Henri starts painting anyway.

Henri keeps painting and learning.

Henri is too poor to travel to a real jungle.

It doesn't matter - he sees one before him.

Near the end of his life

Henri makes a remarkable painting called "The Dream."

Using Functional Analysis in Archival Appraisal

In an age of scarcity and the challenge of electronic records, can archivists and records managers continue to rely upon traditional methodology essentially unchanged since the early 1950s? Using Functional Analysis in Archival Appraisal: A Practical and Effective Alternative to Traditional Appraisal Methodologies shows how archivists in other countries are already using functional analysis, which offers a better, more effective, and imminently more practical alternative to traditional appraisal methodologies that rely upon an analysis of the records themselves.

Developing and Maintaining Practical Archives

Since its original publication Hunter's manual has been "not only a rich and ready reference tool but also a practical resource for solving problems" (Catholic Library World), and no text has served as a better overview of the field of archives. Newly revised and updated to more thoroughly address our increasingly digital world, including integration of digital records and audiovisual records into each chapter, it remains the clearest and most comprehensive guide to the discipline. Former editor of Amer-

ican Archivist, the journal of the Society of American Archivists (SAA), Hunter covers such keystone topics as a history of archives, including the roles of historical societies and local history collections in libraries; new sections on community archives, diversity, and inclusion; conducting a survey and starting an archival program; selection, appraisal, acquisition, accessioning, and deaccessioning; important points of copyright, privacy, and ethics; arrangement of archival collections, with a discussion of new theories; description, including DACS, EAD, and tools such as ArchivesSpace; access, reference, and outreach, with a look at how recent innovations in finding aids can help researchers; preservation, including guidance on how to handle rare books, maps, architectural records, and artifacts; digital records, addressing new and popular methods of storage and preservation of email, social media, image files, webpages, Word documents, spreadsheets, databases, and media files; disaster planning, security, and theft prevention; metrics, assessment, establishing employee procedures and policies, working with interns and volunteers, and other managerial duties; public relations and marketing, from social media and the Web to advocacy; and professional guidelines and codes, such as the newly developed SAA Statement of Core Values of Archivists. Providing in-depth coverage of both theory and practice, this manual is essential for archivists at all levels of experience and of all backgrounds.

The Handbook of Archival Practice

Here is a complete reference guide to the activities that identify various stages of archival practice. Among the environmental topics to be addressed from a practitioner's standpoint are legal, regulatory, political, economic, organizational culture, professional, social, and ethical influences.

Building Trustworthy Digital Repositories

Building Trustworthy Digital Repositories: Theory and Implementation combines information on both theory and practice related to creating trustworthy repositories for records into one up-to-date source. This book will bring all the credible theories into one place where they will be summarized, brought up to date, and footnoted. Moreover, the book will be international in its scope, and will discuss ideas coming from such important sources as Australia, Canada, and Western Europe. Until about five years ago, there were very few implementation projects in this area. This book brings together information on implementation projects that answer these questions: What is a trustworthy repository for digital records? Who is building these repositories, and what have been the results? How are institutions building or creating these repositories? How are institutions addressing the essential requirement related to the ingest or capture of records? How are institutions automatically and manually capturing essential metadata and audit trails? How are institutions implementing retention and disposal decisions within these systems? How are institutions implementing preservation strategies to ensure that digital objects are accessible over long periods of time? What is the current status of trustworthy repositories, and what will these systems look like in the future?

Documenting Localities

Drawing on a wide range of writings from archivists, historians, librarians, and preservationists, Cox summarizes the past decade of discussion concerning practical methodologies of documenting localities.

Urkunden, Archive, Kontexte

Welche Kontexte prägten und prägen die Entstehungs- und Benutzungsweise von Archiven und Urkunden? Rechtliche Umgebung, Organisationskultur, Traditionen und Gewohnheiten, persönliche Präferenzen, politische Situation, Paradigmenwandel in Gedächtnisinstitutionen – damit sind nur einige Beispiele genannt, die darauf Einfluss nehmen, wie eine historische Quelle gestaltet wird und in welcher Weise sie von den Archivbenutzern verwendet wird oder wurde. Die versammelten zwölf Beiträge befassen sich sowohl mit der fernen Vergangenheit verschiedener Archivarten als auch mit der gegenwärtig erstellten Dokumentation, den sich wandelnden Trends in Archivinstitutionen und der Arbeit, die dort geleistet wird, um den Benutzern historische Quellen und Informationen darüber zur Verfügung zu stellen. The twelve diverse scientific contributions collected in this volume explore contexts that documents, sources and archives are exposed to in different stages of their existence. Legal environment, organizational culture, traditions and habits, personal preferences, political situation, paradigm changes in memory institutions – these are only some examples that have an impact on how a historical source is shaped and the way it is or was employed by the users of an archive. The volume contains texts regarding the distant past of different archive types as well as documentation being

generated nowadays, changing trends in archive institutions and the work put into making historical sources and information about them available to users.

