100 Questions & Answers About Your Child's Substance Abuse

100 Questions & Answers About Your Child's Substance Abuse provides clear, straightforward answers to the most commonly-asked questions about a child's substance abuse. Written for parents and caregivers as well as pediatricians and inpatient and outpatient treatment facility workers, this easy-to-read guide is an essential quick reference for anyone dealing with childhood substance abuse. Topics include risk factors, alcohol abuse, steroid use, drug abuse, assessment and diagnosis, and treatment.

All about Drugs and Alcohol

Help children overcome the increasing dangers they face because of their parents' addictions Impact of Substance Abuse on Children and Families addresses the growing concern over children at risk of developing physical and mental health problems because of their parents' addictions to alcohol and other drugs (AOD), including a chapter on the troubling increase of methamphetamine abuse by parents. The book's contributors examine current research findings from the United States, Australia, Ireland, and Israel to provide much-needed insight into the effects of addiction on family dynamics, parental attachment styles, and family characteristics. The book also looks at the impact of addiction on school-aged children and on mothers in residential treatment with their children, survey assessment instruments and treatment outcomes, and the value of Student Assistance Services for older children. Almost 25 percent of children in the United States live in a household where a parent or other adult is a heavy or binge drinker. More than 10 percent live in family where illicit drugs are used. Children of alcoholics are nearly 10 times more likely to develop an alcohol use disorder as other children, and often develop behavior problems such as depression, anxiety, attention deficit hyperactivity disorder, conduct disorder, and oppositional defiant disorder. Children of illicit drug abusers are more likely than other children to demonstrate immature, impulsive, or irresponsible behavior, to have lower IQ scores, and poorer school attendance. Impact of Substance Abuse on Children and Families focuses on these critical and often ignored aspects of addiction, providing the latest evidence-based qualitative

and quantitative research findings, as well as a summary of available literature. *Impact of Substance Abuse on Children and Families* examines: the impact on children at various developmental stages the role of the family as a treatment resource alcohol problems and marriage parental attachment styles of drug-using fathers family cohesion and adaptability self-in-reactions theory family-centered service models the Strengths and Difficulties Questionnaire (SDQ) adolescent substance abuse treatment online treatment options *Impact of Substance Abuse on Children and Families* is an essential resource for both academics and practitioners working in social work, addictions counseling, sociology, psychology, public health, and family and children's studies.

Impact of Substance Abuse on Children and Families

Some people ask me why I wrote this book. I am not an expert in behavior but I have earned a master's degree in special education and I have also worked with emotionally disabled and oppositional defiant children for the last six years. Though most mainstream teachers and even some special education teachers shun the behavior classroom, I found that the behavior classroom is the best place to connect with children and help them through difficult times of stress and frustration.

How to Manage a Behavior Classroom

Summarizes knowledge about the characteristics, knowledge, attitudes, and practices of certain audiences of children who are at a higher risk for drug and alcohol abuse. Also discusses channels, sources, materials and messages and offers ideas for reaching these groups. Chapters cover the general category of youth from high-risk environments, looking specifically at Black and Hispanic/Latino children, and influences on them such as parents and primary care physicians. Includes case studies, messages and materials review process, and intermediary organizations.

Communicating about Alcohol and Other Drugs

Designed for professionals in the fields of child welfare, mental health, health care, education, law, the faith community & substance abuse prevention & treatment. Intended to help identify the various forms of parental substance abuse. Includes a section addressing the identification of substance-abusing clients. Reviews the characteristics of substance-abusing parents. Glossary. Bibliography. Charts & tables.

Communicating about Alcohol and Other Drugs

Harris, a successful businessman, has devoted himself to children's causes for the past forty years and has initiated and funded numerous programs geared to children and families. He presents data from research in pediatrics, social work, nursing, psychology, and education showing that children who receive early nurturing and stimulation are far more likely to have success in school and in life.

