Gandhi's Quit India Movement of 1942 was the climax of a nationalist revolutionary movement which sought independence on India's own terms. Indian independence was attained through revolution, not through a benevolent grant from the British imperial regime. "The British left India because Indians had made it impossible for them to stay." The bases for Francis Hutchins' thesis are new facts from hitherto unused sources: interviews with surviving participants in the movement, private papers from the Gandhi Memorial Museum and the Nehru Memorial Museum and Library, documents in the National Archives of India. In particular, he has studied the secret records of the British government, recently made available, which reveal for the first time the extent of the revolutionary movement and Britain's plans for dealing with it. Of the British records Hutchins says, "No other regime has left such careful documentation of its strategies or compiled such extensive records revealing the way in which it was overthrown." Even though England had always proclaimed its hope that India would one day become independent, the tacit assumption was that this was a remote eventuality. Only after Gandhi's Quit India Movement did Britain's political parties resign themselves to the necessity to leave quickly, whether or not they believed India was "ready." Obscured by censorship in India and by preoccupation with World War II, the significance of Gandhi's revolutionary technique was not appreciated at the time. Hutchins' impressive analysis uses the Indian case to develop a general theory of the revolutionary nature of colonial nationalism.

Literary tourism is a nascent field in tourism studies, yet tourists often travel in the footsteps of well-known authors and stories. Providing a wide-ranging cornucopia of literary tourism topics, this book fully explores the interconnections between the written word and travel. It includes tourism stories using guidebooks, films, television and electronic media, and recognises that stories, texts and narratives, even if they cannot be classified as traditional travel writing, can become journeys in themselves and take us on imaginary voyages. Appealing to a wide audience of different disciplines, it encompasses subjects such as business literary writing, historical journeys and the poetry of Dylan Thomas. The use of these different perspectives demonstrates how heavily and widely literature influences travel, tourists and tourism, making it an important read for researchers and students of tourism, social science and literature.

A plane crashes on a desert island and the only survivors, a group of schoolboys, assemble on the beach and wait to be rescued. By day they inhabit a land of bright fantastic birds and dark blue seas, but at night their dreams are haunted by the image of a terrifying beast. As the boys' delicate sense of order fades, so their childish dreams are transformed into something more primitive, and their behaviour starts to take on a murderous, savage significance. In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. *Communities in Action: Pathways to Health Equity* seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

In a changing world of fad and fashion, the humanitarian impulse is an enduring quality. This impulse was present in the aftermaths of the Rwandan genocide, Hurricane Katrina, the Indian Ocean tsunami, and the January 2010 earthquake in Haiti. The first principle of humanitarian assistance is "do no harm." The second might be, "do better!" Enter the evaluation of emergency and disaster management. The route from donor to affected population is long and varied. When sudden, unprecedented needs are juxtaposed with exceptional levels of charitable responses, the question is whether the responses were good enough. Did supply meet demand? Was it the right thing? Was it done well? Who received support? Was it appropriate? Was the timing right? Can it be improved? All are questions for evaluation. This issue of *New Directions* for evaluation consolidates reflections from evaluation practices in disaster and emergency management. A number of important themes are addressed: the systematic assessment of needs, interagency coordination, and evaluating response in real time, in both international and national jurisdictions. The chapters discuss where the evaluation of humanitarian practice and emergency and disaster management currently stands, and where it should be going. For populations traumatized by disaster, these answers have consequences for protection, for restoration of individual and community efficacy, and ultimately for hope and dignity.

They both studied with the great chefs of their day—Juan in France with Paul Bocuse and the Troisgros brothers; Elena with Alain Ducasse, Ferran Adrià, and Pierre Gagnaire. “What we eat, how we eat, is in our culture,” says Elena, “Our signature cuisine is Basque. Our taste is from here. We were born here. We cook unconsciously with this identity.” Thus, Arzak is considered to be one of the most influential masters of the New Basque cuisine, which has continued to have a major influence on international cuisine, particularly on such world-renowned chefs as Ferran Adrià, who took the techniques pioneered by Arzak to new heights. Now available in English for the first time, Arzak Secrets is a gorgeously photographed glimpse at some of the secrets behind the dishes that have made the restaurant and chef famous. A French food critic faces his mortality in an "entertaining [and] witty" novel by the New York Times–best-selling author of *The Elegance of the Hedgehog* (Newsday). In the heart of Paris, in the same posh building made famous in *The Elegance of the Hedgehog*, Pierre Arthens, the greatest food critic in the world, is dying. Revered by some and reviled by many, Monsieur Arthens has been lording it over the world's most esteemed chefs for years, passing judgment on their creations, deciding their fates with a stroke of his pen, destroying and building reputations on a whim. But now, during his final hours, his mind has turned to simpler things. He is desperately searching for that singular flavor, that sublime something once sampled, never forgotten, the flavor par excellence. Indeed, this flamboyant and self-absorbed man desires only one thing before he dies: one last taste. Thus begins a charming voyage that traces the career of Monsieur Arthens from childhood to maturity across a celebration of all manner of culinary delights. Alternating with the voice of the supercilious Arthens is a chorus belonging to his acquaintances and familiars—relatives, lovers, a would-be protégé, even a cat. Each will have his or her say about M. Arthens, a man who has inspired only extreme emotions in people. Here, as in *The Elegance of the Hedgehog*, Muriel Barbery's story celebrates life's simple pleasures and sublime moments while condemning the arrogance and vulgarity of power. "Lush and satisfying prose." —Publishers Weekly
