Head Strong

From the creator of Bulletproof Coffee and author of the bestselling The Bulletproof Diet comes a revolutionary plan to upgrade your brainpower—in two weeks or less. For the last decade, Silicon Valley entrepreneur Dave Asprey has worked with world-renowned doctors and scientists to uncover the latest, most innovative methods for making humans perform better—a process known as "biohacking." In his first book, The Bulletproof Diet, he shared his biohacking tips for taking control of your own biology. Now, in Head Strong, Asprey shows readers how to biohack their way to a sharper, smarter, faster, more resilient brain. Imagine feeling like your mind is operating at its clearest and sharpest, and being able—possibly for the first time in your life—to do more in less time? What it suddenly became easier to do the very hardest things you do? Or if you could feel 100% confident about your intellect, and never again fear being the person in the room who just isn't smart enough, or can't remember something important? How would you treat people if the mood swings, short temper, and food cravings that disrupt your day could simply disappear? In Head Strong, Asprey shows us that all of this is possible—and more. Using his simple lifestyle modifications (or "hacks") to take advantage of how the structure of your brain works, readers will learn how to take their mental performance to the next level. Combining the latest findings in neuroscience and neurobiology with a hacker-inspired "get it done now" perspective, Asprey offers a program structured around key areas of brain performance that will help you: Power the brain with exactly what it needs to perform at its best all day long Eliminate the sources of "kryptonite," both nutritional and environmental, that make the brain slower. Supercharge the cellular powerhouses of our brains, the mitochondria, to eliminate cravings and turn up mental focus. Reverse inflammation to perform better right now, then stay sharp and energized well into your golden years. Promote neuron growth to enhance processing speed and reinforce new learning—hotwiring your brain for success. Asprey's easy to follow, two-week program offers a detailed plan to supercharge brain performance, including: which foods to eat and which ones to avoid, how to incorporate the right kinds of physical activity into your day, a detox protocol for your home and body; meditation and breathing for

performance, recommended brain-boosting supplements; and how to adjust the lighting in your home and work space to give your brain the quality light it thrives on. A better brain—and a happier, easier, more productive life—is within reach. You just need to get Head Strong.

The Bulletproof Diet

In his midtwenties, Dave Asprey was a successful Silicon Valley multimillionaire. He also weighed 300 pounds, despite the fact that he was doing what doctors recommended: eating 1,800 calories a day and working out 90 minutes a day, six times a week. When his excess fat started causing brain fog and food cravings sapped his energy and willpower, Asprey turned to the same hacking techniques that made his fortune to "hack" his own biology, investing more than \$300,000 and 15 years to uncover what was hindering his energy, performance, appearance, and happiness. From private brain EEG facilities to remote monasteries in Tibet, through radioactive brain scans, blood chemistry work, nervous system testing, and more, he explored traditional and alternative technologies to reach his physical and mental prime. The result? The Bulletproof Diet, an anti-inflammatory program for hunger-free, rapid weight loss and peak performance. The Bulletproof Diet will challenge--and change--the way you think about weight loss and wellness. You will skip breakfast, stop counting calories, eat high levels of healthy saturated fat, work out and sleep less, and add smart supplements. In doing so, you'll gain energy, build lean muscle, and watch the pounds melt off. By ditching traditional "diet" thinking, Asprey went from being overweight and sick in his twenties to maintaining a 100-pound weight loss, increasing his IQ, and feeling better than ever in his forties. The Bulletproof Diet is your blueprint to a better life.

Game Changers: What Leaders, Innovators and Mavericks Do to Win at Life

The bestselling author of Head Strong and The Bulletproof Diet answers the question "How do I kick more ass?"—providing proven techniques for becoming happier, healthier, and smarter, culled from the wisdom and insight of world-class thought leaders and mavericks of science and business.

Fast This Way

Break the rules, not the fast with world-renowned biohacker and Bulletproof Coffee founder Dave Asprey, author of The Bulletproof Diet, Head Strong, and other New York Times bestsellers. For more than a decade, Bulletproof founder Dave Asprey has shared his unique point of view and expertise to help fans become the best versions of themselves. From living longer to getting smarter, maximizing performance to practicing mindfulness, Dave's followers look to him for his take on the most effective techniques to become healthier and more powerful than most doctors think is possible. Asprey has been fasting for years, long before it gained widespread popularity, and if you're a fan of Bulletproof coffee and The Bulletproof Diet, you have been enjoying some of the benefits of Intermittent Fasting too. In Fast This Way, Dave asks readers to forget everything they think they know about the ancient practice and takes them on a journey through cutting-edge science to examine the ways novice fasters and Intermittent Fasting loyalists can up-end their relationship with food and upgrade their fasting game beyond calorie restriction. What IF eating the right foods at the right time can actually enhance your fast? What IF how you work out and sleep could trick your body into thinking you are fasting? What IF it were easy to skip a meal, or two, or three? What IF fasting is different for women, can be personalized to your genes, and can impact your mental health? What IF all fasts could be created equal? Fast This Way is a compelling read through the latest thinking on fasting and gives readers the manual and toolkit to make the most of their fasts and their personal biology.

