## Wie das Selbst sein Gehirn steuert

The textbook builds a bridge between the "neurosciences" (theoretical and experimental neurobiology, neurology) and the "psychosciences" (psychology, psychiatry, psychotherapy) and aims to help provide the other disciplines with the most important and scientifically validated knowledge in an understandable form. The question of how mental experience and brain processes relate to each other has long been considered mysterious. In this book you will learn, based on the latest scientific findings, that the two areas form an indissoluble unity, even if we experience and study them differently. We present this unity in concrete terms in psychological-neurobiological theory and psychiatric-psychotherapeutic practice. We treat the principles of neurobiological excitation and information processing, the structure and function of the limbic system, the development of the personality and the interaction of genetic-epigenetic factors and prenatal and postnatal environmental influences, which may be favourable or unfavourable. On this basis, the exemplary presentation of important mental disorders such as addictive disorders, schizophrenic disorders, affective disorders and anxiety disorders takes place. Finally, following in the footsteps of the eminent psychotherapist Klaus Grawe, the concept of "neuropsychotherapy" is introduced and it is shown why psychotherapy and neurobiology belong together and can enrich each other. Our psychoneuroscientific approach paints a picture of man that is not based on opposites, but on an integration of psyche, brain, behavior and experience.

## Wie das Selbst sein Gehirn steuert

Inhaltsangabe: Einleitung: Eine wesentliche Ursache für die Entstehung von Wirklichkeit ist aus buddhistischer Sicht unser eigener Geist. In welcher Form Wirklichkeit entsteht, ist abhängig von vergangenen Taten und Motiven des Handelns. Diese bilden ein Bewußtsein, das nach bestimmten Gewohnheitsmustern sich der Wirklichkeit bewußt ist. Die Erscheinungsweise von Wirklichkeit ist durch die sie beobachtenden Individuen bedingt. Diese haben ihre Wurzeln in der geistigen Welt. Die Forschung in den Bereichen Kognition und Gehirn kommt zu ähnlichen Ergebnissen. Der Mensch erschafft sich seine eigene Erlebniswelt durch Gedanken, Gefühle und Taten. Wirklichkeit ist verkörperte Erfahrung. Das Universum läßt sich mit der holographischen Theorie umfassend erklären. Westliche und östliche Denkweisen verschmelzen in der holographischen Theorie. Die Grundlage allen Lebens ist Licht. Die moderne Physik beschreibt Materie als gebrochenes oder in seiner Frequenz verlangsamtes Licht. Der Mensch ist ständig mit einer größeren, umfassenden Wirklichkeit verbunden. Die persönliche Wirklichkeit entsteht durch die Art und Weise der Kommunikation mit unserer Umwelt. Aus buddhistischer Sicht sind Mitgefühl und bedingungslose Liebe für alle fühlenden Wesen das Fundament, auf dem das Haus der Wirklichkeit entstehen kann. Sozial verträgliches Handeln auf der Grundlage von Erbarmen, Mitgefühl und reiner Zuneigung ist notwendig für eine spirituelle Transformation der gesamten Menschheit. ### Bewusstsein und Gehirn, eine philosophische Metareflexion

The original edition of Klaus Grawe's book exploring the basis and need for a more generally valid concept of psychotherapy fueled a lively debate among psychotherapists and psychologists in German-speaking areas. Now available in English, this book will help spread the concepts and the debate among a wider audience. The book is written in dialog form. A practicing therapist, a research psychologist, and a therapy researcher take part in three dialogs, each of which builds on the results of the previous dialog. The first dialog explores how therapeutic change takes place, while the second looks at how the mechanisms of action of psychotherapy can be understood in terms of basic psychological concepts. Finally, in the third dialog, a psychological theory of psychotherapy is developed. The practical implications of this are clearly shown in the form of case examples, as well as guidance on indications and treatment planning. The dialog ends with suggestions as to how therapy training and provision of psychotherapy could be improved on the basis of the model of psychotherapy that has been developed.

### Geist als Ursache?

Illusion human You are much more than your body! The fascinating book of Heinz Kaletsch – now available: Who or what exactly is a human being? Are we just a body with a brain that has a consciousness and a spirit for the time of our earthly life and then vanishes? Is our consciousness immortal and what exactly is its purpose? Do we have a free will? Is there good and evil? What about the ego? And is today's knowledge about our brain the last word on the subject? Not only the personal experiences of the author over many decades, but also the astonishing parallels between ancient spiritual traditions and new findings of modern mortality research and genetics, theology, medicine and quantum physics provide convincing evidence that we are much more than our human body suggests. We are immortal beings on the way to experience ourselves, in this and in still hidden worlds. Our worldview will change completely in the next decades and lead us out of the world of mysticism into real reality and to our true selves. Be there and renew your perspective, rethink your values and accompany the author on a journey that gives an inkling that we are something much greater than a materialistic worldview can convey. This richly illustrated book is written for those who like to be inspired, who are open to new models and who want to get a complete perspective on life. Break with the paradigm of inevitable death. We are all one with the universe and together creators of something new and even greater. Let yourself be inspired. You will change.

### Psychoneuroscience

In dieser hochaktuellen und grundlegenden Studie rollt Günter Herrmann wesentliche Fragen auf: Wie kann unser Rechtsleben gerechter und menschlicher werden? Was bedeutet für Richter, Beamte und Spitzenpolitiker der Amtseid, »Gerechtigkeit zu üben«? Woher kommt Gerechtigkeit? Aufgrund der geisteswissenschaftlichen Erkenntnis, dass Gerechtigkeit als Urphänomen und Ideal tatsächlich existiert, weist Herrmann den Weg, wie Gerechtigkeit für unser Rechtsleben fruchtbar werden kann: Jeder soll nach Gerechtigkeit streben, sie in sein Bewusstsein aufnehmen und in seine Entscheidungen sowie in den Diskurs zur Bildung gemeinschaftlicher Gerechtigkeitsvorstellungen einbringen. Dies bedarf aktiven Willens und Handelns aller Beteiligten - am wirksamsten unter Achtung der klassischen Tugenden. Angesichts der Defizite in unserem Rechtsleben tut Gerechtigkeit not! Deshalb soll dieser Essay des erfahrenen Intendanten und Hochschullehrers auch ein Weckruf für mehr Nächstenliebe und Gerechtigkeit sein.

