A Century of Artists Books

Published to accompany the 1994 exhibition at The Museum of Modern Art, New York, this book constitutes the most extensive survey of modern illustrated books to be offered in many years. Work by artists from Pierre Bonnard to Barbara Kruger and writers from Guillaume Apollinaire to Susan Sontag. An important reference for collectors and connoisseurs. Includes notable works by Marc Chagall, Henri Matisse, and Pablo Picasso.

Belphegor

Belphegor, a criminal mastermind and hooded maniac, is obsessed with retrieving the lost treasure of the Medicis from its ancient burial place. Only Chantecoq, the 'king of detectives' can hope to unveil the sinister and sadistic figure that nightly haunts the Paris Louvre and its catacombs. And with that unveiling comes one of the most stunning twists. Belphegor was made into a highly successful 1960s serial for French television and it remains one of the key works of early French pulp fiction.

The J. Paul Getty Museum Journal

The J. Paul Getty Museum Journal has been published annually since 1974. It contains scholarly articles and shorter notes pertaining to objects in the Museum's seven curatorial departments: Antiquities, Manuscripts, Paintings, Drawings, Decorative Arts, Sculpture and Works of Art, and Photographs. The Journal also contains an illustrated checklist of the Museum's acquisitions for the previous year, a staff listing, and a statement by the Museum's Director outlining the year's most important activities. Volume 19 of the J. Paul Getty Museum Journal includes articles by Nicholas Penny, Ariane van Suchtelen, Thomas DaCosta Kaufmann and Virginia Roehrig Kaufmann, Frits Scholten, David Harris Cohen, and Dawson W. Carr.

'No other thriller writer can make you break into a sweat and break your heart at the same time' THE TIMES
Leyli Maal is a beautiful Malian woman, mother of three, living in a tiny apartment on the outskirts of Marseille. Her quiet life as a well-integrated immigrant is suddenly shaken when her beautiful eldest daughter, Bamby, becomes the main suspect in two murders linked to a lethal illegal immigration racket. Is Bamby really involved? And why is everyone desperate to get their hands on Leyli's mysterious red notebook?

Grand dictionnaire universel du XIXe siècle

Set in Peru during a war between U.S. Marines and a Cuban-Bolivian revolutionary army, this fictional memoir characterizes the evolution of a revolutionary, in a powerful psychological portrait of the fanaticism and destruction of revolution.

Ballads and Songs of Brittany

First published in 2009. This work by S. Wells Williams is a complete look at the Chinese Empire during the mid-nineteenth century. Subjects include the divisions of the Empire, geographical descriptions, religion and art, literature, the second war between Great Britain and China and social life among the Chinese. This is Volume one of two.

Nouveau Dictionnaire Portatif Des Langues Françoise Et Angloise

One of Pierre Michon's most powerful works, this book imagines decisive moments in the lives of five artists of different times and places: Vincent van Gogh, Francisco Goya, Antoine Watteau, Claude Lorrain, and Lorentino, a little-remembered disciple of Piero della Francesca. Michon focuses on particular moments when artist and model collide, whether that model is a person or a landscape, inner or outer. In the five separate tales he evokes the full passion of the artist's struggle to capture the world in images even as the world resists capture. Each story is a small masterpiece that transcends national boundaries and earns its place among the essential works of world literature.

An Etymological Dictionary of the Romance Languages

A leading intellectual historian of Latin America here examines the changing political ideas of the Mexican intellectual and quasi-governmental elite during the period of ideological consensus from the victory of Benito Juárez of 1867 into the 1890s. Looking at Mexican political thought in a comparative Western context, Charles Hale fully describes how triumphant liberalism was transformed by its encounter with the philosophy of positivism. In so doing, he challenges the prevailing tendency to divide Mexican thought into liberal and positivist stages. The political impact of positivism in Mexico began in 1878, when the "new" or "conservative" liberals enunciated the doctrine of "scientific politics" in the newspaper *La Libertad*. Hale probes the intellectual origins of scientific politics in the ideas of Henri de Saint-Simon and Auguste Comte, and he discusses the contemporary models of the movement the conservative republics of France and Spain. Drawing on the debates between advocates of scientific politics and defenders of the Constitution of 1857 in its pure form, he argues that the *La Libertad* group of 1878 and their heirs, the Científicos of 1893, were constitutionalists in the liberal tradition and not merely apologists for the authoritarian regime of Porfirio Díaz. Hale concludes by outlining the legacy of scientific politics for post-revolutionary Mexico, particularly in the present-day efforts to inject "democracy" into the political system. Originally published in 1990. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Shakespeare's Globe Exhibition

