Selected Articles on Military Training... - Primary Source Edition

Twice a year, 150 anxious recruits gather at SAS headquarters in the UK, their minds focused on one objective: to become soldiers in one of the world's most elite regiments after nearly four months of the toughest military selection process in the world. This is an illustrated guide to the process of becoming one of the world's best soldiers.

Selected Articles on National Defense

The book presents a broad, international discussion of military training and education problems. It uses the concept of Military Pedagogy to cover the full range of this discussion. As shown by the holistic articles at the beginning of the book, Military Pedagogy is viewed very differently by different authors depending on their national and individual backgrounds. Many of the articles use different subject matters to provide specific examples that, considered as a whole, show the great variety of tasks performed by Military Pedagogy. The two approaches, holistic on the one hand and detailed on the

other, give the reader a comprehensive impression of what Military Pedagogy can be. Simultaneously, the specifically prescriptive articles provide many ideas for use by military training and education specialists. In this way, the book serves both theorists and practitioners. The international scope of the book is indicated by the list of authors who come from 10 different countries. The book also makes a significant contribution to improving the interoperability of Armed Forces.

Compulsory Military Training

This report contains the translations of articles concerning the Soviet military taken from the newspaper Krasnaya Zvezda (Red Star), 4 January-6 June 1961. Complete bibliographic information accompanies each article. Topics discussed include fighter pilot training, radar operations, engineers in military education, and military training.

SAS Training Manual

Selected Articles on Military Training

The present volume on National Defense has been compiled in response to a continued demand for material on this ever-important public question. It contains articles and references relating to general defense, the Army, the Navy, military training, compulsory military service, and, to some extent, disarmament and alternate means of peace.--Publisher's description.

Military Pedagogy

This book provides an insight into the global practices for environmental management of military live-fire training ranges by combining scientific research with practical solutions to ensure continued training capability. The book is divided into four parts: the first provides background information necessary to understand the scientific principles behind environmental management; the second comprises methodologies for the environmental risk assessment of explosives and munitions; the third collates case studies and innovative management techniques that have been applied to reduce remediation costs; while the final section considers the design of 'greener or insensitive munitions' to reduce environmental impact. The book is an essential reference guide for those with a responsibility for environmental management of military training ranges, and who are required to ensure sustainable long-term training capability.

Selected Soviet Military Translations, No. 67

During recent armed conflicts - such as those in Iraq, the former Yugoslavia, and Rwanda - public attention was repeatedly caught by images of children, both as civilians and as soldiers. Those conflicts, like so many others, were vivid reminders that where there is armed conflict there are also, almost always, children. Soldiers and officers fulfil many roles in relation to such children - sometimes as combatants, sometimes as humanitarian workers, sometimes as protectors, and/or sometimes as enemies and abusers. This book aims to address three main questions: what are the obligations of officers of national armed forces in relation to children, either civilians or combatants, whom they or those under their command may encounter while participating in situations of armed conflict?

How realistic and achievable are these obligations? How can compliance with them be encouraged, monitored, and/or enforced? The book examines these questions in the context of military training. In doing so, it has another inextricably linked aim: to see if there are ways in which the training of officers can improve the protection of children in armed conflict situations, in accordance with international law and policy. It is intended for use particularly by those involved in training of national armed forces, including officers themselves, and members of governments, non-governmental organisations (NGOs) and inter-governmental organisations. It is hoped that it will also be of interest to lawyers, academics and others concerned with 'child rights' and related law and policy. It contains examples of actual training materials that can be modified for use in different countries and contexts.

Collected Papers on Physical and Military Training [electronic Resource]

This manual, TRADOC Pamphlet TP 600-4 The Soldier's Blue Book: The Guide for Initial Entry Soldiers August 2019, is the guide for all Initial Entry Training (IET) Soldiers who join our Army Profession. It provides an introduction to being a Soldier and Trusted Army Professional, certified in character, competence, and commitment to the Army. The pamphlet introduces Soldiers to the Army Ethic, Values, Culture of Trust, History, Organizations, and Training. It provides information on pay, leave, Thrift Saving Plans (TSPs), and organizations that will be available to assist you and your Families. The Soldier's Blue Book is mandated reading and will be maintained and available during BCT/OSUT and AIT. This pamphlet applies to all active Army, U.S. Army Reserve, and the Army National Guard enlisted IET conducted at service schools, Army Training Centers, and other training activities under the control of Headquarters, TRADOC.