### Wirklichkeitsentstehung aus buddhistischer Sicht

Ausgangspunkt ist der Gedanke, dass Jesus ein Vorläufer der modernen Psychotherapie, ja der Psychoanalyse war. Umgekehrt kann man durch ein psychoanalytisches Sprechen, dass die Kernpunkte der "Jesus-Therapie" aufnimmt, zu einem Verfahren kommen, das beide Verfahren in einer neuen, kompakten Form übermittelt, so dass diese als direktes psychotherapeutisches Verfahren ähnlich dem Autogenen Training geübt werden kann. Dazu werden auch andere Wissenschaften und insbesondere und in sehr kritischer Weise die Theologie herangezogen. Der Untertitel, dass Gott ein "unsterbliches Gerücht" ist, stammt von einem christlichen Philosophen und darf nicht negativ verstanden werden. Vielmehr eignet sich ein kritischer Bezug auf das uns noch so stark bestimmende christliche Denken

gerade dazu, eine innere Schlüssigkeit in der Argumentation zu akzentuieren. Das ist ein neuer psycho-theologischer Ansatz.

### Psychological Therapy

Wenn der Tod eines lieben Menschen einem den Boden unter den Füßen wegriß, beginnt für die Trauernden ein Leben, das unvorstellbar erscheint. Wie soll das Leben weitergehen? Das Vergangene ist für immer vorbei. Der Psychologe und Seelsorger Hartmut Schott erlebt dies nach dem tragischen Verlust seines Sohnes selbst. Als Vater beleuchtet er tagebuchähnlich das erste Jahr der Trauer und Verzweiflung und offenbart dem Leser nach und nach Einblicke in den Umgang mit dem tragischen Suizid des Sohnes. Auf seinem Trauerweg setzt er sich mit intensiven Gefühlen auseinander: Schmerz, Sehnsucht und Ohnmacht, aber auch Dankbarkeit und Liebe. Trauerwege sind anstrengend, unvorhersehbar und ganz individuell. Mit der eigenen Erfahrung und aus der Trauer heraus beschreibt Hartmut Schott mit bewegenden und berührenden Worten das Weiterleben und den Weg durch alle Tiefen der Trauer. Sie verläuft nicht linear, sie ist von Rückschlägen geprägt, von Machtlosigkeit und von der Beschäftigung mit den immer gleichen Fragen. Umso erfreulicher ist es, wie sehr der Autor in der Bibel zu Hause ist und auf deren Grundlage argumentiert. Christen leben von der Hoffnung auf die Auferstehung. Sie glauben, dass mit dem Tod nicht alles vorbei ist. Eindrücklich wird beschrieben, dass es auch im Leben eines Christen harte Zeiten geben kann. Welchen Wert haben sie? Was sagen sie uns? Liebevoll und ehrlich schreibt der Autor über jede Phase der Trauer und über alles, was in den schweren Zeiten Hoffnung und Lichtblicke schenkt - denn im Leid wartet eine neue und tiefe Begegnung mit Gott. Ein sehr praktisches und hilfreiches Buch, leicht zu lesen und doch voller Tiefgang.

### Illusion Human

Inhaltsangabe: Gang der Untersuchung: Das Kernstück meiner Diplomarbeit stellt die theoretische Modellierung einer Aufmerksamkeitssteuerung dar, welche für die Ausprägung des Bewußtseins grundlegend ist. Computersimulationen auf PC und einem an der Universität Bonn entwickelten Neurocomputer (von Prof. R. Eckmiller) zeigen ungefähr das in der Theorie dargestellte Systemverhalten. Letztlich werden Ansätze für die Ausbildung des Bewußtseins modelliert und diskutiert. Diese für die Praxis hoffentlich sehr brauchbaren Theorien habe ich während meiner Ausarbeitung aus der Anatomie des menschlichen Gehirns und Theorien der Informatik entwickelt. Um diese Zusammenhänge auf fundierten Grundlagen verständlich zu machen, werden zu Anfang kurz die biologischen Hintergründe der Informationsverarbeitung in der Nervenzelle präsentiert und auf ein theoretisches Modell der Informatik projiziert. Außerdem werden Typen von Neuronen und Standardverschaltungen erläutert. Bevor ich auf detaillierte Funktionsweisen im Gehirn eingehen konnte, mußte ich die funktionale Stellung des Gehirns als Gesamtheit betrachten und die theoretischen Aspekte des Geist-Gehirn-Problems klären. Dazu zählt beispielsweise der Aspekt, wie das Gehirn als Betrachter seiner selbst agieren kann oder wie es Zustandsänderungen in der Umgebung registriert, auf neuronaler Ebene repräsentiert und letztlich auf die Umgebung durch Handlung oder Planung zurückprojiziert. Die neueste Literatur von J.C. Eccles, F. Crick und G. Roth habe ich detailliert und kritisch verglichen. Aus sehr vielen verschiedenen Sinnesinputs muß unser Gehirn (und so auch autonom agierende Rechner) die momentan am wichtigsten erscheinende Information herausselektieren, um nicht von einer Informationsflut, welche eine gezielte Verarbeitung unmöglich machen würde, erschlagen zu werden. Eine Selektion dieser Art geschieht im Thalamus (spezielle Hirnregion); er leitet die ausgewählten Informationskanäle weiter zum Cortex, wo dann in den zugehörigen Regionen Mustererkennung, Abruf von gespeicherten Informationen, Bewußtseinsbildung und weitere abstrakte Vorgänge ablaufen. Es ist sehr wahrscheinlich, daß der von mir beschriebene Selektionsmechanismus im Thalamus tatsächlich in dieser Form funktioniert. Auf diese Weise kann sich die natürliche Eigenschaft, einen Konzentrationsfokus auf bestimmte Eingangsdaten zu richten und trotzdem permanent durch wichtigere Ereignisse abgelenkt werden zu können, auf künstliche Intelligenzen [...]

