Imaginary Animals

An extraordinary menagerie of fantastical and unreal beasts featuring hundreds of illustrations, from griffins to dog-men, mermaids, dragons, unicorns, and yetis. Fire-breathing dragons, beautiful mermaids, majestic unicorns, terrifying three-headed dogs—these fantastic creatures have long excited our imagination. Medieval authors placed them in the borders of manuscripts as markers of the boundaries of our understanding. Tales from around the world place these beasts in deserts, deep woods, remote islands, ocean depths, and alternate universes—just out of our reach. And in the sections on the apocalypse in the Bible, they proliferate as the end of time approaches, with horses with heads like lions, dragons, and serpents signaling the destruction of the world. Legends tell us that imaginary animals belong to a primordial time, before everything in the world had names, categories, and conceptual frameworks. In this book, Boria Sax digs into the stories of these fabulous beasts. He shows how, despite their liminal role, imaginary animals like griffins, dog-men, yetis, and more are socially constructed creatures, created through the same complex play of sensuality and imagination as real ones. Tracing the history of imaginary animals from Paleolithic art to their roles in stories such as Harry Potter and even the advent of robotic pets, he reveals that these extraordinary figures help us psychologically—as monsters, they give form to our amorphous fears, while as creatures of wonder, they embody our hopes. Their greatest service, Sax concludes, is to continually challenge our imaginations, directing us beyond the limitations of conventional beliefs and expectations. Featuring over 230 illustrations of a veritable menagerie of fantastical and unreal beasts, *Imaginary Animals* is a feast for the eyes and the imagination.

Animals in the Third Reich

"This is the first book to explore the paradox of the Nazi cult of animals and the obsession with the annihilation of "biologically inferior" people." "Animals in the Third Reich begins by contrasting Jewish, Christian, and polytheistic traditions relating to animals in Germany, and examines the ways that the Nazi movement adopted, altered, challenged, or exploited these traditions. This discussion covers several perspectives on the treatment of animals, including those of zoologists, veterinarians, novelists, painters, sculptors, and the general public. Adopting and exploiting such traditions, the Nazis elaborated their own symbolic system of relating certain animals to supporters and antagonists of the movement - Aryan wolves and horses; Jewish pigs and apes."--BOOK JACKET. Title Summary field provided by Blackwell North America, Inc. All Rights Reserved

The Phoenix

Arising triumphantly from the ashes of its predecessor, the phoenix has been an enduring symbol of resilience and renewal for thousands of years. But how did this mythical bird become so famous that it has played a part in cultures around the world and throughout human history? How much of its story

do we actually know? Here to offer a comprehensive biography and engaging (un)natural history of the phoenix is Joseph Nigg, esteemed expert on otherworldly creatures from dragons to gryphons to sea monsters. Beginning in ancient Egypt and traveling around the globe and through the centuries, Nigg's vast and sweeping narrative takes readers on a brilliant tour of the cross-cultural lore of this famous, yet little-known, immortal bird. This entertaining and informative look at the life and transformation of the phoenix will be the authoritative source for anyone fascinated by folklore and mythology, re-igniting our curiosity about one of myth's greatest beasts.

The Oxford Handbook of Animals in Classical Thought and Life

The Oxford Handbook of Animals in Classical Thought and Life is the first comprehensive guide to animals in the ancient world, encompassing all aspects of the topic by featuring authoritative chapters on 33 topics by leading scholars in their fields. As well as an introduction to, and a survey of, each topic, it provides guidance on further reading for those who wish to study a particular area in greater depth. Both the realities and the more theoretical aspects of the treatment of animals in ancient times are covered in chapters which explore the domestication of animals, animal husbandry, animals as pets, Aesop's Fables, and animals in classical art and comedy, all of which closely examine the nature of human-animal interaction. More abstract and philosophical topics are also addressed, including animal communication, early ideas on the origin of species, and philosophical vegetarianism and the notion of animal rights.