The Great Cholesterol Myth

Heart disease is the #1 killer. However, traditional heart disease protocols--with their emphasis on lowering cholesterol--have it all wrong. Emerging science is showing that cholesterol levels are a poor predictor of heart disease and that standard prescriptions for lowering it, such as ineffective low-fat/high-carb diets and serious, side-effect-causing statin drugs, obscure the real causes of heart disease. Even doctors at leading institutions have been misled for years based on creative reporting of research results from pharmaceutical companies intent on supporting the \$31-billion-a-year cholesterol-lowering drug industry. The Great Cholesterol Myth reveals the real culprits of heart disease, including: - Inflammation - Fibrinogen - Triglycerides - Homocysteine - Belly fat - Triglyceride to HCL ra-

tios - High glycemic levels Bestselling health authors Jonny Bowden, Ph.D., and Stephen Sinatra, M.D. give readers a 4-part strategy based on the latest studies and clinical findings for effectively preventing, managing, and reversing heart disease, focusing on diet, exercise, supplements, and stress and anger management. Get proven, evidence-based strategies from the experts with The Great Cholesterol Myth. MYTHS VS. FACTS Myth—High cholesterol is the cause of heart disease. Fact—Cholesterol is only a minor player in the cascade of inflammation which is a cause of heart disease. Myth—High cholesterol is a predictor of heart attack. Fact—There is no correlation between cholesterol and heart attack. Myth—Lowering cholesterol with statin drugs will prolong your life. Fact—There is no data to show that statins have a significant impact on longevity. Myth—Statin drugs are safe. Fact—Statin drugs can be extremely toxic including causing death. Myth—Statin drugs are useful in men, women and the elderly. Fact—Statin drugs do the best job in middle-aged men with coronary disease. Myth—Statin drugs are useful in middle-aged men with coronary artery disease because of its impact on cholesterol. Fact—Statin drugs reduce inflammation and improve blood viscosity (thinning blood). Statins are extremely helpful in men with low HDL and coronary artery disease. Myth—Saturated fat is dangerous. Fact—Saturated fats are not dangerous. The killer fats are the trans fats from partially hydrogenated oils. Myth—The higher the cholesterol, the shorter the lifespan. Fact—Higher cholesterol protects you from gastrointestinal disease, pulmonary disease and hemorrhagic stroke. Myth—A high carbohydrate diet protects you from heart disease. Fact—Simple processed carbs and sugars predispose you to heart disease. Myth—Fat is bad for your health. Fact—Monounsaturated and saturated fats protect you from metabolic syndrome. Sugar is the foe in cardiovascular disease. Myth—There is good (HDL) cholesterol and bad (LDL) cholesterol. Fact—This is over-simplistic. You must fractionate LDL and HDL to assess the components. Myth—Cholesterol causes heart disease. Fact—Cholesterol is only a theory in heart disease and only the small component of LP(a) or “bb shot” LDL predisposes one to oxidation and inflammation.

Run for Your Life

****As heard on Dr Rangan Chatterjee's 'Feel Better, Live More' Podcast**** We all know how a long walk, a slow jog or a brisk run can free our minds to wander, and give us a powerful uplifting feeling. Some call it the 'runner's high', others put it down to endorphins. But what if we could channel that energy and use it to make positive change in our lives? William Pullen is a psychotherapist who helps people dealing with anxiety, lack of motivation and addiction, to work through their issues using his revolutionary method, Dynamic Running Therapy. He believes that we need a radical new approach to mindfulness: an approach that originates in the body itself. Whether you are looking for strategies to cope with anxiety, change or decision-making, or simply want to focus your mind while pounding the streets, Run for Your Life offers a series of simple mental routines that unleash the meditative, restorative powers of exercise.

