The American Journal of Nursing

The premier professional journal for today's nurse, AJN, American Journal of Nursing provides comprehensive and in-depth information to help nurses stay current in their profession. Content includes practical, hands-on clinical articles on essential topics, vital information on drugs, clinical, nursing and healthcare news, research and more. Cutting-edge features and departments include Practice Errors, Research for Practice. Infectious Disease and Washington Watch. Plus, each issue carries two or more self-study articles for continuing education contact hours. Presented in a lively, fast-read format with vivid photographs and illustrations, AJN is the indispensable source for every practicing nurse. Continuing education contact hours are available in every issue and online. Facts and Features: - practical, hands-on clinical articles on essential topics br

American Journal of Nursing

How different is nursing today from 1900? A reproduction of the first issue of the American Journal of Nursing (AJN), the world's oldest and highest circulation nursing journal, will show you. Published in October of 1900 with Sophia Palmer as editor, this journal was the first to be owned and managed by nurses and for nurses. It was the official publication of the Associated Alumnae of Trained Nurses of the United States, the precursor to the American Nurses Association. Its contents include discussions of important topics of the day written by some of nursing's legends: what nurses could expect from the law, written by Lavinia Dock; specialties in nursing by Katherine De Witt, hospital economics by Isabel Hampton Robb; the work of nurses at the Henry Street Settlement House by Lillian Wald; a nurse's experience on the ship, The Maine, on its journey to South Africa to provide support during the second Boer War; and The Relation of Bacteriology to Preventive Medicine and Infant Feeding by physicians. You'll find news of hospitals and their alumnae associations, proceedings of the third convention of the Associated Alumnae, and fascinating ads for things such as the female urinal, nurses' uniforms, and even champagne. This historic treasure provides a fascinating glimpse of nursing as it was more than a century ago, leaving today's readers reflecting on how much things change--or stay the same.

The Story of the American Journal of Nursing Company

This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work is in the "public domain in the United States of America,

and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. The American Journal Of Nursing; Volume 9

This coherent presentation of clinical judgement, caring practices and collaborative practice provides ideas and images that readers can draw upon in their interactions with others and in their interpretation of what nurses do. It includes many clear, colorful examples and describes the five stages of skill acquisition, the nature of clinical judgement and experiential learning and the seven major domains of nursing practice. The narrative method captures content and contextual issues that are often missed by formal models of nursing knowledge. The book uncovers the knowledge embedded in clinical nursing practice and provides the Dreyfus model of skill acquisition applied to nursing, an interpretive approach to identifying and describing clinical knowledge, nursing functions, effective management, research and clinical practice, career development and education, plus practical applications. For nurses and healthcare professionals.

Instructional Course Lectures

This is a reproduction of a book published before 1923. This book may have occasional imperfections such as missing or blurred pages, poor pictures, errant marks, etc. that were either part of the original artifact, or were introduced by the scanning process. We believe this work is culturally important, and despite the imperfections, have elected to bring it back into print as part of our continuing commitment to the preservation of printed works worldwide. We appreciate your understanding of the imperfections in the preservation process, and hope you enjoy this valuable book.

The American Journal Of Nursing;

Named a 2013 Doody's Essential Purchase! Named a "Choice Outstanding Academic Title" for 2007 and an "AJN Book of the Year" The award-winning Encyclopedia of Nursing Research, now in its third edition, is the comprehensive resource for tracking developments in the field. With over 20 new areas of research, and meticulous updates of original entries, the encyclopedia presents key terms and concepts and their application to practice. Pithy entries provide the most relevant and current research perspectives, and will be a starting point for future content and references. Nurse researchers, educators, students, and all clinical specialties will find the encyclopedia an important introduction to

the breadth of nursing research today. New topics include NIH-funded research areas, a comprehensive survey of major nursing research journals, addictions care, palliative care, translational science, simulation, trauma care, family-centered care, mild cognitive impairment, active surveillance for cancer care, workplace and empowerment research, nurse engagement, nurse-physician collaboration, CAM and empowerment research, spirituality, synthesis and action research, mixed methods research, systematic review, ethnopharmacology, and more. Key Features: Includes NIH-funded research topics Provides a comprehensive survey of major nursing research journals Adds over 20 new areas of research and updates original entries Written by over 200 nursing research experts Organized alphabetically for easy access to information

