The Sense of Touch

Named to Kirkus Reviews Best Books of 2014 Sprung from the variously lush, rugged, and frozen emotional landscapes of the north country, this luminous collection of stories captures the progress of a diverse ensemble of souls as they struggle to uncover themselves and negotiate a meaningful communion, of any kind, with the world around them. A brilliant but troubled Bangladeshi physics student searches for balance, acceptance, and his own extraordinary destiny after his father disappears. When a Halloween blizzard immobilizes Minneapolis, a young woman is forced to confront the snow-bound nature of her own relationships and emotions. During an excursion to an idyllic swimming hole hidden in the Black Hills, two old friends unexpectedly compete for the affections of an irresistible, though married, Lakota woman. Like a mythical expedition to reach the horizon or the quest to distill truth from the beauty around us, the revelation confirmed by these imaginative stories - elegant, sometimes jarring, always wonderfully absurd - is that the very act of reaching is itself a form of touch.

Touch Monkeys

All too often Nonsense is relegated to the nursery. Marnie Parsons argues that, rather than being mere child's play, nonsense is a major force in poetic language. In *Touch Monkeys* she presents us with an original approach to a much-maligned linguistic pursuit. Parsons distinguishes between nonsense language and Nonsense, the genre. Her major chapters work towards a vision of nonsense language as palimpsestic - as involving the overlaying of several ways of making meaning on a verbal sense system, and the consequent disruption of that system. This reading of nonsense is itself an intersection, bringing together historical and contemporary criticism of literary Nonsense and a wide range of poetic and literary theories. Using Carroll and Lear as examples of Nonsense, Parsons provides a survey of existing Nonsense criticism in English, and then extends and elaborates nonsense in theoretical directions set by Gilles Deleuze and Julia Kristeva, among others, and by the poetics of such writers as Charles Olson, Charles Bernstein, Ron Silliman, Steve McCaffery, Louis Zukofsky, and Daphne Marlatt. Following each chapter is a close reading of work by writers as varied as Rudyard Kipling, Colleen Thibodeau, Adrienne Rich, and Lyn Hejinian. These readings provide practical applications of nonsense theory and establish the interdependence of theory and practice. Nonsense inhabits and challenges traditional forms simultaneously; in *Touch Monkeys* Parsons enters into the spirit of the genre.

The Quantum July

DANNY PARSONS IS a dreamer. He loves nothing better than to close his eyes and let the world slip away, dreaming of India, or Alaska, or Kenya - anywhere but his home, living any life but his life. Danny is sure that he was supposed to be someone else, living in a more interesting place, with a more interesting family. Danny's sister, Bridget, believes that Danny's life is more interesting than he knows: she thinks he can set events in motion by touching equations. When she gives him an equation dealing with Chaos Theory to carry in his pocket, an amazing thing happens: Danny's family separates into two. We can't choose our families. But Danny Parsons can. Trapped in the chaos of the quantum world, he's approaching the moment where he will have to, at last, choose - between the father he's always wanted, and the family he desperately needs.

Religions of the Stars

Today's culture is saturated with news about celebrities and their beliefs. Oprah Winfrey, Tom Cruise, and Madonna all promote their own brand of spirituality. What do they really believe, and does it line up with what the Bible teaches? This book answers these questions, appealing to those curious about the religions of the rich and famous while holding up their beliefs to the light of the gospel. Concerned parents will also gain insight into the religious influences their kids may be exposed to in the media.

Bare-Faced Messiah

Bare-Faced Messiah tells the extraordinary story of L. Ron Hubbard, a penniless science-fiction writer who founded the Church of Scientology, became a millionaire prophet and convinced his adoring followers that he alone could save the world. According to his 'official' biography, Hubbard was an explorer, engineer, scientist, war hero and philosopher. But in the words of a Californian judge, he was schizophrenic, paranoid and a pathological liar. What is not in dispute is that Hubbard was one of the most bizarre characters of the twentieth century. Bare-Faced Messiah exposes the myths surrounding the fascinating and mysterious founder of the Church of Scientology - a man of hypnotic charm and limitless imagination - and provides the definitive account of how the notorious organisation was created.

Demorest's Family Magazine

Leo Zagami's groundbreaking study of aliens and UFOs explores where we come from and which mysterious figures have guided humanity's political and religious choices. From the prophets to the initiates and magicians, all ages have drawn from a common source of ultra-terrestrial and magical knowledge, passed down for millennia. This text reveals the identity of the unknown superiors, secret chiefs, and invisible masters who have guided Freemasonry, the Illuminati, and others. Zagami speaks of the existence of multidimensional doors used by the various Illuminati to let other beings into our world, while alluding to the latest discoveries of quantum physics for support. This shocking text will be embraced by those willing to look beyond the everyday to analyze our world's most puzzling circumstances.