Deadly Powers

In this illuminating and evocative exploration of the origin and function of storytelling, the author goes beyond the work of mythologist Joseph Campbell, arguing that mythmaking evolved as a cultural survival strategy for coping with the constant fear of being killed and eaten by predators. Beginning nearly two million years ago in the Pleistocene era, the first stories, Trout argues, functioned as alarm calls, warning fellow group members about the carnivores lurking in the surroundings. At the earliest period, before the development of language, these rudimentary "stories" would have been acted out. When language appeared with the evolution of the ancestral human brain, stories were recited, memorized, and much later written down as the often bone-chilling myths that have survived to this day. This book takes the reader through the landscape of world mythology to show how our more recent ancestors created myths that portrayed animal predators in four basic ways: as monsters, as gods, as benefactors, and as role models. Each incarnation is a variation of the fear-management technique that enabled early humans not only to survive but to overcome their potentially incapacitating fear of predators. In the final chapter, Trout explores the ways in which our visceral fear of predators is played out in the movies, where both animal and human predators serve to probe and revitalize our capacity to detect and survive danger. Anyone with an interest in mythology, archaeology, folk tales, and the origins of contemporary storytelling will find this book an exciting and provocative exploration into the natural and psychological forces that shaped human culture and gave rise to storytelling and mythmaking.

Fictitious and Symbolic Creatures in Art With Special Reference to Their Use in British Heraldry

As we all know, there is a kind of lazy pleasure in useless and out-of-the-way erudition-The compilation and translation of this volume have given us a great deal of such pleasure; we hope the reader will share some of the fun we felt when ransacking the

The Book of Imaginary Beings

Susan Wiseman analyses mythical and natural creatures in English Renaissance writing, including Shakespeare's *A Midsummer Night's Dream* and *The Tempest*.

Writing Metamorphosis in the English Renaissance

When Saville Sax and Theodore Hall first met as undergraduates at Harvard, little did either realize that a day would come when they would be passing atomic secrets to the Soviets. Their acts of espionage could have led, as in the case of Julius and Ethel Rosenberg, to death in the electric chair. But unlike others (Klaus Fuchs, David Greenglass, Morton Sobell) they were never even tried for what they did, let alone convicted. Professor Boria Sax, an eminent scholar in the field of human/animal studies, and the elder son of Saville Sax, here relates his stressful experiences growing up in a troubled home, one in which his father lived in constant fear of the FBI. It was only as an adult that Boria Sax came to fully

comprehend the magnitude of his father's deed, one he does not condone. As a result, he can now relate how Saville Sax's puzzling behavior affected every member of his family, and the price each one had to pay. This very personal memoir is also an account of a Russian Jewish community that settled in the United States, torn between the desire for continued intimacy and the need to assimilate. The examination of social and political events over several generations invites readers to reflect back on their own experience and its implications.

Stealing Fire

One of Woolf's most experimental novels, *The Waves* presents six characters in monologue - from morning until night, from childhood into old age - against a background of the sea. The result is a glorious chorus of voices that exists not to remark on the passing of events but to celebrate the connection between its various individual parts.

Animal Symbolism in Ecclesiastical Architecture

This is a book for readers who are fascinated by the Moon and the earliest speculations about life on other worlds. It takes the reader on a journey from the earliest Greek poetry, philosophy and science, through Plutarch's mystical doctrines to the thrilling lunar adventures of Lucian of Samosata.

The Waves

A celebration of the visual contributions of the bestiary--one of the most popular types of illuminated books during the Middle Ages--and an exploration of its lasting legacy. Brimming with lively animals both real and fantastic, the bestiary was one of the great illuminated manuscript traditions of the Middle Ages. Encompassing imaginary creatures such as the unicorn, siren, and griffin; exotic beasts including the tiger, elephant, and ape; as well as animals native to Europe like the beaver, dog, and hedgehog, the bestiary is a vibrant testimony to the medieval understanding of animals and their role in the world. So iconic were the stories and images of the bestiary that its beasts essentially escaped from the pages, appearing in a wide variety of manuscripts and other objects, including tapestries, ivories, metalwork, and sculpture. With over 270 color illustrations and contributions by twenty-five leading scholars, this gorgeous volume explores the bestiary and its widespread influence on medieval art and culture as well as on modern and contemporary artists like Pablo Picasso and Damien Hirst. Published to accompany an exhibition on view at the J. Paul Getty Museum at the Getty Center May 14 to August 18, 2019.

