The Disappearing Spoon

The infectious tales and astounding details in 'The Disappearing Spoon' follow carbon, neon, silicon and gold as they play out their parts in human history, finance, mythology, war, the arts, poison and the lives of the (frequently) mad scientists who discovered them.

The Lady and Her Monsters

The Lady and Her Monsters by Roseanne Motillo brings to life the fascinating times, startling science, and real-life horrors behind Mary Shelley's gothic masterpiece, Frankenstein. Montillo recounts how—at the intersection of the Romantic Age and the Industrial Revolution—Shelley's Victor Frankenstein was inspired by actual scientists of the period: curious and daring iconoclasts who were obsessed with the inner workings of the human body and how it might be reanimated after death. With true-life tales of grave robbers, ghoulish experiments, and the ultimate in macabre research—human reanimation—The Lady and Her Monsters is a brilliant exploration of the creation of Frankenstein, Mary Shelley's horror classic.

Mein Kampf

Madman, tyrant, animal—history has given Adolf Hitler many names. In Mein Kampf (My Struggle), often called the Nazi bible, Hitler describes his life, frustrations, ideals, and dreams. Born to an impoverished couple in a small town in Austria, the young Adolf grew up with the fervent desire to become a painter. The death of his parents and outright rejection from art schools in Vienna forced him into underpaid work as a laborer. During the First World War, Hitler served in the infantry and was decorated for bravery. After the war, he became actively involved with socialist political groups and quickly rose to power, establishing himself as Chairman of the National Socialist German Worker's party. In 1924, Hitler led a coalition of nationalist groups in a bid to overthrow the Bavarian government in Munich. The infamous Munich "Beer-hall putsch" was unsuccessful, and Hitler was arrested. During the nine months he was in prison, an embittered and frustrated Hitler dictated a personal manifesto to his loyal follower Rudolph Hess. He vented his sentiments against communism and the Jewish people in this document, which was to become Mein Kampf, the controversial book that is seen as the blue-print for Hitler's political and military campaign. In Mein Kampf, Hitler describes his strategy for rebuilding Germany and conquering Europe. It is a glimpse into the mind of a man who destabilized world peace and pursued the genocide now known as the Holocaust.

The Field Guide to the North American Teenager

William C. Morris YA Debut Award Winner! A hilarious YA contemporary realistic novel about a witty Black French Canadian teen who moves to Austin, Texas, and experiences the joys, clichés, and awkward humiliations of the American high school experience—including falling in love. Perfect for fans of Nicola Yoon, When Dimple Met Rishi, and John Green. Norris Kaplan is clever, cynical, and quite possibly too smart for his own good. A Black French Canadian, he knows from watching American sitcoms that those three things don't bode well when you are moving to Austin, Texas. Plunked into a new high school and sweating a ridiculous amount from the oppressive Texas heat, Norris finds himself cataloging everyone he meets: the Cheerleaders, the Jocks, the Loners, and even the Manic Pixie Dream Girl. Making a ton of friends has never been a priority for him, and this way he can at least amuse himself until it's time to go back to Canada, where he belongs. Yet against all odds, those labels soon become actual people to Norris...like loner Liam, who makes it his mission to befriend Norris, or Madison the beta cheerleader, who is so nice that it has to be a trap. Not to mention Aarti the Manic Pixie Dream Girl, who might, in fact, be a real love interest in the making. But the night of the prom, Norris screws everything up royally. As he tries to pick up the pieces, he realizes it might be time to stop hiding behind his snarky opinions and start living his life—along with the people who have found their way into his heart.

The Taming of Chance

This book combines detailed scientific historical research with characteristic philosophic breadth and verve.

