en préoccupe. Comment reconnaître les coïncidences? Quels sont leurs liens avec l'intuition? Comment comprendre suffisamment leur mé-

canisme pour les provoquer? Toutes les réponses à ces questions se trouvent dans ce livre. L'auteure nous partage donc COMMENT chacun de nous pouvons DÉCELER et CRÉER nos coïncidences, quotidiennement dans notre vie. Les coïncidences sont toujours des signes, des messages, parfois à peine subtils, quelquefois totalement électrisants ou excitants. Les reconnaître contribue à votre évolution et ajoute véritablement du pouvoir à votre vie. La première partie de ce livre est consacrée à découvrir les trésors des coïncidences de la vie ou comment reconnaître vos coïncidences? La deuxième partie sera consacrée à : comment créer vos coïncidences magiques? Dès le début de votre lecture les coïncidences ne vont pas cesser de se produire. Regardez bien dès à présent...

Miroirs de l'autre vie

Un dels grans etnòlegs evolucionistes, James Frazer, va predir que totes les societats humanes haviem de passar, en un procés evolutiu lineal, per tres grans etapes: la màgica, la religiosa i la científica. Semblantment, Frazer estava convençut que les societats occidentals estaven plenament instal·lades a la fase científica. Però l'art de la predicció, com el de la profecia, és una tècnica arriscada i, si mirem al nostre voltant, tot sembla indicar que Frazer anava força desencaminat, ja que, si bé és cert que les religions hegemòniques han perdut el paper polític, cultural i simbòlic que havien tingut fins als anys setanta del segle xx (procés conegut a les ciències socials com a secularització o desencantament del món), també ho és que, contra tots els pronòstics, després de la segona guerra mundial, s'ha produït un nou «reencantament del món», que engloba un camp ampli de significats i fronteres incertes. Aquesta proliferació de pràctiques, creences i imaginaris ha rebut diferents denominacions, com per exemple Nova Era o New Age, àmbit difús del misteri o espiritualitats emergents, o nebulosa misticoesotèrica. Nosaltres hem optat per denominar-ho Nous Imaginaris Culturals.

Néo-Indiens (Les)

4e de couverture: Le voyage inachevé prolonge le dialogue que Joël Bonnemaison, précocement arraché à la vie en 1997, menait depuis longtemps avec les autres. Avec les insulaires du pacifique qui insufflèrent ses intuitions les plus riches et auxquels il consacra ses plus belles pages. Avec les nombreux chercheurs que les connivences intellectuelles et les liens d'amitié ont réunis autour de cet ouvrage dédié à sa mémoire. L'œuvre maitresse de Joël Bonnemaison sur l'archipel du Vanuatu, récemment rééditée, est un moment décisif dans l'affirmation d'une géographie culturelle à part entière. Le Voyage inachevé poursuit la quête de sens si magistralement engagée. La centaine de contributions qu'il rassemble témoigne du foisonnement d'un champ scientifique de plus en plus attentif à la dimension culturelle. L'inflexion apportée à l'étude des lieux, des territoires et des peuples répond à une sensibilité nouvelle qui parcourt l'ensemble des sciences sociales. En plaçant l'homme au centre de la connaissance, elle revendique la subjectivité des cultures, valorise l'altérité créatrice et la richesse des patrimoines menacés par le rouleau compresseur de la mondialisation. Le Voyage inachevé est une invitation à feuilleter le grand livre du monde dans sa chatoyante diversité.

Précis de la géographie universelle ou Description de toutes les parties du monde sur un plan nouveau d'après les grandes divisions naturelles du globe

One of the great repositories of a people's world view and religious beliefs, the Huarochirí Manuscript may bear comparison with such civilization-defining works as Gilgamesh, the Popul Vuh, and the Sagas. This translation by Frank Salomon and George L. Urioste marks the first time the Huarochirí Manuscript has been translated into English, making it available to English-speaking students of Andean culture and world mythology and religions. The Huarochirí Manuscript holds a summation of native Andean religious tradition and an image of the superhuman and human world as imagined around A.D. 1600. The tellers were provincial Indians dwelling on the west Andean slopes near Lima, Peru, aware of the Incas but rooted in peasant, rather than imperial, culture. The manuscript is thought to have been compiled at the behest of Father Francisco de Avila, the notorious "extirpator of idolatries." Yet it expresses Andean religious ideas largely from within Andean categories of thought, making it an unparalleled source for the prehispanic and early colonial myths, ritual practices, and historic self-image of the native Andeans. Prepared especially for the general reader, this edition of the Huarochirí Manuscript contains an introduction, index, and notes designed to help the novice understand the culture and history of the Huarochirí-area society. For the benefit of specialist readers, the Quechua text is also supplied.
