## Jack the Ripper: Letters from Hell

The name 'Jack the Ripper' is instantly recognised throughout the world, yet many people probably don't know that the famous nickname first appeared in a letter or that this was where the whole legend of Jack the Ripper really began. This title poses a controversial question: was 'Jack the Ripper' merely a press invention?

## Letters from Hell;

During World War I, Robert Pellissier spent long months with the French troops fighting in the Vosges mountains of Alsace. His letters show this ghastly experience, from the horror of being under fire to the monotony of long hours spent in the trenches.

#### Letters from Hell

Now in a new edition, condemned men and women speak for themselves about the reality behind bars on death row.

#### Letters from Hell

'I suppose my luck is You, Ann and Dad and more so if I could really write.' Annie Eliza Courtenay Tom Courtenay was born in Hull in 1937 and brought up near the fish dock where his father worked. When he left home for university, his mother, Annie, wrote to him every week and when her letters became more searching and more intimate in response to Tom's unhappiness he kept every one, not knowing that after her early death they were to become his most treasured possession. Tom has selected the best of them to go in this book and interwoven with them a portrait of what was going on in his life at the time, in the heady days of the early Sixties when successful young working-class actors were coming to the fore for the first time. Annie's letters are astonishing - wise, funny, with a natural instinct for words, but also deeply painful. She knows she's worthy of a better, more creative life, but she hasn't been given the chance. Partly a memoir of a working-class way of life that has gone for ever, partly a powerfully moving record of the love between mother and son, partly a portrait of the artist as a young actor, Dear Tom is sure to excite admiration and delight in equal measure.

#### Welcome To Hell

In spite of the fact that Jesus talked often about Hell, it rarely comes up in current Christian sermons and conversations. In fact, it seems that unbelievers are the only ones who talk about Hell ... when they use it as a curse word. In this fictional story, the author seeks to unpack a biblical view of what Hell is like. With 34 letters sent back and forth from a man on earth and another man in Hell, the author uses the letters from the man in Hell to describe, in very specific ways, what it's like there. A secondary objective of this book is to expose and attack sinful, nominal Christianity. Someone who claims to be a Christian, and yet is not taking his pursuit of holiness seriously, will either be offended or will experience godly conviction and make the necessary adjustments in his life.

#### Letters From Hell

Imagine being a nineteen-year-old young man in New York City in the late 1960s, revered by peers as a charismatic leader and simultaneously serving as the rock of your family. Imagine being that same young man, voluntarily enlisting in the Marines during an American era in which countless young men fear getting drafted into the armed forces and going off to war in a distant, largely unknown land. Now imagine landing in South Vietnam--roughly one year after graduating from high school--during the turbulent, bloody times of late 1967-early 1968 and being called upon to be a steadying influence amongst your brother Marines while trying like hell to survive amidst the maddening chaos of war, one second at a time. Finally, imagine serving as a leader amongst legions of young men whose mantra is LEAVE NO MAN BEHIND while you write letters to your older sister--your best friend--back home, who is counting on you to serve as the best man at her wedding in the summer of 1968. Imagine that this is all before you assume the mantle as the unquestioned leader of the next generation of your family. "A Saint's Letters from the Depths of Hell" is the compelling story of United States Marine Vincent (Vinnie) Benore "Saint" Santaniello, based on the dozens of letters that he wrote to his older sister and absolute best friend, Lilly Santaniello; accounts shared by both family friends and brother Marines in Vietnam; and the imagination of his oldest surviving nephew. It is also the touching story of a nineteen-year-old kid who loves his family tremendously and yearns to get back to the simple pleasures of life: calling his beloved sister silly names; likely marrying his high-school sweetheart, Roe; and resuming his role as the rock of the Santaniello family. This is a memoir of undying love and loyalty, as seen through the conflicting prisms of war and family. This book is an innovative love story, juxtaposed against a backdrop of typical teenaged hijinks that are repeatedly curtailed by the terrifying reality of a bloody, unforgiving war. It is a compelling story of a young leader who would lay down his life for the sake of his brother Marines while simultaneously striving to survive a merciless war and return home to his family. This touching memoir will leave you loving Vinnie, both as a brother Marine and baby brother, as you live vicariously through the love of his tender letters to Lilly. You will be taken on an unforgettable journey through the eyes of a young hero and you will experience the trepidation and anxiety of trying like hell to survive hell and make it back home, against all odds.

