So We'D Start at 3 with a Bracket You Can Include the 3 and You Need to We Go up to 4 We'D Say You Know What You Need To Exclude that 4 but Then after that You Can Keep Going Forever that's How We Write that for Interval Notation Man I Hope this Makes Sense I Hope You'Re Seen the the Ideas behind Domain Really Producing for You Understanding Real Numbers Here Being Positive Defined Numbers Here Being Not 0 and that Is How We Approach Find a Domain the Last One I'M Going To Go through Very Quickly Obviously We Have the Fraction We Also Have some Square Root And that Is How We Approach Find a Domain the Last One I'M Going To Go through Very Quickly Obviously We Have the Fraction We Also Have some Square Root So Let's Really Think about It There's Two Issues Right We Know that the Denominator Has a Square Root in It We Know that Square Roots Want To Be Positive so When We Write this You Go Let's Talk with a Square Root First Let's Understand that in Order for Us To Get Real Numbers I Would Have To Have X minus 8 Being Greater than or Equal To Zero that's the Square Root I Did Just the Square Root of Says It Keep Me Positive or Most Deadly 0

So if We Exclude the the 8 It Would Exclude that Idea that Hey I Can Be Equal to 0 Here Then We'Re Excluding the Only Number That's GonNa Let that Denominator Be 0 so We Kind Of Put these Ideas Together Sometimes and Say Cool but We Know What We Can't Have that Actually Equals 0 so We'Re Just GonNa Take that Away from that Inequality if We Add a Nothing Changes As Far as Reversal Equality We Get X Is Greater than 8 That's Our Domain We Can Set this Up with Set Builder Notation We Can Say Hey X Is X Is Positive and More than 8 but It Can't Include the 8 So You Think about this One Say All Right the Square Root of X Squared Plus 1 Has To Be Greater than Zero Not Equal to Zero because It's on the Bottom of Fraction You Go Well What Numbers Are Going To Make this Greater I Can't Solve that Oh Geez What Do I Do Well if You Square a Number and Add One Is It Always Positive Is It Ever Negative It's Never Negative It's Always Has To Be Positive or Real Numbers That's all That's all so It's Telling You the Domains Are Real Numbers So Sometimes We Really Just Have To Sit There and Think about It a Little Bit and Understand the Ideas behind the Square Root and the Denominator

It's Never Negative It's Always Has To Be Positive or Real Numbers That's all That's all so It's Telling You the Domains Are Real Numbers So Sometimes We Really Just Have To Sit There and Think about It a Little Bit and Understand the Ideas behind the Square Root and the Denominator if You Have Something That CanNot Equal Zero on the Bottom of Your Fraction Your Domain Is all Real Numbers if You Have Something in a Square Root That CanNot Be Negative Ever No Matter What You Plug in Then Your Domain Is all Real Numbers So I Hope that You'LI Get this from Time to Time I Hope that Makes Sense to You I Hope Also You Understood My My Comment about with Fractions We'Re Really Only Concerned

So I Hope that You'll Get this from Time to Time I Hope that Makes Sense to You I Hope Also You Understood My My Comment about with Fractions We're Really Only Concerned Where Your Denominator Has Variables in It So like X minus 2 over 4 that 4 Is a Constant It Can Never Equal 0 on Its Own so Your Domain Here Would Also Be all Real Numbers We're GonNa Stop There We've Explained What Domain Is Again We've Talked about How To Find the Square Roots and with Denominators and the Interplay between those Later on We'll Talk about Logarithms Hope Makes Sense and We're GonNa Come Back a Little While

DOES IT PAY TO GO TO COLLEGE?