To the amazement of the public, pundits, and even the policymakers themselves, the ideological and political conflict that had endangered the world for half a century came to an end in 1990. How did that happen? What caused the cold war in the first place, and why did it last as long as it did? The distinguished historian Melvyn P. Leffler homes in on four crucial episodes when American and Soviet leaders considered modulating, avoiding, or ending hostilities and asks why they failed: Stalin and Truman devising new policies after 1945; Malenkov and Eisenhower exploring the chance for peace after Stalin's death in 1953; Kennedy, Khrushchev, and LBJ trying to reduce tensions after the Cuban Missile Crisis of 1962; and Brezhnev and Carter aiming to sustain détente after the Helsinki Conference of 1975. All these leaders glimpsed possibilities for peace, yet they allowed ideologies, political pressures, the expectations of allies and clients, the dynamics of the international system, and their own fearful memories to trap them in a cycle of hostility that seemed to have no end. For the Soul of Mankind illuminates how Reagan, Bush, and, above all, Gorbachev finally extricated themselves from the policies and mind-sets that had imprisoned their predecessors, and were able to reconfigure Soviet-American relations after decades of confrontation.

Richelieu

From antiquity to the Middle Ages, the bear's centrality in cults and mythologies left traces in European languages, literatures, and legends. Michel Pastoureau considers how this once venerated creature was deposed by Christianity and continued to sink lower in the symbolic bestiary before rising again in Pyrrhic triumph as the teddy bear.

Singing Sensation

A LACE GUIDE for MAKERS and COLLECTORS. This book includes a bibliography and a five-language nomenclature. It is hoped that this little manual will prove of use to students of stitchery in general, - or of bobbin lace in particular, - to see how certain meshes are woven; that it may aid those planning to produce lace either by hand or machine, in comparing and judging effects, in advance, and that it may assist collectors and classifiers to identify lace: for after all, it is the actual lace which finally determines a variety, only certain meshes being used in a lace of pure type. Originally published in 1917. Many of the earliest books on weaving, textiles and needlework, particularly those dating back to the 1900s and before, are now extremely scarce and increasingly expensive. We are republishing these classic works in affordable, high quality, modern editions, using the original text and artwork.

The Real Life of Alejandro Mayta

In 1997, the series "Stargate SG-1" first aired on American cable television and over the course of nearly nine seasons has developed its own unique mythological superstructure. "Stargate SG-1" focuses on the dynamic relationships among the show's main characters, the four-person first-contact team: SG-1. Each week they are taken to new planets where ancient human civilizations have been seeded as slave populations by the show's arch-villains, the parasitic, body-snatching Goa'uld. The series' concerns therefore range from ancient cultures and contemporary politics, to aliens and advanced technologies, all given life with award-winning special effects and anchored by the central icon of the Stargate. "Stargate SG-1" has blossomed into a series driven by fierce fan loyalty, with lively internet discussion groups, growing 'textual poaching' in fan fiction and art, and popular annual conventions. It has also generated a spin-off, "Stargate: Atlantis". In this welcome critical celebration, contributors discuss "Stargate SG-1's" characters, cinematic techniques, its themes and its place within science fiction television and film, along with its interaction with fan fiction, its Canadian setting, its ideological framing in the American point-of-view, and the tensions between its humanistic morality

and its representation of military/political objectives. There is also assessment of the currently fledgling "Stargate: Atlantis". Written for both fans and scholars, the book also includes an episode guide to the first eight seasons of "Stargate SG-1" and to the first season of "Stargate: Atlantis"

The Middle Kingdom

Discussion of display through a range of artefacts and in a variety of contexts: family and lineage, social distinction and aspiration, ceremony and social bonding, and the expression of power and authority. Medieval culture was intensely visual. Although this has long been recognised by art historians and by enthusiasts for particular media, there has been little attempt to study social display as a subject in its own right. And yet, display takes us directly into the values, aspirations and, indeed, anxieties of past societies. In this illustrated volume a group of experts address a series of interrelated themes around the issue of display and do so in a way which avoids jargon and overly technical language. Among the themes are family and lineage, social distinction and aspiration, ceremony and social bonding, and the expression of power and authority. The media include monumental effigies, brasses, stained glass, rolls of arms, manuscripts, jewels, plate, seals and coins. Contributors: MAURICE KEEN, DAVID CROUCH, PETER COSS, CAROLINE SHENTON, ADRIAN AILES, FRÉDÉRIQUE LACHAUD, MARIAN CAMPBELL, BRIAN and MOIRA GITTOS, NIGEL SAUL, FIONN PILBROW, CAROLINE BARRON and JOHN WATTS.