The American Journal of Nursing, Volume 21 - Primary Source Edition

The Future of Nursing explores how nurses' roles, responsibilities, and education should change significantly to meet the increased demand for care that will be created by health care reform and to advance improvements in America's increasingly complex health system. At more than 3 million in number, nurses make up the single largest segment of the health care work force. They also spend the greatest amount of time in delivering patient care as a profession. Nurses therefore have valuable insights and unique abilities to contribute as partners with other health care professionals in improving the quality and safety of care as envisioned in the Affordable Care Act (ACA) enacted this year. Nurses should be fully engaged with other health professionals and assume leadership roles in redesigning care in the United States. To ensure its members are well-prepared, the profession should institute residency training for nurses, increase the percentage of nurses who attain a bachelor's degree to 80 percent by 2020, and double the number who pursue doctorates. Furthermore, regulatory and institutional obstacles-including limits on nurses' scope of practice-should be removed so that the health system can reap the full benefit of nurses' training, skills, and knowledge in patient care. In this book, the Institute of Medicine makes recommendations for an action-oriented blueprint for the future of nursing.

American Journal of Nursing, Nursing Boards Review, 1990

A comprehensive outline review of the core content used in NCLEX-RN certification exams, this resource includes tips for preparing for the exam, four sample tests with answers and rationales, and reprints of pertinent articles from the "American Journal of Nursing." New information on infection control guidelines has been added. 94 illus.

Encyclopedia of Nursing Research, Third Edition

The Practice of Primary Nursing: Relationship-Based, Resource-Driven Care Delivery updates on where Primary Nursing fits in today's health care climate. Originally started at the University of Minnesota Hospitals in 1968, Primary Nursing has been used by many hospitals in the U.S., Canada, and the World. This new edition thoroughly explains the four important operating elements of Primary Nursing and outlines the actual steps taken at the unit level for successful implementation. Today's hospital needs the type of relationship-based care delivery that Primary Nursing provides. Winner of the 2002 American Journal of Nursing Book of the Year Award!

The American Journal of Nursing, Volume 6

From the frontier to the university, this exciting collection traces the development of the nursing profession through the biographies of individual nurses since 1925 that helped to create its unique history. Among the notable nurses featured in this volume are Faye Abdellah, Virginia Henderson, Margaret Kerr, Thelma Schorr, and many more.

The American Journal of Nursing, Volume 5

Suffering is an unavoidable reality in healthcare. Not only are patients and families suffering, but more and more the clinicians who care for them are also experiencing distress. The omnipresent, daily presence of moral adversity is, in part, a reflection of the burgeoning complexity of healthcare, clinicians' role within it, and the expanding range of available interventions that must be balanced with competing demands. There is an urgent need to design solutions that address the myriad factors that create the conditions for imperiled integrity within the healthcare system. Moral resilience is a pathway to transform the effects of moral suffering in healthcare. Dr. Rushton and colleagues offer a novel approach to addressing moral suffering that engages transformative strategies for individuals and systems alike and leverages practical skills and tools for a sustainable workforce that practices with integrity, competence, and wholeheartedness, and dismantles the systemic patterns that impede ethical practice. This is a must-read for clinicians - front line nurses to physicians to system leaders and policymakers - because it will require collective collaboration, aligned values, shared language and intentional design to make our healthcare organizations and their clinicians healthy again.

