International Human Resource Management

According to the 2006 World Investment Report issued by the United Nations, there are currently a total of 77,000 transnational corporations with over 770,000 foreign affiliates which employ 62 million workers worldwide. In 1990, when the 1st Edition of this textbook was published, a total of 24 million workers were employed. This is merely one of many metrics that demonstrate the extent of the globalization of business. With this increase in scale, the role of human resource management in sustaining this increase in international business activity is a central theme of this 5th Edition of our textbook. In writing this new edition we have retained much of the format that we developed for the 4th Edition while including expanded coverage of the international business context in which International Human Resource Management operates. The challenge of this 5th Edition has been to organize the complexities particular to HRM activities in multinational enterprises in such a way that provides teachers (of both undergraduate and graduate students) real choice as to how they will present the material. We have tried to find a balance that is meaningful and appropriate to the varying cultures represented by potential adopters and readers, and across educational traditions, institutions and forms, while accurately capturing the compelling realities facing HRM professionals practicing in multinational enterprises.

Essentials of International Human Resource Management

Scientific Essay from the year 2010 in the subject Leadership and Human Resource Management - Miscellaneous, grade: 1,0, University of St Andrews, course: Managing People in Global Markets, language: English, abstract: "The primary cause of failure in multinational ventures stem from a lack of understanding of the essential differences in managing human resources in foreign environments" (Desatnick & Bennett 1978). The world has become more globalized, competitive, dynamic and uncertain than ever before. As more and more firms operate internationally, the search for the elements of global competitive advantage is a prominent theme in the management literature (Dickman & Müller-Camen, 2006: 580). There is a clear need to develop an understanding of how to compete successfully on the global playing field. A major component of this understanding appears to be the field of human resource management and, in particular, the field of international human resource management (IHRM) (Schuler, et al., 1993: 419). The effective management of human resources in an international context is increasingly seen as a key source of competitive advantage in international business; and the quality of management seems to be even more critical in international than in domestic operations (e.g. Monks, et al., 2001). Due to the importance of the topic, there has been a significant amount of research on IHRM in recent years. Some of the major debates are concerned with the development of models and concepts of strategic international human resource management (SIHRM) (e.g. Schuler & Tariq 2007) and the question whether successful domestic HR strategies can be applied in a global context (e.g. Schuler & Jackson, 2007: 162). The aim of this essay is to compare domestic human resource management (DHRM) with the concept of IHRM. After briefly defining the key terms, the author will outline both concepts and identify all major similarities and differences. At the end, some final conclusions will be drawn.

Essentials of International Human Resource Management

Conducting business across national borders is nothing new; the Knights Templar were banking internationally as long ago as 1135. But modern globalization processes raise different challenges, and as the world becomes smaller and labour movements more common, an international understanding of human resource management is essential. The second edition of International HRM provides a fully updated and revised analysis of this important area. Its innovative, multi-disciplinary approach allows a holistic picture to emerge in which key issues are assessed from organizational, individual and societal perspectives. The collection is divided into three parts: the contemporary internationalization context the management of international employees strategic issues facing international HR managers. Supported by new research, and including work from eminent writers in the field, this book discusses issues as diverse as the relative absence of women in international work, the ethical merits of localization, and the context faced by organizations like the United Nations. It is a valuable tool for all students, researchers and practitioners working in international business and human resource management.

Diffusion of HRM to Europe and the Role of US MNCs

At the firm level, it elucidates the strategic goals served by IHRM, and the processes used to achieve them. At the individual level, the analysis extends beyond the traditional focus on expatriates to encompass the various IHRM actors and their motivations. The book concludes with three extended case studies, each based on a specific region, to help students consolidate their understanding.

Differences and Similarities Between International and Domestic Human Resource Management

From the mid-1980s to the turn of the 1990s the international HR field was considered to be in its infancy. There continues to be both an evolution of territory covered by the field – a series of successively evolving cultural, geographical and institutional challenges faced by the multinational corporation (MNC) – as well as more critical questioning whether this has created an expanded or a fragmented field. This book brings together the latest research on important “issues-driven” concerns that the field of IHRM now has to face, absorb, interpret then reanalyse through international lenses. This volume gives attention to those aspects of MNC behaviour – choices about location, how they organize local subsidiaries, choices made about technology, capital and labour, and choices made about investments and strategies – that are subject to institutional influences. It also gives voice to a number of contemporary issues – reverse knowledge flows, skill supply strategies, employer branding, e-enablement, outsourcing, global networks – that now need to be accommodated within the field. Broadens the IHRM field to cover comparative and institutional perspectives Provides a multi-level analysis of globalization phenomena at the individual, organization, and macro level Focuses on the current problems and issues driving the attention of IHRM Directors

Outlines and Highlights for International Human Resource Management

This is a new kind of human resource management text because it is written with the general manager in mind. The text provides a base of key organizational behavior material on why employees behave as they do and how to promote behavior required to implement a focused business strategy using staffing, development and reward systems. Organized around the concept of creating integrated HRM systems, students first learn about the processes that explain work behaviors. Students are then acquainted with key issues such as linking HRM systems to a firm's business strategy. That knowledge is then used to design an integrated set of HRM practices promoting the behaviors needed for a particular organization. The text provides detailed and practical examples of the entire process of assessing an organization and designing integrated staffing, development and reward practices. As a result, students become better informed “consumers” of the specialized services provided by in-house human resource professionals and outside consultants and gain insight into how to translate theory into practice.