Economic Science Fictions

An innovative new anthology exploring how science fiction can motivate new approaches to economics. From the libertarian economics of Ayn Rand to Aldous Huxley's consumerist dystopias, economics and science fiction have often orbited each other. In *Economic Science Fictions*, editor William Davies has deliberately merged the two worlds, asking how we might harness the power of the utopian imagination to revitalize economic thinking. Rooted in the sense that our current economic reality is no longer credible or viable, this collection treats our economy as a series of fictions and science fiction as a means of anticipating different economic futures. It asks how science fiction can motivate new approaches to economics and provides surprising new syntheses, merging social science with fiction, design with politics, scholarship with experimental forms. With an opening chapter from Ha-Joon Chang as well as theory, short stories, and reflections on design, this book from Goldsmiths Press challenges and changes the notion that economics and science fiction are worlds apart. The result is a wealth of fresh and unusual perspectives for anyone who believes the economy is too important to be left solely to economists. Contributors AUDINT, Khairani Barokka, Carina Brand, Ha-Joon Chang, Miriam Cherry, William Davies, Mark Fisher, Dan Gavshon-Brady and James Pockson, Owen Hatherley, Laura Horn, Tim Jackson, Mark Johnson, Bastien Kerspern, Nora O Murchú, Tobias Revell et al., Judy Thorne, Sherryl Vint, Joseph Walton, Brian Willems

Dead Lies Dreaming

In a world where magic has gone mainstream, a policewoman and a group of petty criminals are pulled into a heist to find a forbidden book of spells that should never be opened. A new adventure begins in the world of the Laundry Files. *Dead Lies Dreaming* presents a nightmarish vision of a Britain sliding unknowingly towards occult cataclysm . . . 'Grim, hilarious, inventive - make the video game now please' Tamsyn Muir

The Memoirs of Lady Hyegyong

Lady Hyegyong's memoirs, which recount the chilling murder of her husband by his father, form one of the best known and most popular classics of Korean literature. From 1795 until 1805 Lady Hyegyong composed this masterpiece, depicting a court life Shakespearean in its pathos, drama, and grandeur. Presented in its social, cultural, and historical contexts, this first complete English translation opens a door into a world teeming with conflicting passions, political intrigue, and the daily preoccupations of a deeply intelligent and articulate woman. JaHyun Kim Haboush's accurate, fluid translation captures the intimate and expressive voice of this consummate storyteller. Reissued nearly twenty years after its initial publication with a new foreword by Dorothy Ko, *The Memoirs of Lady Hyegyong* is a unique exploration of Korean selfhood and an extraordinary example of autobiography in the premodern era.

The Bizarre Careers of John R. Brinkley

By 1926, it seemed that John R. Brinkley's experimental rejuvenation cure—transplanting goat glands into aging men—had taken the nation by storm. Never mind that "Doc" Brinkley's medical credentials were shaky at best and that he prescribed medication over the airwaves via his high-power radio stations. To most in the medical field, he was a quack. But to his many patients and listeners, he was a brilliant surgeon, a savior of their lost manhood and youth. His rogue radio stations, XER and its successor XERA, eventually broadcast at an antenna-shattering 1,000,000 watts and not only were a megaphone for Brinkley's lucrative quackery but also hosted an unprecedented number of then-unknown country musicians and other guests. *The Bizarre Careers of John R. Brinkley* tells the story of the infamous "Goat Gland Doctor"—a controversial medical charlatan, groundbreaking radio impresario, and prescient political campaigner—and recounts his amazing rags-to-riches-to-rags career. A master manipulator and skilled con artist, Brinkley left behind a patchwork of myths and unreliable personal accounts that many writers have merely perpetuated—until now. Alton Lee brings Brinkley's infamous legacy to the forefront, exploring how he ruthlessly exploited the sexual frustrations of aging men and the general public's antipathy toward medical doctors. Lee leaves no stone unturned in this account of a man who changed the course of American institutions forever.

Slow Violence and the Environmentalism of the Poor

"Slow violence" from climate change, toxic drift, deforestation, oil spills, and the environmental aftermath of war occurs gradually and often invisibly. Rob Nixon focuses on the inattention we have paid to the lethality of many environmental crises, in contrast with the sensational, spectacle-driven messaging that impels public activism today.