The Invisible Master

Under the weight of a combination of forces, many of the older paradigms of learning are being questioned in our time. Among the updated research that elicits such critique is that which deals directly with effective pedagogy, clearly illustrating the enhanced effects on learning when it is dealt with as a holistic developmental enterprise rather than one concerned solely with content, technique and measurable outcomes. This research includes volumes of empirical evidence and conceptual analysis from across the globe that point to the inextricability of values as lying at the heart of those forms of good practice pedagogy that support and facilitate the species of student achievement that truly does transform the life chances of students. This research indicates that the combination of values rich learning environments and values discourse (that is, the holism of implicit and explicit pedagogy) has potential for positive influence on learning outcomes, most markedly for those deemed likely to fail without such pedagogical intervention. *Values Pedagogy and Student Achievement - Contemporary Research Evidence* uncovers, explores and appraises those volumes of evidence and analysis, illustrating their pertinence to student achievement, the vexed issue that lies at the heart of all for which education stands.

Values Pedagogy and Student Achievement

Jack Parsons was a brilliant chemist, member of Cal Tech propulsion unit that invented the rocket fuel used for the US space flight to the moon. He was also a fanatical believer in the Magyck of Aleister Crowley the aging occultist who considered himself 'The Beast' incarnate. In 1947 Jack Parsons and L. Ron Hubbard were performing Crowley's mystic rituals in a house in Pasadena, California. Parsons wrote excitedly to his occult leader, Crowley: 'I have had the most devastating experience of my life. I have been in direct touch with One who is most Holy and Beautiful as mentioned in your "Book of the Law". First instructions were received through Lafayette Ron Hubbard the seer. I have followed them to the letter. There was a desire for incarnation. I am to act as an instructor, guardian, guide for nine months; then it will be loosed on the world...' Crowley wrote despairingly to a disciple about Parsons: 'It appears that he has given away both his girl and his money to this writer of science fiction and is now invoking my ritual to produce a Moonchild. I am fairly frantic...' Nine months later while being visited by two students from Cambridge, Aleister Crowley died of cardiac degeneration. Missing from his personal possessions was his magical diaries and his pocket-watch. His funeral took place in the Chapel of the Brighton Crematorium. The final rites were performed by the novelist Louis Marlowe reading extracts from Crowley's "Book of the Law". "The Brighton Echo" denounced the whole ceremony as a Black Mass. In 1952 Jack Parsons was blown up in his laboratory in Pasadena. L. Ron Hubbard died on his yacht as leader of the Church of Scientology. But did the issue end with these three deaths? Would Crowley, as he claimed, ever return from death to rule the world? Why did US astronauts name a crater on the moon after Jack Parsons? Is L. Ron Hubbard really dead? What had been generated by the ceremony in California that seemed to signal Crowley's demise? And what happened to them missing pocket-watch? Unanswered questions till, late in the twentieth century, Dr. Joshua Mathers brought a 'state of the art' 'Interactive Suit' from Cal Tech California to Cambridge in England to begin an experiment that, unknown to mankind, changed the course of our planet.

From Cleopatra to Chaos Magic: A Vibrant, Epic History of Occultism in Thought and Practice In his most sweeping historical work, occult scholar and widely known voice of esoteric ideas Mitch Horowitz presents a lively, intellectually serious historical exploration of modern occultism, from astrology

and alchemy to the dawn of Theosophy and modern witchcraft—and the spiritual revolutions that followed. In this lively, full-circle history, Mitch explores: Preservation of “hidden wisdom” in late-ancient Hermeticism. Rebirth of esoterica during the Renaissance, including Kabbalah, ceremonial magick, alchemy, Gnosticism—and the backlash culminating in the Thirty Years’ War. Rise of the modern “secret society,” such as Rosicrucians, Freemasons, and Illuminati. Migration of religious radicalism to the New World, including how enslaved people devised the magickal system of hoodoo. Wave of occultism ignited by John Dee, the Romantics, Franz Anton Mesmer, Eliphas Lévi, and P.B. Randolph. The revolution brought by occult explorer Madame H.P. Blavatsky. Growth of New Thought and mind metaphysics. How fin de siècle scientists devised clinical protocols to study the supernatural. Occult influences in politics: a delicate topic weighed maturely. Heterodox movements and figures such as The Process Church, TOPY, Michael Aquino, and Anton LaVey. Pioneering voices including Manly P. Hall, Aleister Crowley, Rudolf Steiner, Edgar Cayce, Carl Jung, Gerald Gardner, Jack Parsons, Annie Besant, G.I. Gurdjieff, Alice Bailey, Austin Osman Spare, and Carlos Castaneda. Surprising occult influences on wide-ranging modern icons such as Frederick Douglass, Sigmund Freud, and Isaac Newton. How models of interdimensionality are loosening the hold of materialism on modern thought.