The Moon in the Greek and Roman Imagination

"Of the Nature of Things" is a first-century BCE didactic poem by the Roman poet and philosopher Lucretius to explain Epicurean philosophy to a Roman audience. In this work, T. Lucretius Carus presents the view that the world can be described by the function of material forces and natural laws. So, one should not fear the gods or death.

Book of Beasts

Popular media, art and science are intricately interlinked in contemporary visual culture. This book analyses the scientific imaginary that is the result of the profound effects of science upon the imagination, and conversely, of the imagination in and upon science. As scientific developments in genetics occur and information technology and cybernetics open up new possibilities of intervention in human lives, cultural theorists have explored the notion of the posthuman. *The Scientific Imaginary in Visual Culture* analyses figurations of the posthuman in history and philosophy, as well as in its utopian and dystopian forms in art and popular culture. The authors thus address the blurring boundaries between art and science in diverse media like science fiction film, futurist art, video art and the new phenomenon of bio-art. In their evaluations of the scientific imaginary in visual culture, the authors engage critically with current scientific and technological concerns.

Of the Nature of Things

This book challenges the common belief that race and racisms are phenomena that began only in the modern era.

The Scientific Imaginary in Visual Culture

Meet the incredible animals that have disappeared due to competition, mass extinctions, hunting, and human activity. *Lost Animals* brings back to life some of the most charismatic creatures to inhabit the planet. It captures the imagination with more than 200 incredible photographs, artworks of fossils, and scientific drawings of charming creatures like dodos, paraceratherium (the largest land mammal), spinosaurus (the biggest carnivorous dinosaur), placoderm fishes (the sharks of their day), and more! *Lost Animals* is a captivating documentation of evolution and extinction. Each chapter focuses on a specific time in Earth's history, from the Cambrian explosion (the most intense surge of evolution the world has ever experienced) to present times, with profiles of the key species that lived then. From long extinct animals to Lazarus species--animals that were thought to be extinct before being rediscovered--this book takes readers on a journey through Earth's natural history, highlighting the world's biggest animal losses and its moments of conservational hope.

The Invention of Race in the European Middle Ages

The Best Nonfiction Masterpiece of the 20th Century? "There are two lives, the natural and the spiritual, and we must lose the one before we can participate in the other." - William James, *The Varieties of Religious Experience: A Study in Human Nature* *The Varieties of Religious Experience: A Study in Human Nature* is not a book about a specific religion. The author, psychologist William James does not try to convince the reader one religion is better than the other. He doesn't even make a case for atheism and the scientific approach. The book is in fact about human nature and how we experience religion at a psychological level. Xist Publishing is a digital-first publisher. Xist Publishing creates books for the touchscreen generation and is dedicated to helping everyone develop a lifetime love of reading, no matter what form it takes

