Le Monde perdu des dinosaures

Loin de représenter un échec de l'évolution, le monde des dinosaures constitue une étape étonnante de la vie sur terre. Bipèdes ou quadrupèdes, carnivores (Tyrannosaurus rex) ou herbivores (Diplodocus), pesant quelques kilos (Compsognatus) ou plusieurs de tonnes (Brachiosaurus), ces reptiles terrestres, incroyablement diversifiés, régnèrent sur la planète pendant quelque 150 millions d'années. Leur disparition demeurent un mystère. Fut-elle longue et inexorable ou bien brutale ? Est-elle due au formidable choc d'un astéroïde gigantesque, à une éruption volcanique qui aurait plongé la terre pendant des siècles dans l'obscurité, ou encore à la régression des eaux à la fin du Crétacé ? Au terme d'un prodigieux voyage dans le temps, Jean-Guy Michard convie le lecteur à une enquête paléontologique, à la recherche du monde perdu des dinosaures.

Le Monde Perdu

Embarquez dans une aventure épique avec "Le Monde Perdu" d'Arthur Conan Doyle. Rejoignez le professeur Challenger et son équipe alors qu'ils découvrent un monde préhistorique caché dans la forêt amazonienne, regorgeant de créatures disparues depuis longtemps. Un mélange captivant d'aventure, de découverte et de survie qui enflammera l'imagination de tout lecteur.

Le monde perdu

Six ans après la catastrophe de Jurassic Park, quelque chose a survécu. Au large du Costa Rica, les inventeurs de la fantastique épopée zoologique ont échoué et vu leur projet anéanti. Mais les dinosaures ont continué à se reproduire. Pourquoi ? Comment ? Mystère. L'île est devenue un monde perdu, repeuplé de mammifères géants et de féroces carnivores. Pour un petit groupe d'hommes et de femmes aussi érudits que téméraires, un nouveau combat commence. Le rêve scientifique s'achèvera-t-il en cauchemar, comme la première fois ?

Le monde perdu

Le Monde perdu (The Lost World) est un roman d'aventures et de fantastique de Sir Arthur Conan Doyle paru en 1912. C'est le premier volet de la série des aventures du Professeur Challenger qui comprend cinq romans. Récit d'une expédition sur un haut-plateau peuplé de créatures préhistoriques, Le Monde perdu reflète l'engouement populaire pour les dinosaures durant les premières années du XXe siècle. Adapté de nombreuses fois au cinéma et à la télévision, le roman a eu une grande influence sur des oeuvres comme King Kong et Jurassic Park. Le monde perdu: univers oublié, disparu ? Pas pour tous: Edouard Malone, reporter à la Daily Gazette, va tenter de prouver à la belle Gladys et à l'effrayant professeur Challenger qu'il existe encore. L'aventure commence dans les méandres de l'Amazone, mais les serpents venimeux et les esprits des bois ne sont pas les moindres dangers. La découverte des monstres du jurassique inaugure une série de catastrophes que le courage des aventuriers et l'intelligence des scientifiques ne parviennent pas toujours à maîtriser... Le Monde perdu n'est pas le plus célèbre roman du créateur de Sherlock Holmes, mais il devance de loin les films à grand spectacle qui nous ont familiarisés avec les pires dinosaures. Mélange d'aventures, de science-fiction et de paléontologie, Le Monde perdu multiplie les sujets d'enquête et de réflexion. Par son intrigue

émaillée de rebondissements et son style d'une grande modernité, ce texte, accessible et stimulant, est idéal pour une étude en classe. Niveau 2: recommandé pour les classes de cinquième et de quatrième.

Le Monde Perdu

La suite du best-seller qui a inspiré le film de Steven Spielberg. Suite de Jurassic Park, Le Monde perdu se déroule six ans après la catastrophe d'Isla Nublar. Bombardée par l'armée, l'île de John Hammond est désormais déserte. Selon le paléontologue Richard Levine, il serait cependant possible que des dinosaures survivent encore non loin de là. Il décide de se rendre sur ce fameux " Site B \