Music Preservation and Archiving Today

Music Preservation and Archiving Today moves beyond the how-to and assembles the work currently being done to preserve music and "scenes" via essays, case studies, and overviews of work by academic archives as well as community-driven preservation projects

Archivaria

Archivists and special collections librarians will find in this book the tools, confidence, and freedom to improve user experience through extensible processing.

Extensible Processing for Archives and Special Collections

This volume explores the scientific frontiers and leading edges of research across the fields of anthropology, economics, political science, psychology, sociology, history, business, education, geography, law, and psychiatry, as well as the newer, more specialized areas of artificial intelligence, child development, cognitive science, communications, demography, linguistics, and management and decision science. It includes recommendations concerning new resources, facilities, and programs that may be needed over the next several years to ensure rapid progress and provide a high level of returns to basic research.

Building Records Appraisal Systems

"Pay for performance" has become a buzzword for the 1990s, as U.S. organizations seek ways to boost employee productivity. The new emphasis on performance appraisal and merit pay calls for a thorough examination of their effectiveness. Pay for Performance is the best resource to date on the issues of whether these concepts work and how they can be applied most effectively in the workplace. This important book looks at performance appraisal and pay practices in the private sector and describes whether—and how—private industry experience is relevant to federal pay reform. It focuses on the needs of the federal government, exploring how the federal pay system evolved; available evidence on federal employee attitudes toward their work, their pay, and their reputation with the public; and the complicating and pervasive factor of politics.

The Behavioral and Social Sciences

This book is designed to introduce doctoral and graduate students to the process of conducting scientific research in the social sciences, business, education, public health, and related disciplines. It is a one-stop, comprehensive, and compact source for foundational concepts in behavioral research, and can serve as a stand-alone text or as a supplement to research readings in any doctoral seminar or research methods class. This book is currently used as a research text at universities on six continents and will shortly be available in nine different languages.

Pay for Performance

Intended to provide the basic foundation for modern archival practice and theory.

Social Science Research

Within the past 15 years, the field of archival studies around the world has experienced unprecedented growth and archival studies graduate education programs today have among the highest enrollments in any information field. During the same period, there has also been unparalleled expansion and innovation in the diversity of methods and theories being applied in archival scholarship. Global in scope, Research in the Archival Multiverse compiles critical and reflective essays across a wide range of emerging research areas and interests in archival studies with the aim of providing current and future archival academics with a text addressing possible methods and theoretical frameworks that have been and might be used in archival scholarship. More than a collation of research methods for handy reference, this volume advocates for reflexive research practice as a means by which to lay bare the fuzziness and messiness of research. Whereas research in the form of published research papers and juried conference presentations provide a view of the study framed in terms of research questions

and findings, reflexive research practice reveals the context of the study and chains of situations, choices, and decisions that influence the trajectories of the studies themselves. Such elucidations from the position of the researcher are instructive for others, who may be inspired to apply or adapt the method for their own research. *** "This book is a landmark publication on research in archival science, tracing the development of ideas in the discipline in part one, then exploring possibilities and pathways in the following chapters. It is essential reading on the evolution and progression of the discipline, particularly for every Masters and PhD student in archival science, whether looking for a deeper understanding of archival theory or inspiration on research design and process. It will be invaluable to all archival educators, but particularly to supervisors of research students." --Karen Anderson, *Archives and Manuscripts*, 2017 *** "The compilation reflects an array of directions in which research in the broadly defined area of archives is heading. While an ambitious collection, it in no way limits our understanding of the multiverse; in fact, quite the opposite, it hints at the notion that the multiverse may be limitless." --*Library and Information Science Research* 39 (2017) 159 (Series: ?Social Informatics) [Subject: Research Studies, Digital Studies, Archival Science, History]