Lost Animals

Extinct Monsters : A Popular Account of Some of the Larger Forms of Ancient Animal Life Natural history is deservedly a popular subject. The manifestations of life in all its varied forms is a theme that has never failed to attract all who are not destitute of intelligence. From the days of the primitive cave-dwellers of Europe, who lived with mammoths and other animals now lost to the world; of the ancient Egyptians, who drew and painted on the walls of their magnificent tombs the creatures inhabiting the delta of the Nile; of the Greeks, looking out on the world with their bright and child-like curiosity, down to our own times, this old, yet ever new, theme has never failed. Never before was there such a profusion of books describing the various forms of life inhabiting the different countries of the globe, or the rivers, lakes, and seas that diversify its scenery. Popular writers have done good service in making the way plain for those who wish to acquaint themselves with the structures, habits, and histories of living animals; while for students a still greater supply of excellent manuals and text-books has been, and still continues to be, forthcoming. But in our admiration for the present we forget the great past. How seldom do we think of that innumerable [x]host of creatures that once trod this earth! How little in comparison has been done for them! Our natural-history books deal only with those that are alive now. Few popular writers have attempted to depict, as on a canvas, the great earth-drama that has, from age to age, been enacted on the terrestrial stage, of which we behold the latest, but probably not the closing scenes. Another object which the writer has kept in view is to connect the past with the present. It cannot be too strongly urged that the best commentary on the dead past is the living present. It is unfortunate that there is still too great a tendency to separate, as by a great gulf, the dead from the living, the past from the present, forms of life. The result of this is seen in our museums. Fossils have too often been left to the attention of geologists not always well acquainted with the structures of living animals. The more frequent introduction of fossil specimens side by side with modern forms of life would not only be a gain to the progress and spread of geological science, but would be a great help to students of anatomy and natural history. The tree of life is but a mutilated thing, and half its interest is gone, when the dead branches are lopped off. It is, perhaps, justifiable to give to the term "monster" a somewhat extended meaning. The writer has therefore included in his menagerie of extinct animals one or two creatures which, though not of any great size, are nevertheless remarkable in various ways—such, for instance, as the winged reptiles, and anomalous birds with teeth, of later times, and others. Compared with living forms, these creatures appear to us as "monstrosities," and may well find a place in our collection.

The Varieties of Religious Experience: A Study in Human Nature

This volume explores the potential of the concept of the creaturely for thinking and writing beyond the idea of a clear-cut human-animal divide, presenting innovative perspectives and narratives for an

age which increasingly confronts us with the profound ecological, ethical and political challenges of a multispecies world. The text explores written work such as Samuel Beckett's *Worstward Ho* and Michel Foucault's *The Order of Things*, video media such as the film "Creature Comforts" and the video game *Into the Dead*, and photography. With chapters written by an international group of philosophers, literary and cultural studies scholars, historians and others, the volume brings together established experts and forward-thinking early career scholars to provide an interdisciplinary engagement with ways of thinking and writing the creaturely to establish a postanthropocentric sense of human-animal relationality.

Extinct Monsters : A Popular Account of Some of the Larger Forms of Ancient Animal Life

Anthropology is the study of all humans in all times in all places. But it is so much more than that. "Anthropology requires strength, valor, and courage," Nancy Scheper-Hughes noted. "Pierre Bourdieu called anthropology a combat sport, an extreme sport as well as a tough and rigorous discipline. ... It teaches students not to be afraid of getting one's hands dirty, to get down in the dirt, and to commit yourself, body and mind. Susan Sontag called anthropology a "heroic" profession." What is the payoff for this heroic journey? You will find ideas that can carry you across rivers of doubt and over mountains of fear to find the light and life of places forgotten. Real anthropology cannot be contained in a book. You have to go out and feel the world's jagged edges, wipe its dust from your brow, and at times, leave your blood in its soil. In this unique book, Dr. Michael Wesch shares many of his own adventures of being an anthropologist and what the science of human beings can tell us about the art of being human. This special first draft edition is a loose framework for more and more complete future chapters and writings. It serves as a companion to anth101.com, a free and open resource for instructors of cultural anthropology. This 2018 text is a revision of the "first draft edition" from 2017 and includes 7 new chapters.