Jurassic Park - Tome 2 : Le Monde perdu

Le Monde perdu (The Lost World) est un roman d'aventures et de fantastique de Sir Arthur Conan Doyle paru en 1912. C'est le premier volet de la série des aventures du Professeur Challenger qui comprend cinq romans. Récit d'une expédition sur un haut-plateau peuplé de créatures préhistoriques, Le Monde perdu reflète l'engouement populaire pour les dinosaures durant les premières années du XXe siècle. Adapté de nombreuses fois au cinéma et à la télévision, le roman a eu une grande influence sur des œuvres comme King Kong et Jurassic Park. Le monde perdu : univers oublié, disparu ? Pas pour tous : Edouard Malone, reporter à la Daily Gazette, va tenter de prouver à la belle Gladys et à l'effrayant professeur Challenger qu'il existe encore. L'aventure commence dans les marécages de l'Amazonie, mais les serpents venimeux et les esprits des bois ne sont pas les moindres dangers. La découverte des monstres du jurassique inaugure une série de catastrophes que le courage des aventuriers et l'intelligence des scientifiques ne parviennent pas toujours à maîtriser... Le Monde perdu n'est pas le plus célèbre roman du créateur de Sherlock Holmes, mais il devance de loin les films à grand spectacle qui nous ont familiarisés avec les pires dinosaures. Mélange d'aventures, de science-fiction et de paléontologie, Le Monde perdu multiplie les sujets d'enquête et de réflexion. Par son intrigue émaillée de rebondissements et son style d'une grande modernité, ce texte, accessible et stimulant, est idéal pour une étude en classe. Niveau 2 : recommandé pour les classes de cinquième et de quatrième. --Ce texte fait référence à une édition épuisée ou non disponible de ce titre.

Le Monde Perdu (texte Intégral De 1913)

Un album composé de photographies spectaculaires tirées des deux films, de quelques informations secondaires sur les dinosaures et de quelques remarques sur le tournage. Une publication exclusivement d'intérêt commercial.

Le monde perdu

Une suite au ##Parc jurassique## en vue d'un film. [SDM].

Le monde perdu : roman

Le monde perdu, d'Arthur Conan Doyle a été de multiples fois adapté. Ce guide vous présente une dizaine de transpositions en bandes dessinées, les films et téléfilms de Harry Hoyt, Irwin Allen, Timothy Bond, Bob Keen, Stuart Orme, ainsi que la série animée de François Brisson et Thomas Lapiere et les trois saisons de The Lost World avec les soixante-six épisodes résumés et commentés. Il est complété par un tour d'horizon d'œuvres "parentes, pastiches ou parodies" : les comics Turok, Korak et Tarzan, trois aventures de Bob Morane, une de Luc Orient, quelques-unes des nombreuses adaptations de Voyage au centre de la Terre de Jules Verne, Lost Continent de Samuel Newfield, Unknown Island de Jack Bernhard, The Valley of Gwangi de Jim O'Connolly, The Last Dinosaur d'Alex Grasshoff et Tom Kotani, The Land that Time Forgot de Kevin Connor, Dinotopia de Marco Brambilla, King of the Lost World de Leigh Scott, etc."

VARIATIONS SUR LE MONDE PERDU

Quatre ans après la destruction de Jurassic Park, le parc d'attraction peuplé de dinosaures vivants, le professeur Ian Malcolm fait une découverte ahurissante : les animaux ont été introduits sur une autre île et vivent à l'état sauvage. Des dizaines d'espèces, libres de grandir et de se reproduire...

Le Monde des Dinosaures

JAMAIS DEPUIS JURASSIC PARK LA CHASSE AUX FOSSILES DE DINOSAURES N'AVAIT ÉTÉ AUSSI DANGEREUSE... Le roman inédit de Michael Crichton, qui lui a inspiré Jurassic Park 1993. Dandy désœuvré, le jeune William Johnson, après avoir perdu un pari, doit partir pour le Far West. Quittant son univers privilégié, l'étudiant de Yale rejoint une expédition à la recherche de fossiles préhistoriques dans les territoires reculés et hostiles du Wyoming. Mais la plus sanglante des guerres indiennes vient d'éclater. Et avec elle un autre conflit, opposant deux célèbres paléontologues prêts à tout pour déterrer d'innombrables vestiges de dinosaures et accéder à la gloire. Pactes secrets, trahisons et meurtres rythmeront l'épopée de Johnson, peuplée de figures mythiques de l'Ouest : chasseurs de bisons et chasseurs de primes, généraux en déroute et Sioux sanguinaires, as de la gâchette et danseuses de saloon. Retrouvé dans les archives de l'écrivain, ce roman inédit au confluent du western et du thriller est fondé sur des faits réels. Il lui a ensuite inspiré Jurassic Park, son plus célèbre roman.

LE MONDE PERDU.

