The College Solution A Guide For Everyone Looking For ...

Bioethics

Vaughn offers a hybrid of text, readings, and cases to fill a need left for a current, accessible introduction to the philosophical, medical, scientific, social, and legal aspects of key bioethics issues. It offers a balance between basic ethical theories and current controversies. Its case-driven approach and a very robust set of pedagogical features introduce issues in a way that engages students in decision making. Hot topics include paternalism and patient autonomy, truth telling, informed consent, abortion, in vitro fertilization, cloning, impaired infants, embryonic stem-cell dilemmas, genetic engineering, euthanasia, physician-assisted suicide, human and animal research, inequities in access to medical treatment, HIV/AIDS in Africa, and health-care costs.

Doing Ethics

Doing Ethics emphasizes that ethics is an activity--something you do--rather than a body of knowledge that you memorize. Stressing critical thinking throughout the book, Lewis Vaughn motivates students to wrestle with moral quandaries from the start. His clear prose ensures that students understand major arguments and core concepts, and the extensive readings and exercises provide plenty of thought-provoking material for in-class discussions and student papers. Practical, clear and comprehensive, Doing Ethics will inspire students to see ethics not just as a distribution requirement, but as a lifelong project.
