remove some cover plates to access the drain plug

begin the oil change by removing the bullbar

remove the small access panel in the bash plate

remove the plug using a 14 millimeter span

replace and tighten the sump plug

drain most of the oil from the filter housing

remove the metal locking clip from the sides of the filter
fit the special oil filter removal tool to the filter cap
attempt to remove the cap by heating it around with a hammer
fit it into the filter cap in the correct slot
replace the locking clip
refit the sump plug
