Participant Introductions

How is there a convergence between biology and the quantum?

Are particles in two places at once or is this based just on observations?

Are biological states creating a unique quantum rules?

Quantum mechanics is so counterintuitive.

Can nature have a quantum sense?

The quantum migration of birds... With bird brains?

Electron spin and magnetic fields.

Cryptochrome releases particles with spin and the bird knows where to go.

How is bird migration an example for evolution?

photosynthesis and quantum phenomena.

Bacteria doing quantum search.

Is quantum tunneling the key to quantum biology?

What are the experiments that prove this?

When fields converge how do you determine causality?

We have no idea how life began.

Replication leads to variation which is the beginning of life?