Combining Alcohol and Other Drug Abuse Treatment with Diversion for Juveniles in the Justice System

Pediatric Education for Prehospital Professionals (PEPP), Fourth Edition is an evidence-based resource of essential medical content for the assessment and management of infants and children in the field. This respected and ground-breaking program paired physicians and EMS providers together to ensure the content reflects current best practices and the realities of the field. Developed by the American Academy of Pediatrics, PEPP is designed to give prehospital professionals the knowledge, skills, and confidence they need to effectively assess and manage pediatric patients. PEPP combines world-class content with engaging features and an interactive course to truly prepare prehospital professionals to care for pediatric patients. The Fourth Edition Includes: A new chapter on Behavioral Emergencies A top-flight EMS author team working with AAP physician reviewers to ensure exceptional medical content with a focus on how it is applied in the "streets" New procedures on tourniquet application and intranasal medication administration Features Include: The Pediatric Assessment Triangle (PAT) represents the essence of the PEPP patient assessment method, which includes assessing appearance, work of breathing, and circulation to the skin. The Patient Assessment Flowchart provides students with an easy-to-understand reference of the pediatric patient assessment process. Case Studies provide an opportunity for students to apply the foundational knowledge presented in the chapter and strengthen their critical-thinking skills. Procedures provide step-by-step explanations and visual summaries of vital BLS and ALS pediatric care skills. Flexible Course Options: PEPP Course

Coordinators may offer a 2-day onsite course or a 1-day enhanced hybrid course at the BLS or ALS level. The onsite course features interactive case-based lectures where students apply their knowledge in a safe environment. The hybrid course features case-based online modules with engaging interactivities, including rapid skills demonstration videos that students complete before attending the onsite portion for hands-on skill station coaching and small-group discussions. The BLS-level courses are geared toward emergency responders and EMTs, while the ALS-level courses are geared toward AEMTs and Paramedics.

Alcohol and Drug Abuse Education Act oversight, 1981

The consumption of drugs and alcohol, and the pleasures and problems arising from this consumption, can be understood as embedded and constitutive elements of social, family, and recreational life. At the same time, they are key sites of intervention for a broad array of state and non-state actors focused on regulation, treatment, and recovery. This edited volume showcases current research on the complex social and cultural geographies of drugs and alcohol. Taking an avowedly critical approach, the authors draw from a variety of theoretical traditions to explore the socially and spatially embedded nature of alcohol and drug consumption, regulation and treatment, and the ways in which these give rise to particular lived experiences, while foreclosing on others. Together, the chapters question taken-for-granted assumptions about the nature of, and motivations for, drug and alcohol use, and pay direct attention to both the intended and unintended consequences of regulation and treatment initiatives. Despite and, in part, because of this critical stance, chapters hold immediate implications for drug and alcohol policy and public health interventions. This book was originally published as a special issue of *Social and Cultural Geography*.

Protecting Children in Substance-abusing Families

Our drug prohibition policy is hopeless, just as Prohibition, our alcohol prohibition policy, was before it. Today there are more drugs in our communities and at lower prices and higher strengths than ever before. We have built large numbers of prisons, but they are overflowing with non-violent drug offenders. The huge profits made from drug sales are corrupting people and institutions here and abroad. And far from being protected by our drug prohibition policy, our children are being recruited by it to a lifestyle of drug use and drug selling. Judge Gray's book drives a stake through the heart of the War on Drugs. After documenting the wide-ranging harms caused by this failed policy, Judge Gray also gives us hope. We have viable options. The author evaluates these options, ranging from education and drug treatment to different strategies for taking the profit out of drug-dealing. Many officials will not say publicly what they acknowledge privately about the failure of the War on Drugs. Politicians especially are afraid of not appearing "tough on drugs." But Judge Gray's conclusions as a veteran trial judge and former federal prosecutor are reinforced by the testimonies of more than forty other judges nationwide.

Children in Jeopardy

Looks at the dangers of abusing drugs and alcohol and explains how to stay safe and avoid these harmful substances.

The Facts About Drugs and Alcohol

THE SOUL'S JOURNEY: GUIDANCE FROM THE DIVINE WITHIN propels the reader onto a breath-taking visionary quest as the soul's longing to know the Divine is answered by the loving power of Grace. Dr. Edwards uses his personal mystical experiences to gradually unfold the tasks to be mastered and the lessons to be learned as we tread our individual path to the Divine. His wisdom is grounded in both direct experience as well as in the knowledge of Jungian archetypal psychology, Eastern and Western mysticism and mythology. The book presents a rich interweaving of personal trials and challenges, insights from poet saints and mystics, uplifting experiences of the Divine being discovered in everyday life, and lofty overviews of the spiritual terrain from different vantage points. The reader will have the good fortune to find their faith and their enthusiasm for treading their path delightfully boosted by what they encounter in this book. Joseph Chilton Pearce, noted author and lecturer on human development whose books include *THE MAGICAL CHILD*, *THE MAGICAL CHILD MATURES* and *EVOLUTION'S END*: "You have a treasure chest of experience - so rich a story.... The only one worth telling - the only game in town." Dr. Marion Woodman, the highly regarded Jungian analyst, author of numerous works and co-author of *DANCING IN THE FLAMES: THE DARK GODDESS IN THE TRANSFORMATION OF CONSCIOUSNESS*: "I find your descriptions of your experiences fascinating. I really feel that blackness