Le monde perdu: univers oublié, disparu ? Pas pour tous: Édouard Malone, reporter à la Daily Gazette, va tenter de prouver à la belle Gladys et à l'effrayant professeur Challenger qu'il existe encore. L'aventure commence dans les méandres de l'Amazone, mais les serpents venimeux et les esprits des bois ne sont pas les moindres dangers. La découverte des monstres du jurassique inaugure une série de catastrophes que le courage des aventuriers et l'intelligence des scientifiques ne parviennent pas toujours à maîtriser. Le Monde perdu n'est pas le plus célèbre roman du créateur de Sherlock Holmes mais il devance de loin les films à grand spectacle qui nous ont familiarisés avec les pires dinosaures. Mélange d'aventures, de science-fiction et de paléontologie, Le Monde perdu multiplie les sujets d'enquête et de réflexion. Par son intrigue émaillée de rebondissements et son style d'une grande modernité, ce texte, accessible et stimulant, est idéal pour une étude de classe. Niveau 2: recommandé pour les classes de cinquième et de quatrième. Le Monde perdu figure dans les documents d'accompagnement des programmes officiels de l'Éducation Nationale

Dent de dinosaure

Un voyage dans le monde perdu des dinosaures à la rencontre des terrifiants carnassiers, des impressionnants herbivores et de toutes les créatures étranges et inclassables ! Un superbe livre géant qui révèle au fil de pages dix mini-livres étonnants et plein d'autres surprises pour vivre intensément sa passion des dinosaures. Chaque livre fourmille d'informations insolites et passionnantes pour découvrir autrement le monde de ces animaux qui ont régné sur Terre pendant 160 millions d'années.

Le monde des dinosaures

«En 1964, mes pas ont croisé la piste des dinosaures et, depuis, mes souliers ont beaucoup voyagé, du désert du Ténéré au Sertão du Brésil, de la forêt du Laos aux steppes de Mongolie; j'ai eu la chance de découvrir quelques dinosaures et la joie de partager la vie de nombreux terriens, Touaregs du Niger, Berbères du Haut-Atlas marocain ou vigneron des Corbières. En racontant ces voyages à la recherche des dinosaures, je souhaite entraîner le lecteur dans un monde qui ne doit rien à la fiction mais tout à la science.» Philippe Taquet Professeur de paléontologie au Muséum national d'histoire naturelle, dont il a été le directeur, Philippe Taquet est l'un des grands spécialistes mondiaux des dinosaures.

Le Monde Perdu

Suivez les pas d'un paléontologue à travers l'Amérique du nord, à la découverte des sites riches en fossiles de dinosaures! Vous retrouverez la majesté et l'effroi qu'inspire le royaume des dinosaures : Coelophysis, triceratops, Tyrannosaurus rex, Elasmosaurus... Dont vous pourrez monter les maquettes, afin que le jeu prolonge le plaisir de la lecture.

Le monde des dinosaures

"Il n'y a pas de mots pour décrire ce qui s'offre enfin à nos yeux ! L'expédition du professeur Challenger continue son périple en Amazonie et c'est complètement éberlué que tous découvrent enfin les dinosaures tant espérés. Leur long voyage n'aura pas été vain ! Alors que certaines espèces sont inoffensives et herbivores d'autres sont beaucoup plus hostiles aux humains et l'équipe manque même de se faire dévorer. Alors que Summerlee préconise de rebrousser chemin et de revenir avec plus d'hommes et surtout plus d'armes, Challenger s'y refuse soutenu par ses compagnons. Mais le danger

n'est pas seulement dû aux créatures, la nuit alors que de terrifiants cris retentissent, des silhouettes observent le campement... ".

Dinosaurium

Retrouvez le monde disparu des dinosaures. Comment les connaissons-nous ? Quelles étaient les grandes familles de dinosaures ? Pourquoi et comment ont-ils disparu ? Existait-il des dinosaures à plumes ? Quelles espèces actuelles descendent des dinosaures ? Grâce à de superbes reconstitutions de ces animaux extraordinaires, vous serez témoin de ces temps reculés où les dinosaures peuplaient les océans, les continents et le ciel !

Le monde des dinosaures

Dinosaur Impressions is the engaging account of thirty years of travel and paleontological exploration by Philippe Taquet, one of the world's most noted paleontologists. In this 1998 book, Dr Taquet takes the reader on a surprisingly far-flung tour ranging from the Provence countryside to the Niger desert, from the Brazilian bush to the Mongolian Steppes, and from the Laos jungle to the Moroccan mountains in search of dinosaur bones and what they have to tell us about a vanished world. With wry humor and lively anecdotes, Dr Taquet retraces the history of paleontological research along the way discussing the latest theories of dinosaur existence and extinction. Dinosaur Impressions provides a unique, thoughtful perspective not often encountered in English-speaking works. This insightful, first-hand account of an exceptional career is also a travelogue par excellence that will enthrall enthusiasts and general readers alike.

