Practice Makes Perfect Spanish Pronouns and Prepositions, Second Edition

Originally published in 1987 and revised in 2004, *Compañeras* speaks with the voices of Latina lesbians who are puertorriqueñas, chicanas, cubanas, chilenas, hondureñas, brasileñas, colombianas, argentinas, peruanas, costarricenses, mexicanas, ecuatorianas, bolivianas, dominicanas, and nicaragüenses; women who met to speak about what it implies to be both Latina and lesbian in our communities, whether we live in Latin America or the US. Each time a woman begins to speak, a liberating process begins, one that is unavoidable and has powerful political implications. In these pages we see repeated the process of self-discovery, of affirmation in coming out of the closet, the search for a definition of our identity within the family and our community, the search for answers, for meaning in our personal struggle, and the commitment to a political struggle to end all forms of oppression. The stages of increasing awareness become clear when we begin to recount the story of our lives to someone else, someone who has experienced the same changes. When we write or speak about these changes, we establish our experience as valid and real, we begin to analyze, and that analysis gives us the necessary perspective to place our lives in a context where we know what to do next. *Compañeras* becomes an instrument of unity, a political tool. *Compañeras habla a través de la voz de lesbianas latinoamericanas, chicanas, puertorriqueñas, cubanas, chilenas, hondureñas, brasileñas, colombianas, argentinas, peruanas, costarricense, mexicanas, ecuatorianas, bolivianas, dominicanas, y nicaragüenses; mujeres que se encontraron para hablar sobre lo que significa en nuestra comunidad ser ambas cosas, latinoamericanas y lesbianas, sea que vivamos en América Latina o en los Estados Unidos. Cada vez que una mujer comienza a hablar, comienza el proceso de liberación; es algo inevitable que tiene implicaciones políticas ponderosas. En estas páginas vemos repetido nuestro propio proceso de descubrimiento, la afirmación al asumirnos ante los demás, la búsqueda de una definición de identidad dentro de la familia y de nuestra comunidad, la búsqueda de repuestas significativas a las muchas personales y el compromiso en la lucha política para acabar con toda forma de opresión. Las etapas de crecimiento o de desarrollo de nuestra conciencia se hacen claras cuando comenzamos a recontar la historia de nuestras vidas en alguien más, alguien que ha experimentado los mismos cambios. Cuando hablamos sobre estos cambios afirmamos nuestra experiencia como*

válida y real, y ese análisis nos da la perspectiva necesaria para colocar nuestras vidas dentro de un contexto que nos permita saber cuál es el próximo paso que tenemos que dar. Compañeras viene a ser un instrumento de unidad, una herramienta política.

TIME FOR KIDS® Practicing for STAAR Success: Mathematics: Grade 4

Designed to strengthen the teaching of mathematics in the elementary grades, this book focuses on helping teachers engage in instruction based on learning trajectories (LTs). Renowned scholars, including professional development researcher Hilda Borko, examine four exemplary projects with details on professional development design, teacher learning, and project implementation. Contributors include Hilda Borko, Douglas H. Clements, Susan B. Empson, Victoria R. Jacobs, and Julie Sarama. "This is an amazingly important and valuable resource for mathematics teachers and leaders at any level. It provides the background and understandings so critical for teachers and teacher leaders to regularly consider and use learning trajectories to inform teacher planning and instruction." —Dr. Francis (Skip) Fennell, professor emeritus, McDaniel College, and past president of the Association of Mathematics Teacher Educators and the National Council of Teachers of Mathematics "This is the first book that I've come across that unpacks what it means to have a framework for student learning at the center of one's instruction." —Mary Kay Stein, University of Pittsburgh School of Education "I find this book useful for mathematics educators interested in framing learning trajectories across several domains—including tasks, discourse, curriculum, learners' understanding, and assessment—to support professional development. Learning trajectories help us make connections among the domains and deepens professional knowledge and understanding." —Robert Q. Berry III, University of Virginia, and president of the National Council of Teachers of Mathematics

Spots for MATH - Stepping Up - Teacher's Edition Booklet: Grade 2

This book discusses examples of discrete mathematics in school curricula, including in the areas of graph theory, recursion and discrete dynamical systems, combinatorics, logic, game theory, and the mathematics of fairness. In addition, it describes current discrete mathematics curriculum initiatives in several countries, and presents ongoing research, especially in the areas of combinatorial reasoning and the affective dimension of learning discrete mathematics. Discrete mathematics is the math of our time.' So declared the immediate past president of the National Council of Teachers of Mathematics, John Dossey, in 1991. Nearly 30 years later that statement is still true, although the news has not yet fully reached school mathematics curricula. Nevertheless, much valuable work has been done, and continues to be done. This volume reports on some of that work. It provides a glimpse of the state of the art in learning and teaching discrete mathematics around the world, and it makes the case once again that discrete mathematics is indeed mathematics for our time, even more so today in our digital age, and it should be included in the core curricula of all countries for all students.