Masters and Servants

A vital survey of 32 internationally recognized artists who make books as part of their creative practice - features 500 images of these rarely seen works. The 'artist's book' has long been an important form of expression, and Artists Who Make Books showcases 32 internationally recognized artists who have integrated book production into their larger creative practice. This volume features a selection of books — many rarely seen — by every artist included, an accompanying text providing further context, and over 500 illustrations of covers and interior spreads. Insightful interviews with Tauba Auerbach, Paul Chan, and Walther König, and in-depth essays by Benjamin H. D. Buchloh and Lynda Morris round out this illuminating survey.

The Facetiae Or Jocose Tales of Poggio; Volume 2

A respected Harvard logician and philosopher gathers together twenty-nine writings dealing with the foundations of mathematics, Rudolf Carnap, linguistics, truth, analyticity, modal logic, propositional attitudes, and ontology.

For the Soul of Mankind

The descriptions of the quaint villagers of Werst, their costumes, manner of living, and belief in the supernatural world would in themselves prove an interesting narrative, but when coupled with the exciting adventures of Nic Deck, the two Counts, the cowardly Doctor, and the beautiful La Stilla, the story is undoubtedly one of the most enchanting ever offered. This mysterious tale takes place in the area which in just a few years would become known as Dracula's homeland. Jules Verne has the knack of it. He knows how to make the scientifically romantic story. You might not know what a "nyctalop" was, but if you saw one flapping his wings around the dark fortress in the Carpathians, you would run for it, as did Nic Deck.. Orfanik is head conjurer, and in his trial he explains how he brought into play for a wicked purpose a variety of ingenious inventions. Includes unique illustrations!

Celtic Declension

A groundbreaking work of linguistics, this volume is one of the first comprehensive dictionaries of the Old Breton language. Drawing on a wide range of historical sources, Joseph Loth has compiled a rich and vivid portrait of this ancient Celtic language, shedding light on its grammar, vocabulary, and cultural context. This work is an invaluable resource for scholars, linguists, and anyone interested in the history of the Celtic peoples. A Lace Guide for Makers and Collectors

Coats of arms were at first used only by kings and princes, then by their great nobles, but by the mid-13th century arms were being used extensively by the lesser nobility, knights and those who later came to be styled gentlemen. In some countries the use of arms spread even to merchants, townspeople and the peasantry. From the mundane to the fantastic, from simple geometric patterns to elaborate mythological beasts, this fascinating work by Terence Wise explores the origins and appearance of medieval heraldic devices in an engagingly readable style accompanied by numerous illustrations including eight full page colour plates by Richard Hook.

Reading Stargate SG-1

This panoramic volume tells the story of French art, culture and life from the 1770s to the 1820s: the first French voyages of discovery to Australia, the stormy period of social change with the outbreak of the French Revolution, and the rise to power of the young Napoleon Bonaparte and his wife Josephine.

Foucault

Poetry. Translated from the French by Peter Manson. THE POEMS IN VERSE is Peter Manson's translation of The Poésies of Stéphane Mallarmé. Long overshadowed by Mallarmé's theoretical writings and by his legendary visual poem "Un coup de Dés jamais n'abolira le Hasard," the Poésies are lyrics of a uniquely prescient and generative modernity. Grounded in a scrupulous sounding of the complex ambiguities of the original poems, Manson's English translations draw on the resources of the most innovative poetries of our own time these may be the first translations really to trust the English

language to bear the full weight of Mallarméan complexity. With THE POEMS IN VERSE, Mallarmé's voice is at last brought back, with all its incisive strangeness, into the conversation it started a hundred and fifty years ago, called contemporary poetry."

The Ways of Paradox, and Other Essays

An argumentation and debate textbook for the digital age. Composing Arguments combines traditional and contemporary theory with the online argument mapping tool Debategraph. This edition covers basic concepts regarding the definition and composition of arguments. The theory focuses on informal logic and is heavily influenced by Stephen Toulmin and Ludwig Wittgenstein, but traces the roots of argumentation theory to Aristotle. The first half of the textbook includes explanations of the syllogism, enthymeme, and the Toulmin model. Additionally, there are images of argument maps to illustrate the concepts, as well as exercises for students to use for studying. The second half of the textbook has step-by-step instructions for using Debategraph, complete with assignments that have been tried and tested in the classroom. This book represents the next step in argumentation and debate instruction. Use it for the class, or for instruction for competitive debate.

Vocabulaire Vieux-Breton

This text shows how scientific and archaeological techniques can be used to identify the common illnesses and injuries from which humans suffered in antiquity. Charlotte Roberts and Keith Manchester study evidence gleaned from written records and works of art as well as from ancient human remains, and they combine a clinical interpretation of prevalent diseases with a graphic description of thier social, economic, and cultural consequences. This edition includes case studies from around the world and gives an account of the rapid technical advances that have dramatically increased our knowledge of illness in the distant past.