Empreinte des dinosaures (L')

Il y a 65 millions d'années, les dinosaures furent rayés de la surface du globe, à la suite d'un gigantesque cataclysme dont la cause reste encore controversée. Comète géante ? Eruption volcanique ? L'explication appartient aux paléontologues, alors que déjà, dans le Sud de la France, des restes de dinosaures et des œufs fossiles apportent un début de réponse à cette énigme. Retraçant l'épopée de ces " dinosaures français " et de leur " redécouverte " dans les années 70, Eric Buffetaut dresse le tableau de la faune du Crétacé. Une faune incroyablement diverse, aboutissement d'un règne de 160 millions d'années - la plus spectaculaire " réussite " du monde vivant depuis les origines. Car les dinosaures n'étaient pas voués à l'extinction. Sans leur disparition, l'histoire des mammifères eût sans doute pris un cours tout différent - et, a fortiori, l'histoire des hommes. Du site de Bellevue, dans l'Aude, à celui de Cruzy, dans l'Hérault, Dinosaures : à la recherche d'un monde perdu nous donne à voir, au jour le jour, le travail du paléontologue : fouilles, reconstitutions, analyses et recherches dans les musées d'histoire naturelle du monde entier. Un travail qui s'apparente à celui de l'enquêteur, et dont l'ultime objectif est de mieux comprendre l'évolution de la vie sur terre.

Le monde des dinosaures

Le procédé original des films transparents révèle et explique, avec une exceptionnelle clarté, tous les secrets de la vie des dinosaures. Tournez chaque film transparent et découvrez : - L'éclosion d'un œuf de dinosaure, - La reconstitution virtuelle de Tyrannosaurus, - Allosaurus, un féroce prédateur, en pleine partie de chasse, - Les particularités étonnantes de la tête de Styracosaurus, un dinosaure végétarien. Retournez des centaines de millions d'années en arrière et plongez dans le monde disparu des dinosaures. Partagez avec des paléontologues des découvertes fascinantes. Comprenez comment les chercheurs ont retrouvé les traces des dinosaures, de quelle manière ces animaux vivaient et pourquoi ces " lézards terribles " se sont éteints.

Le Monde perdu T02

La fascinante histoire de l'extinction des dinosaures et des débuts de l'humanité ! Le saviez-vous ? Si les dinosaures n'avaient pas disparu il y a soixante-six millions d'années à la suite d'un impact d'une météorite gigantesque dans le golfe du Mexique, nous ne serions pas là. L'Homme n'aurait pas pu exister. En effet, les dinosaures dominaient le monde et écrasaient les mammifères dont nous sommes issus. La disparition de ces grands reptiles leur a permis de se développer. C'est cette histoire passionnante que l'auteur raconte ici à la manière d'une pièce en trois actes : la vie en France à la fin du Crétacé supérieur ; l'impact de la météorite et ses effets dévastateurs ; la renaissance des mammifères et l'émergence de l'Homme. Vous vous promènerez dans le sud de la France, du côté de Cahors, et

partagerez la vie des derniers dinosaures. Vous assisterez à leur agonie, au désastre planétaire, à l'extinction de 75 % des espèces animales. Vous comprendrez pourquoi, quelques centaines de milliers d'années plus tard, des mammifères de la taille d'un mulot ont progressivement grandi, mué, grimpé dans les arbres, donnant naissance aux primates... dont nous sommes issus. Une saga étonnante qui aide à mieux comprendre le prodigieux destin de l'humanité.

Le temps des dinosaures

Au cours des quinze dernières années, d'extraordinaires découvertes ont bouleversé le monde de la paléontologie et ont fait voler en éclats certains mythes. Dinosaures à plumes, oiseaux archaïques, mammifères dévorant des dinosaures, insectes géants... Le visage de la Préhistoire a changé. D'incroyables fossiles, mis au jour notamment en Chine, dévoilent des secrets jusque-là inconnus des scientifiques. À quoi ressemblaient les premiers mammifères ? Les dinosaures avaient-ils tous des plumes ? De quelle couleur étaient-elles ? Issu de la série documentaire Les Mondes Perdus (Saint Thomas Productions/Arte), superbement illustré par des reconstitutions hyperréalistes de ces monstres du passé, enrichi d'interviews de paléontologues de renom, truffé d'anecdotes insolites, ce livre propose un nouveau regard scientifique sur le passé lointain, un voyage à travers le temps à la rencontre de la nouvelle Préhistoire.