Education and Training of Women in the United States Military

Based on historical case studies, this volume analyzes the success and failure of professional military education in the western world from the 18th century to the present.

Conceptions of the Role of Military Training as an Aspect of Higher Education in the United States

This publication, which consists of selected readings from volumes 1-5 of The American Journal of Distance Education, is designed for corporate and military trainers who want research-grounded materials that can be used in programs that train trainers. The 12 articles, whose authors come from the army, navy, and airforce, from universities and major corporations, represent various media, different types of organizations, and different processes in the teaching-learning relationship. The articles include: (1) "A Historical Overview of Telecommunications in the Health Care Industry" (Joseph S. Anderson); (2) "Learning from Teletraining" (Allen G. Chute, Lee B. Balthazar, and Carol O. Poston); (3) "Use of Interactive Television for Outreach Nursing Education" (Marilyn B. Major and Donea L. Shane); (4) "A Fourth Generation Distance Education System: Integrating Computer-Assisted Learning and Computer Conferencing" (Allan C. Lauzon and George A. B. Moore); (5) "A Selection Model and Pre-Adoption Evaluation Instrument for Video Programs" (Carla Lane); (6) "Business, Education, and Distance Education" (Stephen Murgatroyd); (7) "Design Considerations in Selecting Teleconferencing for Instruction" (Ellen D. Wagner and Nancy L. Reddy); (8) "Whose Job is Teleconference Reception?" (Shirley Davis and Charles S. Elliot); (9) "A Navy Video Teletraining Project: Lessons Learned" (William L. Maloy and Nancy N. Perry); (10) "Effectiveness of Distance Education Approach to U.S. Army Reserve Component Training" (S. Delane Keene and James S. Cary); (11) "Empowering the Learner through Computer-Mediated Communication" (Lynn E. Davie and Rosalie Wells); and (12) "Effectiveness and Costs of Distance Education Using Computer-Mediated Communication" (Ruth H. Phelps, Rosalie Wells, Robert L. Ashworth, Jr., and Heidi A. Hahn). Three interviews are also presented: "Speaking Personally with Colonel William A. Wojciechowski" (Phil Savarise); "Speaking Personally with Kathryn Porter and William Mason (Aetna Life and Casualty)" (Dawn Middleton-Paradise); and "IBM's View of Distance Education: Speaking Personally with Susan Leslie, Dick Scott, and James Tomsic" (Lauren Lukert). Most of the papers list references; approximately 200 references are contained overall. (KRN)

Advance Sheets ... , Selected Articles on National Defense, Volume II

The U.S. military has been continuously engaged in foreign conflicts for over two decades. The strains that these deployments, the associated increases in operational tempo, and the general challenges of military life affect not only service members but also the people who depend on them and who support them as they support the nation – their families. Family members provide support to service

members while they serve or when they have difficulties; family problems can interfere with the ability of service members to deploy or remain in theater; and family members are central influences on whether members continue to serve. In addition, rising family diversity and complexity will likely increase the difficulty of creating military policies, programs and practices that adequately support families in the performance of military duties. Strengthening the Military Family Readiness System for a Changing American Society examines the challenges and opportunities facing military families and what is known about effective strategies for supporting and protecting military children and families, as well as lessons to be learned from these experiences. This report offers recommendations regarding what is needed to strengthen the support system for military families.

Selected Soviet Military Translations

The popularity of high-intensity interval training (HIIT), which consists primarily of repeated bursts of high-intensity exercise, continues to soar because its effectiveness and efficiency have been proven in use by both elite athletes and general fitness enthusiasts. Surprisingly, few resources have attempted to explain both the science behind the HIIT movement and its sport-specific application to athlete training. That's why *Science and Application of High-Intensity Interval Training* is a must-have resource for sport coaches, strength and conditioning professionals, personal trainers, and exercise physiologists, as well as for researchers and sport scientists who study high-intensity interval training.