#### Letters From Hell

Sylvia Plath (1932-1963) was one of the writers that defined the course of twentieth-century poetry. Her vivid, daring and complex poetry continues to captivate new generations of readers and writers. In the Letters, we discover the art of Plath's correspondence. Most has never before been published, and it is here presented unabridged, without revision, so that she speaks directly in her own words. Refreshingly candid and offering intimate details of her personal life, Plath is playful, too, entertaining a wide range of addressees, including family, friends and professional contacts, with inimitable wit and verve. The letters document Plath's extraordinary literary development: the genesis of many poems, short and long fiction, and journalism. Her endeavour to publish in a variety of genres had mixed receptions, but she was never dissuaded. Through acceptance of her work, and rejection, Plath strove to stay true to her creative vision. Well-read and curious, she simultaneously offers a fascinating commentary on contemporary culture. Leading Plath scholar Peter K. Steinberg and Karen V. Kukil, editor of *The Journals of Sylvia Plath 1950-1962*, provide comprehensive footnotes and an extensive index informed by their meticulous research. Alongside a selection of photographs and Plath's own drawings, they masterfully contextualise what the pages disclose. This selection of later correspondence witnesses Plath and Hughes becoming major, influential contemporary writers, as it happened. Experiences recorded include first books and other publications; teaching; committing to writing full-time; travels; making professional acquaintances; settling in England; building a family; and buying a house. Throughout, Plath's voice is completely, uniquely her own.

#### Letters from Hell

Mary Whately's letters paint a fascinating picture of life in Egypt in 1879. And her insight into customs, culture, and climate ring true even today. Plus, many Bible quotations and allusions are woven throughout the letters, along with illustrations of how life in Egypt reminded Mary of those passages. *Letters from Egypt* is a living geography book that will touch your mind, your imagination, and your heart.

### Letters from Hell

In 1998, Andrew Carroll founded the Legacy Project, with the goal of remembering Americans who have served their nation and preserving their letters for posterity. Since then, over 50,000 letters have poured in from around the country. Nearly two hundred of them comprise this amazing collection -- including never-before-published letters that appear in the new afterword. Here are letters from the Civil War, World War I, World War II, Korea, the Cold War, Vietnam, the Persian Gulf war, Somalia, and Bosnia -- dramatic eyewitness accounts from the front lines, poignant expressions of love for family and country, insightful reflections on the nature of warfare. Amid the voices of common soldiers, marines, airmen, sailors, nurses, journalists, spies, and chaplains are letters by such legendary figures as Gen. William T. Sherman, Clara Barton, Theodore Roosevelt, Ernie Pyle, Gen. Douglas MacArthur, Julia Child, Gen. Norman Schwarzkopf, and Gen. Benjamin O. Davis Sr. Collected in *War Letters*, they are an astonishing historical record, a powerful tribute to those who fought, and a celebration of the enduring power of letters.

