Dieses System wird als Goldstandard bezeichnet.

Damals verpflichteten sich die Zentralbanken

In der Weltwirtschaftskrise 1929 erwies sich der Goldstandard

In der Folge wurde er abgeschafft.

Ökonomen sind sich weitgehend einig, dass der starre Goldstandard die Weltwirtschaftskrise der 1930er Jahre verschärfte.

Auch wenn so mancher Gold mit Stabilität gleichsetzt, für viele Finanzexperten ist klar eine Währung sollte nicht fix an ein Edelmetall gebunden sein.

Gold Standard, Euro, European Monetary Integration, History of Money, European Economy

The transition from the gold standard to the Euro represents a pivotal shift in European monetary history. This evolution involved dismantling fixed exchange rates tied to gold and embracing a unified currency, fundamentally altering economic relationships within Europe and globally. Understanding this transformation requires analyzing the challenges and benefits of both systems, and the long-term consequences for the European Union's economic and political landscape.

Southern Wealth and Northern Profits, as Exhibited in Statistical Facts and Official Figures

"Ostensibly an argument that the economies of the North and South were dependent on each other, Southern wealth and Northern profits was met with much criticism from the North as it was essentially

a defense of slavery, a dismissal of the humanity of blacks, and a complaint against the abolitionist makeup of the legislature." -- Rulon Miller Books

Southern Wealth and Northern Profits

Excerpt from Southern Wealth and Northern Profits: As Exhibited in Statistical Facts and Figures; Showing the Necessity of Union to the Future Prosperity and Welfare of the Republic We have endeavored, in the following pages, to trace the gradual development of this great wealth, to show its sources, the course of the resulting trade, and the great profits derived from sectional intercourse, harmony, and dependence. The mutual benefit will be found to be large and that, on the other hand, the disasters of disunion would be only the more terrible for the greatness of former success. In the midst of this prosperity, a wanton attack, by political and clerical agitators, is made upon sister States, a new idea of morality is conjured up as a means of stirring up domestic strife, and wantonly destroying the source of all this material good. Historians record with surprise the amazing folly of George the Third and his ministers, who drove the colonies into rebellion for a system But they wanted revenue.

What will the future historian say of the North, which destroyed its source of profit for a more trivial pretence! The monkey that persisted in sawing off the limb between himself and the tree, seems to be the model of modern sagacity. We are told that there is no intention of destroying the institutions of the States - that the design is only to exclude the institution from territory where it would have been long since had nature permitted. There is here, then, nothing practical a mere pretence of agitating the popular mind and engendering animosities, for the mere sake of those animosities. The national prosperity, the domestic peace, the safety of life and property, the very existence of the nation, are jeopardized for an idea, admitted by the agitators to be fruitless. The agitation has at the North no one practical application what ever; while at the South, it has in the background servile insurrection, blood shed, and annihilation of person and property, involving ultimately the ruin of the North. Southern Wealth and Northern Profits

Excerpt from Southern Wealth and Northern Profits: As Exhibited in Statistical Facts and Figures; Showing the Necessity of Union to the Future Prosperity and Welfare of the Republic The Emperor of the French has said, that "France is the only nation that goes to war for an idea." With more truth may it be said, that "the United States is the only nation that goes to destruction for an idea." This appears, however, to be the settled policy of a party at the North. The United States, at the age of seventy years, have exhibited a degree of success in working out the "experiment" of self-government, that has baffled the sagacity, while it has excited the admiration, of the most far-seeing statesmen of the Old World. This great success manifests itself in the international peace that the country enjoys, its rapid increase in numbers, the general wealth of the people, and the vast aggregate which that wealth presents. At the close of the War of Independence, the country was composed of exhausted Colonies, having a population of 3,172,464 whites. The government was heavily in debt and without credit, the channels of trade flooded with irredeemable and depreciated paper that had driven away specie, national bankruptcy and individual insolvency were the rule. The people were destitute of capital and manufactures; the employment of the shipping apparently destroyed, and the future presenting but little hope. There were 751,868 black slaves, who were without employment that would earn their own support, and their fate and that of their masters gave ample cause of uneasiness, as well to statesmen as to owners. To abandon the blacks to their fate, under the plea of philanthropy, suggested itself to many. The employment of Northern ships was mostly the slave-trade, while the South, having daily less employment for the blacks, was determined to stop their arrival, - a measure which the North regarded as depriving it of its legitimate business. Thus growing jealousy was added to other evils. The lapse of seventy years has changed all that. The North has come to rival the mother country in manufactures - her shipping is the first in the world - capital of every description has become redundant - the Federal debt is nominal, and local wealth superior in Massachusetts to that of any community of like numbers in the world. The condition of the South has changed to one of the most brilliant promise. From a desponding position, in the possession of 600,000 idle blacks, she has 4,000,000, whose labor is inadequate to the production of that staple which the civilised world demands from her fertile soil. The blacks themselves have been gradually elevated in material comforts and religious sentiment - not only far above those of any other country, but greatly and progressively above their own former condition. And this is comprehended in the material fact, that their value, which was \$200 by assessment in 1790, is \$550 in 1858. From a market value of \$250, they have risen to \$1500 and \$2000. This simple fact alone would show not only the great value that their labor is to the Christian world, but that their owners have thus, as it were, come under bonds in the sum of \$1200 and \$1800 each hand, to give them the best moral and material care. Excerpt from Notes on "Southern Wealth and Northern Profits" Although no hostile, nor even unfriendly feeling has led to the ozami nation, some pages in the work cannot fail to provoke the most stern indignation. As a whole, it begets an irresistible impulse to attempt a reply, however unworthy of the task the reader may feel. Notes on Southern Wealth and Northern Profits.

This book offers conclusions that are very different from most of the traditional historical interpretations of the Buchanan presidency. Historians have either condemned Buchanan for weakness and vacillation or portrayed him as a president dedicated to peace who did everything constitutionally possible to avoid war. Under the scrutiny of Elbert B. Smith, Buchanan emerges as a strong figure who made vital contributions not to peace but to the accelerating animosities that produced the war. "Historians who have considered the Civil War a necessary and justifiable price for the destruction of slavery should feel a debt to James Buchanan," Smith writes. "Those who think the war could and should have been avoided owe him nothing." Most of the accounts of the era have concentrated on the Dred Scott Case, Bleeding Kansas and the Lecompton Constitution, the Lincoln-Douglas debates, John Brown, the rise of the Republicans and the disintegration of the Democrats, the election of 1860, and the bitter quarrels over slavery extension occasioned by these events. Buchanan has often appeared on a stage occupied by more important actors. Whether or not the war was already inevitable by March, 1857, cannot be proved. That a subsequent series of emotion-packed events filled both North and South with rage and fear, triggering secession and the war, is undebatable. It is Smith's theory that Buchanan, in leading the United States through these fateful years, added much to the war spirit that developed in both sections. Driven by affection and sympathy for the Southerners, he tried to satisfy their demands for slavery rights in the territories. This aroused bitter anti-South feelings throughout the North, which foiled his efforts and further convinced the Southerners that they could no longer have their way inside the Union. The one event that finally triggered the Southern secession was the election of a Republican president, and Buchanan's agreement with the Southern demands and his personal hatred for Stephen A. Douglas did much to accomplish this. Covering the most controversial period in American history, Smith presents important new evaluations for the consideration of students of both the Civil War and the presidency.
