The child's guide to knowledge, by a lady [F. Ward].

Excerpt from The Child's Guide to Knowledge: Being a Collection of Useful and Familiar Questions and Answers on Every-Day Subjects Adapted for Young Persons, and Arranged in the Most Simple and Easy Language The most common-place subjects, and those which occur most frequently in almost every conversation, are, by youth, either totally disregarded, or but imperfectly understood. This indifference arises from the erroneous supposition, that words and subjects so constantly in use are, in a general sense, sufficiently understood by every one, and therefore that inquiries as to how, where, when, &c., would be redundant, and that particular information would be unimportant, or at least unnecessary. To convince youth of the importance and necessity of a thorough acquaintance with such subjects, and to habituate them to inquiry, by tracing the connexion and bearing of one subject on another, is the object which the authoress of this volume has in its publication. Excerpt from Parents' and Teachers' Guide to Reading Courses: The Book of Knowledge; The Children's Encyclopædia Enthusiastic letters regarding this new method of enlarging and supplementing the child's school work and home life by delightful educational reading and play have come in to the Publishers from all over the country. Some valuable suggestions have also been received from prominent educators. Chief among these, was the request that we furnish parents and teachers with an analysis of each of the Great Departments of Knowledge, which this work comprehends, and which the index naturally does not reveal, or the psychological arrangement permit. How and Why to Read and Create Children's Digital Books outlines effective ways of using digital books in early years and primary classrooms, and specifies the educational potential of using digital books and apps in physical spaces and virtual communities. With a particular focus on apps and personalised reading, Natalia Kucirkova combines theory and practice to argue that personalised reading is only truly personalised when it is created or co-created by reading communities. Divided into two parts, Part I suggests criteria to evaluate the educational quality of digital books and practical strategies for their use in the classroom. Specific attention is paid to the ways in which digital books can support individual children's strengths and difficulties, digital literacies, language and communication skills. Part II explores digital books created by children, their caregivers, teachers and librarians, and Kucirkova also offers insights into how smart toys, tangibles and augmented/virtual reality tools can enrich children's reading for pleasure. How and Why to Read and Create Children's Digital Books is of interest to an international readership ranging from trainee or established teachers to MA level students and researchers, as well as designers, librarians and publishers. All are inspired to approach children's reading on and with screens with an agentic perspective of creating and sharing. Praise for How and Why to Read and Create Children's Digital Books 'This is an exciting and innovative book – not least because it is freely available to read online but because its origins are in primary practice. The author is an accomplished storyteller, and whether you know, as yet, little about the value of digital literacy in the storymaking process, or you are an accomplished digital player, this book is full of evidence-informed ideas, explanations and inspiration.' Liz Chamberlain, Open University 'At a time when children's reading is increasingly on-screen, many teachers, parents and carers are seeking practical, straightforward guidance on how to support children's engagement with digital books. This

volume, written by the leading expert on personalised e-books, is packed with app reviews, suggestions and insights from recent international research, all underpinned by careful analysis of digital book features and recognition of reading as a social and cultural practice. Providing accessible guidance on finding, choosing, sharing and creating digital books, it will be welcomed by those excited by the possibilities of enthusing children about reading in the digital age.' Cathy Burnett, Professor of Literacy and Education, Sheffield Hallam University

Reading for pleasure urgently requires a higher profile to raise attainment and increase children's engagement as self-motivated and socially interactive readers. Building Communities of Engaged Readers highlights the concept of 'Reading Teachers' who are not only knowledgeable about texts for children, but are aware of their own reading identities and prepared to share their enthusiasm and understanding of what being a reader means. Sharing the processes of reading with young readers is an innovative approach to developing new generations of readers. Examining the interplay between the 'will and the skill' to read, the book distinctively details a reading for pleasure pedagogy and demonstrates that reader engagement is strongly influenced by relationships between children, teachers, families and communities. Importantly it provides compelling evidence that reciprocal reading communities in school encompass: a shared concept of what it means to be a reader in the 21st century; considerable teacher and child knowledge of children's literature and other texts; pedagogic practices which acknowledge and develop diverse reader identities; spontaneous 'inside-text talk' on the part of all members; a shift in the focus of control and new social spaces that encourage choice and children's rights as readers. Written by experts in the literacy field and illustrated throughout with examples from the project schools, it is essential reading for all those concerned with improving young people's enjoyment of and attainment in reading.

For effective use, this book should be purchased alongside the illustrated picture book Harry's Story. Both books can be purchased together as a set, Supporting Children with DLD: A Picture Book and User Guide to Learn About Developmental Language Disorder [978-0-367-70920-4]. Supporting Children with DLD, has been developed to help raise awareness of Developmental Language Disorder, and to highlight the impact of the condition from the child's point of view. With activities, prompts and sample questions, this is an essential resource to enable adults to understand the reality of living with DLD, helping children feel heard and respected, as well as providing a solid foundation for tailoring support to individual needs. Drawing on specific examples from Harry's Story, the book does not assume any prior knowledge of DLD and is designed to offer the reader accessible information and practical advice, teaching as you go. This book: Highlights the link between spoken and written language, addressing the need to recognise the literary difficulties faced by children with DLD Provides practical activities and worksheets that can be used to help children express themselves and ask for help Offers strategies for supporting children's understanding of language, based on common situations and experiences explored in Harry's Story Written to be an accessible introduction to DLD and its effect on children's lives, this is an essential resource for parents and professionals looking to understand the condition.