Selected Articles on National Defense

Streamlined ID: A Practical Guide to Instructional Design presents a focused and generalizable approach to instructional design and development – one that addresses the needs of ID novices, as well as practitioners in a variety of career environments. Emphasizing the essentials and "big ideas" of ID, *Streamlined ID* presents a new perspective – one that aims to produce instruction that is sustainable, optimized, appropriately redundant, and targeted at continuous improvement. The book features an enhanced version of the classic ADDIE model (Analysis, Design, Development, Implementation, and Evaluation) that emphasizes the iterative nature of design and the role of evaluation throughout the design/development process. It clearly lays out a systematic approach that emphasizes the use of research-based theories, while acknowledging the need to customize the process to address a variety of pedagogical approaches: Instructivist, Constructivist, and Connectivist. The book opens with an overview of the basics of ID and each subsequent chapter describes major activities in the ID process with step-by-step instructions and tips for streamlining the process. Numerous job aids serve to maximize the efficiency and effectiveness of your design efforts. Each chapter highlights key concepts and provides additional exercises and assignments based on the work of Benjamin Bloom. *Streamlined ID* is an ideal reference guide for optimizing professional practice.

Global Approaches to Environmental Management on Military Training Ranges

Discusses how to plan a staff ride of a battlefield, such as a Civil War battlefield, as part of military training. This brochure demonstrates how a staff ride can be made available to military leaders throughout the Army, not just those in the formal education system.

Selected Articles on National Defense

Human behavior forms the nucleus of military effectiveness. Humans operating in the complex military system must possess the knowledge, skills, abilities, aptitudes, and temperament to perform their roles effectively in a reliable and predictable manner, and effective military management requires understanding of how these qualities can be best provided and assessed. Scientific research in this area is critical to understanding leadership, training and other personnel issues, social interactions and organizational structures within the military. The U.S. Army Research Institute for the Behavioral and Social Sciences (ARI) asked the National Research Council to provide an agenda for basic behavioral and social research focused on applications in both the short and long-term. The committee responded by recommending six areas of research on the basis of their relevance, potential impact, and timeliness for military needs: intercultural competence; teams in complex environments; technology-based training; nonverbal behavior; emotion; and behavioral neurophysiology. The committee suggests doubling the current budget for basic research for the behavioral and social sciences across U.S. military research agencies. The additional funds can support approximately 40 new projects per year across the committee's recommended research areas. *Human Behavior in Military Contexts* includes committee reports and papers that demonstrate areas of stimulating, ongoing research in the behavioral and

social sciences that can enrich the military's ability to recruit, train, and enhance the performance of its personnel, both organizationally and in its many roles in other cultures.

Military Training And Children In Armed Conflict

The Encyclopedia of Military Science provides a comprehensive, ready-reference on the organization, traditions, training, purpose, and functions of today's military. Entries in this four-volume work include coverage of the duties, responsibilities, and authority of military personnel and an understanding of strategies and tactics of the modern military and how they interface with political, social, legal, economic, and technological factors. A large component is devoted to issues of leadership, group dynamics, motivation, problem-solving, and decision making in the military context. Finally, this work also covers recent American military history since the end of the Cold War with a special emphasis on peacekeeping and peacemaking operations, the First Persian Gulf War, the events surrounding 9/11, and the wars in Afghanistan and Iraq and how the military has been changing in relation to these events. Click here to read an article on The Daily Beast by Encyclopedia editor G. Kurt Piehler, "Why Don't We Build Statues For Our War Heroes Anymore?"

TRADOC Pamphlet TP 600-4 The Soldier's Blue Book

This work is a collection of observations, insights, and advice from over 50 serving and retired Senior Non-Commissioned Officers. These experienced Army leaders have provided for the reader, outstanding mentorship on leadership skills, tasks, and responsibilities relevant to our Army today. There is much wisdom and advice "from one leader to another" in the following pages.