Beyond the Human-Animal Divide

Two romantic tales of dark forces and Christmas miracles... The *Twilight Before Christmas* Bestselling novelist Kate Drake, one of seven sisters with amazing powers of witchcraft, wants to open a bookstore in a charming but run-down mill in her California hometown. Decorated former U.S. Army Ranger Matt Granite, now a contractor, doesn't mind helping -- and getting closer to Kate. But when an earthquake exposes a crypt in the mill's foundation, a centuries-old evil threatens to destroy both Christmas and the gift of soul-searing passion Kate's hometown hero wants her to keep forever.... After *The Music* Terrified by mysterious threats, Jessica Fitzpatrick takes her twin wards to the island mansion of their estranged father, Dillon Wentworth, a famous musician who shut out the world after a fire claimed his wife's life and left him disfigured. With Christmas approaching, the spark between Dillon and Jessica might light the future, but the evil machinations of those who share his wife's love of the occult may plunge the family into darkness -- unless a Christmas miracle occurs.... Experience the magic!

The Art of Being Human

When Trent McCauley's obsession for making movies by reassembling footage from popular films causes his home's internet to be cut off, it nearly destroys his family. Shamed, Trent runs away to London. A new bill threatens to criminalize even harmless internet creativity. Things look bad, but the powers-that-be haven't entirely reckoned with the power of a gripping movie to change people's minds...

Sketches of the History of Man

Reproduction of the original: *Eccentricities of The Animal Creation* by John Timbs

The Wicked and the Wondrous

Through a unique combination of critical, posthumanist, and educational theories, the authors engage in a surreal journey into the worlds of feral children, alien reptoids, and faery faiths in order to understand how social movements are renegotiating the boundaries of community.

Pirate Cinema

The international bestseller about life, the universe and everything. 'A simply wonderful, irresistible book' *DAILY TELEGRAPH* 'A terrifically entertaining and imaginative story wrapped round its tough, thought-provoking philosophical heart' *DAILY MAIL* 'Remarkable ... an extraordinary achievement' *SUNDAY TIMES* When 14-year-old Sophie encounters a mysterious mentor who introduces her to

philosophy, mysteries deepen in her own life. Why does she keep getting postcards addressed to another girl? Who is the other girl? And who, for that matter, is Sophie herself? To solve the riddle, she uses her new knowledge of philosophy, but the truth is far stranger than she could have imagined. A phenomenal worldwide bestseller, *SOPHIE'S WORLD* sets out to draw teenagers into the world of Socrates, Descartes, Spinoza, Hegel and all the great philosophers. A brilliantly original and fascinating story with many twists and turns, it raises profound questions about the meaning of life and the origin of the universe.

Eccentricities of The Animal Creation

"As the psalms are a microcosm of the Old Testament, so the Expositions of the Psalms can be seen as a microcosm of Augustinian thought. In the Book of Psalms are to be found the history of the people of Israel, the theology and spirituality of the Old Covenant, and a treasury of human experience expressed in prayer and poetry. So too does the work of expounding the psalms recapitulate and focus the experiences of Augustine's personal life, his theological reflections and his pastoral concerns as Bishop of Hippo."--Publisher's website.

Education Out of Bounds

The Art of Fantasy is an inspiring curation of art for fans of myth, magic and the unreal – from gallery greats (the Surrealists and Symbolists) to artists working in the margins today.

Clark.

Expositions of the Psalms 1-32 (Vol. 1)

This open access book provides the first critical history of the controversy over whether to cull wild badgers to control the spread of bovine tuberculosis (bTB) in British cattle. This question has plagued several professional generations of politicians, policymakers, experts and campaigners since the early 1970s. Questions of what is known, who knows, who cares, who to trust and what to do about this complex problem have been the source of scientific, policy, and increasingly vociferous public debate ever since. This book integrates contemporary history, science and technology studies, human-animal relations, and policy research to conduct a cross-cutting analysis. It explores the worldviews of those involved with animal health, disease ecology and badger protection between the 1970s and 1990s, before reintegrating them to investigate the recent public polarisation of the controversy. Finally it asks how we might move beyond the current impasse.