### Gerechtigkeit!

Dieses Werk beschäftigt sich mit außergewöhnlichen Zuständen des menschlichen Bewußtseins, die der Medizinphilosoph, Psychotherapeut und Psychiater Dr. med. Dr. phil. STANISLAV GROF als "holotrope Bewusstseinszustände" definierte, weil durch diese transpersonale Erfahrungen möglich werden. Im ersten Teil werde sämtliche Auslösebedingungen für die Induktion außergewöhnlicher veränderter Bewusstseinszustände aufgezeigt und die subjektiven Komponenten dieses inneren spirituellen Erlebens beschrieben. Von der transpersonal psychologischen zur religionskritischen und

-historischen sowie vergleichenden religionswissenschaftlichen Deutung der Phänomene ausgehend wird der psychohygienische Nutzen dieser reflektiert. Im zweiten Teil werden zunächst die subjektiven Komponenten dieses inneren spirituellen Erlebens, des "kosmischen Bewußtseins\

### Signifikant Gott?

Aleksandr Romanovič LURIJÄ (16. Juli 1902 - 14. August 1977) war einer der prominentesten Psychologen des vergangenen Jahrhunderts. Zusammen mit L. S. VYGOTSKIJ und A. N. LEONT'EV entwickelte er die kulturhistorische Theorie/Tätigkeitstheorie. Sein äußerst umfangreiches Werk ist, obwohl er ungeheuer viel publizierte und ein großer Teil seines Werkes auch in westlichen Sprachen zugänglich ist, bei weitem noch nicht erschlossen. Hauptgebiet seiner Tätigkeit war die Entwicklung der Neuropsychologie, für welche er inhaltlich und methodologisch Maßstäbe gesetzt hat, die auch heute noch Gültigkeit haben. Daneben hat er auf zahlreichen weiteren Gebieten gearbeitet: Sprache und Sprachentwicklung, Entwicklungspsychologie, psychologische Diagnostik, klinische Psychologie, Psychologie der Rehabilitation, Psychologie der geistigen Behinderung, kulturvergleichende Psychologie, allgemeine Psychologie etc. Dieses Denken anlässlich des 100. Geburtstages zu würdigen und weiterzuführen war Gegenstand einer Internationalen Tagung an der Universität Bremen am 5. und 6. Juli 2002, die gemeinsam durchgeführt wurde von der Luria-Gesellschaft e.V., dem Lurija-Institut für Rehabilitationswissenschaften und Gesundheitsforschung der Universität Konstanz sowie dem Institut für Behindertenpädagogik der Universität Bremen. Der vorliegende Band gibt die Grußadressen und Vorträge der Konferenz (unter ihnen vier Mitarbeiter/innen von Lurija) in ihrer Reihenfolge wieder. Wissenschaftliche Beiträge von Gerhard ROTH (Bremen), Anne-Lise CHRISTENSEN (Kopenhagen), Alexandre MÉTRAUX (Heidelberg), Janna GLOZMAN (Moskau), Paul-Walter SCHÖNLE (Magdeburg), Wolfgang JANTZEN (Bremen), Tatjana ACHUTINA (Moskau) und Helmut DÄUKER (Mannheim) würdigen das wissenschaftliche Werk von Aleksandr R. LURIJÄ, indem sie es rekonstruieren und aktualisieren.

### Gott hat beim Suizid meines Sohnes zugeschaut

Was ist der Sinn des Lebens? Die Frage nach dem Sinn des Lebens ist die wichtigste Frage, die sich ein Mensch in seinem Leben stellen kann. Glückwunsch, dass Sie es tun! In den nächsten 100 Minuten (Ich verspreche Ihnen, es dauert wirklich nicht länger...:-)) werden Sie erfahren, was der christliche Glaube zu dieser fundamentalsten menschlichen Frage zu sagen hat. Sie werden nach dem Lesen des Buches eine Antwort darauf haben, was der Sinn des Lebens aus der Perspektive der Bibel ist. Nicht mehr und nicht weniger.

### Bioinformation auf verschiedenen Verarbeitungsebenen

Dieses Werk entspringt dem Studium des Buches der Schöpfung und richtet sich direkt an diejenigen, die den Sinn des Lebens suchen und sich nach spiritueller Befreiung sehnen. Hier findet sich der Schlüssel zu höheren Erkenntnissen, die es dem Menschen ermöglichen, durch das Verständnis der Größe des Schöpfers, seines Willens, seiner Gerechtigkeit und Liebe, aus dem heutigen Chaos sicher herauszufinden. Durch die Erklärung der Schöpfungsgesetze, die alles durchdringen und in harmonischem und unaufhaltsamem Wirken antreiben, zeigt uns der Autor die Richtung zu Kraft, Licht und Wahrheit und öffnet das Tor zu einer neuen Ära. Im Mittelpunkt stehen dabei in sämtlichen Lebensbereichen drei Grundgesetze, das Gesetz der Anziehung der Gleichart, das Gesetz der Schwere und das Gesetz der Wechselwirkung, welches besagt, daß der Mensch immer erntet, was er mit Empfindungen, Gedanken, Worten und Taten aussät.

### Das Andere sagen

Das Lehrbuch schlägt eine Brücke zwischen den „Neurowissenschaften“ (theoretische und experimentelle Neurobiologie, Neurologie) und den „Psychowissenschaften“ (Psychologie, Psychiatrie, Psychotherapie) und will dabei helfen, den jeweils anderen Disziplinen die wichtigsten und wissenschaftlich gesicherten Kenntnisse in verständlicher Form zu liefern. Die Frage, wie sich psychisches Erleben und Gehirnvorgänge zueinander verhalten, galt lange als rätselhaft. In diesem Buch erfahren Sie aufgrund neuester wissenschaftlicher Erkenntnisse, dass beide Bereiche eine unauflösliche Einheit bilden, auch wenn wir sie unterschiedlich erfahren und untersuchen. Diese Einheit stellen wir in der psychologisch-neurobiologischen Theorie und der psychiatrisch-psychotherapeutischen Praxis konkret dar. Wir behandeln die Prinzipien der neurobiologischen Erregungs- und Informationsverarbeitung, Aufbau und Funktion des limbischen Systems, die Entwicklung der Persönlichkeit und der dabei stattfindenden

