This book summarizes the major recent advances in the economic analysis of plant behavior.

Proceedings of the Philological Society

This volume, consisting of nineteen articles from Readings in Linguistics I and twenty articles from Readings in Linguistics II, constitutes an invaluable collection of papers in English, German, and French on subjects of continuing interest to linguists of all schools. Complete with a new preface explaining the editors' principles of selection and bibliographical citations, Readings in Linguistics I & II includes the influential work of Bloomfield, Trubetzkoy, Firth, Harris, and Kurylowicz, as well as important but less accessible articles by Vachek, Bazell, Chao, Fischer-Jorgensen, and Tesniere.

On the Economy of Plant Form and Function

A collection of literary texts, business letters and military orders from the 8th century AD, written in an Indo-Scythian dialect.

Readings in Linguistics I & II

Argues that Juvenal actively concealed his own authorship from his Satires in response to a dangerous political climate.

Indo-Scythian Studies: Being Khotanese Texts Volume IV: Volume 4

This fascinating record of how English is spoken in England is now being reprinted. Over 400 maps detail differences in phonology, lexicon, morphology and syntax. The Atlas provides a unique survey of the linguistic geography of England. This volume was inspired by the English Dialect Survey which set out to elicit information about the current dialectal usages of the older members of the farming communities throughout rural England. The Survey secondly mapped this information to illustrate the regional distributions of those features of their speech which persisted from ancient times. Published after Orton's death, the publication of this volume testified to the sustained interest in the linguistic geography of England.

Juvenal and the Poetics of Anonymity

Satire as a distinct genre of writing was first developed by the Romans in the second century BCE. Regarded by them as uniquely 'their own', satire held a special place in the Roman imagination as the one genre that could address the problems of city life from the perspective of a 'real Roman'. In this Cambridge Companion an international team of scholars provides a stimulating introduction to Roman satire's core practitioners and practices, placing them within the contexts of Greco-Roman literary and political history. Besides addressing basic questions of authors, content, and form, the volume looks to the question of what satire 'does' within the world of Greco-Roman social exchanges, and goes on to

treat the genre's further development, reception, and translation in Elizabethan England and beyond. Included are studies of the prosimetric, 'Menippean' satires that would become the models of Rabelais, Erasmus, More, and (narrative satire's crowning jewel) Swift.

Greek Musical Writings: Volume 2, Harmonic and Acoustic Theory

Excerpt from Transactions and Proceedings of the American Philological Association, 1909, Vol. 40 Heraclides of Heracleia in Pontus, a disciple of Plato, and Asclepiades of Prusa, a physician of the Ciceronian age, proposed a form of corpuscular theory of matter, which, after much discussion, is still a subject of many doubts. Some of these I hope to clear up in the course of this paper. The first question relates to our sources of information - the doxographic tradition. Beyond this, almost everything may be said to be doubtful, since conflicting testimony may be cited on almost every point. We cannot hope to make any progress, therefore, without first determining the relative value and credibility of our sources. I remember Seeing a remark, I think in Notes and Queries, that this form baffles explanation; and, at any rate, Dr. Morris has not explained it. However, it presents no difficulty; the *r* is merely intrusive, and the word is equivalent to a Low Lat. *Diuin-ista*, formed by adding *-ista* to the stem of *drain-as*. To those who tell us that we cannot explain the *r* in this word, we have merely to reply that we are not called upon to do more than to declare it to be intrusive. The Times Literary Supplement

The third volume in the collected works of Professor M.A.K. Halliday, *On Language and Linguistics*, includes eighteen chapters exploring different aspects of language from a systemic functional perspective. These are organized into three sections: the place of linguistics as a discipline; linguistics and language; and language as social semiotic. In addition, there is a new work from Professor Halliday, entitled 'The architecture of language' in which he focuses on the assumptions or working hypotheses that enabled him to explore important questions about this massive semiotic power called 'language'.

Transactions of the Philological Society

This volume is a theoretico-empirical study of nations and nationalism on a global scale. It enquires if the idea of the nation, by its own logic, is feasible and whether India fulfils the requirement of nationhood with a reasonable prospect of survival. The monograph engages with the theories of nation and nationalism and examines if they are relevant and tenable in contemporary times. It looks at the way these ideas have acted out in the Indian nation while attempting to map its future trajectory. It also asks: how do the two fundamental challenges to the idea of nation – ethnicity and class – fare in the era of globalisation; and further, how does India, a new state in an ancient society, reconceptualise the paradigm of this debate? The book will be of great interest to scholars and students of political science, political theory, history, political philosophy, and South Asian studies, as well as informed general readers.