Dinosaur Impressions

Ce livre est un guide illustré des incroyables espèces qui régnaient sur notre planète il y a des millions d'années. Vous y découvrirez plus de 250 espèces disparues, dont certaines viennent tout juste d'être exhumées. Cet ouvrage, merveilleusement illustré, fourmille d'informations sur l'anatomie, le comportement, le régime alimentaire et l'habitat de ces créatures de la préhistoire. Faites connaissance avec les tout premiers dinosaures et leurs descendants, les herbivores géants, les énormes carnivores et les reptiles qui dominaient les océans et les cieux. suivez la progression continue des chasseurs de fossiles qui nous révèlent ce monde merveilleux.

Dinosaures

A Propos Doyle: Sir Arthur Ignatius Conan Doyle, DL (22 May 1859 - 7 July 1930) was a Scottish author most noted for his stories about the detective Sherlock Holmes, which are generally considered a major innovation in the field of crime fiction, and the adventures of Professor Challenger. He was a prolific writer whose other works include science fiction stories, historical novels, plays and romances, poetry, and non-fiction. Conan was originally a given name, but Doyle used it as part of his surname in his later years. Source: WikipediaLe Monde perdu (The Lost World) est un roman d'aventures et de fantastique de Sir Arthur Conan Doyle paru en 1912. C'est le premier volet de la série des aventures du Professeur Challenger qui comprend cinq romans. Récit d'une expédition sur un haut-plateau peuplé de créatures préhistoriques, Le Monde perdu reflète l'engouement populaire pour les dinosaures durant les premières années du XXe siècle. Adapté de nombreuses fois au cinéma et à la télévision, le roman a eu une grande influence sur des oeuvres comme Jurassic Park et King Kong.

La vie des dinosaures

Remonte le temps et explore le monde incroyable des dinosaures. Découvre le diplodocus, gros comme quatre autobus, le stégosaure avec son cerveau minuscule et le terrible tyrannosaure qui doit manger un petit dinosaure tous les deux jours pour rester en vie ! Amuse-toi aussi avec des jeux et un quiz, et complète les scènes avec plus de 300 super stickers.

Le monde incroyable des dinosaures

Quelle taille faisaient les dinosaures ? Que pouvaient-ils bien manger ? A quoi servait le long cou de certains dinosaures ? Quand ont-ils disparu ? Savaient-ils nager ? Et voler ? Grâce au contrôleur et à tous les amis du Dino Train, le monde des dinosaures n'aura plus de secrets pour toi ! Avec un super poster g "ant de tous les dinosaures !

La fin des dinosaures - S'ils n'avaient pas disparu nous ne serions pas là !

Parcours les diverses périodes de la vie sur Terre, à travers la formation des fossiles. Explore le monde disparu des dinosaures, des premiers brachiosaures aux redoutables tyrannosaures, sans oublier les

ptérosaures, les reptiles du ciel. Découvre les animaux et les plantes qui vivaient il y a cinq cents millions d'années.

Le monde fantastique des dinosaures

A partir d'un journal de bord de deux naturalistes anglais partis sur les traces de Darwin en 1860, s'élabore une agréable utopie qui, à l'instar du "monde perdu" de Conan Doyle, se révèle un continent intemporel où ont survécu les dinosaures et autres bestioles apparentées. Un récit jubilatoire, puisque ces bêtes sont familières et bienveillantes envers l'homme, un roman à la Jules Verne rehaussé d'étonnantes illustrations.

La musique de la nuit des temps aux aurores nouvelles

Showcases the energy and diversity of the young field of music semiology, appealing to readers who want to explore the meaning of music in our lives.

Catalog of Copyright Entries. Third Series

The subject of this study has two distinct but not unrelated aspects: first, an investigation into the sociology of music as an autonomous and specialized discipline; and second, an examination of certain fundamental facts that may be considered within the purview of the sociology of music itself. If an analysis and study even a preliminary one of these facts is to be properly focused and fruitful, we must first try to determine the subject and methods of the sociology of music, its position and boundaries in respect to musicology, and, most especially, its relation to the aesthetics of music and music history. It is equally indispensable to ascertain what the sociology of music as a separate scholarly discipline embraces, where its investigation leads, and, finally, to establish its position vis-a-vis sociology in general. (From the Author's Introduction.)