- radiant blackness [of Kali] - you describe. Also your descriptions and explanations and in-depth experiences of the chakras are excellent. Many thanks for sharing this with me. I know it can be of value to many who are working so hard to bring East and West, body and mind together." Stanley Krippner, Ph.D., professor of psychology, author of *Spiritual Dimensions of Healing* and editor of *Dreamscaping*: "...Edwards' first person accounts are riveting. [His] descriptions of his Kundalini states are eloquent, including colorful descriptions of his imagery (olfactory and tactile as well as visual and auditory) and profound insights into the human condition. Edwards skillfully guides his readers through a pathway on which he has been an experienced traveler." (AHP Perspective, Sept/Oct 2001)

Pediatric Education for Prehospital Professionals (PEPP), Fourth Edition

Parenting and Substance Abuse is the first book to report on pioneering efforts to move the treatment of substance-abusing parents forward by embracing their roles and experiences as mothers and fathers directly and continually across the course of treatment.

Using Space: Critical Geographies of Drugs and Alcohol

Beyond this synthesis of the state of the science, the contributors also develop public health and public policy implications, presenting: approaches to training personnel, a comprehensive model for services, and public and private resources to deliver those services.

Why Our Drug Laws Have Failed

How do you keep the whole family in mind when carrying out social work assessment? How do you balance the needs of adults and children? How do you ensure that children's welfare and safety are everyone's priority when families face complex difficulties? *Mastering Whole Family Assessment in Social Work* brings together what social workers in adult and children services need to know about assessment across both services. With tools and frameworks that make sense of the interface between adult life difficulties, family problems, parenting capacity and children's needs, this practical guide will help social workers to think across professional and administrative divides. Case studies, practice vignettes, exercises and suggestions for further reading are included throughout the book to help the reader consider the well-being of the whole family when conducting and interpreting assessments. This guide will help social workers to think holistically and work collaboratively both with each other and with families.

Drugs & Alcohol

Countertransference was believed at one time to consist of the subjective reactions of the therapist whose own unresolved conflicts had been reactivated by the patient's transference. More recently, however, it has been recast to include the totality of the therapist's attitudes, fantasies, and emotional reactions to the patient. While this important topic has received increased attention in the mental health literature in recent years, little attention has been paid to countertransference encountered in child and adolescent psychotherapy. This book focuses on countertransference in the psychotherapy of children and adolescents in detail. It offers the child and adolescent therapist an invaluable opportunity to explore countertransference in substantial depth and in a variety of clinical encounters across the wide spectrum of child and adolescent psychopathology. Perhaps most importantly, it normalizes the topic of transference in the psycho-therapy of children and adolescents and, in so doing, highlights the clinician's subjective experience as central to the process of psychotherapy.

The Soul's Journey

Directed towards the typical family with the typical teenager, *100 Questions and Answers About Your Daughter's Sexual Wellness and Development* provides parents of adolescent daughters with reliable, up-to-date information about the special health issues affecting their daughter's sexual development. This essential guide covers a wide range of topics including breast development, menstruation, birth control, the health effects of tattoos and piercings, and the "pros and cons" of the new HPV vaccine. Written by an obstetrician-gynecologist and mother of a young woman, with commentary from other parents and a teenager, this book offers authoritative and practical answers to your questions about your daughter's sexual wellness and development.

Parenting and Substance Abuse

100 Questions & Answers About Your Child's Schizophrenia provides clear, straightforward answers to your questions about your child's schizophrenia. Written by an expert in the field, this practical, easy-to-read guide shows you and your family how to cope with symptoms, where to get the best treatment, what medications are available for this condition, and much more. An indispensable quick reference for anyone facing childhood schizophrenia!

Drug-dependent Mothers and Their Children

Here's all of the crucial coverage you need to succeed in class and confidently prepare for the NCLEX-RN®. From nursing theory, legal and ethical issues, and leadership and management to psychological support, infection control and medication administration—easy-to-follow outlines in every chapter review exactly what you need to know.