Garfield

This biography evaluates and examines James A. Garfield's military career, the congressional years and the Presidency. Allan Perkins has had access to the Garfield and other papers, as well as drawing upon other resources of the Reconstruction Era.

The End of Poverty

Hailed by The New York Times as probably the most important economist in the world, Jeffrey Sachs is internationally renowned for his work around the globe advising economies in crisis. Now he draws on all he has learned from twenty-five years of work to offer a uniquely informed vision of the keys to economic success in the world today and the steps that are necessary to achieve prosperity for all. Marrying vivid, passionate storytelling with profound, rigorous analysis, Jeffrey Sachs explains why, over the past two hundred years, wealth has diverged across the planet and why the poorest nations have so far been unable to improve their lot. He explains how to arrive at an in-depth diagnosis of a country's economic challenges and the options it faces. He leads readers along the same learning path he himself followed, telling the stories of his own work in Bolivia, Poland, Russia, India, China and Africa to bring us to a deep understanding of the challenges faced by developing nations in different parts of the world. Finally, he offers an integrated set of solutions to the interwoven economic, political, environmental and social problems that most challenge the world's poorest countries and, indeed, the world. Ultimately, *The End of Poverty* leaves readers with an understanding, not just of how grave the problem of poverty is, but how solvable it is and why making the necessary effort is a matter of both moral obligation and strategic self-interest of the rich countries. A work of astounding intellectual vision that grows out of unprecedented real-world experience, *The End of Poverty* is a road map to a safer, more prosperous world for us all.

Corporate Crime in the Pharmaceutical Industry (Routledge Revivals)

First published in 1984, this book examines corporate crime in the pharmaceutical industry. Based on extensive research, including interviews with 131 senior executives of pharmaceutical companies in the United States, the United Kingdom, Australia, Mexico and Guatemala, the book is a major study of white-collar crime. Written in the 1980s, it covers topics such as international bribery and corruption, fraud in the testing of drugs and criminal negligence in the unsafe manufacturing of drugs. The author considers the implications of his findings for a range of strategies to control corporate crime, nationally and internationally.

The Sociology of Religion

With an emphasis on detailed and truly contemporary case studies, Lundskow offers a provocative and compelling exploration of the Sociology of Religion.

Omnia Sunt Communia

In this weaving of radical political economy, *Omnia Sunt Communia* sets out the steps to postcapitalism. By conceptualising the commons not just as common goods but as a set of social systems, Massimo De Angelis shows their pervasive presence in everyday life, mapping out a strategy for total social transformation. From the micro to the macro, De Angelis unveils the commons as fields of power relations – shared space, objects, subjects – that explode the limits of daily life under capitalism. He exposes attempts to co-opt the commons, through the use of code words such as 'participation' and 'governance', and reveals the potential for radical transformation rooted in the reproduction of our communities, of life, of work and of society as a whole.

The Gentleman from Ohio

When first published, Marshall McLuhan's *Understanding Media* made history with its radical view of the effects of electronic communications upon man and life in the twentieth century.

Don Quixote is a Spanish novel by Miguel de Cervantes Saavedra. Published in two volumes, in 1605 and 1615, *Don Quixote* is considered the most influential work of literature from the Spanish Golden Age and the entire Spanish literary canon. As a founding work of modern Western literature and one of the earliest canonical novels, it regularly appears high on lists of the greatest works of fiction ever published. The story follows the adventures of a hidalgo named Mr. Alonso Quixano who reads so many chivalric romances that he loses his sanity and decides to set out to revive chivalry, undo wrongs, and bring justice to the world, under the name *Don Quixote de la Mancha*. He recruits a simple farmer, Sancho Panza, as his squire, who often employs a unique, earthy wit in dealing with *Don Quixote*'s rhetorical orations on antiquated knighthood. *Don Quixote*, in the first part of the book, does not see the world for what it is and prefers to imagine that he is living out a knightly story. Throughout the novel, Cervantes uses such literary techniques as realism, metatheatre, and intertextuality.