The Metabolism Reset Diet

Dr Alan Christianson, top naturopathic physician and bestselling author of The Adrenal Reset Diet, introduces a four-week cleanse that heals damage to the liver, helping readers unlock the key to lasting weight loss, lower blood sugar levels and optimal health. Through his work with thousands of patients, Dr Christianson has discovered a fasting plan that resets and cleanses the liver so that it works optimally. After all, the liver is the key to losing weight, increasing immune function and cognition, and even reversing diabetes. New research has shown that high blood sugar is actually caused by damage to the pancreas and liver, which is why some people still struggle with weight loss even after cutting carbs out of their diet. In this book, readers will find: • guidance on which foods to eat and when • easy meal plans and delicious recipes • simple but comprehensive guidelines to achieve optimal liver function • advice on maintenance after weight loss This is not a crazy fad diet but a simple and sensible way to reset your liver health, with amazing consequences on your weight and wellbeing.

Be Where Your Feet Are

Scott O'Neil, one of America's most successful sports executives, shares seven principles to keep you present, grounded, and thriving. When we're moving at 115 MPH, we rarely see the wall coming. But it comes for all of us and when it does, we grasp for lessons, for meaning, for purpose. Each moment (good or bad) and each win or loss, provides us an opportunity to learn, and if we choose to take it, that opportunity can change our lives-and the world- for the better. The human spirit craves connection. Authenticity. Belonging. Touch. Gratitude. Purpose. We need to make our interactions count. Whether it's the death of a friend, loss of a job, a bad break-up or the isolation of COVID-19, those who manage to be where their feet are will grow, stretch and emerge stronger, smarter and more prepared as we find peace and gratitude in the pause. In *Be Where Your Feet Are*, Scott O'Neil, CEO of the Philadelphia 76ers and New Jersey Devils, offers his own story of grief and healing, and shares his most valuable lessons in what keeps him present, grounded and thriving as a father, husband, coach, mentor, and leader. Scott avails his network to share poignant life lessons from an array of people including professional athletes and sports executives, a world-famous Movie Director, Saudi royalty; and his teenage daughters, among many others. *Be Where Your Feet Are* provides a humbling and vulnerable peek behind the curtain as well as a framework, anecdotes, and exercises to guide the reader towards self-discovery. A gifted storyteller with an uncanny ability and willingness to bare raw emotion, Scott weaves in and out of stories that have left deep imprints on him and are written to lift and inspire.

Bulletproof Butterfly

I wasn't a rookie, but I made a mistake because I was selfish, impulsive, and headstrong. I was also in love. My desire for her overwhelmed me. Consumed me. Distracted me. To protect her, I stood motionless as my partner pried her from the security of my arms. I watched as she fought his hold. I even listened when she screamed that she hated me. For years I've been patient, I've been smart, and I've gone by the book. But now... it's finally over. It's time to get my girl back. When I show up to reclaim what's mine, I discover she's not ready to forgive me quite yet... but that's okay, because I have no problem reminding her just how good it used to be, even if I have to show her over and over again. What I do have a problem with is the guy who's been trying to take my place. Because here's the thing, I've waited too long to have her in my arms again to have anybody stand in my way... and I'm done following the rules.

Biohack Your Brain

"This is how we will change the world, one soul at a time," Wim says. "We alter the collective consciousness by awakening to our own boundless potential. We are limited only by the depth of our imagination and the strength of our conviction." If you're ready to explore and exceed the limits of your own potential, The Wim Hof Method is waiting for you.

Bliss Brain

Award Winner in the Science category of the 2020 Best Book Awards sponsored by American Book Fest Award-winning author and thought leader Dawson Church, Ph.D., blends cutting-edge neuroscience with intense firsthand experience to show you how you can rewire your brain for happiness-starting right now. Neural plasticity-the discovery that the brain is capable of rewiring itself-is now widely understood. But what few people have grasped yet is how quickly this is happening, how extensive brain changes can be, and how much control each of us has over the process. In Bliss Brain, famed researcher Dawson Church digs deep into leading-edge science, and finds stunning evidence of rapid and radical brain change. In just eight weeks of practice, 12 minutes a day, using the right techniques, we can produce measurable changes in our brains. These make us calmer, happier, and more resilient. When we cultivate these pleasurable states over time, they become traits. We don't just feel more blissful as a temporary state; the changes are literally hard-wired into our brains, becoming stable and enduring personality traits. The startling conclusions of Church's research show that neural remodeling goes much farther than scientists have previously understood, with stress circuits shriveling over time. Simultaneously, "The Enlightenment Circuit"-associated with happiness, compassion, productivity, creativity, and resilience-expands. During deep meditation, Church shows how "the 7 neurochemicals of ecstasy" are released in our brains. These include anandamide, a neurotransmitter that's been named "the bliss molecule" because it mimics the effects of THC, the active ingredient in cannabis. It boosts serotonin and dopamine; the first is an analog of psilocybin, the second of cocaine. He shows how cultivating these elevated emotional states literally produces a self-induced high. While writing Bliss Brain, Church went through a series of disasters, including escaping seconds ahead of a California wildfire that consumed his home and office and claimed 22 lives. The fire triggered a painful medical condition and a financial disaster. Through it all, Church steadily practiced the techniques of Bliss Brain while teaching them to thousands of other people. This