Military Education

V.1: Contains transcripts of certain House Foreign Affairs Committee executive session hearings. Transcribed hearings are. a. International peace-keeping agency participation by U.S. June 8, 11, 1943. p. 19-70. Includes discussions of views of British Prime Minister Winston S. Churchill and of U.S. public opinion on such participation. b. Briefing on U.N. Relief and Rehabilitation Administration (UNRRA) draft agreement. July 7, 1943. p. 75-99. Includes discussions of development of multi-national war relief planning by European governments-in-exile and use of lend-lease program funds for European economic war relief. c. Italy in UNRRA aid programs. July 10, 1945. p. 101-119. Includes discussions of possible Italian economic collapse and UNRRA funding. d. U.N. participation by U.S. Dec. 7, 10-12, 1945. p. 123-211. Includes consideration of invitation to locate U.N. headquarters in U.S. e. Procurement of supplies for U.N. and other international organizations by U.S. July 14, 1947. p. 215-242. f. U.N. headquarters agreement on future N.Y.C. location and granting of certain reciprocal diplomatic privileges. July 19, 1947. p. 243-268. g. Resolution welcoming Italy's WWII liberation. Oct. 19, 1943. p. 367-382. Includes discussion of impact of resolution on U.S. relations with other wartime adversaries of Italy. h. Diplomatic relations with Italy. June 13, 1944. p. 383-392. i. Italy invited to become a U.N. member. July 10, 1945. p. 393-400. v.2: Contains transcripts of certain House Foreign Affairs Committee executive session hearings. Transcribed hearings are. a. Discussion of rescue and relief of European Jews from Nazi persecution by an international organization. Nov. 19, 23, 24, 26, Dec. 2, 1943. p. 1-247. Includes discussions of Allies' policies on Nazi genocide program, role of neutral nations in assisting Jewish and other war refugees, U.S. quotas on European and Jewish immigration, British policies on Jewish immigration to Palestine, and Allied programs for war refugee relief. c. Discussion of Jewish homeland and unrestricted immigration rights in Palestine state. Dec. 17, 1945. p. 295-361. Includes discussions of British and U.S. commitment to Balfour Declaration principles, political activities and objectives of Zionist organizations in Palestine, and European Jewish war refugee problems. d. Lend-Lease military air program extension. Feb. 8, 13, 1945. p. 383-391. Includes discussion of French and Soviet participation in the program. e. War criminals apprehension and punishment. Apr. 24, 1945. p. 413-428. Includes discussions of U.N. War Crimes Commission authority and jurisdiction, U.S. policies on apprehension of alleged war criminals in neutral countries, and the relationship between Congress and State Dept in war crime affairs. f. Eastern Europe, Soviet Union, and Middle East travel reports by Reps. Karl E. Mundt and Frances P. Bolton to U.S. military intelligence officers. Nov. 9, 1945. p. 437-463. Includes discussions of Soviet life, Soviet use of Allied Control Commission occupation authority in Eastern Europe, East European Jewish immigration to Palestine and anti-Semitism in Soviet Union and Poland, Arab anti-Zionism and Arab-Jewish tensions in Palestine; Yugoslav, Greek, and Turkish political affairs; British, French, and Soviet roles in Middle East, and the role of women in Saudi Arabia. g. German industrial plant dismantlement. Dec. 4, 16,