Understanding Media

Spanning 25 years of serious writing on hip-hop by noted scholars and mainstream journalists, this comprehensive anthology includes observations and critiques on groundbreaking hip-hop recordings.

Don Quixote (World Classics, Unabridged)

Biosocial Worlds presents state-of-the-art contributions to anthropological reflections on the porous boundaries between human and non-human life – biosocial worlds. Based on changing understandings of biology and the social, it explores what it means to be human in these worlds. Growing separation of scientific disciplines for more than a century has maintained a separation of the 'natural' and the 'social' that has created a space for projections between the two. Such projections carry a directional causality and so constitute powerful means to establish discursive authority. While arguing against the separation of the biological and the social in the study of human and non-human life, it remains important to unfold the consequences of their discursive separation. Based on examples from Botswana, Denmark, Mexico, the Netherlands, Uganda, the UK and USA, the volume explores what has been created in the space between 'the social' and 'the natural', with a view to rethink 'the biosocial'. Health topics in the book include diabetes, trauma, cancer, HIV, tuberculosis, prevention of neonatal disease and wider issues of epigenetics. Many of the chapters engage with constructions of health and disease in a wide range of environments, and engage with analysis of the concept of 'environment'. Anthropological reflection and ethnographic case studies explore how 'health' and 'environment' are entangled in ways that move their relation beyond interdependence to one of inseparability. The subtitle of this volume captures these insights through the concept of 'health environment', seeking to move the engagement of anthropology and biology beyond deterministic projections.

That's the Joint!

25th ANNIVERSARY EDITION • From the bestselling author of *The Passenger* and the Pulitzer Prize-winning novel *The Road*: an epic novel of the violence and depravity that attended America's westward expansion, brilliantly subverting the conventions of the Western novel and the mythology of the Wild West. Based on historical events that took place on the Texas-Mexico border in the 1850s, *Blood Meridian* traces the fortunes of the Kid, a fourteen-year-old Tennessean who stumbles into the nightmarish world where Indians are being murdered and the market for their scalps is thriving. Look for Cormac McCarthy's latest bestselling novels, *The Passenger* and *Stella Maris*.

Biosocial Worlds

A planet had been seeded for life by humans, first with microbes and later with plants and insects. A third expedition, intended to complete the seeding with animals, never occurred. Over the millennia the insects and plants grew to gigantic sizes. The action of the novel describes the fight for survival by descendants of a crashed spaceship as they battle wolf-sized ants, flies the size of chickens, and

gigantic flying wasps. Interestingly, this novel is a combination of three different science-fiction tales "The Mad Planet\

Blood Meridian

Despite creating vast inequalities and propping up reactionary world regimes, capitalism has many passionate defenders—but not because of what it withholds from some and gives to others. Capitalism dominates, Todd McGowan argues, because it mimics the structure of our desire while hiding the trauma that the system inflicts upon it. People from all backgrounds enjoy what capitalism provides, but at the same time are told more and better is yet to come. Capitalism traps us through an incomplete satisfaction that compels us after the new, the better, and the more. Capitalism's parasitic relationship to our desires gives it the illusion of corresponding to our natural impulses, which is how capitalism's defenders characterize it. By understanding this psychic strategy, McGowan hopes to divest us of our addiction to capitalist enrichment and help us rediscover enjoyment as we actually experienced it. By locating it in the present, McGowan frees us from our attachment to a better future and the belief that capitalism is an essential outgrowth of human nature. From this perspective, our economic, social, and political worlds open up to real political change. Eloquent and enlivened by examples from film, television, consumer culture, and everyday life, *Capitalism and Desire* brings a new, psychoanalytically grounded approach to political and social theory.

