La riqueza de las naciones, nuevamente explicada con la doctrina de su mismo investigador

«Una investigación sobre la naturaleza y las causas de la riqueza de las naciones», generalmente conocida por su título abreviado «La riqueza de las naciones», es la obra maestra del economista y filósofo moral escocés. Fue publicado por primera vez en 1776, el libro ofrece una de las primeras descripciones recopiladas del mundo de lo que construye la riqueza de las naciones, y hoy es un trabajo fundamental en la economía clásica. Al reflexionar sobre la economía al comienzo de la Revolución Industrial, el libro toca temas tan amplios como la división del trabajo, la productividad y los mercados libres.

La riqueza de las naciones

First published in Rome in 1535, Leone Ebreo's Dialogues of Love is one of the most important texts of the European Renaissance. Well known in the Italian academies of the sixteenth century, its popularity quickly spread throughout Europe, with numerous reprintings and translations into French, Latin Spanish, and Hebrew. It attracted a diverse audience that included noblemen, courtesans, artists, poets, intellectuals, and philosophers. More than just a bestseller, the work exerted a deep influence

over the centuries on figures as diverse as Giordano Bruno, John Donne, Miguel de Cervantes, and Baruch Spinoza. Leone's Dialogues consists of three conversations - 'On Love and Desire,' 'On the Universality of Love,' and 'On the Origin of Love' - that take place over a period of three subsequent days. They are organized in a dialogic format, much like a theatrical representation, of a conversation between a man, Philo, who plays the role of the lover and teacher, and a woman, Sophia, the beloved and pupil. The discussion covers a wide range of topics that have as their common denominator the idea of Love. Through the dialogue, the author explores many different points of view and complex philosophical ideas. Grounded in a distinctly Jewish tradition, and drawing on Neoplatonic philosophical structures and Arabic sources, the work offers a useful compendium of classical and contemporary thought, yet was not incompatible with Christian doctrine. Despite the unfinished state and somewhat controversial, enigmatic nature of Ebreo's famous text, it remains one of the most significant and influential works in the history of Western thought. This new, expertly translated and annotated English edition takes into account the latest scholarship and provides an invaluable resource for today's readers.

Dialogues of Love

This book, which can be used as a text for teaching purposes, gives a fascinating, and authoritative treatment both the rights protected by the Inter-American system and of the way in which its institutions work. An important part of the book is a thorough, article by article account of the guarantee in the American Declaration of the Rights and Duties of Man and in the American Convention on Human Rights of civil, political, economic, social and cultural rights in the light of the jurisprudence of the Inter-American Commission on Human Rights and the Inter-American Court of Human Rights, and of the Commission's many country reports on the human rights situation in particular states. There are also chapters on the rights of indigenous peoples, amnesty laws and states of emergencies. The evolution and current methods of work of the Commission and the Court are set out at length and their achievements are critically assessed. The role of non-governmental organisations is also examined in this context. The book will be invaluable to all those interested in the protection of human rights in the Americas and international human rights law generally.

The Inter-American System of Human Rights

It is a serious mistake to think that all we need for a just world is properly-structured organizations. But it is equally wrong to believe that all we need are virtuous people. Social structures alter people's decisions through the influence of the restrictions and opportunities they present. Does buying a shirt at the local department store create for you some responsibility for the workplace welfare of the women who sewed it half a planet away? Many people interested in justice have claimed so, but without identifying any causal link between consumer and producer, for the simple reason that no single consumer has any perceptible effect on any of those producers. Finn uses a critical realist understanding of social structures to view both the positive and negative effects of the market as a social structure comprising a long chain of causal relations from consumer/clerk to factory manager/seamstress. This causal connection creates a consequent moral responsibility for consumers and society for the destructive effects that markets help to create. Clearly written and engaging, this book is a must-read for scholars involved with these moral issues.

Consumer Ethics in a Global Economy

The history of economic thought does not stand still and, like other fields of study, it experiences outbursts of new interpretations and revised perspectives. Mark Blaug - one of the most important historians of economic thought of his generation - has prepared an authoritative collection which reflects the fresh currents that have been blowing through the history of economic thought in recent years. The volume successfully conveys the many types and models of analysis that characterise the modern history of economic thought. Professor Blaug's masterful selection will be essential reading for all instructors, researchers and students of the history of economic thought.

Path of Justice

Adam Smith's name has become synonymous with free market economics; *The Wealth of Nations* is taken as the definitive account of the benefits of free competitive markets. Yet recent scholarship has challenged this view and given us a richer, more nuanced figure, steeped in the intricacies of enlightenment social and political philosophy. Adam Smith's *Discourse* both develops this literature and gives it a radical new extension by taking into account recent debates in literary theory.

