Media in Modern India

This book is a collection of articles based on first-hand experiences in news media by eminent Indian media personalities. It is a comprehensive collection, exploring different kinds of news reporting across TV, print, and radio as also across different genres like sports, business, entertainment, war. Each essay is written as a primer yet with important tips from the foremost practitioners, which makes the business of reporting and news both a science and an art. Additionally, it also has essays on production and the news process. It is easily the first of a kind volume available within an Indian context. The volume illustrates how TV news reporting differs from the print, the importance of radio, the specific experiences in reporting business, crime, political, war stories. It also talks about the advantages of using the media for social marketing and many more engaging examples

India's Media and Modern Journalism

Indian Media Giants is an analytical chronicle of six Indian mega media conglomerates' individual odyssey from their beginnings in the pre-independence era to their transformation into powerful business empires in the digitised modern India. The book traces media metamorphoses, contours of growth and development, travails and trajectories, organizational structures, editorial policies and business dynamics of print majors in India, namely, The Times Group, The Hindu Group, The Hindustan Times Limited, The Indian Express Group, Dainik Jagran Limited and DB Corp Limited.

Making News

This book explores the transformation of Indian media in the context of two major developments: globalisation (which Sociologist Anthony Giddens terms as being 'revolutionary') and advances in communication technologies. It is rich in empirical details of how the Indian media has evolved in the past two decades, particularly in the context of potential to transform, construct and nurture particular identities in response to globalisation. The study of the transformation of Indian media is significant because not only has globalisation allowed access to a host of things hitherto represented as 'foreign' to Indian culture by the media, but it has also opened the floodgates for foreign media. Adopting a multi-disciplinary approach, this book looks at the role of media in purveying political, economic and cultural identities, the current definitions of 'we', 'they', and the 'other', and how the 'other' is perceived in contemporary India. The discussions cover all forms of media, that is, newspaper, films, radio, television and online media, along with media policy and other economic challenges facing the media.

Indian Media Giants

"The book examines the historical trajectory of the growth of the television news and critically analyses the role of private television news in framing the nature of public discourse in contemporary India. Set in the context of a transformed media landscape, the book attempts to understand and analyze the role two private national news channels, NDTV 24x7 and Aaj Tak, in producing mediatized narratives that offer a commentary on the various social, political, cultural, religious and economic issues in the public domain. This is achieved by critically examining the process and techniques of production, representation and consumption of current affairs programmes such as studio debates, panel discussions, audience talk shows and documentaries aired on both the channels. Highlighting some of the key trends that impinge on the structure and mode of operation of television news media in contemporary India, the book offers a simultaneous examination of how the production, representation and consumption of the mediatized discourses, shape the nature of public discourse, and have social-political ramifications for the functioning of Indian democracy. The book will be of interest to researchers in sociology, media and communication studies, popular culture and South Asian Studies"--

Indian Media in a Globalised World

Two puzzles of modern India one well known, the other overlooked form the core of this book.

Media Discourse in Contemporary India

This is a time when the space for free speech is shrinking in India, along with a growing intolerance of contrarian views. The right to dissent, which should be the bedrock of any democracy, is seriously endangered. There is widespread belief that we are in an undeclared emergency. Not everyone agrees with this, though, and the jury is out on the state of play in the world's largest democracy. As charges and countercharges fly, with no unanimity in sight, India's national discourse, particularly its news media, is becoming increasingly divided and polarized. In *Editor Missing*, veteran journalist Ruben Banerjee attempts to provide clarity on the state of Indian media at a time when there is consensus only on the lack of it. The media mirrors society, and Banerjee is best placed to tell its contested story in contemporary India. As a top editor for various publications, he has had a ringside view for years of the decline in its standards, quality and objectivity. His own experiences reflect the time we live in. The book provides rare insights into the minefield that an editor today runs into - from pressures that are exerted to the risks of upsetting the powers that be. At the end of it, the reader is left with a chilling realization that defending the truth can come at a huge personal cost in present-day India.

Media and Modernity

Presenting a communicational perspective on the British empire in India during the 20th century, the book seeks to examine how, and explain why, British proconsuls, civil servants and even the monarch George V, as well as Indian nationalists, interacted with the media, primarily British and American, and with what consequences.