The Tuning of the World

Bill Cooper, former United States Naval Intelligence Briefing Team member, reveals information that remains hidden from the public eye. This information has been kept in Top Secret government files since the 1940s. His audiences hear the truth unfold as he writes about the assassination of John F. Kennedy, the war on drugs, the Secret Government and UFOs. Bill is a lucid, rational and powerful speaker who intent is to inform and to empower his audience. Standing room only is normal. His presentation and information transcend partisan affiliations as he clearly addresses issues in a way that has a striking impact on listeners of all backgrounds and interests. He has spoken to many groups throughout the United States and has appeared regularly on many radio talk shows and on television. In 1988 Bill decided to "talk" due to events then taking place worldwide, events which he had seen plans for back in the early '70s. Since Bill has been "talking," he has correctly predicted the lowering of the Iron Curtain, the fall of the Berlin Wall and the invasion of Panama. All Bill's predictions were on record well before the events occurred. Bill is not a psychic. His information comes from Top Secret documents that he read while with the Intelligence Briefing Team and from over 17 years of thorough research. "Bill Cooper is the world's leading expert on UFOs." -- Billy Goodman, KVEG, Las Vegas. "The onlt man in America who has all the pieces to the puzzle that has troubled so many for so long." -- Anthony Hilder, Radio Free America "William Cooper may be one of America's greatest heros, and this story may be the biggest story in the history of the world." -- Mills Crenshaw, KTALK, Salt Lake City. "Like it or not, everything is changing. The result will be the most wonderful experience in the history of man or the most horrible enslavement that you can imagine. Be active or abdicate, the future is in your hands." -- William Cooper, October 24, 1989.

The Forgotten Planet

The first collection to address the collective transformation happening in response to the rise of social media With the rise of web 2.0 and social media platforms taking over vast tracts of territory on the internet, the media landscape has shifted drastically in the past 20 years, transforming previously stable relationships between media creators and consumers. The Social Media Reader is the first collection to address the collective transformation with pieces on social media, peer production, copyright politics, and other aspects of contemporary internet culture from all the major thinkers in the field. Culling a broad range and incorporating different styles of scholarship from foundational pieces and published articles to unpublished pieces, journalistic accounts, personal narratives from blogs, and whitepapers, The Social Media Reader promises to be an essential text, with contributions from Lawrence Lessig, Henry Jenkins, Clay Shirky, Tim O'Reilly, Chris Anderson, Yochai Benkler, danah boyd, and Fred von Loehmann, to name a few. It covers a wide-ranging topical terrain, much like the internet itself, with particular emphasis on collaboration and sharing, the politics of social media and social networking, Free Culture and copyright politics, and labor and ownership. Theorizing new models of collaboration, identity, commerce, copyright, ownership, and labor, these essays outline possibilities for cultural

democracy that arise when the formerly passive audience becomes active cultural creators, while warning of the dystopian potential of new forms of surveillance and control.

Capitalism and Desire

A massive anthology of texts, visual material, and research on TBA21's commissions and the foundation's vast collection of over 700 artworks. "What survives after the artwork?" asks curator and researcher Natasha Ginwala in one of the essays in *Thyssen-Bornemisza Art Contemporary: The Commissions Book*, a new and comprehensive publication by the art foundation Thyssen-Bornemisza Art Contemporary (TBA21), founded by Francesca Thyssen-Bornemisza in Vienna, Austria, in 2002. "The artwork is not just the thing in itself, but also the metaphysical infrastructure and unfinished relationships that produce it," Ginwala writes. In that sense, this anthology of texts, visual material, and research on TBA21's commissions and the foundation's vast collection of over 700 artworks serves as vivid testimony to the processes and relationships that enabled them. In over 1,300 pages *The Commissions Book* engages with more than 100 works of art, proposing a speculative topography that organizes and weaves together sequences of potential narratives and interrogations along with close examinations of different works of art and a collective archive of images. The stories embedded in these works, as well as in TBA21 and TBA21-Academy's practice--an itinerant site of transdisciplinary research and cultural production engaging with the oceans--is a story of making new connections, or rather creating interconnections. Bringing together visual and written material from TBA21's commissioning practice and vast history of exhibitions and live events, *The Commissions Book* also goes beyond the foundation's archives to present new works and commissions by Cecilia Bengolea, Claudia Comte, SUPERFLEX, and Territorial Agency, amongst many others. New essays by Natasha Ginwala's and such transdisciplinary feminist thinkers as Astrida Neimanis and Eva Hayward transcend individual artistic positions and ask questions that lie at the core of TBA21's program.

