Intro

The Board's Role in Quality Improvement and Eliminating Patient Harm

Does the quality committee report to the board?

Does your organization have a strategic quality improvement plan with clear goals for improvement that use data and benchmarks?

Does your hospital/health system have a method for monitoring quality and patient safety events?

Does your board have written, well-defined leadership and oversight responsibilities for quality improvement?

What type of governance education is offered to ensure that board members thoroughly understand the importance of quality?

Have you identified a quality improvement priority?

Does your organization actively look to learn from patient safety events and implement changes based on such events?

Are these target goals structured to hold leadership and staff accountable for quality performance?

Does your board assess and continuously improve quality and safety literacy through education and training?

The Alignment of Safety and Quality with Financial Performance

Do quality improvement and efficiency measures play a role in your financial planning?

Does your organization's quality improvement strategies impact your financial performance?

Does your board allocate resources for data collection and to support and implement quality improvement initiatives?

Does your board have a clear, understood approach to monitor quality that includes a dashboard for monitoring overall performance?

What quality measures does your organization currently collect and report? Does the board review these measures?

The Importance of Measuring Harm Across the Board

Can you state your organizations key strategic priorities in terms of reducing patient harm?

Does your board take steps to learn about and understand all patient safety events, understanding the event and the factors involved in why it may have happened?

How does your board reinforce accountability while continuing to monitor outcomes of care?

Does your organization have effective quality and safety measures and tracking processes in place to identify when patient safety events occur?

Does your board and hospital/health system leadership have an established process for responding

to and learning from events?

Do your clinicians communicate and interact with your board as it relates to quality improvement policies?

Does your board ensure that clinicians achieve set quality goals?

Does your board have reliable, on-going mechanisms to communicate with and engage with clinicians about quality?

Has your board identified clinical champions within the organization to help improve quality but also enhance clinician support and engagement?

Has your organization adopted a culture of safety and has the board taken steps to promote an environment of excellence?

Does your board engage management in performance improvement and tie financial incentives to meeting organizational goals?

Does your board recognize successes and share lessons learned among all parts of the organization?

Does your board oversee the process of assessing the organization's values, policies and leadership actions against your desired culture?

Does your board support a strong safety culture

The Importance of Patient, Family and Community Engagement in Improving Quality

Does your organization have methods to engage patients, families and the community in setting quality goals?

Does your organization work to educate patients and families about their health and their role in quality improvement?

Do your leaders engage patients and families to learn about the care process and identify opportunities for quality and safety improvements?

Does your board support and encourage engagement strategies that help educate patients and engage them as active partners in their health?

How Diversity in the Board Room Can Improve Quality and Eliminate Disparities

Does your board reflect the diversity of your hospital/health system in terms of staff, patients and the community you serve?

Does your board measure and understand potential disparities among your patient populations?

Does your board ensure that patient diversity and disparities in care are accounted for and considered when quality improvement goals are set?

Does your board reflect the patient population and community your organization serves?

Is patient diversity and disparities in care a key factor monitored when collecting data and setting overall quality improvement goals?

Product Life Cycle Management Complete Self-Assessment Guide

How can skill-level changes improve Product Life Cycle Management? How does Product Life Cycle Management integrate with other business initiatives? How do we Improve Product Life Cycle Management service perception, and satisfaction? Are there any easy-to-implement alternatives to Product Life Cycle Management? Sometimes other solutions are available that do not require the cost implications of a full-blown project? Is the Product Life Cycle Management process severely broken such that a re-design is necessary? Defining, designing, creating, and implementing a process to solve a business challenge or meet a business objective is the most valuable role... In EVERY company, organization and department. Unless you are talking a one-time, single-use project within a business, there should be a process. Whether that process is managed and implemented by humans, AI, or a combination of the two, it needs to be designed by someone with a complex enough perspective to ask the right questions. Someone capable of asking the right questions and step back and say, 'What are we really trying to accomplish here? And is there a different way to look at it?' For more than twenty years, The Art of Service's Self-Assessments empower people who can do just that - whether their title is marketer, entrepreneur, manager, salesperson, consultant, business process manager, executive assistant, IT Manager, CxO etc... - they are the people who rule the future. They are people who watch the process as it happens, and ask the right questions to make the process work better. This book is for managers, advisors, consultants, specialists, professionals and anyone interested in Product Life Cycle Management assessment. Featuring 447 new and updated case-based questions, organized into seven core areas of process design, this Self-Assessment will help you identify areas in which Product Life Cycle