book weaves his story of resilience into the fabric of neuroscience, producing a fascinating picture of just how happy we can make our brains, no matter what the odds.

Look Better Naked

Offers tips and plans for reshaping a woman's body, reveals the power-foods that should be eaten daily, and provides a workout that can be done in just minutes a day.

Smart Fat

The innovative guide that reveals how eating more fat—the smart kind—is the key to health, longevity, and permanent weight loss. For years experts have told us that eating fat is bad. But by banning fat from our diets, we've deprived ourselves of considerable health benefits—and have actually sabotaged our own efforts to lose weight. Though they originally came from vastly different schools of thought about diet and weight loss, renowned nutritionist Jonny Bowden and well-respected physician Steven Masley independently came to the same conclusion about why so many people continually fail to shed pounds and get healthy. It all comes back to a distinction far more important than calories vs. carbs or paleo vs. plant-based: smart fat vs. dumb fat. In *Smart Fat*, they explain the amazing properties of healthy fat, including its ability to balance hormones for increased energy and appetite control, and its incredible anti-inflammatory benefits. The solution for slimming down—and keeping the pounds off for life—is to “smart-fat” your meals, incorporating smart fats with fiber, protein, and most importantly, flavor. Bowden and Masley identify smart fats, explain what not to eat, and provide a thirty-day meal plan and fifty recipes based on the magic formula of fat, fiber, protein, and flavor. It's time to unlearn what we think we know about food. Getting smart about fat—and everything you eat—and learning to smart-fat your meals is the only solution you'll ever need.

The Circadian Code

Change your daily routine, transform your health. Circadian rhythms are biological processes or clocks that exist in each one of our cells. Programmed to turn genes on or off at different times of the day or night, they influence every aspect of our health from weight and energy levels through to resistance to disease and infection, and how well we sleep. Now, in *The Circadian Code*, this new science is revealed, showing that the timings of our day (when we eat, sleep, exercise, work) are more crucial than we ever thought before. And that, most importantly, if your daily schedule is out of sync with your circadian rhythms, you can fix it! Whether you are a shift worker, a frustrated dieter, someone suffering from sleep problems or chronic illness, whatever your health concern, *The Circadian Code* is the key to unlocking your health.

The Diet Compass

The answer to all questions about ageing and nutrition. When science journalist Bas Kast collapsed with chest pains when he was only 40, he was faced with an existential question: had he ruined his health with junk food? He decided to radically change his eating habits in order to heal himself. But what is really good for you? This was the beginning of a journey of discovery into the latest research into ageing and nutrition — and it lasted several years. What do people with a particularly long life span eat? How can you lose weight efficiently? Are afflictions typical of old age avoidable? Can you 'eat yourself young' with certain foods? Much of what we think is healthy can even be harmful. Bas Kast has filtered out from thousands of sometimes contradictory studies scientifically founded findings about what really makes for healthy eating.

Ageless Man

Sooner or later, starting from forty, each man knows various disorders: general tiredness, overweight, cardiovascular troubles, sexual problems, memory losses, irritability, and tendency to depress. Often, they put these disturbances on stress and overwork. These disorders are actually due to a natural phenomenon easy to diagnose: the progressive reduction in the production of male hormones. It is