Editor Missing

This book examines the historical trajectory of the growth of the television news and critically analyzes the role of private television news in framing the nature of public discourse in contemporary India. Set in the context of a transformed media landscape, the book attempts to understand and analyze the role of two private national news channels, NDTV 24x7 and Aaj Tak, in producing mediatized narratives that offer a commentary on the various social, political, cultural, religious and economic issues in the public domain. This is achieved by critically examining the process and techniques of production, representation and consumption of current affairs programs such as studio debates, panel discussions, audience talk shows and documentaries aired on both the channels. Highlighting some of the key trends that impinge on the structure and mode of operation of television news media in contemporary India, the book offers a simultaneous examination of how the production, representation and consumption of the mediatized discourses shape the nature of public discourse and have social-political ramifications for the functioning of Indian democracy. The book will be of interest to researchers in sociology, media and communication studies, popular culture and South Asian Studies.

Communications, Media and the Imperial Experience

Third Completely Revised and Updated Edition
Mass Communication in India is a result of the author's in-depth study and understanding of the media. The book deals with a general introduction to Communication Theory, Advertising, Television, Effects of Media and Development. In short, the book is designed to give the student of Mass Communication a general and comprehensive view of the modern and traditional media in India. It meets the objective of being a text book as well as a book that gives an overview of mass communication in India.

Law of Freedom of Press & Media in India

In addition to making a comprehensive survey of journalism, other mass media, and public relations in India, Mehta discusses such issues as freedom of the press, press laws, and developments in the international regulation of the media. His book is also a bibliography and a sourcebook of information on advertising codes; accreditation rules for media representatives and other information on Indian media and journalism.

Media Discourse in Contemporary India

This book examines instances of transformative dissent, turning points or shifts in popular mobilisation patterns in contemporary India, while adopting a historical approach and analysing past events. Exploring the different continuities and discontinuities in mobilising patterns and dissident agency in India, the authors present a heterogeneous insurrectional pattern that pivoted around issues of caste, class, religion, land reform, labour, taxation and territorial control, with anti-colonialism movements becoming prominent in the first half of the twentieth century. The authors move beyond this to explore more recent templates of mobilisation which surfaced towards the end of the twentieth century, during India's liberalisation period. With growing marketisation and technological advancement, unprecedented changes in social relations, growing economic opportunities and cultural transfusion taking place, the country became a 'New India' - one which aspired to be a global player in the wider technological public sphere. Tracing the historical trajectories of social movements in India, this book examines recent trends in digitised dissidence and explores new frontiers of protests, providing fresh insights for those researching the history of social movements, South Asian and Indian history and postcolonial studies.

Mass Communication in India, Fifth Edition

This book explores the transformation of Indian media in the context of two major developments: globalization, which has introduced what are termed as 'foreign' elements to Indian culture, and the opening of the floodgates for foreign media to enter the country. It discusses both theoretical considerations and empirical studies related to the role of Indian media. *Indian Media in a Globalised World* adopts a multi-disciplinary approach and looks at the role of media in purveying political, economic, and cultural identities. The discussions cover all forms of media, that is, newspaper, films, radio, television and online media, along with media policy and the challenges facing the media.

Mass Communication and Journalism in India

Indian Media Giants is an analytical chronicle of six Indian mega media conglomerates' individual odyssey from their beginnings in the pre-independence era to their transformation into powerful business empires in the digitised modern India. The book traces media metamorphoses, contours of growth and development, travails and trajectories, organizational structures, editorial policies and business dynamics of print majors in India, namely, The Times Group, The Hindu Group, The Hindustan Times Limited, The Indian Express Group, Dainik Jagran Limited and DB Corp Limited.

Social Movements, Media and Civil Society in Contemporary India

Modern Media, Elections and Democracy explores how the modern media functions in a democracy, especially during elections, when it performs the crucial role of educating people and moulding public opinion. At such times, it becomes an arena for public debate and sometimes even a check against the abuse of power. The book analyses the constraints that curb the immense power of the media. It takes up issues that restrict free political debate and, in response, studies the statutory provisions that defend and protect freedom of expression. In this context, the author refers to many legal suits, case studies, jurisprudence governing election coverage, international standards for media practices, and so on. The book identifies ways in which various forms of media exert influence on politics and argues that the modern media—in all its forms—is expanding the scope of political pluralism.