The Dawn of Music Semiology

A new perspective on post-war avant-garde music's engagement with records, highlighting the stereo technology that also fascinated popular music creators.

Music in Society

A pour ambition de présenter la vie de ce compositeur finlandais (1865-1957), d'esquisser à grands traits ses oeuvres les plus significatives et de conduire le mélomane curieux à découvrir un monde véritablement singulier, source de grandes beautés et vecteur de moments paroxystiques inoubliables.

Avant-Garde on Record

In 1996 the French journalist Claude Glayman conducted a series of interviews with Henri Dutilleux which were published in France in 1997. The translator is the UK's leading translator of French musical writing, Roger Nichols.

Jean Sibelius

The English National Opera Guides were originally conceived in partnership with the English National Opera and edited by Nicholas John, the ENO's dramaturg, who died tragically in an accident in the Alps. Most of the guides are devoted to a single opera, which is described in detail—with many articles that cover its history and information about the composer and his times. The complete libretto is included in both the original language and in a modern singing translation—except where the opera was written in English. Each has a thematic guide to the most important musical themes in musical notation and each guide is lavishly illustrated. They also contain a bibliography and a discography which is updated at each reprint. The ENO guides are widely regarded as the best series of their kind and excellent value.

Henri Dutilleux

This first book in English on the French composer André Jolivet (1905–1974) investigates his music, life and influence. A pupil of Varèse and colleague of Messiaen in La Jeune France, Jolivet is a major figure in French music of the twentieth century. His music combines innovative language with spirituality, summarised in his self-declared axiom to 'restore music's ancient original meaning when it was the magic and incantatory expression of the sacred in human communities'. The book's contextual introduction is followed by contributions, edited by Caroline Rae, from leading international scholars including the composer's daughter Christine Jolivet-Erlh. These assess Jolivet's output and activities from the 1920s through to his last works, exploring creative process, aesthetic, his relationship with the exotic and influences from literature. They also examine, for the first time, the significance of Jolivet's involvement with the visual arts and his activities as conductor, teacher and critic. A chronology of Jolivet's life and works with details of first performances provides valuable overview and reference. This fascinating and comprehensive volume is an indispensable source for research into French music and culture of the twentieth century.

Der Rosenkavalier (The Knight of Rose)

This title was first published in 2000. Pianist and scholar Rae presents a detailed study of composer Maurice Ohana's life and music, and identifies the procedures that characterize his mature style. In the initial chapters, she provides a biographical overview and sets his work in its musical and cultural context.

André Jolivet: Music, Art and Literature

This 6-volume set of Bakers covers all musical genres, with entries written by a distinguished group of area specialists as well as the original articles of Nicolas Slonimsky. More than 15, 000 biographies span the medieval ages to the present. This work continues the tradition of offering the most comprehensive and authoritative information on the musicians, along with interesting and insightful evaluations of their contributions to the musical world. Bakers remains the most affordable, comprehensive and readable of all music reference works, providing everyone from the student to scholar a one-stop resource for all their music biographical needs. Some of the artists featured include: Louis Armstrong Johann Sebastian Bach The Beatles Ludwig van Beethoven James Brown John Cage Maria Callas Johnny Cash Miles Davis Claude Debussy Marvin Gaye Philip Glass George Frideric Handel Charlie Parker Luciano Pavarotti Arturo Toscanini Tom Waits And many more

The Music of Maurice Ohana

This new edition (last, 1992) includes entries on some 500 musicians who were not included in the eighth edition (such as violin virtuoso Sarah Chang) and updates many others (such as composer

John Cage, who died after the 8th edition was published). As before, entries also include musicians and composers of the 1800s and artists from other musical genres whose work has significantly influenced 20th century classical music. A glossary of terms is included at the end of the volume. c. Book News Inc.

Catalog of Copyright Entries. Third Series

Ce volume comprend le répertoire de tous les traducteurs repris dans les différents volumes et les index des genres, des sujets, des auteurs, des œuvres et des traducteurs qui permettent une navigation systématique et raisonnée dans l'ensemble du Patrimoine littéraire européen.