günstig oder ungünstig verlaufenden Interaktion genetisch-epigenetischer Faktoren und vorgeburtlich sowie nachgeburtlich stattfindender Umwelteinflüssen. Auf dieser Grundlage erfolgt die beispielhafte Darstellung wichtiger psychischer Störungen wie Suchterkrankungen, schizophrene Störungen, affektive Störungen sowie Angststörungen. In der Nachfolge des bedeutenden Psychotherapeuten Klaus Grawe wird schließlich in das Konzept der „Neuropsychotherapie“ eingeführt und gezeigt, warum Psychotherapie und Neurobiologie zusammengehören, und sich gegenseitig bereichern können. Unser psychoneurowissenschaftlicher Ansatz zeichnet ein Menschenbild, das nicht auf Gegensätzen, sondern einer Integration von Psyche, Gehirn, Verhalten und Erleben beruht.

### Holotrope Bewusstseinszustände und die Verblendung des dritten Auges

Während seit einiger Zeit im Feuilleton ein Kulturkampf zwischen Vertretern des "Gehirns" und des "Geistes" ausgefochten wird, haben führende Neurobiologen und Philosophen – unter Beteiligung einer Soziologin, eines Mathematikers und zweier Physiker - in der "Deutschen Zeitschrift für Philosophie" eine Sachdiskussion zu den Grenzfragen der Hirnforschung geführt. Neben der hier vorgelegten vollständigen Neuedition dieser Auseinandersetzung umfasst ca. ein Drittel des Bandes sämtliche Beiträge einer bisher unveröffentlichten Schlussrunde, die eine vorläufige Bilanz zieht, die strittig bleibt. Alle Diskussionsteilnehmer sind sich in der Intention einig, dass weder der reduktive Naturalismus noch der ontologische Dualismus von Gehirn und Geist überzeugen können. Uneins bleiben aber nicht nur die Neurobiologen und Philosophen gegen einander, sondern auch die Philosophen und die Neurobiologen jeweils untereinander. Der Dissens betrifft die Frage, wie ihre schwache Gemeinsamkeit methodologisch und geschichtlich, ontologisch und ontisch so durchgeführt werden kann, dass keine Selbstwidersprüche eintreten: Für die Erfüllung des eigenen Anliegens wird noch etwas Anderes in Anspruch genommen, als man selbst zugleich zu erklären vermag. Personale Lebewesen bzw. lebende Personen vollziehen sich anders, als dualistisch konzipiert werden kann.

### Gehirn, Geschichte und Gesellschaft

Phänomenologie ist eine Anschauungsweise und Erkenntnismethode, die sich auf alles anwenden lässt, was uns in den Sinn kommen kann. Sie setzt nicht theoretisch an, wie dies in den reduktionistisch-materialistisch geprägten Naturwissenschaften üblich ist, sondern praktisch, unmittelbar am Phänomen (das Erscheinende; sich den Sinnen Zeigende; jeder sich der Erkenntnis anbietende Bewusstseinsinhalt). Diese Methode führt zu Erkenntnissen und einem Wissen, die aus Erfahrungen stammen und kann ein Schlüssel sein, sich Bewusstseinsräume zu erschließen, die den Erkenntnishorizont der Naturwissenschaften übersteigen. Sie ist nicht auf physische Dinge und Ereignisse begrenzt und lässt sich auch auf metaphysische Phänomene anwenden. Phänomenologie kann jeder praktizieren, egal ob er als gebildet oder ungebildet gilt. Wer sie anwendet, wird mit hoher Wahrscheinlichkeit eine Erweiterung seines Bewusstseinshorizonts erfahren. Dieser zweite Band der Schriftenreihe "Einsichten auf dem Weg spirituellen Erwachens" enthält Studienmaterial aus phänomenologischen Forschungen des Autors. Es soll dazu dienen, zu inspirieren und zur Besinnung zu kommen, dass es in unserem so "aufgeklärt" anmutenden Kulturkreis wahrhaft Einiges "aufzuklären" gibt.

### In 100 Minuten zum Sinn des Lebens!

Dieses Buch liefert wichtige und unverzichtbare Grundlagen für alle, die biblisch-therapeutische Seelsorge betreiben. Es verschafft einen Überblick über die gängigen Therapieschulen und leitet zu kompetenter und verantwortungsvoller Arbeit in der Seelsorge an.

### Der Weg zu Freiheit und Kraft

Criminal law is no longer the exclusive domain of national legislatures. International criminal law has established itself as a new field of law, and national penal legislation has become the object of European regulation. The science of criminal law, traditionally accustomed to think within the boundaries of national law, is now faced with new tasks of analysis and systematization. Since the use of national legal concepts will create confusion in the emerging international legal discourse, an attempt is made here to grasp the notions of criminal intent and mistake in a set of neutral analytical instruments as a precondition for a transnational doctrine of mens rea and the necessary comparative work. This includes an appraisal of the impact of analytical philosophy and cognitive psychology on criminal law doctrine.

### Hirn als Subjekt?

Aus der Fülle des von Fachwissenschaftlern veröffentlichten Materials hat der Autor die wichtigsten Beweise dafür ausgewählt, dass es ein nicht-materielles Bewusstsein tatsächlich gibt, und dass dieses Bewusstsein als ein seiner selbst und seiner Vergangenheit bewusstes Ich den Tod des Körpers dauerhaft überlebt. Die Argumente dafür stammen vor allem aus der medizinischen Nahtodforschung und belegen, dass es sich bei den Nahtoderfahrungen (NTE) nicht um letzte Regungen eines durch die Todesnähe bedrängten oder durch Medikamente beeinflussten Gehirns handelt, sondern um reale, überaus klare Erlebnisse. Hierfür werden beeindruckende Fallbeispiele gegeben – auch solche, welche das Erlebte aufgrund Beobachtungen Dritter unwiderlegbar verifizieren. Manche Elemente der NTE, vor allem der Umstand, dass Zeit und Raum in diesem außerkörperlichen Zustand keine Rolle mehr spielen, erinnern in auffälliger Weise an quantenphysikalischen Tatsachen. Deshalb geht der Autor in einer leicht verständlichen Darstellung auch auf diesen Bereich und auf Aussagen berühmter Quantenphysiker ein, die der Existenz eines körperunabhängigen Bewusstseins eine interessante Deutungsmöglichkeit bieten. – In einem zweiten Teil des Buches sucht der Autor nach Gottesbildern, die mit den Nahtoderfahrungen vereinbar sind. Schlüssel dazu ist die Liebe, die bei der Lebensrückschau während einer NTE der entscheidende Maßstab ist; der theologische Hintergrund sind die Ergebnisse der Historisch– Kritischen Forschung.