Answering the Objections of Atheists, Agnostics, and Skeptics

This fascinating book is the first volume in a projected cultural history of the United States, from the earliest English settlements to our own time. It is a history of American folkways as they have changed through time, and it argues a thesis about the importance for the United States of having been British in its cultural origins. While most people in the United States today have no British ancestors, they have assimilated regional cultures which were created by British colonists, even while preserving ethnic identities at the same time. In this sense, nearly all Americans are “Albion's Seed,” no matter what their ethnicity may be. The concluding section of this remarkable book explores the ways that regional cultures have continued to dominate national politics from 1789 to 1988, and still help to shape attitudes toward education, government, gender, and violence, on which differences between American regions are greater than between European nations.

Modern Occultism

From the Introduction In his Autobiography, Mill predicts that the essay On Liberty is “likely to survive longer than anything else that I have written.” He goes on to say that the essay is the expression of a “single truth:” “the importance, to man and society, of a large variety of types of character, and of giving full freedom to human nature to expand itself in innumerable and conflicting directions.” In the essay itself, Mill defines his subject as “the nature and limits of the power which can be legitimately exercised by society over the individual.” He defends the absolute freedom of individuals to engage in conduct not harmful to others, and the near-absolute freedom to express and discuss opinions of all kinds. Mill's essay survives, as he had predicted, because his powerful message is still widely rejected by the powerful, and by those who continue to seek power over the lives of others.

Albion's Seed

Theatrical Reflections consists of essays on such plays as Hamlet, Leonce and Lena, Curse of the Starving Class, The Birthday Party, The Knight of Olmedo, and Androcles and the Lion in addition to reviews of productions of The Servant of Two Masters, Yerma, The Threepenny Opera, Caligula, and Wings, among other works. The author's focus in his essays is on dramatic analysis that ultimately can be of benefit to directors, designers, and even actors - that is, with analysis of character, action, language, and setting that can be translated into viable concepts for theatrical production. In the case of reviews, of course, he is concerned with evaluating the actual concepts behind various theatrical productions. Most of the plays considered here are regularly produced, and it is the goal of this book to make some contribution to their future staging.

On Liberty

From the New York Times columnist and bestselling author of Bad Religion, a “clever and stimulating” (The New York Times Book Review) portrait of how our turbulent age is defined by dark forces seemingly beyond our control. The era of the coronavirus has tested America, and our leaders and institutions have conspicuously failed. That failure shouldn't be surprising: Beneath social-media frenzy and reality-television politics, our era's deep truths are elite incompetence, cultural exhaustion, and the flight from reality into fantasy. Casting a cold eye on these trends, The Decadent Society explains what

happens when a powerful society ceases advancing—how the combination of wealth and technological proficiency with economic stagnation, political stalemate, and demographic decline creates a unique civilizational crisis. Ranging from the futility of our ideological debates to the repetitions of our pop culture, from the decline of sex and childbearing to the escapism of drug use, Ross Douthat argues that our age is defined by disappointment—by the feeling that all the frontiers are closed, that the paths forward lead only to the grave. Correcting both optimism and despair, Douthat provides an enlightening explanation of how we got here, how long our frustrations might last, and how, in renaissance or catastrophe, our decadence might ultimately end.

L. Ron Hubbard

The poems of John Ashbery, Lyn Hejinian and Ron Silliman may seem to offer endless small details of expression, observation, thought and narrative which fail to hang together even from one line to the next. But as Elina Siltanen shows here, this extraordinary flow of uncoordinated detail can stimulate readers to join the poets in a delightful exploration of ordinary language. When readers take a poem in this spirit, they actually begin to read as members of a community: the community not only of themselves and other readers, but also including the poet and other poets, plus all the speakers of the language in which the poem is written. For all these different parties, that language is indeed a shared resource, and the way for readers to get started is simply by recalling or imagining some of the numerous kinds of context in which the given poem's words-phrases-sentences could, or could not, be successfully used. The rewards for such proactive readers are on the one hand a heightened sense of the subtle interweavings of language and life, and on the other hand a freshly empowered self-confidence. The point being that, within the community of contemporary experimental poetry, poets have no more authority than readers.

Rejecting older cultural hierarchies, they present themselves as teasing out the idiomatic serendipities of their own poems together with their readers.

How did a decade that dawned with the Age of Aquarius end in Altamont and the Manson Family bloodbath? The 1960s were a time of revolution - political, social, psychedelic, sexual. But there was another revolution that many historians forget: the rise of a powerful current that permeated pop culture and has been a central influence on it ever since. It was a magical revolution - a revival of the occult. Previously rejected and ridiculed beliefs took centre stage, reaching the Beatles and the Rolling Stones, saturating the hippies and flower power, hitting the big screen with *Rosemary's Baby* and the bookshelves with *Lord of the Rings*. The Tarot. I Ching, astrology, Kabbala, yogis, witchcraft, UFOs, Aleister Crowley. Yin Yang and the Tibetan Book of the Dead now became the common currency they are today. But the vibes went bad, the auras darkened. Did that darker undercurrent win out? Gary Lachman here charts this explosion, its rise and fall, and its enduring legacy -- This text refers to an out of print or unavailable edition of this title.