The History of Economic Thought

Why the art historian's craft is a uniquely melancholy art Melancholy is not only about sadness, despair, and loss. As Renaissance artists and philosophers acknowledged long ago, it can engender a certain kind of creativity born from a deep awareness of the mutability of life and the inevitable cycle of birth and death. Drawing on psychoanalysis, philosophy, and the intellectual history of the history of art, *The Melancholy Art* explores the unique connections between melancholy and the art historian's craft. Though the objects art historians study are materially present in our world, the worlds from which they come are forever lost to time. In this eloquent and inspiring book, Michael Ann Holly traces how this disjunction courses through the history of art and shows how it can give rise to melancholic sentiments in historians who write about art. She confronts pivotal and vexing questions in her discipline: Why do art historians write in the first place? What kinds of psychic exchanges occur between art objects and those who write about them? What institutional and personal needs does art history serve? What is lost in historical writing about art? *The Melancholy Art* looks at how melancholy suffuses the work of some of the twentieth century's most powerful and poetic writers on the history of art, including Alois Riegl, Franz Wickhoff, Adrian Stokes, Michael Baxandall, Meyer Schapiro, and Jacques Derrida. A disarmingly personal meditation by one of our most distinguished art historians, this book explains why to write about art is to share in a kind of intertwined pleasure and loss that is the very essence of melancholy.

Lectures on Justice, Police, Revenue and Arms

This 2005 book traces the history of economic thought from its prehistory to the present day.

Adam Smith's Discourse

"... I have used essays from the book to help dance graduate students push their thinking beyond the studio and their own physical experience and to realize the varied resources, approaches, and theoretical positions possible in writing about the body." -- Dance Research Journal "Choreographing History... assembles an impressive diversity of sites, disciplines and critical approaches... [and] includes not only historical bodies and discourses, but also the very bodies of the historians themselves." -- Parachute "This volume is not only full of gems (the very lineup of preeminent scholars is impressive), but is also a neat cross-section of the academic conventions and mannerisms of our time." -- Dance Chronicle "... [an] important step... in the ineluctable dance by postmodern historians across a bridge that spans the gaps among disciplines, between theory and practice, and between present and past." -- Theatre Journal Historians of science, sexuality, the arts, and history itself focus on the body, merging the project of writing about the body with theoretical concerns in the writing of history.

The Melancholy Art

This is the first English-language intellectual biography of the German-Jewish philosopher Ernst Cassirer (1874-1945), a leading figure on the Weimar intellectual scene and one of the last and finest representatives of the liberal-idealist tradition. Edward Skidelsky traces the development of Cassirer's thought in its historical and intellectual setting. He presents Cassirer, the author of *The Philosophy of Symbolic Forms*, as a defender of the liberal ideal of culture in an increasingly fragmented world, and as someone who grappled with the opposing forces of scientific positivism and romantic vitalism. Cassirer's work can be seen, Skidelsky argues, as offering a potential resolution to the ongoing conflict between the "two cultures" of science and the humanities--and between the analytic and continental traditions in philosophy. The first comprehensive study of Cassirer in English in two decades, this book will be of great interest to analytic and continental philosophers, intellectual historians, political and cultural theorists, and historians of twentieth-century Germany.

The Wealth of Ideas

First published in 2002. Routledge is an imprint of Taylor & Francis, an informa company.

Choreographing History

In the former Eastern Bloc countries, one of the most difficult and important aspects of the transition to democracy has been the establishment of constitutional justice and the rule of law. Herman Schwartz's wide-ranging book, backed with rich historical detail and a massive array of research, is the first to chronicle and analyze the rise and troubles of constitutional courts in this changing region. "Those who are interested in understanding the behavior of constitutional courts in transitional regimes cannot afford to ignore this important book. . . . [It] is fecund with hypotheses of interest to political scientists, and we are indebted to Professor Schwartz for his comprehensive analysis."—James L. Gibson, *Law and Politics Book Review*

The Doctrine of the Trinity

This exciting new book addresses how governments are now seeking to drive innovation through new forms of R&D policies, through public procurement, skills development, entrepreneurship and innovation culture to name but a few of the approaches. The volume debates and presents scattered and anonymous material in a coherent way, with a particular focus is on 'hot topics' in the field of innovation studies that have been previously under-researched. The book is divided into four key themes: government as a key actor in the innovation process, entrepreneurs as innovators, skills and competences required to maintain and improve innovation performance in Europe and finally, the wider context in which innovation policy develops.