### Einsichten auf dem Weg spirituellen Erwachens

Das Buch handelt von den Herausforderungen der Evolutionstheorie für unser Menschenbild. Es möchte darauf Antworten aus der Sicht der Philosophie bieten. Grundthese ist, dass der Mensch Höhepunkt und Ziel der Evolution ist. Diese These ist nicht nur philosophisch bedeutsam, sondern besitzt auch politische Brisanz. Gegenüber ihren religiösen Kritikern wird sowohl die Evolutionstheorie wie auch das klassische Menschenbild verteidigt und eine philosophisch reflektierte Konzeption vorgelegt, die naturwissenschaftliche, metaphysische, anthropologische und religionsphilosophische Aspekte kohärent zusammendenkt.

### Einführung in die Allgemeine Psychotherapie und Seelsorge

Ist das Hirn vernünftig? Die provozierende Frage stellt der renommierte Hirnforscher und Neuropsychologe Lutz Jäncke aus gutem Grund: Wir alle denken, dass wir als Menschen rationale Entscheidungen treffen. Unser Hirn fungiert dabei als eine Art Supercomputer, mit dessen Hilfe wir streng logisch das Für und Wider abwägen. Doch wir täuschen uns! Je mehr wir über die Funktionsweise jenes Denkkorgans erfahren, desto plausibler wird die Frage, wie vernünftig wir denn eigentlich wirklich sind. Lutz Jäncke nimmt uns mit auf eine faszinierende Reise und zeigt auf verständliche und unterhaltsame Weise, wie unser Hirn unser Denken, Handeln und Fühlen beeinflusst - und dass das manchmal nur am Rande mit Vernunft zu tun hat. Er zeigt uns, dass das Unbewusste tatsächlich existiert und wie es uns beeinflusst, wie wir richtige und falsche Entscheidungen treffen, wie unser Gedächtnis funktioniert und wie fragil es sein kann - aber auch wie robust. Anhand aufschlussreicher Experimente und neuester Forschungsergebnisse, aber auch mit vielen Beispielen aus seiner Praxis als weltbekannter Forscher kann er anschaulich darstellen, welch unglaublich beeindruckendes Denkkorgan unser Hirn darstellt - auch wenn es keine reine "Vernunftsmaschine" ist.

### Vorstudien zu Vorsatz und Irrtum im Völkerstrafrecht

Dieses Buch räumt mit den Einseitigkeiten auf, die man täglich zu hören und zu lesen bekommt, wie in etwa: Alles in uns ist Evolution. Oder: Die Gesellschaft macht mit uns, was sie will. Oder aber: Ich bin geworden, was die Umwelt aus mir gemacht hat. Solche Aussagen sind schlicht falsch. Die Menschwerdung in der Geschichte wie im Einzelleben ist ein sehr komplexer Vorgang, dennoch lässt sie sich gut beschreiben, wenn man sich auf das Wesentliche konzentriert. Dies geschieht im vorliegenden Buch mit dem EKO-Modell (E für Evolution, K für Kultur und O für Ontogenese). So erfahren Sie, wie wir besser mit Aggressionen umgehen können, warum das Spiel eine zentrale Bedeutung hat, welche Rolle das Ästhetische in unserem Leben spielt, warum wir mit den Naturwissenschaften die Evolution ausgetrickst haben und warum auch in der Ethik nicht der Mensch das Maß aller Dinge ist. Die griechischen Götter begleiten jedes Kapitel kritisch und fügen Ergänzungen aus ihrer Sicht an,

die nicht selten allzu menschlich sind. Ein spannendes Buch für all jene, die mehr wissen wollen. Mit zahlreichen Tabellen und 65 meist farbigen Abbildungen.

### Realistische Philosophie

Eine bunte Reise durch das zweite Jahr im CoViD-Ausnahmestand mit weiterhin vielen unbeantworteten Fragen. Ist Corona nun das kleinste Problem, das wir haben oder ist es ein Beschleuniger, der aufgezeigt hat, welche Spaltungen existieren? Wie langanhaltend und vielschichtig giftig ist gesellschaftliches Long CoViD und wo zeigt es sich im sozialen Miteinander? Inwiefern grätschen sich Selbstvergessenheit und Unbekümmertheit als zwei Errungenschaften einer offenen Gesellschaft gegenseitig die Beine weg, wenn sie zu einer achtlosen Selbstverständlichkeit werden? Und wie zur Hölle kann der Spaß in dem Dilemma seinen Platz als wichtigste Notwendigkeit behalten? Oder sind Corona und die Maßnahmen nur ein Vogelschiss im Vergleich zu 250 Jahren erfolgreicher internationaler Umweltzerstörung? Die Frage, wann sich das Kultusministerium bei allen überforderten Eltern und verzweifelten Kindern entschuldigt, wird in diesem Buch ebenso wenig besprochen, wie die Frage, ob das Lied Wann wird's mal wieder richtig Sommer aus ökologischer Perspektive geso genannt -cancelt werden sollte. Stattdessen hat in dieses Tagebuch ein bunter Blumenstrauß an Fragen, Gegebenheiten und Besonderheiten des gesellschaftlichen (Long) CoViD-Alltags Einzug gefunden. Das inzwischen typische Mit- und Gegeneinander zeigt sich Dank vieler Begegnungen, (geheimer) 'Mitschnitte' von Telefonaten, ganz gewöhnlichen Situationen, die durch Corona plötzlich zu Besonderheiten wurden und findet sich in neuen Geschichten mit Verschwörungspotential. Unter die Lupe genommen wurde im Laufe von 13 Monaten fast alles, was nicht ohne Brille betrachtet werden konnte.