Management improvements can be made. In using the questions you will be better able to: - diagnose Product Life Cycle Management projects, initiatives, organizations, businesses and processes using accepted diagnostic standards and practices - implement evidence-based best practice strategies aligned with overall goals - integrate recent advances in Product Life Cycle Management and process design strategies into practice according to best practice guidelines Using a Self-Assessment tool known as the Product Life Cycle Management Scorecard, you will develop a clear picture of which Product Life Cycle Management areas need attention. Included with your purchase of the book is the Product Life Cycle Management Self-Assessment downloadable resource, containing all questions and Self-Assessment areas of this book. This enables ease of (re-)use and enables you to import the questions in your preferred management tool. Access instructions can be found in the book. You are free to use the Self-Assessment contents in your presentations and materials for customers without asking us - we are here to help. This Self-Assessment has been approved by The Art of Service as part of a lifelong learning and Self-Assessment program and as a component of maintenance of certification. Optional other Self-Assessments are available. For more information, visit <http://theartofservice.com>

Product Lifecycle Management Complete Self-Assessment Guide

At what point will vulnerability assessments be performed once Product lifecycle management is put into production (e.g., ongoing Risk Management after implementation)? Risk factors: what are the characteristics of Product lifecycle management that make it risky? What are your results for key measures or indicators of the accomplishment of your Product lifecycle management strategy and action plans, including building and strengthening core competencies? Record-keeping requirements flow from the records needed as inputs, outputs, controls and for transformation of a Product lifecycle management process. ask yourself: are the records needed as inputs to the Product lifecycle management process available? Are accountability and ownership for Product lifecycle management clearly defined? Defining, designing, creating, and implementing a process to solve a business challenge or meet a business objective is the most valuable role... In EVERY company, organization and department. Unless you are talking a one-time, single-use project within a business, there should be a process. Whether that process is managed and implemented by humans, AI, or a combination of the two, it needs to be designed by someone with a complex enough perspective to ask the right questions. Someone capable of asking the right questions and step back and say, 'What are we really trying to accomplish here? And is there a different way to look at it?' Management Product Complete Self-Assessment Guide

What are the compelling business reasons for embarking on Software Development Life Cycle (SDLC)? Have the types of risks that may impact Software Development Life Cycle (SDLC) been identified and analyzed? If substitutes have been appointed, have they been briefed on the Software Development

goals and received regular communications as to the progress to date? What are the expected benefits of Software Development Life Cycle (SDLC) to the business? How does the Software Development manager ensure against scope creep? Defining, designing, creating, and implementing a process to solve a business challenge or meet a business objective is the most valuable role... In EVERY company, organization and department. Unless you are talking a one-time, single-use project within a business, there should be a process. Whether that process is managed and implemented by humans, AI, or a combination of the two, it needs to be designed by someone with a complex enough perspective to ask the right questions. Someone capable of asking the right questions and step back and say, 'What are we really trying to accomplish here? And is there a different way to look at it?' For more than twenty years, The Art of Service's Self-Assessments empower people who can do just that - whether their title is marketer, entrepreneur, manager, salesperson, consultant, business process manager, executive assistant, IT Manager, CxO etc... - they are the people who rule the future. They are people who watch the process as it happens, and ask the right questions to make the process work better. This book is for managers, advisors, consultants, specialists, professionals and anyone interested in Software Development assessment. Featuring 379 new and updated case-based questions, organized into seven core areas of process design, this Self-Assessment will help you identify areas in which Software Development improvements can be made. In using the questions you will be better able to: - diagnose Software Development projects, initiatives, organizations, businesses and processes using accepted diagnostic standards and practices - implement evidence-based best practice strategies aligned with overall goals - integrate recent advances in Software Development and process design strategies into practice according to best practice guidelines Using a Self-Assessment tool known as the Software Development Index, you will develop a clear picture of which Software Development areas need attention. Included with your purchase of the book is the Software Development Self-Assessment downloadable resource, containing all questions and Self-Assessment areas of this book. This enables ease of (re-)use and enables you to import the questions in your preferred management tool. Access instructions can be found in the book. You are free to use the Self-Assessment contents in your presentations and materials for customers without asking us - we are here to help. This Self-Assessment has been approved by The Art of Service as part of a lifelong learning and Self-Assessment program and as a component of maintenance of certification. Optional other Self-Assessments are available. For more information, visit <http://theartofservice.com>

How To Create A Blue Ocean: Look Across The Functional-Emotional Appeal To Buyers - How To

Create A Blue Ocean: Look Across The Functional-Emotional Appeal To Buyers by Blue Ocean

Strategy 1,132 views 4 years ago 1 minute, 36 seconds - Some industries compete principally on

price and function – their appeal is rational. Other industries compete primarily on feelings ...

ways to develop your blue ocean ideas

to create blue oceans of new market space and strong profitable growth.

Some industries compete principally on price and function based largely on calculations of utility

Yet the appeal of most products or services is rarely intrinsically one or the other.

when they are willing to challenge the functional- emotional orientation of an industry

Starbucks elevated what was a commodity product into a coffee experience.

Drybar turned getting a blowout into an emotional experience from a typically functional one

If it competes on emotional appeal, what elements can YOU strip out to make it functional?

If it competes on functionality, what elements can YOU add to make it emotional?

