It is a process of managing the assets and liabilities of the credit union to meet the credit union's specific financial objectives while balancing risk with reward.
How we price our products is influenced by competitor rates.
Once the risk is known, the credit union must review the model reports to determine how the risk and the financial performance of the credit union is changing
The credit union must have a policy with risk limits and a system to identify and measure the risk.
The credit union will want to ensure that the process is working effectively through strong internal controls.

Welcome and question about inheriting boss' duties

How do I ask for a raise?

Here's what to say to evaluate the situation

Here's what you don't want to do

Make sure to ask questions first so you don't incorrectly assume anything

Questions to employer to set up your argument for the raise

This is me thinking I want to give you a more structured approach: can you tell I'm doing this on the fly? Ha ha!

Think in terms of 5 steps for asking for your raise

Step 1: The primer to move their emotional state of mind

Step 2: Acknowledge you appreciate their viewpoint (perspective, empathy)

Step 3: Present your value

Step 4: The juxtaposition technique

Step 5: The pullback option

minutes - target costing, **cost**,-plus costing.

Intro

1. Discuss the three major influences on pricing decisions. 2. Understand how companies make short-run pricing decisions. 3. Understand how companies make long-run pricing decisions 4. Price products using the target costing approach. 5. Price products using the cost-plus approach 6. Use life-cycle budgeting and costing when making pricing decisions.

Understanding the Market Environment • Understanding customers and competitors is important because Competition from lower cost producers is continually

Value Engineering • Value engineering is a systematic evaluation of all aspects of the value chain, with the objective of reducing costs while improving quality and satisfying customer needs. • Value-analysis teams (top management experts) evaluate the impact of design innovations and modifications on all business functions of the value chain

Value Engineering Terminology - Cost incurrence - describes when a resource is consumed (or benefit foregone) to meet a specific objective

Other Important Considerations in Pricing Decisions Price discrimination — the practice of charging different customers different prices for the same product or service - Legal implications • Peak-load pricing the practice of charging a higher price for the same product or service when the demand for it approaches the physical limit of the capacity to produce that product or service

Environmental Sustainability Environmental sustainability and life-cycle costing touch on the increasing social concern about what constitutes the end of a product's life cycle. • Environmental laws introduced tougher environmental standards and cleanup requirements, and severe penalties