Completing the Puzzle

Armstrong's Essential Human Resource Management Practice provides a complete overview of the practices and processes fundamental to managing people. The text provides a thorough introduction to the core areas of HR including: people resourcing, performance management, learning and development and rewarding people. It also examines the contribution of HR to organizational aims

and objectives and how it is integrated within the business. The book is accompanied by online resources for both lecturers and students and adopts an increased focus on employee engagement, a concept which is becoming increasingly prominent in people management, but which is often presented as a mantra without being properly understood; this is examined in detail with reference to recent research. Michael Armstrong's original Handbook of Human Resource Management is the classic text for all those studying HR or who are entering the profession for the first time. In this new title Michael Armstrong provides a condensed text which has been rewritten with the non-HR student or professional in mind, describing and evaluating key HRM concepts such as: HRM itself; strategic HRM; the resource-based view; the choice between best practice and best fit; human capital measurement; motivation theory; emotional intelligence; the flexible firm; the learning organization; and financial rewards. Online supporting resources for this book include lecture slides, an instructor's manual, case examples and a literature review.

International Human Resource Management

International Human Resource Management tackles the issues raised by cross-national differences in HRM styles. Specifically, it identifies a number of themes: the meaning of globalization and the extent to which it is a novel phenomenon; the challenges to national traditions; the embeddedness of actors in distinct national styles; the way in which many key issues within international HRM are contested; and the extent to which change in national systems is evident. These themes underlie the treatment of the content of the book, which is split into two parts. The first part of the book examines the context of international HRM through an examination of the process of globalization and the origins of the distinctiveness of national business systems. The second part is concerned with particular issues relating to multinational companies, such as how and why they transfer practices across operations in different countries. In addition, this part tackles HR issues in international context, such as management development, pay and reward, and recruitment and selection. This book will appeal to undergraduates taking International HRM courses, those taking Masters programmes in HRM and MBA students. It may also be used as supplementary reading for comparative industrial relations courses that feature multinational companies. Tony Edwards is Senior Lecturer, Department of Management at King's College, London and Chris Rees is Reader in International Employment Relations, Kingston Business School, Kingston University.

Human Resource Strategy: A Behavioral Perspective for the General Manager

Essay from the year 2010 in the subject Business economics - Personnel and Organisation, grade: A, University of St Andrews, language: English, abstract: Human resource management (HRM) is becoming an increasingly important topic as organisations are forced to adapt their operations to a rapidly growing global environment (Boxall, Purcell & Wright, 2007, pp. 216-218). In this regard, international human resource management (IHRM) has gained in substantiality compared to domestic human resource management in terms of management, organisational structures, cultures and workforce utilisation. The sustainable international human resource management is essential for implementing strategies in multinational companies (MNCs) (Bartlett & Ghoshal, 1989). Companies generally engage in internationalisation activities for the following reasons: higher profit and sales potential, risk spreading, realisation of competitive or country-specific advantages (CSAs), reaction to competitor actions, capitalisation on government incentives, securing business relations, access to know-how and hedging of currency movements (Rump, 2006, p. 10). From an HR perspective companies need to address issues such as the selection, recruiting, compensation, and legal/regulatory requirements of a 'global workforce' (Du Plessis, Venter, Prabhudev, 2007, p. 59). Overall, the globalisation has led to a heightened acknowledgement of a well-managed workforce (Keating & Thompson, 2004, p. 595). On top of that, this development has also contributed to the view that HRM has become a function of strategic significance rather than simply a support function (Scullion & Starkey, 2000, pp. 1061-1081; Pucik, 1992, pp. 61-81). The objective of this paper is to provide a clear overview of the differences between domestic and international HRM analysing recent developments and current issues in this subject. The coursework is divided into five chapters. Initially, the general theoretic foundations

The authors explore the degree to which Chinese multinationals have a distinctive 'Chinese' approach to human resource management, in the same way as large Japanese companies are widely regarded as having a special Japanese approach. Based on extensive original research in the subsidiaries of Chinese multinationals outside China, the book examines a wide range of issues related to this key question including the evolution of human resource management in Chinese companies, the internationalization of Chinese business, recruitment and selection, rewards and compensation, performance appraisal, strategic integration, and employee relations. Shen and Edwards give a detailed account of the international human resource management of Chinese multinational enterprises; a topic of increasing significance in understanding global economic affairs.