Ernst Cassirer

"A primary condition for fresh thinking on the Trinity is an accurate, objective account of past and present thought" wrote one reviewer when *The Triune God* first appeared in 1972. "This [is what] Fortman has presented sensitively, accurately, and compactly." The author sets out "to trace the historical development of Trinitarian doctrine from its written beginnings to its contemporary status." Thus he treats the biblical witness, the Council of Nicea, Augustine, the Middle Ages, and the development of this doctrine from the fifteenth century to the present in the Protestant, Orthodox, and Catholic traditions.

Global Culture

Moving beyond the usual good-versus-evil story that pits master-planner Robert Moses against the plucky neighborhood advocate Jane Jacobs, Samuel Zipp sheds new light on the rise and fall of New York's urban renewal in the decades after World War II. Focusing on four iconic "Manhattan projects"--the United Nations building, Stuyvesant Town, Lincoln Center, and the great swaths of public housing in East Harlem--Zipp unearths a host of forgotten stories and characters that flesh out the conventional history of urban renewal. He shows how boosters hoped to make Manhattan the capital of modernity and a symbol of American power, but even as the builders executed their plans, a chorus of critics revealed the dark side of those Cold War visions, attacking urban renewal for perpetuating deindustrialization, racial segregation, and class division; for uprooting thousands, and for implanting a new, alienating cityscape. Cold War-era urban renewal was not merely a failed planning ideal, Zipp concludes, but also a crucial phase in the transformation of New York into both a world city and one mired in urban crisis.

The Struggle for Constitutional Justice in Post-Communist Europe

A benchmark in the history of economics and of political ideas, Rothschild shows us the origins of laissez-faire economic thought and its relation to political conservatism in an unquiet world.

Innovation Policy Challenges for the 21st Century

This Elibron Classics title is a reprint of the original edition published by the University of Chicago Press; T. Fisher Unwin in Chicago; London, 1907.

The Triune God

An analysis of contemporary violence as the new commodity of today's hyper-consumerist stage of capitalism. "Death has become the most profitable business in existence." —from *Gore Capitalism*

Written by the Tijuana activist intellectual Sayak Valencia, *Gore Capitalism* is a crucial essay that posits a decolonial, feminist philosophical approach to the outbreak of violence in Mexico and, more broadly, across the global regions of the Third World. Valencia argues that violence itself has become a product within hyper-consumerist neoliberal capitalism, and that tortured and mutilated bodies have become commodities to be traded and utilized for profit in an age of impunity and governmental austerity. In a lucid and transgressive voice, Valencia unravels the workings of the politics of death in the context of contemporary networks of hyper-consumption, the ups and downs of capital markets, drug trafficking, narcopower, and the impunity of the neoliberal state. She looks at the global rise of authoritarian governments, the erosion of civil society, the increasing violence against women, the deterioration of human rights, and the transformation of certain cities and regions into depopulated, ghostly settings for war. She offers a trenchant critique of masculinity and gender constructions in Mexico, linking their misogynist force to the booming trade in violence. This book is essential reading for anyone seeking to analyze the new landscapes of war. It provides novel categories that allow us to deconstruct what is happening, while proposing vital epistemological tools developed in the convulsive Third World border space of Tijuana.

Manhattan Projects

The emperor Constantine changed the world by making the Roman Empire Christian. Eusebius wrote his life and preserved his letters so that his policy would continue. This English translation is the first based on modern critical editions. Its Introduction and Commentary open up the many important issues the Life of Constantine raises.

Economic Sentiments

Arranged in a chronological narrative accompanied by maps, charts, illustrations and photographs, this is a celebration of one of the world's great cities. Its themes are as diverse as they are relevant, covering social and economic conditions, transport and trade, leisure, education and religion. The book traces London's history from the earliest evidence of human settlement over 40,000 years up to the end of the millennium.

Adam Smith and Modern Sociology

Paper mosaics, silk screen prints, fold-outs, silhouettes, and other types of cards to make yourself.

Gore Capitalism

This book examines emerging hypotheses, new methods and theoretic developments in regional economic development. It offers a diverse set of case studies, ranging from a focus on Europe, Central and East Asia and North America.