A Glossary of Archival and Records Terminology

Updated in its 3rd edition, *Basic Methods of Policy Analysis and Planning* presents quickly applied methods for analyzing and resolving planning and policy issues at state, regional, and urban levels. Divided into two parts, *Methods* which presents quick methods in nine chapters and is organized around the steps in the policy analysis process, and *Cases* which presents seven policy cases, ranging in degree of complexity, the text provides readers with the resources they need for effective policy planning and analysis. Quantitative and qualitative methods are systematically combined to address policy dilemmas and urban planning problems. Readers and analysts utilizing this text gain comprehensive skills and background needed to impact public policy.

Research in the Archival Multiverse

Includes sections "Reviews of books" and "Abstracts of archive publications (Western and Eastern Europe)."

Resources in Education

This Handbook addresses the methodology of social science research and the appropriate use of different methods.

Basic Methods of Policy Analysis and Planning -- Pearson eText

How can you analyse narratives, interviews, field notes, or focus group data? Qualitative text analysis is ideal for these types of data and this textbook provides a hands-on introduction to the method and its theoretical underpinnings. It offers step-by-step instructions for implementing the three principal types of qualitative text analysis: thematic, evaluative, and type-building. Special attention is paid to how to present your results and use qualitative data analysis software packages, which are highly recommended for use in combination with qualitative text analysis since they allow for fast, reliable, and more accurate analysis. The book shows in detail how to use software, from transcribing the verbal data to presenting and visualizing the results. The book is intended for Master's and Doctoral students across the social sciences and for all researchers concerned with the systematic analysis of texts of any kind.

The American Archivist

The rise of digitisation and social media over the past decade has fostered the rise of participatory and DIY digital culture. Likewise, the archival community leveraged these new technologies, aiming to engage users and expand access to collections. This book examines the creation and development of participatory archives, its impact on archival theory, and present case studies of its real world application. *Participatory Archives* is divided into four sections with each focused on a particular aspect of participatory archives: social tagging and commenting; transcription; crowdfunding; and outreach & activist communities. Each section includes chapters summarizing the existing literature, a discussion of theoretical challenges and benefits, and a series of case studies. The case studies are written by a range of international practitioners and provide a wide range of examples in practice, whilst the remaining chapters are supplied by leading scholars from Australia, Canada, Denmark, the

Netherlands, Norway, the United Kingdom, and the United States. This book will be useful for students on archival studies programs, scholarly researchers in archival studies who could use the book to frame their own research projects, and practitioners who might be most interested in the case studies to see how participatory archives function in practice. The book may also be of interest to other library and information science students, and similar audiences within the broader cultural heritage institution fields of museums, libraries, and galleries.

All Shook Up

Brings the theory, philosophy and techniques of research to life and enables students to understand the relevance of the research methods. This book helps you learn from worked examples and case studies based on real student research, illustrating what to do and what not to do in your project.

Selecting and Appraising Archives and Manuscripts

This publication, prepared under the aegis of the WIPO Creative Heritage Project by two external consultants, Ms. Molly Torsen and Dr. Jane Anderson, offers legal information and compiles practical experiences on the management of intellectual property for cultural institutions whose collections comprise traditional cultural expressions. It seeks to respond directly to the needs of cultural institutions and indigenous and traditional communities dealing with the preservation, safeguarding and protection of cultural heritage.

The SAGE Handbook of Applied Social Research Methods

This straightforward, student-friendly guide contains all the practical advice for successfully undertaking a research project, leading students through all the stages of the research process. The second edition of this no-nonsense textbook supports students in conducting their own research projects, whatever discipline they are from. Describing processes, tools and strategies in a simple, succinct way, it supports the reader carefully through the planning and design stages, to implementation, analysis and completion. Doing a Successful Research Project is suitable for an interdisciplinary audience all over the world. It is aimed at undergraduate and postgraduate students undertaking a research project or dissertation across the social sciences, applied social sciences, education, health and business studies. It can also be used as essential or complimentary reading on modules on qualitative and quantitative research and research design.