### Kosmos - Leben - Bewusstsein

Der Autor nimmt Lebewesen in biologischen Zellen an und beleuchtet die sich daraus ergebenden Konsequenzen. In der Evolution, beim Bau des Menschen, insbesondere bei Wahrnehmung, Geist und Gehirn, bietet er aus seiner Sicht neue Erkenntnisse an. Zum Beispiel erklärt er die Entstehung eines virtuellen Bildes oder das bisher unverständliche Ergebnis des Libet-Versuchs. Auch für Medizin und Sozialwesen leitet er Erkenntnisse ab.

### Das Ich lebt ewig

Ein streng geheimes Experiment gerät außer Kontrolle. Ein Schwarzes Loch droht die Welt zu verschlingen. Eine bewussteinserweiternde Droge macht aus normalen Menschen willenlose Zombies, die sich um einen machthungrigen Anführer scharen, der schon bald wie ein wahnsinniger Gott ganz New York beherrscht. Wird es den Wissenschaftlern um Professor Leighland und dem jungen Physiker Shuin Sparks gelingen, die bevorstehende Apokalypse zu verhindern, oder ist das Ende der Menschheit gekommen? Ein fesselnder Science-Thriller - ungewöhnliche Helden, überraschende Wendungen, Spannung pur!

### Homo sapiens: die Krone der Schöpfung

Nicht nur angesichts der Transformationsprozesse in Osteuropa bleibt die Politische Kultur ein zentraler Gegenstand politikwissenschaftlicher und soziologischer Forschung. Allerdings sind die bisherigen Ansätze in aller Regel nicht nur kulturspezifischen Kategorien und Begriffen verhaftet, sondern beruhen auch auf einer Theorie menschlichen Handelns, die den Einzelnen vollständig zum Opfer seiner gesellschaftlichen Umstände macht. Dagegen wird hier ein anderer Begriff von Politischer Kultur vorgeschlagen, der in Anlehnung an den kanadischen Sozialphilosophen Charles Taylor von der Intentionalität des Handelns ausgeht: Die Wünsche, Ziele, Absichten und Emotionen, nach denen Menschen handeln, rücken dann in den Blick. Und Politische Kultur wird zwar zuletzt bestimmt als eine gemeinsame Vorstellung davon, wie das Zusammenleben mit Anderen und die Konflikte und Differenzen grundsätzlich geregelt werden oder geregelt werden sollten, als eine Vorstellung aber, die in persönlichen Wirklichkeitskonstruktionen wurzelt.

### Ist das Hirn vernünftig?

Die Bände 6 und 7 der ISA-Lehrbuchreihe sind das theoretische Unterrichtsmaterial für die beiden Zentralkurse I und II bei ISA (Institut für Seelsorgeausbildung, Ettlingen bei Karlsruhe, [www.isa-institut.de](http://www.isa-institut.de)) in „Kognitiver Seelsorge & Verhaltenstherapie“. Teil I in Band 6 enthält Begründung, Einführung und

Anleitung zur Praxis der Kognitiven Seelsorge; Teil II in Band 7 erweitert den Lernstoff durch grundlegende Gesichtspunkte der Neuropsychologie, Entstehungsmodelle seelischer Störungen (Ätiologie) und kognitiv-verhaltenstherapeutische Diagnostik und Therapieplanung. Die Ausbildung in Kognitiver Seelsorge ist das Alleinstellungsmerkmal von ISA. Während insbesondere in den USA kognitive Ansätze schon seit Jahrzehnten ein zentraler Bestandteil der Seelsorge sind und umgekehrt die säkularen Kognitiven Therapien wertvolle Handreichungen für die Verwendung bei glaubenden Menschen entwickelt haben, hat sie sich in Mitteleuropa noch kaum durchsetzen können. Das ist erstaunlich, weil die Kompatibilität ihrer Prinzipien mit den biblischen Aussagen über die Veränderung des Denkens außerordentlich hoch ist. ISA ist das einzige Ausbildungsinstitut in Mitteleuropa, das eine überkonfessionelle Seelsorgeschulung anbietet, in der die Kognitive Seelsorge Achse und Aushängeschild des Gesamtprogramms ist. Die beiden Zentralkurse sind überdies eine „Ausbildung in der Ausbildung“, indem sie dadurch, dass sie miteinander den Schwerpunkt auf Kognitive Verhaltenstherapie legen, auch ein ansehnliches Vorbereitungsprogramm auf die staatliche Prüfung zum Heilpraktiker für Psychotherapie bilden. Diese beiden Bände sind aber alles andere als Insiderliteratur für Kursteilnehmer. Teil 1 in Band 6 bietet eine prägnante, didaktisch eingängige Einführung zum Eigenstudium für alle, die auf wirklich gutem Niveau einen klar strukturierten Zugang zur Rational-Emotiven Verhaltenstherapie erhalten wollen. Die spirituellen Aspekte, die aus der REVT Kognitive Seelsorge machen, werden den interessierten Leser sehr wahrscheinlich ebenfalls bereichern, auch wenn er selbst den christlichen Glauben des Verfassers nicht teilt.

### Professionalisierung und, oder Kunst der Führung von Unternehmen

Wege zur spirituellen Intelligenz Was heißt eigentlich emotionale Intelligenz? Was sagen mir meine Gefühle? Was tue ich, wenn ich wütend bin? Rudy Vandercruysse zeigt anhand von praktischen Übungen, wie die Fähigkeit der emotionalen Selbstführung entwickelt werden kann und dadurch eine Verwandlung und Umkehr des Gefühlslebens möglich wird. Diese neu errungene Fähigkeit kann wiederum Grundlage einer meditativen Tätigkeit werden.

Jeremiah 32:27 Behold, I am the Lord, the God of all flesh. Is there anything too hard for Me?

Matthew 19:26 But Jesus looked at them and said to them, With men this is impossible, but with God all things are possible.

Jesus said to him, If you can believe, all things are possible to him who believes

So Jesus answered and said to them, Have faith in God.