Indian Media in a Globalised World

The very rapid growth in the Indian media industries and the vibrancy of India's popular culture are making a working understanding of the Indian scene a prerequisite for any serious study of media in the twenty-first century. As one of the largest and most influential emerging economies in the world today, India now plays a crucial role in any serious discussion of social and economic change taking place at the global level. As new commercial and political alignments take shape in the face of new global circumstances, thinkers and decision-makers are inexorably drawn towards the reality of a new India being forged in the technological and cultural flux of global media flows. Taking an innovative interdisciplinary approach to the complex field of Indian media and society, this book combines a rich descriptive account with critical analysis designed to engender informed debate amongst students, academics and other researchers.

Indian Media Giants

Media studies in India is a young and emergent field. Through interdisciplinary studies in the fields of film, television, music, print, and radio, No Limits addresses the issue of the contemporary in Indian media environment since its globalization in the 1980s.

Challenge and Stagnation

Orientalism is about much more than just information gathered about the East within its general postcolonial period. In this period, orientalism is a Western discourse that dominated and shaped the view of the East. There is "otherization" in the way the West has historically looked at the East and within the information presented about it. These original stories of travelers in the past and previous telling about the East are facing a reconstruction through modern types of media. Cinema, television, news, newspaper, magazine, internet, social media, photography, literature, and more are transforming the way the East is presented and viewed. Under the headings of post-orientalism, neo-orientalism, or self-orientalism, these new orientalist forms of work in combination with both new and traditional media are redefining orientalism in the media and beyond. The Handbook of Research on Contemporary Approaches to Orientalism in Media and Beyond shows how both new media and traditional media deal with orientalism today through the presentation of gender, race, religion, and culture that make up orientalist theory. The chapters focus on how orientalism is presented in the media, cinema, TV, photography, and more. This book is ideal for communications theorists, media analysts, practitioners, researchers, academicians, and students working in fields that include mass media, communications, film studies, ethnic studies, history, sociology, and cultural studies.

India Watching

This Palgrave Pivot showcases new research on M.K. Gandhi or Mahatma Gandhi, and the press, telegraphs, broadcasting and popular culture. Despite Gandhi being the subject of numerous books over the past century, there are few that put media centre stage. This edited collection explores both Gandhi's own approach to the press, but also how different advocacy groups and the media, within India and overseas, engaged with Gandhi, his ideology and methodology, to further their own causes. The timeframe of the book extends from the late nineteenth century up to the present, and the case studies draw inspiration from a number of disciplinary approaches.

Modern Media, Elections and Democracy

What have English terms such as 'civil society', 'democracy', 'development' or 'nationalism' come to mean in an Indian context and how have their meanings and uses changed over time? Why are they the subjects of so much debate - in their everyday uses as well as amongst scholars? How did a concept such as 'Hinduism' come to be framed, and what does it mean now? What is 'caste'? Does it have quite the same meaning now as in the past? Why is the idea of 'faction' so significant in modern India? Why has the idea of 'empowerment' come to be used so extensively? These are the sorts of questions that are addressed in this book. Keywords for Modern India is modelled after the classic exploration of English culture and society through the study of keywords - words that are 'strong, important and persuasive' - by Raymond Williams. The book, like Williams' Keywords, is not a dictionary or an encyclopaedia. Williams said that his was 'an inquiry into a vocabulary', and Keywords for Modern India presents just such an inquiry into the vocabulary deployed in writing in and about India in the English language - which has long been and is becoming ever more a critically important language in India's culture and society. Exploring the changing uses and contested meanings of common but significant words is a powerful and illuminating way of understanding contemporary India, for scholars and for students, and for general readers.