Behold a Pale Horse

A fictionalized biography of James Garfield from his log cabin youth in Ohio through his career as educator and service as Civil War general to his 1881 election as twentieth President of the United States, an office he held for only four months before his assassination.

The Social Media Reader

Tipping points are zones or thresholds of profound changes in natural or social conditions with very considerable and largely unforecastable consequences. Tipping points may be dangerous for societies and economies, especially if the prevailing governing arrangements are not designed either to anticipate them or adapt to their arrival. Tipping points can also be transformational of cultures and behaviours so that societies can learn to adapt and to alter their outlooks and mores in favour of accommodating to more sustainable ways of living. This volume examines scientific, economic and social analyses of tipping points, and the spiritual and creative approaches to identifying and anticipating them. The authors focus on climate change, ice melt, tropical forest drying and alterations in oceanic and atmospheric circulations. They also look closely at various aspects of human use of the planet, especially food production, and at the loss of biodiversity, where alterations to natural cycles may be creating convulsive couplings of tipping points. They survey the various institutional aspects of politics, economics, culture and religion to see why such dangers persist.

Policing the Crisis

The psychologist may appear in science fiction as the herald of utopia or dystopia; literary studies have used psychoanalytic theories to interpret science fiction; and psychology has employed science fiction as an educational medium. *Science Fiction and Psychology* goes beyond such incidental observations and engagements to offer an in-depth exploration of science fiction literature's varied use of psychological discourses, beginning at the birth of modern psychology in the late nineteenth century and concluding with the ascendancy of neuroscience in the late twentieth century. Rather than dwelling on psychoanalytic readings, this literary investigation combines with history of psychology to offer attentive textual readings that explore five key psychological schools: evolutionary psychology, psychoanalysis, behaviourism, existential-humanism, and cognitivism. The varied functions of psychological discourses in science fiction are explored, whether to popularise and prophesy, to imagine utopia or dystopia, to estrange our everyday reality, to comment on science fiction itself, or to abet (or resist) the spread of psychological wisdom. *Science Fiction and Psychology* also considers how psychology itself has made

use of science fiction in order to teach, to secure legitimacy as a discipline, and to comment on the present.