### Letters of Sylvia Plath Volume II

"Last night Mel and I were talking about some of the adjustments we'll have to make to our husbands' return. I must admit I'm not exactly the same girl you left-I'm twice as independent as I used to be and to top it off, I sometimes think I've become 'hard as nails'. . . . Also--more and more I've been living exactly as I want to . . . I do as I damn please." [These tough words from the wife of a soldier show that World War II changed much more than just international politics.] "From a fascinating collection of letters, filled with wonderfully distinctive human stories, Judy Barrett Litoff and David C. Smith have shaped a rare and brilliant book that transports the reader back in time to an unforgettable era."--Doris Kearns Goodwin, author of *The Fitzgeralds and the Kennedys* and *Lyndon Johnson and the American Dream*. "This is a wonderful volume, full of admirable women struggling in a difficult situation, doing their best for their families and their country. Ah, the memories it brings back! Highly recommended for those who lived through the war, and for those who want to understand it."--Stephen E. Ambrose, author of *Eisenhower* and *D-Day*, June 6, 1944 "Offering a remarkable view into the lives of ordinary women during wartime, this book will enlighten and catch at the hearts of general readers and cause historians to reconsider how women experienced World War II."--Susan M. Hartmann, author of *The Home Front and Beyond*. "From among 25,000 of an estimated six billion letters sent overseas during World War II, Litoff and Smith have culled and skillfully edited a sampling by 400 American women. These letters, starting with one to a seaman wounded at Pearl Harbor, are compelling documents of home-front life in varied ethnic, cultural, and financial milieus. Tragic, touching, and funny, the correspondence is full of prosaic news and gossip about jobs and neighbors, along with accounts of births and intimate allusions to love-making. The stress of separation was intensified for women whose loved ones were hospitalized, or imprisoned as either conscientious objectors or security risks. Some women wrote General MacArthur and others for news of missing men or to obtain details of their deaths. Many of these heartrending documents also express acceptance-and even pride-in the sacrifices required by

war."--Publishers Weekly. "Other scholars of WW II have published letters written home by servicemen, but this is the first collection sampling the letters written by sisters, sweethearts, wives, and mothers, saved by thousands of servicemen. Chapters are organized around themes that were important to these women: courtship, marriage, motherhood, work, sacrifices. . . . What women tell readers in these letters about their concerns and their wartime feelings will cause historians [readers?] to rethink what has been written about the homefront."--Choice. "Despite the popular appeal of Rosie the Riveter, nine out of ten mothers with children under six were not in the labor force, which helps to account for the vast outpouring of mail from the home front to 'our boys' in the European and Pacific theaters. Some couples wrote every day for four years. This is the rich historic documentation that the authors have drawn upon to create a panoramic pastiche of indefatigable, energetic, patriotic female letter writers in the war years. . . . One is struck by the hard-headed practicality of many of the letters--stories of plucky, sometimes even grumpy, coping. There are letters of growing independence, with strong and at times explicit indication that the boyfriend or husband will be facing a very different woman upon his return from the one he 'knew' when he disembarked for his own, often terrible, venture. . . . Every war leaves mothers with broken hearts. What this volume most remarkably demonstrates is just how prepared American women on the home front were for that dread eventuality."--Jean Bethke Elshtain in the *Journal of American History*. "Fascinating and often heartbreaking letters. . . . The letters illuminate a time when sex roles were first showing the changes that would culminate in the women's movement. 'I must admit I'm not exactly the same girl you left,' Edith Speert wrote to her husband, Victor, in 1945. 'I'm twice as independent as I used to be, and I sometimes think I've become hard as nails. I don't think my changes will affect our relationship.' . . . In the end, it is the small human dramas in these letters that stand out. Anne Gudis, miffed to distraction by her soldier-swain Sam Kramer, writes what may be the shortest Dear John on record: 'Mr. Kramer: Go to hell! With love, Anne Gudis.' A woman working at a Honolulu nightclub assures a pilot that she'll wait for him-until she's 20. The wife of an Air Corps navigator reads in a news story that only 15 of 1,500 Allied bombers were lost in a raid over Europe and later learns that her husband died in one of the 15. And a grieving mother whose son died in the Pacific asks Gen. Douglas MacArthur, in desperation, 'Please general he was a good boy, wasn't he? Did he die a hard death?'--*Smithsonian*. "'They made it possible for me to retain my sanity in an insane world,' wrote one pilot about the letters his wife sent him throughout World War II. The letters contained in this collection explain the soldier's sentiments. Whether full of passionate longing for a missing sweetheart or merely detailing domestic gossip, the letters offer a rich introduction to how American women experienced the war. Since military authorities ordered soldiers not to keep any letters written them by their loved ones, the authors have done a magnificent service in obtaining letters that soldiers either surreptitiously hid or whose authors copied them before sending them on."--*Library Journal*.