Catalogue of Title-entries of Books and Other Articles Entered in the Office of the Librarian of Congress, at Washington, Under the Copyright Law ... Wherein the Copyright Has Been Completed by the Deposit of Two Copies in the Office

Une histoire de la musique occidentale, avec un chapitre assez important sur la musique dans l'Antiquité et un autre sur la musique dans les pays non occidentaux. Présentation des compositeurs et de l'évolution des formes musicales. Bien documenté et assez abondamment illustré, en noir principalement. Discographie systématique sélective assez développée. En tout, plus de onze cents pages bien remplies.

Music in the World of Ideas

L'écrivain uruguayen Felisberto Hernández (Montevideo, 1902-1964), bien que peu connu en France, est l'auteur d'une oeuvre singulière. Il est reconnu aujourd'hui comme un des maîtres de la littérature fantastique latino-américaine, un novateur de la fiction et de la métafiction sur fond autobiographique. Dans son oeuvre, écrite principalement sous forme de récits et de nouvelles, la musique est un référent essentiel. Musicien et pianiste de formation, Hernández fait intervenir la composante musicale à plusieurs niveaux du discours narratif, soit d'une façon explicite, évoquant un passé musical autobiographique, soit par le biais de l'allusion implicite ou suggestive.

The New Grove Dictionary of Music and Musicians: Glinka to Harp

La musique, moyen de communication, disséquée et transformée par les outils d'une technique de communication : tourne-disques puis magnétophones de la radiodiffusion. Ce, grâce - ou à cause - d'un homme : Pierre Schaeffer, qui fut quasiment à lui seul, pendant cinquante ans, la réflexion voire l'histoire des deux disciplines.

National Union Catalog

La carrière du compositeur, né en 1916, est retracée. Arrière-petit-fils de Constant Dutilleux (1807-1865), peintre proche de Corot et ami de Delacroix et petit-fils de Julien Koszul, qui, lui, fut le condisciple de Gabriel Fauré, Henri Dutilleux explique comment il n'a jamais envisagé d'être autre chose que compositeur.

An out-of-this-world activity book packed with puzzles, things to spot, colouring, drawing and doodle activities. Little children can add sticker planets to the Solar System, draw a rocket blasting into space, colour an alien birthday party and lots more. With lots of stickers to add, this is guaranteed to keep any budding astronaut busy for hours.

The Usborne Little Children's Activity Book

This book is filled with mixed activities to keep little children happy and occupied on holiday, on journeys and at home. Contains lots of puzzles, drawing, colouring, dot-to-dots, mazes, spot the difference and so on.

Little Children's Under the Sea Activity Book

An activity book awash with an irresistible selection of brightly illustrated brain teasers on an undersea theme; things to find, similarities to spot, differences to detect, fish to draw and colour and more. Young children can enjoy pages full of fun activities and puzzles, developing their powers of observation, and their number and language skills whilst learning about underwater creatures.

Little Children's Holiday Activity Book

A holiday themed, write-in activity book for little children, full of lots of different things to do. There are things to spot, mazes to follow, colouring, drawing and lots more. All you need is some pens or pencils to complete the activities so this is a perfect book for holidays, rainy days or journeys. Readers won't realise that they are learning information and practising valuable skills while completing the fun activities. Part of a series of activity books for little children.

Little Children's Zoo Activity Book

An imaginative zoo-themed activity book for young children, packed with lots of puzzles, mazes, dot-to-dot, pictures to colour and things to spot. Facts about zoos, the people who work in them and the creatures that live there are incorporated into the activities. A fun way to extend a fun day at the Zoo. All the reader needs are some pens or pencils, so this is an ideal activity book for holidays and rainy days or down-time.

Little Children's Pirate Activity Book

An action-packed, write-in activity book for little children, full of lots of different things to do. There are things to spot, mazes to follow, colouring, drawing and lots more. Factual information about the life aboard a pirate ship are incorporated into the activities. Illustrations: Full colour throughout

Little Children's Activity Book Spot-The-difference Puzzles Draw

A write-in book packed with masses of activities, including puzzles, drawing, colouring, dot-to-dot, mazes and spot the difference.

Little Children's Christmas Activity Book

A write-in activity book for young children, full of mazes, dot-to-dot, drawing, colouring, stickering, spot-the-difference, counting, spotting and matching activities - all themed around christmas.

Little Children's Sticker Book

A bright and cheerful sticker book, which offers both simple outlines to guide sticker placement, and plenty of space for unstructured play, too. This enchanting sticker book is full of bright, cheerful pictures that will engage young readers. There are inviting scenes to decorate on every page, offering both simple outlines to guide sticker placement, and plenty of space for unstructured play, too. It's a great way to help little children develop fine motor skills.

