rip all of the sides down to the same width

shave a little bit off of each edge

use a stack of data blades in your table saw

lower your blade down to half the thickness of the board

use the miter gauge and a rip fence in combination

start making cuts advancing the board forward each cut

cut the long rabbits along one long edge of each piece

hold the bottom panel in place

cut it to size by first dry fitting all of the side

use some regular bar clamps on the sides

glue together all the sides and the bottom at the same time

cut that down to its final size