1845-1860

This is the first single volume to focus on the presidencies of both James A. Garfield and Chester A. Arthur. Drawing from a host of studies on the foreign and domestic policies of the nation during the Gilded Age, as well as from his own primary research, the author presents a somewhat revisionist look at Garfield and Arthur—revisionist in that he gives the reader a renewed appreciation of both men. Far from being cynical spoilsmen or naive incompetents, individuals whose presidencies provide studies in ineptitude, Garfield and Arthur emerge as men of considerable ability. While making no claims of greatness, Doenecke maintains that each was a significant transitional figure, playing a crucial role as the institution of the presidency moved from the weak leadership of Andrew Johnson to the forceful direction of Theodore Roosevelt. According to Doenecke, Garfield saw the office of chief executive primarily in administrative terms, and his great battle was over keeping the power of appointment in his own hands. His victory over the Stalwarts enhanced both the power and prestige of the office. His knowledge of how government worked was unmatched; long before Woodrow Wilson made his mark, Garfield was "the scholar in politics." The diplomacy of Secretary of State James G. Blaine comes under critical scrutiny. Doenecke evaluates his performance in the Chile-Peru War (War of the Pacific), the Guatemala-Mexico dispute, the isthmian-canal issue, Irish-American activities in Britain, and efforts to secure markets in Korea. Garfield was assassinated less than six months after he entered office; he had yet to be tested on major issues of public policy. Chester A. Arthur was ill prepared to be chief executive, was in poor health much of the time while he was in office, and was faced with a hopelessly divided party. Nevertheless, he was one of the nation's great political surprises. His administration pioneered in the development of the navy, sought foreign markets for American surpluses, fostered civil-service reform, and pressed for a scientific tariff. Doenecke devotes one chapter to the spoils system and the background to the Pendleton Act, one to Arthur's strategy regarding the South, and then offers an in-depth analysis of diplomacy during Arthur's tenure. During the presidencies of Garfield and Arthur, the United States attempted to intervene in a war between Chile and Peru, sought to turn Nicaragua into a protectorate, supplied leading advisers to Madagascar and Korea, and took a major part in the Congo conference of 1884. In examining these activities, even while pointing to uncoordinated statecraft and inept diplomacy, Doenecke challenges the long-held view that, from 1881 to 1885, the nation was withdrawn and insular. His fresh perspective on the Garfield and Arthur years will be of considerable interest to historians of the Gilded Age.

"Up there," she says, "I'm just another little old lady. But down here, at the pool, I'm myself." For the people who swim there each day, the local pool is a haven of unexpected kinship and private solace. For Alice, her daily laps have become the ritual that gives her life meaning, even though she may not remember the combination to her locker or where she put her towel. But one day, a crack appears deep beneath the surface of the water, and then another, and then another. The pool must close for repairs, and with that Alice is plunged into dislocation and chaos. Away from the steady routines of her swimming, she is engulfed by difficult memories of her own past. And as her sense of home, and of herself, slip further out of her grasp, her daughter must navigate the newly fractured landscape of their relationship. From the internationally bestselling author of *The Buddha in the Attic* comes a novel about memory and loss, mothers and daughters, the stories that make up a life, and what happens when they start to unravel. "I'm in awe of how this beautiful, graceful novel can hold so much grief and loss and love in its pages: a literary gem." Nicci Gerrard 'An unforgettable novel about mothers and daughters by a spellbinding talent' Daily Mail

From Canal Boy to President, Or, The Boyhood and Manhood of James A. Garfield

In *The Second Self*, Sherry Turkle looks at the computer not as a "tool," but as part of our social and psychological lives; she looks beyond how we use computer games and spreadsheets to explore how the computer affects our awareness of ourselves, of one another, and of our relationship with the world. "Technology," she writes, "catalyzes changes not only in what we do but in how we think." First published

in 1984, *The Second Self* is still essential reading as a primer in the psychology of computation. This twentieth anniversary edition allows us to reconsider two decades of computer culture-to (re)experience what was and is most novel in our new media culture and to view our own contemporary relationship with technology with fresh eyes. Turkle frames this classic work with a new introduction, a new epilogue, and extensive notes added to the original text. Turkle talks to children, college students, engineers, AI scientists, hackers, and personal computer owners-people confronting machines that seem to think and at the same time suggest a new way for us to think-about human thought, emotion, memory, and understanding. Her interviews reveal that we experience computers as being on the border between inanimate and animate, as both an extension of the self and part of the external world. Their special place betwixt and between traditional categories is part of what makes them compelling and evocative. In the introduction to this edition, Turkle quotes a PDA user as saying, "When my Palm crashed, it was like a death. I thought I had lost my mind." Why we think of the workings of a machine in psychological terms-how this happens, and what it means for all of us-is the ever more timely subject of *The Second Self*. Book jacket.