The Future of Nursing

First Place, History and Public Policy, 2010 American Journal of Nursing Book of the Year Awards
This new interpretation of the history of nursing in the United States captures the many ways women reframed the most traditional of all gender expectations—that of caring for the sick—to create new possibilities for themselves, to renegotiate the terms of some of their life experiences, and to reshape their own sense of worth and power. For much of modern U.S. history, nursing was informal, often uncompensated, and almost wholly the province of female family and community members. This began to change at the end of the nineteenth century when the prospect of formal training opened for women doors that had been previously closed. Nurses became respected professionals, and becoming a formally trained nurse granted women a range of new social choices and opportunities that eventually translated into economic mobility and stability. Patricia D'Antonio looks closely at this history—using a new analytic framework and a rich trove of archival sources—and finds complex, multiple meanings in the individual choices of women who elected a nursing career. New relationships and social and professional options empowered nurses in constructing consequential lives, supporting their families, and participating both in their communities and in the health care system. Narrating the experiences of nurses, D'Antonio captures the possibilities, power, and problems inherent in the different ways women defined their work and lived their lives. Scholars in the history of medicine, nursing, and public policy, those interested in the intersections of identity, work, gender, education, and race, and nurses will find this a provocative book.

The Nursing Process in Practice

Nursing Boards Review

The Spirit of Nursing is filled with stories from more than 40 authors who have been inspired by their choice of career. Collectively, they boast 1,091 years of practice, diverse certifications, and numerous degrees. Some have just begun their practice and others have worked as nurses for half a century or more. Read how we have earned the true credentials needed to provide care for strangers, family members, and each other. Learn how we have earned the academic and honorary titles required to lead each other in our profession. The stories we have collected here cover the moment each contributor knew he or she was to become a nurse, what was learned (and what was not) in nursing school, and unforgettable patients and colleagues. But this book is about more than the sum of all of the parts that make up our nursing trajectories. It is about the process of becoming and being a nursing colleague. Filled with professionals who have earned their distinction as leaders in practice and healers in their communities, it is rumination on what it means to care. It is also a thank you to a line of work that has given us so much.

The Practice of Primary Nursing

This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work was reproduced from the original artifact, and remains as true to the original work as possible. American Nursing

Named an Outstanding Academic Title for 2001 by Choice! Why turn to the past when attempting to build nursing's future?...To make good decisions in planning nursing's future in the context of our complex health care system, nurses must know the history of the actions being considered, the identities and points of view of the major players, and all the stakes that are at risk. These are the lessons of history." -- from the Introduction This book presents nursing history in the context of problems and issues that persist to this day. Issues such as professional autonomy, working conditions, relationships with other health professionals, appropriate knowledge for education and licensure, gender, class, and race are traced through the stories told in this volume. Each chapter provides a piece of the puzzle that is nursing. The editors, all noted nurse historians and educators, have carefully made selections from the best that has been published in the nursing and health care literature.

The Expanded Role of the Nurse

Pamphlet is a succinct statement of the ethical obligations and duties of individuals who enter the nursing profession, the profession's nonnegotiable ethical standard, and an expression of nursing's

own understanding of its commitment to society. Provides a framework for nurses to use in ethical analysis and decision-making.

Moral Resilience

Includes impressions and photographs of the profession in Americas, as well as commentaries by 16 notable leaders in the field.

American Nursing

A compilation of articles from the American journal of nursing, Nursing outlook, and Nursing research.

- peer-reviewed, clinically relevant articles

The Nature of Nursing

NEW! Extensively updated content reflects the most current quantitative and qualitative approaches to nursing research, as well as the most current research tools and techniques used in the digital era. NEW! Updated research examples throughout incorporate the best examples of current literature, with increased emphasis on international examples to reflect the increasingly global nature of nursing research. NEW! Increased use of visuals includes the addition of more illustrations, tables, and boxes to help break up long passages of text for today's more visually oriented learners of all levels. NEW! Revised chapters offer improved clarity and usability in the areas of research problems and purpose, quantitative research design, quantitative methodology, and qualitative methodology. NEW! Increased emphasis on hospital magnet status reflects the effect this status has on improving nursing competency and quality outcomes. UPDATED! Coverage of certain qualitative research content has been de-emphasized to reflect the decreased use of certain methodologies (e.g., historical research) and to allow the introduction of additional methodologies that are growing in use.