How To Create A Blue Ocean: Look Across Complementary Products Or Service Offerings - How To

Create A Blue Ocean: Look Across Complementary Products Or Service Offerings by Blue Ocean

Strategy 1,018 views 4 years ago 1 minute, 30 seconds - Few products and services are used on

their own. Most of the time, other products and services affect their value. But in most ...

ways to develop your blue ocean ideas

to create blue oceans of new market space and strong profitable growth

Look Across Complementary Products or Service Offerings

Most companies converge within the bounds of their industry's product and service offerings.

But untapped value is often hidden in complementary products and services.

The key is to define the total solution buyers seek when they choose a product or service.

A simple way to do so is to think about what happens before, during, and after your product is used.

What are the pain points in buying a book?

What do customers think about it?

What is the context in which the product or service you are interested in is used?

How can YOU eliminate these pain points through a complementary product or service offering

to open up a blue ocean of new market space?

Join the Blue Ocean Entrepreneurship Competition NOW!

How To Create A Blue Ocean: Look Across Buyer Groups - How To Create A Blue Ocean: Look

Across Buyer Groups by Blue Ocean Strategy 1,082 views 4 years ago 1 minute, 31 seconds - Start

creating your **blue ocean**, by looking across a chain of buyers rather than focusing on your target

buyer. There are many ...

Based on studying over 150 strategic moves

to create blue oceans of new market space and strong profitable growth.

Look Across Buyer Groups

By shifting the buyer group of their industry, companies can create new market space.

Insulin supplied in vials was challenging to administer

Patients were left with the difficult task of dosing

Needles and syringes evoked unpleasant feelings of social stigmatism.

Novo Nordisk created Novopen

Novo Nordisk is not the only example

Can YOU identify the chain of buyers in your targeted industry?

seconds - To create a **blue ocean**., you need to look beyond your existing industry. Don't focus on

beating the rivals within your industry.

How To Capture Your Overall Business Strategy in One Picture - How To Capture Your Overall

Business Strategy in One Picture by Blue Ocean Strategy 1,177 views 4 years ago 2 minutes, 43

seconds - The **blue ocean strategy**, canvas will show you how to present your blue ocean idea in

one simple picture. It is one of the most ...

Wonder how to present your blue ocean idea?

you need to present your blue ocean idea.

in one simple picture

Go back to the four questions

The four actions will help you to create your strategy canvas.

By asking those 4 questions

simply place this range of factors on the horizontal axis.

Then, you have to show the current offering level that buyers receive

in your targeted industry's strategy

across all of these key competing factors on the vertical axis.

Then, you have to show your blue ocean profile

The strategy canvas allows you to see on one page how your business offering stands apart from competitors.

When Australia's Casella Winery introduced [yellow tail] in the US the market was highly competitive.

[yellow tail] soon emerged as the overall bestselling 750ml red wine outstripping Californian, French and Italian brands.

Let's look at what [yellow tail] eliminated, reduced, raised and created to get to their blue ocean.

And now look at how different their strategy was compared to the budget wine industry.

Get the Strategy Canvas App to easily draw your strategy canvas on your iPad or Android tablet
Good luck in presenting your blue ocean idea!

4 Questions to Ask when Developing Your Blue Ocean Pitch - 4 Questions to Ask when Developing Your Blue Ocean Pitch by Blue Ocean Strategy 1,597 views 4 years ago 1 minute, 48 seconds - Start with asking the right questions when developing your **blue ocean**, idea. If you are a high school student interested in ...

In developing your blue ocean pitch you need to ask yourself

Which factors that your target industry takes for granted should be eliminated?

Which factors that your target industry has never offered should be created?

The first two questions of eliminate and reduce give you insight into

By contrast, the second two questions of raise and create

Drybar eliminated haircuts & coloring

They reduced hair styling equipment, stylist reputation

and stylist requirements for ancillary services (perm, color)

They raised the ambiance with a chic & fun cocktail bar atmosphere

and they raised the personal service, exclusive merchandise and the convenience.

Lastly, Drybar created a fun experience and blowout styles.

Look how different their strategy is

In developing your own strategy

what can YOU eliminate, reduce, raise and create?

Release Management in ServiceDesk Plus - Release Management in ServiceDesk Plus by ManageEngine 4,049 views 2 years ago 22 minutes - In this video, we will go over the components, workflows, processes, roles, and other elements required to set up an effective ...

Intro

Service desk teams can now build multiple release templates with additional fields, form layout customizations, roles to manage members for each release, and stages and statuses to control the flow of the release

The visual release workflow builder allows teams to stitch all these elements together on a drag-and-drop canvas.

Release management helps in scheduling, planning, controlling, testing, and deploying an agreed and accepted change or project process for an organization

When an IT change request is approved and ready for implementation, the implementation is further planned and proceeds using the release management process, which is controlled by members of the change board to ensure a successful release