Mastering Whole Family Assessment in Social Work

Originally published in 1995, this title provides a practical examination of the problems of substance abuse and abuse among persons with chronic mental disorders. Epidemiologic, diagnostic, and treatment issues are examined, as well as the problems of special populations and systems issues. This book will be of interest to practising clinicians in both the mental health and substance abuse treatment sectors.

Children's Software Revue

The YA Hotline is a unique newsletter written by graduate students in the Young Adult Literature and Media Interests class in the School of Library and Information Studies at Dalhousie University. Hot, Hotter, Hottest: The Best of the YA Hotline consists of selected articles from issues 44 to 64. This collection of articles from The YA Hotline is useful not only for YA librarians, but also for teachers and other educators and program coordinators working with young adults.

Countertransference in Psychotherapy with Children and Adolescents

Psychiatric and Mental Health Nursing has established itself as Australia and New Zealand's foremost mental health nursing text and is an essential resource for all undergraduate nursing students. This new edition has been thoroughly revised and updated to reflect current research and changing attitudes about mental health, mental health services and mental health nursing in Australia and New Zealand. Set within a recovery and consumer-focused framework, this text provides vital information for approaching the most familiar disorders mental health nurses and students will see in clinical practice, along with helpful suggestions about what the mental health nurse can say and do to interact effectively with consumers and their families. Visit evolve.elsevier.com for your additional resources: eBook on Vital Source Resources for Students and Instructors: Student practice questions Test bank Case studies Powerful consumer story videos 3 new chapters: - Physical health care: addresses the physical health of people with mental health problems and the conditions that have an association with increased risk of mental health problems - Mental health promotion: engages with the ways in which early intervention can either prevent or alleviate the effects of mental health problems - Challenging behaviours: presents a range of risk assessments specifically focused upon challenging behaviours Now addresses emerging issues, such as: - The transitioning of mental health care to primary care - The development of peer and service user led services, accreditation and credentialing - Mental Health Nurse Incentive Program

100 Questions & Answers About Your Daughter's Sexual Wellness and Development

Here's everything you need to succeed in your fundamentals of nursing course and prepare for course exams and the NCLEX®. Succinct content review in outline format focus on must-know information, while case studies and NCLEX-style questions develop your ability to apply your knowledge in simulated clinical situations. You'll also find proven techniques and tips to help you study more effectively, learn how to approach different types of questions, and improve your critical-thinking skills.

Children's Software & New Media Revue

Many forensic pathologists and death investigators would agree that infant deaths have historically been poorly investigated. Investigating Infant Deaths provides an in-depth guide featuring 40 case ex-

amples that illustrates real-life scenarios in which techniques are put into action. It explains techniques for interviewing grieving parents, how to perform an initial post-mortem exam, what to look for at the incident scene, and the goals of state and local child fatality teams. It also presents suggestions for using doll re-enactments to interview surviving caregivers and witnesses as well as 44 pictures of scenes and unsafe environments.

100 Questions & Answers About Your Child's Schizophrenia

Drugs and Society, Ninth Edition, clearly illustrates the impact of drug use and abuse on the lives of ordinary people and provides students with a realistic perspective of drug-related problems in our society. Written in an objective and user-friendly manner, this best-selling text continues to captivate students by incorporating personal drug use and abuse experiences and perspectives throughout. Statistics and chapter content have been revised to include the latest information on current topics.

Fundamentals of Nursing

Poverty, domestic violence, marginalisation, drug and alcohol dependence are just some of the issues faced by many Australian families. Now in its second edition, Working with Vulnerable Families provides a comprehensive and evidence-based introduction to family-centred practice in Australia. It explores the ways in which health, education and social welfare professionals can support and protect children and their families. Fully revised and updated, with eight new chapters, the book examines recent research and programs on relationship-based family support, harnessing 'resilience' and working with Aboriginal and Torres Strait Islander families. It encourages readers to 'think child, think family, think community' in order to promote the development, wellbeing and safety of young children and future generations. Each chapter features learning goals, local case studies and reflective questions to help reinforce and extend the reader's understanding. Written by a diverse team of experts, this is an indispensable resource for students and practitioners alike.

Double Jeopardy

UPDATED! Thoroughly revised and expanded coverage of top-of-mind ethical and legal topics concerning vulnerable populations; Indigenous (Joyce Echaquan Inquiry), refugees, and LGBTQ2 persons; advancing technologies and telemedicine; evolving scopes of practice of various categories of nurses; Medical Assistance in Dying (MAiD); and much more.