The Art of Fantasy

Wayward Shamans tells the story of an idea that humanity's first expression of art, religion and creativity found form in the figure of a proto-priest known as a shaman. Tracing this classic category of the history of anthropology back to the emergence of the term in Siberia, the work follows the trajectory of European knowledge about the continent's eastern frontier. The ethnographic record left by German natural historians engaged in the Russian colonial expansion project in the 18th century includes a range of shamanic practitioners, varied by gender and age. Later accounts by exiled Russian revolutionaries noted transgendered shamans. This variation vanished, however, in the translation of shamanism into archaeology theory, where a male sorcerer emerged as the key agent of prehistoric art. More recent efforts to provide a universal shamanic explanation for rock art via South Africa and neurobiology likewise gloss over historical evidence of diversity. By contrast this book argues for recognizing indeterminacy in the categories we use, and reopening them by recalling their complex history.

The Oxford Handbook of Animal Studies

The inspiration behind the hit podcast THE 100 TYPES OF HUMAN with DEXTER DIAS and BBC 5 Live host NIHAL ARTHANAYAKE 'This book is the one. Think Sapiens and triple it.' - Julia Hobsbawm, author of Fully Connected _____ We all have ten types of human in our head. They're the people we become when we face life's most difficult decisions. We want to believe there are things we would always do - or things we never would. But how can we be sure? What are our limits? Do we have limits? The Ten Types of Human is a pioneering examination of human nature. It looks at the best and worst that human beings are capable of, and asks why. It explores the frontiers of the human experience, uncovering the forces that shape our thoughts and actions in extreme situations. From courtrooms to civil wars, from Columbus to child soldiers, Dexter Dias takes us on a globe-spanning journey in search of answers, touching on the lives of some truly exceptional people. Combining cutting-edge neuroscience, social psychology and human rights research, The Ten Types of Human is a provocative map to our hidden selves. It provides a new understanding of who we are - and who we can be. _____ 'The Ten Types of Human is a fantastic piece of non-fiction, mixing astonishing real-life cases with the latest scientific research to provide a guide to who we really are. It's inspiring and essential.' - Charles Duhigg, author of The Power of Habit 'I emerged from this book feeling better about almost everything... a mosaic of faces building into this extraordinary portrait of our species.' - Guardian 'Uplifting and indispensable.' - Howard Cunnell _____ What readers are saying about 'the most important book in years': 'utterly compelling...this one comes with a warning - only pick it up if you can risk not putting it down' - Wendy Heydorn on Amazon, 5 stars 'one of the most remarkable books I've read... I can genuinely say that it has changed the way I view the world' - David Jones on Amazon, 5 stars 'Essential reading for anyone wishing to understand the human condition... a thrilling and beautifully crafted book' - Wasim on Amazon, 5 stars 'This is the most important book I have read in years' - Natasha Geary on Amazon, 5 stars 'an important and fascinating read... It will keep you glued to the page' - Hilary Burrage on Amazon, 5 stars 'a journey that I will never forget, will always be grateful for, and I hope will help me question who I am... a work of genius' - Louise on Amazon, 5 stars 'This is a magnificent book that will capture the interest of every type of reader... one of those rare and special books that demand rereading' - Amelia on Amazon, 5 stars 'I simply couldn't put it down... one of the most significant books of our time' - Jocelyne Quennell on Amazon, 5 stars 'Read The Ten Types of Human and be prepared to fall in love' - Helen Fospero on Amazon, 5 stars

Vermin, Victims and Disease

The contributors to Monster Theory consider beasts, demons, freaks and fiends as symbolic expressions of cultural unease that pervade a society and shape its collective behavior. Through a historical sampling of monsters, these essays argue that our fascination for the monstrous testifies to our continued desire to explore difference and prohibition.

