How do states think? Watch him debate the ...

Introduction

Why is the realist school for international relations the best framework for explaining how states behave?

How do you understand the criticism that Russia choosing to invade rather than bomb Ukraine is a sign of an attempt to conquer rather than neutralise?

Why do you think the realist framework underplays dramatic declarations of ideology by political leaders like this?

Can states be influenced by ideology? If so, is that a falsification of your own realist thesis?

Do you think the realist framework should adjust to make sense of these counterexamples?

Do you think the critique that the US focusing on China has caused the world to go up in flames is credible?

Why do you think Israel has been sabotaging a two-state solution with Palestine?

Is the realist framework good for describing or prescribing how states should behave?