Wipe-Clean Space Activities

Spot the differences between space suits, find shooting stars, join the dots on a space station and much more in this out-of-this-world activity book. The activities are designed to help young children develop

their counting, observation and pen control skills, and the durable wipe-clean pages mean the book can be enjoyed again and again.

Little Children's Dinosaur Puzzles

This exciting activity pad is packed with dinosaur-themed word, number and picture puzzles for young children. Spot the difference between long-necked leaf-eaters and toothy tyrannosaurs, lead a team of scientists through a maze to a pit full of fossils, complete a dinosaur wordsearch and more. All the activities are designed to help children develop vital skills in reading, writing, counting and observation. An ideal gift for dinosaur fans and you only need a pen or pencil. Young children can enjoy the puzzles alone or shared - the pad can be split up between a group of children at parties, play dates, sleepovers or on holidays. Answers are given on separate sheets at the back of the pad. Perfect year-round title for museums, toy shops and gift shops as well as bookshops.

Space Sticker Activity Book

This charming book is guaranteed to please any young fan of space exploration and science. The activities found in these pages invite readers to solve puzzles, color in pictures--and draw their own--and even qualify for their very first Teddy Space Agency Certificate. Packed with one hundred stickers and full of fun, it will be the perfect gift for budding astronauts.

My Very First Space Book

This is non-fiction for very young children, who will find lots of things to look at and talk about in this highly visual book about what it was like in space. Space is a perennially fascinating subject for very young children who will love learning about spacecraft and exploration -- whilst the rich vocabulary will be invaluable when they start learning to read.

Little Children's Music Book

There's a concert in the forest tonight. Listen to the magical music as Squirrel, Mole, Weasel, Badger and Fox play their part then all perform together.

Planet Earth Activity Book

Fascinating activity book for children to explore the wonders of our planet. The puzzles and activities in this book will take you to the furthest corners of the Earth. You'll spot wildlife in the Amazon Rainforest and find a wonderful array of corals in the Great Barrier Reef to colour in. You'll discover the highest mountains on all the world's continents and identify volcanoes around the Pacific Ocean in the Ring of Fire. And when you come to reunite a herd of elephants on the African savanna, you'll learn why these amazing creatures are rather like gardeners.

Science Activity Book

An activity book to accompany Collins First English Words, winner of the Best Entry for Young Learners prize at HRH The Duke of Edinburgh English Language Book Awards 2012.

Collins First

Ted took a big deep breath then fired up the engines. The rocket's boosters rumbled into action like a hungry bear belly. "No adventure can start without a countdown " shouted Ted over the roar of the engines. 5 ... 4 ... 3 ... 2 ... 1 ... BEAR BLAST OFF In this richly illustrated book, astronomer Elizabeth Avery takes children and their parents on an educational and exciting journey through space. In these captivating pages, a bear named Ted takes off for a trip through the solar system with his best friend--a flower named, aptly, Fleur. The pair explore our moon, and from there they head out to places no being from Earth has yet visited: our neighboring planets Mars and Venus, more distant locales like Jupiter and Saturn, and even the source of all Earth's energy, the Sun. At each stop in this winning adventure, the pair learns basic scientific facts that are presented at a level that early readers can grasp. The result is a trip that is simultaneously instructive and entertaining, an interplanetary romp that will inspire kids to follow their scientific dreams.

Teds Space Adventure

A write-in, tear-off activity pad containing lots of puzzles; look and find, mazes, dot-to-dots, word searches and more will help children develop vital reading, writing, counting and observational skills. Great for keeping children occupied on journeys, rainy days or during quiet moments. Perfect for sharing with a friend.

Little Children's Travel Pad

Suitable for young children aged 3+ Use the world as your classroom; keep travel meaningful and memorable, educational and fun. www.tinytourists.co.uk

Tenerife! Children's Travel Activity and Keepsake Book

The Secret Woodland Activity Book is a beautifully illustrated and immersive Scandinavian-style woodland-themed activity book full of magic and make-believe. Rather than being an activity book that children take with them when playing outside, this exciting title is packed full of woodland activities for children to do wherever they are. Some of the characters in the woodland activity book include magical birds, woodland sprites and fairies as well as other more conventional creatures such as bears, owls and foxes. Activities in The Secret Woodland Activity Book include mazes, paper crafts activities, coloring in, recipes, scenes to create with help from the included stickers and treasure maps, and all with a mystical and magical theme!

The Secret Woodland Activity Book
