Carolina Comments

This successor to the classic Lefler-Newsome North Carolina: The History of a Southern State, published in 1954, presents a fresh survey history that includes the contemporary scene. Drawing upon recent scholarship, the advice of specialists, and his own knowledge, Powell has created a splendid narrative that makes North Carolina history accessible to both students and general readers. For years to come, this will be the standard college text and an essential reference for home and office.

The National Directory of State Agencies

The most comprehensive state project of its kind, the Dictionary provides information on some 4,000 notable North Carolinians whose accomplishments and occasional misdeeds span four centuries. Much of the bibliographic information found in the six volumes has been compiled for the first time. All of the persons included are deceased. They are native North Carolinians, no matter where they made the contributions for which they are noted, or non-natives whose contributions were made in North Carolina.

1 Historical Introduction INTRODUCTION This chapter is mainly about the history of medicine and its ethics. As usually conceived, history is retrograde: It is what happened yesterday, and, much as we may try, it is what happened yesterday seen with a set of today's eyes. Trying to understand

yesterday's culture may help us put on a pair of corrective glasses, but it fails in - tirely correcting our vision. Contemporary cultural anthropology may likewise help us understand the way today's events and cultural habits shape what we call history tomorrow. Past events and the kaleidoscopic pattern of today's cultures may help guide us into a future that in at least some respects is ours to forge. Learning about ethics yesterday and thinking about ethics as it expresses itself in various cultures today can help us shape the ethics of tomorrow: This is true whether we are speaking of that part of social ethics called "medical" or of any other part of social ethics. The social aspects of medical practice—how the institution called medicine fits into and works within the greater society called culture—shape the way its ethics ultimately must play itself out.

The Teacher's Almanac, 1988-89

In *The Marathon Called Educational Leadership: The Twenty-Six Commandments of Success*, author and veteran educator Dr. Joe Sinclair describes his lifelong experiences, which ranged from cleaning out sewage ditches to meeting in the Oval Office with President Ronald Reagan. Sinclair's leadership experiences also involved some of the most unusual situations encountered by a school administrator, such as using a goat to predict the weather for school closings, selling a school for profit, and taking a group of students into the Soviet Union as the country collapsed around them. Sinclair's guidance and knowledge helped to turn these and other events into positive situations for his school district. *The Marathon Called Educational Leadership* offers guidance and insight into education today based upon his more than forty-five years of experience. He explores the challenges facing today's educators as well as the opportunities they have to work with students of different backgrounds. His willingness to share the knowledge, advice, and strategies he used to achieve his own accomplishments in district-level educational leadership is a testament to his lifelong commitment to educational excellence. The 26 Commandments may be applied not only to educational leadership, but also as a guide for leaders in all walks of life. Through practical advice for educators and recollections of his own experiences, Sinclair seeks to make a positive difference in the lives of young people and the educators who serve them.

This comparative study provides an overview of the textbook production chain, starting with its origins in the curriculum, and suggests ways in which policymakers can make improvements at every point in the chain. With evidence from a range of countries, mainly in Asia, the study is intended as a resource for policymakers and as a reference and benchmark for education systems. Although the study focuses on textbooks, which are the priority for governments and teachers and represent the greatest item of expenditure on teaching and learning materials, it also includes other teaching and learning materials including digital resources.