Excerpt from Does It Pay to Go to College?: An Answer to the Argument of Mr. R. T. Crane, in the Form of an Address Delivered Before the Graduating Class of the Evanston, Ill., Township High School Crane's inquiry. This leaves only 65 letters from the class that he desired to reach. Observe how very narrow is the basis of his conclusions. He first eliminates that vast number, fully fifty per cent, of the college men who have taken technical or scientific work, tacitly admitting that a college education for them is a good thing, even if they enter mercantile life. Then, of the remaining fifty per cent, he eliminates all but 65 out of 555. That is, reduced to percentages, we have 11 per cent of 50 per cent, or a total of about five and one-half per cent of the whole college output as a basis of inquiry. Now, accepting as correct Mr. Crane's conclusions that about five and one-half per cent of academic college graduates go into business, in his definition of business, what does he find? Let me answer in his own words: Sixty out of the sixty-five say that, if they had their lives to live over, they would take a college course [p. The question whether a college education has been of benefit to them in the performance of their duties and in securing advancement is answered in the affirmative by fifty and in the negative by seven. The others gave no information on this point. [p. It appears, then, that, taking the five and one half per cent of the classical or academic graduates who go into business, 7 out of 65, or a little over 10 per cent, tell Mr. Crane that it does not pay to go to college; while 50 out of 65, or over 73 per cent, tell him that it does pay to go to college. But what of the other question? Let me again quote Mr. Crane [p. Even those who admit that they would be better off financially if they had never gone to college, claim that whatever they lose in this respect, is more than compensated for by the college experience and the increased capacity it has given them for enjoying life. An extreme instance of this is seen in the case of one of these young men, who states that upon leaving college he had neither pull nor capital; that he thinks his college experience was of no material or direct benefit to him in securing a position; that he finally drifted into the cattle business out West, in which he was unsuccessful, and that he is now out of a position. Notwithstanding all this, and admitting, as he does, that, had he continued in business instead of going to college, his financial condition undoubtedly would have been better than it is today, he says: I think I am safe in saying that, if I had the decision to make over again, I should take the college education. It may not make great returns on the investment in actual money; but to the man who has taste and determination, it makes, I feel, adequate returns in the enlarged field he is given for the pursuits of his life with happiness to himself and with benefit to those about him. This, remember, is Mr. Crane's awful example - what he himself calls an extreme case; the worst, obviously, to be found among that ten per cent who replied that it does not pay, financially, to go to college. Medieval History of the University of Cambridge - Medieval History of the University of Cambridge

by M. Laser History 27,083 views 4 years ago 11 minutes, 48 seconds - Video scripts with sources are available for free on my Patreon. Extra Information and clarifications. 0:36 This map isn't a ... This map isn't a completely accurate representation of Cambridge in the 16th century as it is an artistic rendition of an 16th century artistic rendition of Cambridge.

Milton Keynes didn't exist at this point. Well at least not as it is now. The city was part of a new development project in the 1960s. Before that the area was mostly farmland with very small population. It was inhabited ever since the bronze age it just never was an established city or even a town until the 1960s. I put it in because I simply made a mistake.

This could have been more than three or even less, it's hard to prove where one was born in the 12th century. Not many birth certificates were printed out at that time.

Technically he was only a "master of the scholars" since the chancellery didn't exist yet but in practice he basically oversaw all the day to day administrations of the University just like a chancellor would. Another reason for staying may have been that Cambridge had a presence of ecclesiastical courts for the bishopric of Ely meaning students and specially law students would have had a great opportunity to work in the town as well as learn.

Joined by the Dominicans in 1238.

However there were new Universities in Scotland due to the fact that the oath by Cambridge and Oxford pertained only to England.

Hostels and halls are basically the same thing and the words are used interchangeably for the most part. However the main difference is that the word hostel was mainly used in Cambridge as the word Hall was mainly used in Oxford.

Hostels like St Bernard's or Physwick.

Starting in around the 15th century.

M. Laser is an idiot who can't do History.

Gonville Hall unlike where today's Gonville & Caius College stands was located at what is today the garden of Corpus Christi College.

6 of which survived to this day and King's Hall and Michaelhouse got absorbed in to today's Trinity College.

Allegedly one of the leaders of the rioters was the mayor of Cambridge.

Back then Corpus Christi College was located a bit more up street than it is today.