AJN

The Future of the Nursing Workforce in the United States: Data, Trends and Implications provides a timely, comprehensive, and integrated body of data supported by rich discussion of the forces shaping the nursing workforce in the US. Using plain, jargon free language, the book identifies and describes the key changes in the current nursing workforce and provide insights about what is likely to develop in the future. The Future of the Nursing Workforce offers an in-depth discussion of specific policy options to help employers, educators, and policymakers design and implement actions aimed at strengthening the current and future RN workforce. The only book of its kind, this renowned author team presents extensive data, exhibits and tables on the nurse labor market, how the composition of the workforce is evolving, changes occurring in the work environment where nurses practice their profession, and on the publics opinion of the nursing profession.

The Spirit of Nursing

Medical mistakes are more pervasive than we think. How can we improve outcomes? An acclaimed MD's rich stories and research explore patient safety. Patients enter the medical system with faith that they will receive the best care possible, so when things go wrong, it's a profound and painful breach. Medical science has made enormous strides in decreasing mortality and suffering, but there's no doubt that treatment can also cause harm, a significant portion of which is preventable. In *When We Do Harm*, practicing physician and acclaimed author Danielle Ofri places the issues of medical error and patient safety front and center in our national healthcare conversation. Drawing on current research, professional experience, and extensive interviews with nurses, physicians, administrators, researchers, patients, and families, Dr. Ofri explores the diagnostic, systemic, and cognitive causes of medical error. She advocates for strategic use of concrete safety interventions such as checklists and improvements to the electronic medical record, but focuses on the full-scale cultural and cognitive shifts required to make a meaningful dent in medical error. Woven throughout the book are the powerfully human stories that Dr. Ofri is renowned for. The errors she dissects range from the hardly noticeable missteps to the harrowing medical cataclysms. While our healthcare system is—and always will be—imperfect, Dr. Ofri argues that it is possible to minimize preventable harms, and that this should be the galvanizing issue of current medical discourse.

Mrs. Chua a 78 year old client is admitted with the diagnosis of mild chronic heart failure. The nurse expects to hear when listening to client's lungs indicative of chronic heart failure would be Patrick who is hospitalized following a myocardial infarction asks the nurse why he is taking morphine. The nurse explains that morphine

Which of the following should the nurse teach the client about the signs of digitalis toxicity?

Nurse Trisha teaches a client with heart failure to take oral Furosemide in the morning. The reason for this is to help...

What would be the primary goal of therapy for a client with pulmonary edema and heart failure?

Answer: B. The primary goal of therapy for the client with pulmonary edema or heart failure is increasing cardiac output. Pulmonary edema is an acute medical emergency requiring immediate intervention

Nurse Linda is caring for a client with head injury and monitoring the client with decerebrate posturing. Which of the following is a characteristic of this type of posturing?

A female client is taking Cascara Sagrada. Nurse Betty informs the client that the following maybe experienced as side effects of this medication

Dr. Marquez orders a continuous intravenous nitroglycerin infusion for the client suffering from myocardial infarction. Which of the following is the most essential nursing action?

Answer: D. Administration of Intravenous Nitroglycerin infusion requires pump for accurate control of medication

During the second day of hospitalization of the client after a Myocardial Infarction. Which of the following is an expected outcome?

A 68 year old client is diagnosed with a right-sided brain attack and is admitted to the hospital. In caring for this client, the nurse should plan to

Nurse Liza is assigned to care for a client who has returned to the nursing unit after left nephrectomy. Nurse Liza's highest priority would be...

Answer: A. After nephrectomy, it is necessary to measure urine output hourly. This is done to assess the effectiveness of the remaining kidney also to detect renal failure early

A 64 year old male client with a long history of cardiovascular problem including hypertension and angina is to be scheduled for cardiac catheterization. During pre cardiac catheterization teaching, Nurse Cherry should inform the client that the primary purpose of the procedure is.....