Wayward Shamans

The human mind needs monsters. In every culture and in every epoch in human history, from ancient Egypt to modern Hollywood, imaginary beings have haunted dreams and fantasies, provoking in young and old shivers of delight, thrills of terror, and endless fascination. All known folklores brim with visions of looming and ferocious monsters, often in the role as adversaries to great heroes. But while heroes have been closely studied by mythologists, monsters have been neglected, even though they are equally

important as pan-human symbols and reveal similar insights into ways the mind works. In *Monsters: Evil Beings, Mythical Beasts, and All Manner of Imaginary Terrors*, anthropologist David D. Gilmore explores what human traits monsters represent and why they are so ubiquitous in people's imaginations and share so many features across different cultures. Using colorful and absorbing evidence from virtually all times and places, *Monsters* is the first attempt by an anthropologist to delve into the mysterious, frightful abyss of mythical beasts and to interpret their role in the psyche and in society. After many hair-raising descriptions of monstrous beings in art, folktales, fantasy, literature, and community ritual, including such avatars as Dracula and Frankenstein, Hollywood ghouls, and extraterrestrials, Gilmore identifies many common denominators and proposes some novel interpretations. Monsters, according to Gilmore, are always enormous, man-eating, gratuitously violent, aggressive, sexually sadistic, and superhuman in power, combining our worst nightmares and our most urgent fantasies. We both abhor and worship our monsters: they are our gods as well as our demons. Gilmore argues that the immortal monster of the mind is a complex creation embodying virtually all of the inner conflicts that make us human. Far from being something alien, nonhuman, and outside us, our monsters are our deepest selves.

The Ten Types of Human

Entangled Fictions: Nonhuman Animals in an Indian World studies the ethical and affective relationships between human and nonhuman animals in Indian fictional worlds. While drawing upon existing theoretical and philosophical texts with nonhumanist underpinnings, *Entangled Fictions* argues that the corpus is limited epistemologically and politically when it comes to their examinations of the nonhuman in India. Deeply influenced by the political/existential expediencies of our times, the book traverses several genres, shifts from fictional to anecdotal, and transitions from autobiographical to spectra in effort to introduce readers to fictional worlds marked by human-nonhuman fluidity and trans-species contiguity that was imagined and lived much before the telos of human extinction became either a global or local concern.

Monster Theory

Living on a damaged planet challenges who we are and where we live. This timely anthology calls on twenty eminent humanists and scientists to revitalize curiosity, observation, and transdisciplinary conversation about life on earth. As human-induced environmental change threatens multispecies livability, *Arts of Living on a Damaged Planet* puts forward a bold proposal: entangled histories, situated narratives, and thick descriptions offer urgent “arts of living.” Included are essays by scholars in anthropology, ecology, science studies, art, literature, and bioinformatics who posit critical and creative tools for collaborative survival in a more-than-human Anthropocene. The essays are organized around two key figures that also serve as the publication’s two openings: Ghosts, or landscapes haunted by the violences of modernity; and Monsters, or interspecies and intraspecies sociality. Ghosts and Monsters are tentacular, windy, and arboreal arts that invite readers to encounter ants, lichen, rocks, electrons, flying foxes, salmon, chestnut trees, mud volcanoes, border zones, graves, radioactive waste—in short, the wonders and terrors of an unintended epoch. Contributors: Karen Barad, U of California, Santa Cruz; Kate Brown, U of Maryland, Baltimore; Carla Freccero, U of California, Santa Cruz; Peter Funch, Aarhus U; Scott F. Gilbert, Swarthmore College; Deborah M. Gordon, Stanford U; Donna J. Haraway, U of California, Santa Cruz; Andreas Hejnlol, U of Bergen, Norway; Ursula K. Le Guin; Marianne Elisabeth Lien, U of Oslo; Andrew Mathews, U of California, Santa Cruz; Margaret McFall-Ngai, U of Hawaii, Manoa; Ingrid M. Parker, U of California, Santa Cruz; Mary Louise Pratt, NYU; Anne Pringle, U of Wisconsin, Madison; Deborah Bird Rose, U of New South Wales, Sydney; Dorion Sagan; Lesley Stern, U of California, San Diego; Jens-Christian Svenning, Aarhus U.

Monsters

Discusses how European scientists from the High Middle Ages through the Enlightenment used wonders, monsters, curiosities, marvels, and other phenomena to envision the natural world.