Mark 11:24 Therefore I say to you, whatever things you ask when you pray, believe that you receive them, and you will have them.

Hebrews 11:1 Now faith is the substance of things hoped for, the evidence of things not seen.

Hebrews 11:6 But without faith it is impossible to please Him, for he who comes to God must believe that He is, and that He is a rewarder of those who diligently seek Him.

Romans 10:17 So then faith comes by hearing, and hearing by the word of God.

2 Corinthians 5:7 For we walk by faith, not by sight.

#### The House of Broken Angels

'Epic . . . Rambunctious . . . Highly entertaining' New York Times 'All we do, mija, is love. Love is the answer. Nothing stops it. Not borders. Not death.' In his final days, beloved and ailing patriarch Miguel Angel de La Cruz, affectionately called Big Angel, has summoned his entire clan for one last legendary birthday party. But as the party approaches, his mother, nearly one hundred, dies, transforming the weekend into a farewell doubleheader. Among the guests is Big Angel's half brother, known as Little Angel, who must reckon with the truth that although he shares a father with his siblings, he has not, as a half gringo, shared a life. Across two bittersweet days in their San Diego neighbourhood, the revellers mingle among the palm trees and cacti, celebrating the lives of Big Angel and his mother, and recounting the many inspiring tales that have passed into family lore, the acts both ordinary and heroic that brought these citizens to a fraught and sublime country and allowed them to flourish in the land they have come to call home. Teeming with brilliance and humor, authentic at every turn, The House of Broken Angels is Luis Alberto Urrea at his best, and cements his reputation as a storyteller of the first rank.

Recalling those harrowing days, including when they stumbled on a resistance cell deep in the forest and lived underground in filthy conditions, begins to take its toll on Rose. As she delves deeper into her past, she is haunted by the most terrifying memory of all. Will she find the courage to bear witness to her mother's ultimate sacrifice?

And even in the face of searing tragedy, he continues to inspire, transform, and elevate all of us who share his dream. ### Albion's Seed

This fascinating book is the first volume in a projected cultural history of the United States, from the earliest English settlements to our own time. It is a history of American folkways as they have changed through time, and it argues a thesis about the importance for the United States of having been British in its cultural origins. While most people in the United States today have no British ancestors, they have assimilated regional cultures which were created by British colonists, even while preserving ethnic identities at the same time. In this sense, nearly all Americans are "Albion's Seed," no matter what their ethnicity may be. The concluding section of this remarkable book explores the ways that regional cultures have continued to dominate national politics from 1789 to 1988, and still help to shape attitudes toward education, government, gender, and violence, on which differences between American regions are greater than between European nations.

### Elijah of Buxton (Scholastic Gold)

Master storyteller Christopher Paul Curtis's Newbery Honor novel, featuring his trademark humor and unique narrative voice, is now part of the Scholastic Gold line! *Elijah of Buxton*, recipient of the Newbery Honor and winner of the Coretta Scott King Award, joins the Scholastic Gold line, which features award-winning and beloved novels. This edition includes exclusive bonus content! Eleven-year-old Elijah lives in Buxton, Canada, a settlement of runaway slaves near the American border. Elijah's the first child in town to be born free, and he ought to be famous just for that -- not to mention for being the best at chunking rocks and catching fish. Unfortunately, all that most people see is a "fra-gile" boy who's scared of snakes and tends to talk too much. But everything changes when a former slave steals money from Elijah's friend, who has been saving to buy his family out of captivity in the South. Now it's up to Elijah to track down the thief -- and his dangerous journey just might make a hero out of him, if only he can find the courage to get back home.

### Show Them You're Good

The bestselling, critically acclaimed, award-winning author of *The Short and Tragic Life of Robert Peace* presents a brilliant and transcendent work that closely follows four Los Angeles high school boys as they apply to college. Four teenage boys are high school seniors at two very different schools within the city of Los Angeles, the second largest school district in the nation with nearly 700,000 students. Author Jeff Hobbs, writing with heart, sensitivity, and insight, stunningly captures the challenges and triumphs of being a young person confronting the future—both their own and the cultures in which they live—in contemporary America. Combining complex social issues with the compelling experience of the individual, Hobbs takes us deep inside these boys' worlds. The foursome includes Carlos, the younger son of undocumented delivery workers, who aims to follow in his older brother's footsteps and attend an Ivy League college; Tio harbors serious ambitions to become an engineer despite a father who doesn't believe in him; Jon, devoted member of the academic decathlon team, struggles to put distance between himself and his mother, who is suffocating him with her own expectations; and Owen, raised in a wealthy family, can't get serious about academics but knows he must. Filled with portraits of secondary characters including friends, peers, parents, teachers, and girlfriends, this masterwork of immersive journalism is both intimate and profound and destined to ignite conversations about class,

race, expectations, cultural divides, and even the concept of fate. Hobbs's portrayal of these young men is not only revelatory and relevant, but also moving, eloquent, and indelibly powerful.

#### A Quiet Belief In Angels

A superb, atmospheric thriller from 'one of crime fiction's new stars' [Sunday Telegraph] Joseph Vaughan's life has been dogged by tragedy. Growing up in the 1950s, he was at the centre of series of killings of young girls in his small rural community. The girls were taken, assaulted and left horribly mutilated. Despite banding together with his friends as 'The Guardians', he was powerless to prevent more murders - and no one was ever caught. Only after a full ten years did the nightmare end when the one of his neighbours is found hanging from a rope, with articles from the dead girls around him. Thankfully, the killings finally ceased. But the past won't stay buried - for it seems that the real murderer still lives and is killing again. And the secret of his identity lies in Joseph's own history...