During the first several hours after a cardiac catheterization, it would be most essential for nurse Cherry to...

Kate who has undergone mitral valve replacement suddenly experiences continuous bleeding from the surgical incision during postoperative period. Which of the following pharmaceutical agents should Nurse Aiza prepare to administer to Kate?

Answer: A. Protamine Sulfate is used to prevent continuous bleeding in client who has undergone open heart surgery.

In reducing the risk of endocarditis, good dental care is an important measure. To promote good dental care in client with mitral stenosis in teaching plan should include proper use of...

Answer: C. The use of electronic toothbrush, irrigation device or dental floss may cause bleeding of gums, allowing bacteria to enter and increasing the risk of endocarditis.

Among the following signs and symptoms, which would most likely be present in a client with mitral regurgitation?

Kris with a history of chronic infection of the urinary system complains of urinary frequency and burning sensation. To figure out whether the current problem is in renal origin, the nurse should assess whether the client has discomfort or pain in the...

Nurse Perry is evaluating the renal function of a male client. After documenting urine volume and characteristics, Nurse Perry assesses which signs as the best indicator of renal function.

John suddenly experiences a seizure, and Nurse Gina notice that John exhibits uncontrollable jerking movements. Nurse Gina documents that John experienced which type of seizure?

Smoking cessation is critical strategy for the client with Burgher's disease, Nurse Jasmin anticipates that the male client will go home with a prescription for which medication?

Nurse Lilly has been assigned to a client with Raynaud's disease. Nurse Lilly realizes that the etiology of the disease is unknown but it is characterized by

Nurse Jamie should explain to male client with diabetes that self-monitoring of blood glucose is preferred to urine glucose testing because...

Answer: A. Urine testing provides an indirect measure that maybe influenced by kidney function while blood glucose testing is a more direct and accurate measure.

Jessie weighed 210 pounds on admission to the hospital. After 2 days of diuretic therapy, Jessie weighs 205.5 pounds. The nurse could estimate the amount of fluid Jessie has lost...

Nurse Donna is aware that the shift of body fluids associated with Intravenous administration of albumin occurs in the process of

Myrna a 52 year old client with a fractured left tibia has a long leg cast and she is using crutches to ambulate. Nurse Joy assesses for which sign and symptom that indicates complication associated with crutch walking?

Which of the following statements should the nurse teach the neutropenic client and his family to avoid?

A female client is experiencing painful and rigid abdomen and is diagnosed with perforated peptic ulcer. A surgery has been scheduled and a nasogastric tube is inserted. The nurse should place the client before surgery in

Which nursing intervention ensures adequate ventilating exchange after surgery?

George who has undergone thoracic surgery has chest tube connected to a water-seal drainage system attached to suction Presence of excessive bubbling is identified in water-seal chamber, the nurse should...

A client who has been diagnosed of hypertension is being taught to restrict intake of sodium. The nurse would know that the teachings are effective if the client states that...

A male client with a history of cirrhosis and alcoholism is admitted with severe dyspnea resulted to ascites. The nurse should be aware that the ascites is most likely the result of increased...

A newly admitted client is diagnosed with Hodgkin's disease undergoes an excisional cervical lymph node biopsy under local anesthesia. What does the nurse assess first after the procedure?

Answer: C. Assessing for an open airway is the priority. The procedure involves the neck, the anesthesia may have affected the swallowing reflex or the inflammation may have closed in on the airway leading to ineffective air exchange.

A client has 15% blood loss. Which of the following nursing assessment findings indicates hypovolemic shock?

Nurse Lucy is planning to give pre operative teaching to a client who will be undergoing rhinoplasty. Which of the following should be included?

Paul is admitted to the hospital due to metabolic acidosis caused by Diabetic ketoacidosis (DKA). The nurse prepares which of the following medications as an initial treatment for this problem?

