

comparative study of male and female students

[#gender studies](#) [#academic performance](#) [#student achievement](#) [#learning styles](#) [#educational research](#)

This study provides a comparative analysis of academic performance and learning styles between male and female students. It explores potential gender-related differences in student achievement, examining factors such as study habits, classroom participation, and overall academic success. The findings contribute to a deeper understanding of how gender may influence educational outcomes and inform strategies to promote equitable learning environments for all students.