### Moon Over Manifest

Winner of the 2011 Newbery Award. The movement of the train rocked me like a lullaby. I closed my eyes to the dusty countryside and imagined the sign I'd seen only in Gideon's stories: Manifest—A Town with a rich past and a bright future. Abilene Tucker feels abandoned. Her father has put her on a train, sending her off to live with an old friend for the summer while he works a railroad job. Armed only with a few possessions and her list of universals, Abilene jumps off the train in Manifest, Kansas, aiming to learn about the boy her father once was. Having heard stories about Manifest, Abilene is disappointed to find that it's just a dried-up, worn-out old town. But her disappointment quickly turns to excitement when she discovers a hidden cigar box full of mementos, including some old letters that mention a spy known as the Rattler. These mysterious letters send Abilene and her new friends,

Lettie and Ruthanne, on an honest-to-goodness spy hunt, even though they are warned to “Leave Well Enough Alone.” Abilene throws all caution aside when she heads down the mysterious Path to Perdition to pay a debt to the reclusive Miss Sadie, a diviner who only tells stories from the past. It seems that Manifest’s history is full of colorful and shadowy characters—and long-held secrets. The more Abilene hears, the more determined she is to learn just what role her father played in that history. And as Manifest’s secrets are laid bare one by one, Abilene begins to weave her own story into the fabric of the town. Powerful in its simplicity and rich in historical detail, Clare Vanderpool’s debut is a gripping story of loss and redemption.

#### Into No Man’s Land

An eighteen-year-old Marine records in his journal his experiences in Vietnam during the siege of Khe Sanh, 1967-1968. Includes a history of Vietnam, war timeline, glossary, and related military information.

#### Dear Los Angeles

A rich mosaic of diary entries and letters from Marilyn Monroe, Cesar Chavez, Susan Sontag, Albert Einstein, and many more, this is the story of Los Angeles as told by locals, transplants, and some just passing through. “Los Angeles is refracted in all its irreducible, unexplainable glory.”—Los Angeles Times The City of Angels has played a distinct role in the hearts, minds, and imaginations of millions of people, who see it as the ultimate symbol of the American Dream. David Kipen, a cultural historian and avid scholar of Los Angeles, has scoured libraries, archives, and private estates to assemble a kaleidoscopic view of a truly unique city. From the Spanish missionary expeditions in the early 1500s to the Golden Age of Hollywood to the strange new world of social media, this collection is a slice of life in L.A. through the years. The pieces are arranged by date—January 1st to December 31st—featuring selections from different decades and centuries. What emerges is a vivid tapestry of insights, personal discoveries, and wry observations that together distill the essence of the city. As sprawling and magical as the city itself, Dear Los Angeles is a fascinating, must-have collection for everyone in, from, or touched by Southern California. With excerpts from the writing of Ray Bradbury • Edgar Rice Burroughs • Octavia E. Butler • Italo Calvino • Winston Churchill • Noël Coward • Simone De Beauvoir • James Dean • T. S. Eliot • William Faulkner • Lawrence Ferlinghetti • Richard Feynman • F. Scott Fitzgerald • Allen Ginsberg • Dashiell Hammett • Charlton Heston • Zora Neale Hurston • Christopher Isherwood • John Lennon • H. L. Mencken • Anaïs Nin • Sylvia Plath • Ronald Reagan • Joan Rivers • James Thurber • Dalton Trumbo • Evelyn Waugh • Tennessee Williams • P. G. Wodehouse • and many more Advance praise for Dear Los Angeles “This book’s a brilliant constellation, spread out over a few centuries and five thousand square miles. Each tiny entry pins the reality of the great unreal city of Angels to a moment in human time—moments enthralled, appalled, jubilant, suffering, gossiping or bragging—and it turns out, there’s no better way to paint a picture of the place.”—Jonathan Lethem “[A] scintillating collection of letters and diary entries . . . an engrossing trove of colorful, witty insights.”—Publishers Weekly (starred review)

#### Dear America: With the Might of Angels

Coretta Scott King winner Andrea Davis Pinkney brings her talents to a brand-new Dear America diary about the Civil Rights Movement. In the fall of 1955, twelve-year-old Dawn Rae Johnson’s life turns upside down. After the Supreme Court ruling in Brown v. Board of Education, Dawnie learns she will be attending a previously all-white school. She’s the only one of her friends to go to this new school and to leave the comfort of all that is familiar to face great uncertainty in the school year ahead. However, not everyone supports integration and much of the town is outraged at the decision. Dawnie must endure the harsh realities of racism firsthand, while continuing to work hard to get a good education and prove she deserves the opportunity. But the backlash against Dawnie’s attendance of an all-white school is more than she’s prepared for. When her father loses his job as a result, and her little brother is constantly bullied, Dawnie has to wonder if it’s worth it. In time, Dawnie learns that the true meaning of justice comes from remaining faithful to the integrity within oneself.

#### Silent Thunder

In 1862 eleven-year-old Summer and her thirteen-year-old brother Rosco take turns describing how life on the quiet Virginia plantation where they are slaves is affected by the Civil War.

#### Fictions of Integration

This book examines how children's and young adult literature addresses and interrogates the legacies of American school desegregation. Such literature narrates not only the famous battles to implement desegregation in the South, in places like Little Rock, Arkansas, but also more insidious and less visible legacies, such as re-segregation within schools through the mechanism of disability diagnosis. Novelizations of children's experiences with school desegregation comment upon the politics of getting African-American children access to white schools; but more than this, as school stories, they also comment upon how structural racism operates in the classroom and mutates, over the course of decades, through the pedagogical practices depicted in literature for young readers. Lesley combines approaches from critical race theory, disability studies, and educational philosophy in order to investigate how the educational market simultaneously constrains how racism in schools can be presented to young readers and also provides channels for radical critiques of pedagogy and visions of alternative systems. The volume examines a range of titles, from novels that directly engage the Brown v. Board of Education decision, such as Sharon Draper's *Fire From the Rock* and Dorothy Sterling's *Mary Jane*, to novels that engage less obvious legacies of desegregation, such as Cynthia Voigt's *Dacey's Song*, Sharon Flake's *Pinned*, Virginia Hamilton's *The Planet of Junior Brown*, and Louis Sachar's *Holes*. This book will be of interest to scholars of American studies, children's literature, and educational philosophy and history.

#### More Mirrors, Windows, and Sliding Doors

#### Teachings from the Mystery School, the Healing Power of Angels

In the diary account of her journey from Ireland in 1847 and of her work in a mill in Lowell, Massachusetts, fourteen-year-old Mary reveals a great longing for her family.