### Baby Dinosaurs on the Ark?

A scientific look at creationism from a former creationist According to a recent Gallup Poll, almost 40 percent of Americans believe that sometime in the last 10,000 years Earth and humankind were created in their present form--the rationale being that this is (presumably) the story told in the book of Genesis. Within that group, any threatening scientific evidence that suggests otherwise is rejected or, when possible, retrofitted into a creationist worldview. But can this uncomfortable blend of biblical literalism and pseudoscience hold up under scrutiny? Is it tenable to believe that the Grand Canyon was formed not millions of years ago by gradual erosion but merely thousands of years ago by the Great Flood? Were there really baby dinosaurs with Noah on his ark? Janet Kellogg Ray, a science educator who grew up a creationist, doesn't want other Christians to have to do the exhausting mental gymnastics she did earlier in her life. Working through the findings of a range of fields including geology, paleontology, and biology, she shows how a literal interpretation of the book of Genesis simply doesn't mesh with what we know to be reality. But as someone who remains a committed Christian, Ray also shows how an acceptance of the theory of evolution is not necessarily an acceptance of atheism, and how God can still be responsible for having created the world, even if it wasn't in a single, momentary, miraculous event.

### Drawing Futures

Drawing Futures brings together international designers and artists for speculations in contemporary drawing for art and architecture. Despite numerous developments in technological manufacture and computational design that provide new grounds for designers, the act of drawing still plays a central role as a vehicle for speculation. There is a rich and long history of drawing tied to innovations in technology as well as to revolutions in our philosophical understanding of the world. In reflection of a society now underpinned by computational networks and interfaces allowing hitherto unprecedented views of the world, the changing status of the drawing and its representation as a political act demands a platform for reflection and innovation. Drawing Futures will present a compendium of projects, writings and interviews that critically reassess the act of drawing and where its future may lie. Drawing Futures focuses on the discussion of how the field of drawing may expand synchronously alongside technological and computational developments. The book coincides with an international conference of the same name, taking place at The Bartlett School of Architecture, UCL, in November 2016. Bringing together practitioners from many creative fields, the book discusses how drawing is changing in relation to new technologies for the production and dissemination of ideas.

#### Plus-Sized Elf Vol. 5

In 1683, two empires - the Ottoman, based in Constantinople, and the Habsburg dynasty in Vienna - came face to face in the culmination of a 250-year power struggle: the Great Siege of Vienna. Within the city walls the choice of resistance over surrender to the largest army ever assembled by the Turks created an all-or-nothing scenario: every last survivor would be enslaved or ruthlessly slaughtered. The

Turks had set their sights on taking Vienna, the city they had long called 'The Golden Apple' since their first siege of the city in 1529. Both sides remained resolute, sustained by hatred of their age-old enemy, certain that their victory would be won by the grace of God. Eastern invaders had always threatened the West: Huns, Mongols, Goths, Visigoths, Vandals and many others. The Western fears of the East were vivid and powerful and, in their new eyes, the Turks always appeared the sole aggressors. Andrew Wheatcroft's extraordinary book shows that this belief is a grievous oversimplification: during the 400 year struggle for domination, the West took the offensive just as often as the East. As modern Turkey seeks to re-orient its relationship with Europe, a new generation of politicians is exploiting the residual fears and tensions between East and West to hamper this change. *The Enemy at the Gate* provides a timely and masterful account of this most complex and epic of conflicts.