Journalism in India

This book profiles twentieth-century India through the life and times of Ramananda Chatterjee – journalist, influencer, nationalist. Through a reconstruction of his history, the book highlights the oft-forgotten role of media in the making of the idea of India. It shows how early twentieth-century colonial India was a curious melee of ideas and people – a time of rising nationalism, as well as an influx of Western ideas; of unprecedented violence and compelling non-violence; of press censorship and defiant journalism. It shows how Ramananda Chatterjee navigated this world and went beyond the traditional definition of the nation as an entity with fixed boundaries to anticipate Benedict Anderson and Ernest Gellner. The volume also examines the wide reach and scope of his journals in English, Hindi and Bengali, which published the likes of Rabindranath Tagore, Subhash Bose, Abanindranath

Tagore, Nandalal Bose, Ananda Coomaraswamy, the scientist J. C. Bose and Zhu Deh, the co-founder of the Chinese Red Army. He also published *India in Bondage* by the American Unitarian minister J. T. Sunderland, which resulted in his arrest. An intriguing behind-the-scenes look of early twentieth-century colonial India, this book will be of great interest to scholars and researchers of history, modern South Asia and media and cultural studies.

Indian Media

Follows the rise of modern India's pop culture world, especially since the 1980s, when relaxed censorship and economic liberalization led to an explosion in movies, music, mass media, consumerism, spiritual practices, and more. It is a captivating introduction to a diverse nation whose appetite for entertainment has led to some surprising twists and turns in recent history.

No Limits

The concept of nation building is a multi-dimensional process, addressing various components simultaneously. It takes into account the various historical and geographical perspectives of the country in question, noting the peculiarities and diversity of its cultural ethos, including its social, economic and political structures. This volume addresses these inter-linked aspects, and the innovative development of these structures and institutions. However, such changes and development must be directed to create a more culturally homogenous and productive society, so that basic human needs like food, shelter, healthcare and education are fulfilled at the optimum level. All-round development and growth for the nation can be achieved only with a robust economy and political stability. As such, the process of nation building and development is a multifaceted phenomenon. In the context of India, this process is associated with the central values embodied in the preamble of the country's constitution, which advocates for the establishment of secular, socialist and democratic society based on well-defined fundamental rights. This anthology reflects these academic spirits and vistas.

Handbook of Research on Contemporary Approaches to Orientalism in Media and Beyond

"Comprising original essays by an unusually varied group - including filmmakers, journalists and scholars from a wide range of disciplines - and written in a very accessible manner, this exploration of contemporary developments in cultural change and the media in India will interest media professionals, sociologists, anthropologists, and those in the fields of cultural and media studies."--BOOK JACKET.

M.K. Gandhi, Media, Politics and Society

In the aftermath of liberalization of Indian economy in 1991, the study of star-fan studies has experienced exponential expansion. *Hero and Hero-Worship: Fandom in Modern India* explores the areas of political, religious, film and cricket star fandoms; analyzing the rise of star formations and their consequent fandoms, star-fan bonds, as well as the physical and virtual space that both stars and fans inhabit. As perhaps one of the first book-length studies on Indian fandom, this volume not only draws on the works of Jenkins and other fandom scholars, but also explores the economic and cultural specificities of Indian fandom. This book will be of particular interest to scholars working in the field, as well as general readers interested in understanding star-fan interactions and intersections.

Keywords for Modern India

The Second Half Of The 20Th Century Witnessed Increasingly Rapid Cultural Ferment And Social Transformation, As Access To Media And Communications. Profound Changes Many Of Which Should Improve The Economic And Social Development Of Asia Have Been Initiated By The Industrialization Of The Countries Of Pacific Asia, The Break-Up Of The Soviet Union, The Emergence Of More Democratic Governments, And The Moves Toward Peace In The Middle East. Yet Many Political Problems Remain To Be Solved. In Order To Bring Structural Transformation, Two Sets Of Forces Are Commonly Recognised External And Internal. Scholars, However, Differ About Their Relative Role. In Fact, The Stability And Change In The Indian Society Were Greatly Influenced By Both External And Internal Factors. And More And More Social Scientist Have Come To Hold This View Though It May Not Be 'Easy For Them To Isolate Their Effects Because Of Close Aspects Of Social Transformation And Change.