Addressing Tipping Points for a Precarious Future

Science Fiction and Psychology

The classic work on the music of Afrofuturism, from jazz to jungle *More Brilliant than the Sun: Adventures in Sonic Fiction* is one of the most extraordinary books on music ever written. Part manifesto for a militant posthumanism, part journey through the unacknowledged traditions of diasporic science fiction, this book finds the future shock in Afrofuturist sounds from jazz, dub and techno to funk, hip hop and jungle. By exploring the music of such musical luminaries as Sun Ra, Alice Coltrane, Lee Perry, Dr Octagon, Parliament and Underground Resistance, theorist and artist Kodwo Eshun mobilises their concepts in order to open the possibilities of sonic fiction: the hitherto unexplored intersections between science fiction and organised sound. Situated between electronic music history, media theory, science fiction and Afrodiasporic studies, *More Brilliant than the Sun* is one of the key works to stake a claim for the generative possibilities of Afrofuturism. Much referenced since its original publication in 1998, but long unavailable, this new edition includes an introduction by Kodwo Eshun as well as texts by filmmaker John Akomfrah and producer Steve Goodman aka kode9.

The Presidencies of James A. Garfield & Chester A. Arthur

Written in collaboration with Cornelius Castoriadis and Grace Lee, James examines the practical process of social revolution in the modern world. Inspired by the October 1956 Hungarian workers' revolution against Stalinist oppression, as well as the wildcat strikes of U.S. workers (against Capital and the union bureaucracies), James and his co-authors looked ahead to the rise of new mass emancipatory movements by African Americans and anti-colonialist/anti-imperialist currents in Africa and Asia. Virtually alone among the radical texts of the time, *Facing Reality*, first published in 1958 by Marty Glaberman, rejected modern society's mania for conquering nature, and welcomed women's struggles for new relations between the sexes. A true masterpiece, and still one of the finest expositions of workers' self-emancipation around. This new 21st-century edition includes a new introduction by James's longtime friend, John H Bracey, situating the book in its 1950s/60s context, and accentuating its continued relevance in our time.

Active investing strategies to profit from world-changing trends In *The Next Great Bull Market*, Matthew McCall advocates an approach he calls, "Conversification," meaning concentrating your investments in specific areas that are poised to benefit from global change. The areas of change addressed throughout this book include the green movement, infrastructure expansion, commodities, peak oil, the next great commodity—water—aging baby boomers, a growing global middle class, geopolitical upheavals, and the explosion of exchange-traded funds. With today's world characterized by rapid change on many different levels, McCall's approach holds even greater promise in the years ahead. Page by page, he provides strategies for both conservative investors interested in long-term growth and aggressive investors interested in generating fast profits. Describes the dynamics driving each major change and provide specific strategies to take advantage of them Shows how to profit from short-term swings in fast-moving sectors of the world economy Highlights how to use various investment vehicles, including ETFs, stocks, and options Investors who understand and anticipate the changes ahead stand to profit handsomely. With *The Next Great Bull Market* as your guide, you'll quickly discover how the trends that are changing the world can be used to enhance the performance of your portfolio.

As you're well aware, your individual energy ebbs and flows--leading to high and low productivity cycles. Fail to manage your energy correctly, and you risk falling into traps including inertia, complacency, and frenzied, unfocused activity that only erodes the quality of your life. The same holds true for your entire organization. In *Fully Charged*, Heike Bruch and Bernd Vogel provide tools and strategies to help you manage your company's collective energy. First, diagnose your company's "energy state" using the Organizational Energy Matrix. By assessing the intensity (high or low) and the quality (positive or negative) of the energy in your enterprise, you discover which of four energy states your company is experiencing. Second, move your company out of dangerous states characterized by complacency, cynicism, aggression, withdrawal, and other perils. By applying practices mastered by companies as diverse as Airbus, Novartis, SAP, and Tata Steel, you can shift your firm into a state of high, positive energy--in which everyone is emotionally engaged, mentally alert, and working swiftly and productively toward critical goals. Practical and backed by extensive research, *Fully Charged* reveals how to continually refresh your company's energy--so it's always ready to tackle the next period of high demand.