1947. p. 499-548. Includes discussions of communist guerrilla and revolutionary activities in Greece; Yugoslavian, Bulgarian, Albanian, and Soviet support for Greek communist activities; British role in Greek affairs; Soviet demands on Turkey for certain border areas and military bases at the Dardanelles; and political stability of Turkish government. d. Latin American Military Assistance. June 18, July 10, 1947. p. 471-570. Includes discussion of Canadian-U.S. mutual defense programs. v.7: Contains transcripts of certain House Foreign Affairs Committee executive session hearings. Transcribed hearings are. a. Philippine military aid program. June 7, 1946. p. 11-33. b. Nationalist China military aid program. June 19, 26, 1946. p. 109-142. Includes discussions of support for Nationalist Chinese in civil war against Communist forces, possible conflict of aid program with U.N. Charter provisions, and repatriation of Japanese forces still in China. c. Nationalist China aid provisions for Foreign Assistance Act. Feb. 20, Mar. 5, 9, 10, 1948. p. 159-268. Includes discussions of extent of Nationalist Chinese economic and military aid requirements due to civil war against Communist forces, military competency of Nationalist Chinese Armed Forces, Soviet activities in China, parallels between Greek and Chinese aid and political affairs, and economic aid programs for Japan, Korea, and Ryukyu Islands. d. Nationalist China economic aid and rural development programs. Mar. 4, 14, 15, 25, 28, 1949. p. 343-468. Includes discussions of loss of Nationalist Chinese control over much of mainland China to Communist forces, effectiveness of proposed programs for non-Communist controlled areas in strengthening Nationalist Chinese military and political position, and possibility of a coalition Nationalist-Communist government being organized. e. Briefing on final loss of Nationalist Chinese control over mainland China to Communist forces. Apr. 6, 1949. p. 497-534. v.8: Contains transcripts of House Foreign Affairs Committee executive session hearings. Transcribed hearings are. a. Korea Assistance Acts. June 16, 17, 20-24, 30, 1949. p. 19-326. Includes discussion of communist control in China and U.S. aid policies impact on communist expansion in Asia, withdrawal of U.S. forces from South Korea and military threat from North Korea, Soviet and communist Chinese relations with North Korean government, and parallels between U.S. aid programs to Greece with those to Nationalist China and South Korea. Also includes briefing on a Paris conference of British, French, Soviet and U.S. Foreign Ministers on European affairs. b. Mutual Defense Assistance Programs, 1950. June 20, 1950. p. 462-515. Focuses on aid to Philippines and Taiwan.

Distance Education for Corporate and Military Training

February issue includes Appendix entitled Directory of United States Government periodicals and subscription publications; September issue includes List of depository libraries; June and December issues include semiannual index.

Strengthening the Military Family Readiness System for a Changing American Society

This book surveys the entire field of body composition as it relates to performance. It includes a clear definition of terminology and a discussion of the various methods for measuring body composition. The authored papers represent a state-of-the-art review of this controversial field and address questions such as: What is a better measure of body composition—body fat or lean body mass? Does being overweight for one's height really affect performance? The book also addresses the issue of physical appearance as it relates to body fatness and performance. It includes an in-depth discussion of many of the topics of interest to those involved in sports medicine and exercise physiology.

Research in Education

On War is a treatise about a military art which Prussian officer Carl Philipp Gottlieb von Clausewitz had been working on for 15 years. It is commonly believed that Clausewitz's treatise had a greater impact on

military leaders of the late XIX and XX centuries than any other book. In reality, this book is an overturn in the war theory. The work is notable for its brightness, narration details as well as hard criticism of many war events. The author dedicates a special place in his work to politics, its influence on the war events, the dependence how the war finishes on powers and weaknesses of particular politicians and military leaders. There is a good reason why his famous phrase “the war is the continuation of the politics, but with other, strong arm methods” is still relevant.

Book Review Digest

Field Manual FM 7-0 Train to Win in a Complex World October 2016 FM 7-0, Train to Win in a Complex World, expands on the fundamental concepts of the Army's training doctrine introduced in ADRP 7-0. The Army's operations process is the foundation for how leaders conduct unit training. It also places the commander firmly at the center of the process and as the lead of every facet of unit training. FM 7-0 supports the idea that training a unit does not fundamentally differ from preparing a unit for an operation. Reinforcing the concepts, ideas, and terminology of the operations process while training as a unit makes a more seamless transition from training to operations. This publication focuses on training leaders, Soldiers, and Army Civilians as effectively and efficiently as possible given limitations in time and resources.

Science and Application of High-Intensity Interval Training

A bill to provide for the military and naval training of the citizen forces of the United States.