An Introduction to Property Theory

This book is a testament to the brilliant London-based Dutch artist who has made a unique contribution to the visual culture of architecture. Vriesendorp is best known as one of the co-founders of the Office of Metropolitan Architecture in the early 1970s, and her paintings and drawings from this period (published in Rem Koolhaas' *Delirious New York*, 1978) are widely acknowledged as beguiling and beautiful masterpieces. Images of Vriesendorp's idiosyncratic collection of drawings, paintings, postcards and paraphernalia are combined in this volume, alongside texts that illuminate her work. Charles Jencks ruminates on Vriesendorp's cosmology of symbols; the novelist and artist Douglas Coupland writes on the pathology of collecting; Beatriz Colomina re-treads the 'delirious' 1970s in New York; and Rem and Charlotte Koolhaas reframe the domestic environment that has been both the family home and Vriesendorp's studio archive for 30 years.

Life of Constantine

Mitry was driven to explain the "why," "what if," and "how come" experiences that resulted after the "wow" experience in cinema. His theory uses psychology and phenomenology to understand how cinema can elevate the viewer from the everyday world.

The Times History of London

This is a bilingual edition of the selected peer-reviewed papers that were submitted for the International Symposium on Jesuit Studies on the thought of the Jesuit Francisco Suárez (1548–1617). The symposium was co-organized in Seville in 2018 by the Departamento de Humanidades y Filosofía at Universidad Loyola Andalucía and the Institute for Advanced Jesuit Studies at Boston College.

The Great Chain of Being

Media semiotics is a valuable method of focusing on the hidden meanings within media texts. This new edition brings Understanding Media Semiotics fully up to date and is written for students of the media, of linguistics and those interested in studying the ever-changing media in more detail. Offering an in-depth guide to help students investigate and understand the media using semiotic theory, this book assumes little previous knowledge of semiotics or linguistics, avoiding jargon and explaining the issues step by step. With in-depth case studies, practical accounts and directed further reading, Understanding Media Semiotics provides students with all the tools they need to understand semiotic analysis in the context of the media. Semiotic analysis is sometimes seen as complicated and difficult to understand; Marcel Danesi shows that on the contrary it can be readily understood and can greatly enrich students' understanding of media texts, from print media right through to the internet and apps.

New Directions in Regional Economic Development

This examination of a key moment in modern architecture pointedly and critically evaluates the role of the neo-avant-garde in today's world. International in scope the book explores important exponents of 'visionary' and 'utopian' architecture in the closing juncture of the modernist era.

Walker's Expedition to Nicaragua

Legal issues that have traditionally been treated as domestic are increasingly governed by transnational law and numerous obscure tribunals. This book acquaints students of law and politics with the largely unrecognized authority of transnational legal systems and the ways boundaries of national sovereignty are being eroded in the 21st century. The editors have skillfully organized their collection around issues dealing with both human rights and issues of trade and used a comparative approach to analyze the many court decisions, treaties, and legal agreements that affect national sovereignty. Among subject areas included are: Courts and Regional Trade Agreements, Dispute Resolution under NAFTA, and Universal Criminal Jurisdiction. "This is an edited book that brings together in one highly readable place a crisp and engaging look at transnational courts in today's global world....In sum, Courts Crossing Borders is a quality effort that deserves careful reading. Enhancing a deeper understanding of this timely topic, it is a book that can be profitably studied by students, scholars, and the curious public." -- Law & Politics Book Review, 2005

The Aesthetics and Psychology of the Cinema

From one of Britain's most distinguished historians and the bestselling author of Hitler, this is the definitive history of a divided Europe, from the aftermath of the Second World War to the present. After the overwhelming horrors of the first half of the 20th century, described by Ian Kershaw in his previous book as having gone 'to Hell and back', the years from 1950 to 2017 brought peace and relative prosperity to most of Europe. Enormous economic improvements transformed the continent. The catastrophic era of the world wars receded into an ever more distant past, though its long shadow continued to shape mentalities. Europe was now a divided continent, living under the nuclear threat in a period intermittently fraught with anxiety. Europeans experienced a 'roller-coaster ride', both in the sense that they were flung through a series of events which threatened disaster, but also in that they were no longer in charge of their own destinies: for much of the period the USA and USSR effectively

reduced Europeans to helpless figures whose fates were dictated to them by the Cold War. There were striking successes - the Soviet bloc melted away, dictatorships vanished and Germany was successfully reunited. But accelerating globalization brought new fragilities. The impact of interlocking crises after 2008 was the clearest warning to Europeans that there was no guarantee of peace and stability. In this remarkable book, Ian Kershaw has created a grand panorama of the world we live in and where it came from. Drawing on examples from all across the continent, Roller-Coaster will make us all rethink Europe and what it means to be European.
