### Fundamental Financial Accounting Concepts

Fundamentals of Accounting and Financial Analysis (For U.P.T.U.) has been specially designed for entrants into business administration courses. Developed to meet the requirements of the syllabus of the first-semester MBA course of U.P. Technical University, Lucknow, the text has been kept simple for the benefit of students from non-commerce and non-finance backgrounds. It covers the basics of financial accounting, accounting concepts, accounting conventions, accounting postulates, steps to be taken for the construction of the funds-flow statement, preparation of cash flow statements, ratio analysis and the analysis of a company's financial statements.

### FUNDAMENTAL FINANCIAL ACCOUNTING CONCEPTS

Students are often overwhelmed by the amount of information presented in the introductory financial accounting course. By focusing on fundamental concepts in a logical sequence, students are able to fully comprehend the material rather than memorize seemingly unrelated terms and topics. The goal of Fundamental Financial Accounting Concepts is to enable students to understand how any given business event affects the financial statements. The "financial statements model" is a highly praised feature because it allows students to visualize the simultaneous impact of business events on all of the key financial statements (the income statement, the balance sheet, and the statement of cash flows). The mechanics of accounting coverage (debits and credits) is delayed until chapter 4. Instructors have flexibility as to the amount of emphasis they want to place on this topic.

### Study Guide to Accompany Fundamental Financial Accounting Concepts

Prepared by Barbara Chiappetta, Nassau Community College, and Janice Klimek, Central Missouri State University, this guide covers each chapter and appendix with reviews of the learning objectives, outlines of the chapters, summaries of chapter materials, and additional problems with solutions.