New to this Edition:

- Enhanced coverage of essential topics, including research ethics, the literature review and online methodologies
- Increased coverage on quantitative methods
- New up-to-date examples of real-life research studies
- Broadened scope to encourage appeal to a wide range of academic disciplines

Naar een nieuw paradigma in de archivistiek

Showing you how to take a structured and organized approach to a wide range of literature review types, this book helps you to choose which approach is right for your research. Packed with constructive tools, examples, case studies and hands-on exercises, the book covers the full range of literature review techniques. New to This Edition: Full re-organization takes you step-by-step through the process from beginning to end New chapter showing you how to choose the right method for your project Practical guidance on integrating qualitative and quantitative data New coverage of rapid reviews Comprehensive inclusion of literature review tools, including concept analysis, scoping and mapping With an emphasis on the practical skills, this guide is essential for any student or researcher needing to get from first steps to a successful literature review.

Qualitative Text Analysis

Displaced archives have long been a problem and their existence continues to trouble archivists, historians and government officials. Displaced Archives brings together leading international experts to comprehensively explore the current state of affairs for the first time. Drawing on case studies from around the world, the authors examine displaced archives as a consequence of conflict and colonialism, analysing their impact on government administration, nation building, human rights and justice. Renewed action is advocated through considerations of the legal approaches to repatriation, the role of the international archival community, 'shared heritage' approaches and other solutions. The volume offers new theoretical, technical and political insights and will be essential reading for practitioners,

academics and students in the field of archives, cultural property and heritage management, as well as history, politics and international relations.

Participatory Archives

"Architecture and design records are exciting resources for historical research and vital for documenting and maintaining the built environment. Yet their temporal nature often makes them difficult to preserve, and managing collections of these records can be a challenge. In addition to addressing preservation issues, this resource helps archivists, curators, librarians and researchers understand how to assess the value of architectural records" -- Publisher's description.

Research Methods for Business Students

"This collection was presented to Hugh Taylor by his colleagues to acknowledge the impact he has had on archival writing and thought during a remarkable archival career. The book includes eleven essays, eclectic in subject and style, and reflecting a variety of interests."--Pub. desc.

Intellectual Property and the Safeguarding of Traditional Cultures: Legal Issues and Practical Options for Museums, Libraries and Archives

This book discusses the importance of collection appraisal in the context of archival work as a whole. It is an invaluable source for all those responsible for the use and administration of archives.

Doing a Successful Research Project

As a depository of civic record and social history whose very name derives from the Greek word for town hall, the archive would seem to be a public entity, yet it is stocked with the personal, even intimate, artifacts of private lives. It is this inherent tension between public and private which inaugurates, for Derrida, an inquiry into the human impulse to preserve, through technology as well as tradition, both a historical and a psychic past. What emerges is a marvelous expansive work, engaging at once Judaic mythos, Freudian psychoanalysis, and Marxist materialism in a profound reflection on the real, the unreal, and the virtual.

Systematic Approaches to a Successful Literature Review

This guidance on Building Information Modelling for heritage (Historic BIM) offers guidance for owners, end-users and professionals in the fields of heritage and construction. By raising awareness of the potential advantages of a BIM approach, this guidance will help users successfully implement BIM in heritage projects. Historic BIM is, by definition, a multi-disciplinary process that requires the input and collaboration of professionals with very different skillsets. It is also a fast-developing field in terms of research, official guidance, standards and professional practice. This publication addresses the issues surrounding the production and use of BIM for history buildings, and provides information about guidance and standards available elsewhere for managing a building's entire life cycle effectively.

Documentation Abstracts

Diplomatics was originally developed in France during the seventeenth century in attempts to prove the authenticity of archival documents. It was later refined in European universities as a legal, historical, and philological discipline, and in the twentieth century it has primarily been applied to medieval and early modern documents in order to evaluate their authority as sources of research. Diplomatics embraces the perspective of the modern archivist, and investigates the origin, development, and application of diplomatic concepts. It examines the organizational and evaluative effectiveness of diplomatic concepts in the context of modern records and archival systems, and looks at the relationship between originality and authenticity in records. The physical and intellectual form of records is examined, and the traditional methodology of diplomatic criticism is clearly explained and augmented by tips concerning its archival use. Diplomatics was originally a series of six articles that appeared in *Archivaria*, the journal of the Association of Canadian Archivists. In addition to those six articles, this volume contains an introduction that provides a broad synopsis of diplomatics, including its unused potential to help rethink record organization and use in a multimedia age fraught with increasingly complex informational problems.

Displaced Archives