Answer: A Metabolic acidosis is anaerobic metabolism caused by lack of ability of the body to use circulating glucose. Administration of insulin corrects this problem

Dr. Marquez tells a client that an increase intake of foods that are rich in Vitamin E and beta-carotene are important for healthier skin. The nurse teaches the client that excellent food sources of both of these substances are

Answer: D. Beta-carotene and Vitamin E are antioxidants which help to inhibit oxidation. Vitamin E is found in the following foods: wheat germ, corn, nuts, seeds, olives, spinach, asparagus and other green leafy vegetables. Food sources of beta-carotene include dark green vegetables, carrots, mangoes and tomatoes.

A client has Gastroesophageal Reflux Disease (GERD). The nurse should teach the client that after every meals, the client should...

After gastroscopy, an adaptation that indicates major complication would be

A client who has undergone a cholecystectomy asks the nurse whether there are any dietary restrictions that must be followed. Nurse Hilary would recognize that the dietary teaching was well understood when the client tells a family member that

Nurse Rachel teaches a client who has been recently diagnosed with hepatitis A about untoward signs and symptoms related to Hepatitis that may develop. The one that should be reported immediately to the physician is

Which of the following antituberculosis drugs can damage the 8th cranial nerve?

Answer: D. Streptomycin is an aminoglycoside and damage on the 8th cranial nerve (ototoxicity) is a common side effect of aminoglycosides.

The client asks Nurse Annie the causes of peptic ulcer. Nurse Annie responds that recent research indicates that peptic ulcers are the result of which of the following

Ryan has undergone subtotal gastrectomy. The nurse should expect that nasogastric tube drainage will be what color for about 12 to 24 hours after surgery?

Nurse Joan is assigned to come for client who has just undergone eye surgery. Nurse Joan plans to teach the client activities that are permitted during the post operative period. Which of the following is best recommended for the client?

A client suffered from a lower leg injury and seeks treatment in the emergency room. There is a prominent deformity to the lower aspect of the leg, and the injured leg appears shorter than the other leg. The affected leg is painful, swollen and beginning to become ecchymotic. The nurse interprets that the client is experiencing

Nurse Jenny is instilling an otic solution into an adult male client left ear. Nurse Jenny avoids doing which of the following as part of the procedure

Nurse Bea should instruct the male client with an ileostomy to report immediately which of the following symptom?

Jerry has diagnosed with appendicitis. He develops a fever, hypotension and tachycardia. The nurse suspects which of the following complications?

Answer: B. Complications of acute appendicitis are peritonitis, perforation and abscess development. Which of the following complications should the nurse carefully monitor a client with acute pancreatitis.

Which of the following symptoms during the icteric phase of viral hepatitis should the nurse expect the client to exhibit?

Answer: B. Liver inflammation and obstruction block the normal flow of bile. Excess bilirubin turns the skin and sclera yellow and the urine dark and frothy

Teamwork and Collaboration in Nursing

Why is positive team working and collaboration so important in nursing? • Rafferty, Ball and Aiken (2001): "Are teamwork and professional autonomy compatible, and do they result in improved hospital care? • Zaheer et al (2021): "Acute care nurses' perceptions of leadership, teamwork, turnover intention and patient safety - a mixed methods study

Awareness of team members knowledge and skills • Shared decision making, shared responsibility for problem solving and making decisions

What can you do to promote positive team working? • Understand local corporate roles and team structures: Review team structures, job descriptions and junior staff competencies/ proficiencies; attend team meetings; spend time with AHPs and review communication structures across teams e.g., education, clinical governance, safeguarding and medical • YouTube video: Differences between a Support Worker, Assistant Practitioner, Nursing Associate

Promote team building Promote team building and social events - you can help support social events as a junior staff member Use regular team meetings and de-briefs to reflect and learn from issues together • Join shared governance groups and working parties to promote collaborative working ABC podcast/OET listening/HEALTH REPORT - ABC podcast/OET listening/HEALTH REPORT by oet listening 94,575 views 2 years ago 8 minutes, 36 seconds - ABC podcast OET Listening Health Report.
