Keep careful track on whether a particular variable is being estimated at Level 1 or Level 2

Use the Interclass Correlation Coefficient to make sure you have sufficient variation in your Level 2 data

Each Level needs to have a sufficiently large sample size to provide a meaningful estimation

What's the most common error with Multi-Level Models?

In your analysis, remember that sometimes a statistical difference is not always a practical difference

Some researchers will argue that Multi-Level Models lead to over-interpretation of Level 2 effects on Level 1 characteristics