Media and Nation Building in Twentieth-Century India

In this insightful and engaging book, Pat Lovett provides an in-depth analysis of the role of journalism in modern India. She explores the challenges and opportunities faced by journalists in this rapidly changing and complex society, and offers a compelling vision for the future of Indian journalism. A must-read for anyone interested in media studies, India, or current events. This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work is in the "public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Communicating models : the relevance of models for research on the worlds of the internet.

Role of Media in Nation Building

This book is about media content analysis in the English language print media in South Asia, with reference to certain contemporary issues. It is written from the perspective of the need to analyze media discourses and the ways in which their circulation creates a 'common sense' view of the world. The focus is on English language papers and news magazines; additionally, some Hindi, Urdu, and Sindhi newspapers are examined. The highlight is on the ways in which English language publications contribute to and function within middle class matrices of modernity, consumption, conflict, and conservatism in India.

Image Journeys

India has become one of the world's emerging powers, rivaling China in terms of global influence. Yet many people know relatively little about the economic, social, political, and cultural changes unfolding in India today. To what extent are people benefiting from the economic boom? In what ways is education transforming society? And how is India's culture industry responding to technological change? In this "Very Short Introduction\

Hero and Hero-Worship: Fandom in Modern India

One of the first ethnographic studies to explore use of social media in the everyday lives of people in Tamil Nadu, *Social Media in South India* provides an understanding of this subject in a region experiencing rapid transformation. The influx of IT companies over the past decade into what was once a space dominated by agriculture has resulted in a complex juxtaposition between an evolving knowledge economy and the traditions of rural life. While certain class tensions have emerged in response to this juxtaposition, a study of social media in the region suggests that similarities have also transpired, observed most clearly in the blurring of boundaries between work and life for both the old residents and the new. Venkatraman explores the impact of social media at home, work and school, and analyses the influence of class, caste, age and gender on how, and which, social media platforms are used in different contexts. These factors, he argues, have a significant effect on social media use, suggesting that social media in South India, while seeming to induce societal change, actually remains bound by local traditions and practices.

Social Transformation In Modern India

Is the bicycle, like the loudspeaker, a medium of communication in India? Do Indian children need trade unions as much as they need schools? What would you do with a mobile phone if all your friends were playing tag in the rain or watching Indian Idol? *Children and Media in India* illuminates the experiences,

practices and contexts in which children and young people in diverse locations across India encounter, make, or make meaning from media in the course of their everyday lives. From textbooks, television, film and comics to mobile phones and digital games, this book examines the media available to different socioeconomic groups of children in India and their articulation with everyday cultures and routines. An authoritative overview of theories and discussions about childhood, agency, social class, caste and gender in India is followed by an analysis of films and television representations of childhood informed by qualitative interview data collected between 2005 and 2015 in urban, small-town and rural contexts with children aged nine to 17. The analysis uncovers and challenges widely held assumptions about the relationships among factors including sociocultural location, media content and technologies, and children's labour and agency. The analysis casts doubt on undifferentiated claims about how new technologies 'affect', 'endanger' and/or 'empower', pointing instead to the importance of social class – and caste – in mediating relationships among children, young people and the poor. The analysis of children's narratives of daily work, education, caring and leisure supports the conclusion that, although unrecognised and underrepresented, subaltern children's agency and resourceful conservation makes a significant contribution to economic, interpretive and social reproduction in India.

Journalism In India

This volume aims to look both at as well as beyond the 'Delhi Gang Rape' through the lens of Indian Media Studies. The editors consider it a critical event, or rather critical media event that needs to be contextualized within a rapidly changing, diversifying and globalizing Indian society which is as much confronted with new ruptures, asymmetries and inequalities as it may still be shaped by the old-established structures of a patriarchal social order. But the volume also looks beyond the 'Delhi Gang Rape' and introduces other related thematic areas of an emerging research field which links Youth, Media and Gender Studies.

Media in a Globalized Society

This book explores how sociological and cultural factors affect interpretations of mediated knowledge. Using concepts from contemporary hermeneutics - in particular Gadamer - it examines the notion that understanding is irretrievably linked to the interpreter's socio-cultural positioning.

Tracking the Media

Caste in Modern India