the androgenic disease of andropause or andropause disease. To neglect this phenomenon leads to early aging and the development of psychological problems, which can affect personal life. However, for many years, the treatment of male aging exists. Thanks to suitable hormonal proportioning, it is possible to slow down aging and even to prevent it. But for lack of information or because they do not dare speak of their problems, men seldom resort to medicine. Georges Debled MD, Associate Professor of Urology, and specialist in andrology joins together in these bright and precise book results of most recent medical research and its forty years of experience on treatment and prevention of aging diseases. He presented this topic in Dallas in 1992. Unfortunately, generally, androgenic disease of andropause is only recognized, occasionally and tardily by doctors, at its end-stage called Low Testosterone in old age. But andropause disease has a commencement around forty, and sometimes before. That condition produces a pathologic fall in the production of dihydrotestosterone, the potent sexual hormone produced from the transformation of testosterone, and, consequently, sexual aging. With time, lack of androgens induces diabetes, high cholesterol, arterial rigidity and hypertension, cardiovascular diseases, osteoarthritis, hearing and eye troubles, nervous breakdown, Parkinson's, and Alzheimer's diseases. The Ageless Man explains the facts and principles of sexual aging, prostate problems, and conditions of aging since their early stages; and how to prevent them. Prevention of diseases of aging should be a priority for everyone who wants to live healthy longevity beyond eighty. The Ageless Man is already born. Do you want to be him?

Sex, Lies, and Menopause

In this revolutionary work -- a landmark that signals the true beginning of feminist medicine -- a doctor, a philosopher, and a scientist prove that by postponing marriage and motherhood, women have accelerated the aging process, resulting in earlier menopause and, ultimately for thousands, earlier death. In Sex, Lies, and Menopause, T.S. Wiley, Julie Taguchi, M.D., and Bent Formby, Ph.D., turn thirty years of medical and cultural wisdom on its head, challenging both the medical establishment and modern feminists who believe women can delay childbearing that menopause, a natural state of female maturity, does not have to lead to potentially deadly medical conditions. Sex, Lies, and Menopause offers strong evidence that the use of synthetic hormones leads to cancer and advises women to turn to natural hormone replacement therapy -- derived from plants, not drugs -- to help them elevate their estrogen level for greater energy, libido, and intellectual capacity. A groundbreaking effort of creative insight and astute research, this book fearlessly tackles one of the greatest health crises facing American women today. Provocative, empowering, and scientifically sound, Sex, Lies, and Menopause addresses the inherent benefits of natural progesterone, reveals the lies advanced by

the medical and drug establishments, and challenges women to demand a medical future where their health comes first. The research presented here will at last allow women to create their own plan of action by safely putting themselves on the path to better health and hormonal balance at any stage of life.

Boundless

From Matthew Crawford, 'one of the most influential thinkers of our time' (Sunday Times), comes *The World Beyond Your Head* - a hugely ambitious manifesto on flourishing in the modern world. In this brilliant follow-up to *The Case for Working with Your Hands*, Crawford investigates the challenge of mastering one's own mind. With ever-increasing demands on our attention, how do we focus on what's really important in our lives? Exploring the intense focus of ice-hockey players, the zoned-out behaviour of gambling addicts, and the inherited craft of building pipe organs, Crawford argues that our current crisis of attention is the result of long-held assumptions in Western culture and that in order to flourish, we need to establish meaningful connections with the world, the people around us and the historical moment we live in. Praise for *The Case for Working With Your Hands*: 'The best book I have read for ages . . . a profound exploration of modern education, work and capitalism' Telegraph 'Full of interesting stories and thought-provoking aperçus enlivened with humour . . . Important, memorable and enjoyable' The Times 'Masterly' Economist Matthew Crawford is a philosopher and mechanic. He has a Ph.D. in political philosophy from the University of Chicago and served as a postdoctoral fellow on its Committee on Social Thought. Currently a senior fellow at the Institute for Advanced Studies in Culture at the University of Virginia, he also runs Shockoe Moto, a motorcycle repair shop.

Eat Like You Give a Fork

While government and nutritional agencies still spout the failed mantra of calorie reduction, doctors treating diabetes and obesity are experiencing extraordinary results among patients cutting out carbs; a diet which has the essential benefit of allowing you to lose weight without ever feeling hungry. With forensic journalistic rigour and in compelling prose, world authority Gary Taubes analyses the bad science behind our nutritional dogma. He shows that weight gain is driven by genetic, hormonal factors - and not overeating or 'gluttony' as is commonly the underlying suggestion - citing compelling evidence that people with the propensity to fatten easily can be helped best by a low carbohydrate high fat diet. This groundbreaking read offers hope to anyone wishing to prevent or reverse diabetes or obesity - as well as anyone wanting to eat more healthily - and will fundamentally change our habits around food forever.

Effective Fervent Prayer

Sugar is the new controlled substance. More addictive than cocaine, the deadly white stuff has become the focus of health professionals worldwide who are highlighting the dangers of over-indulgence. And whilst we all know that a diet high in sugar can cause obesity, heart disease, cancer and diabetes, it is now also linked to a wide range of other serious health conditions, such as poor brain development in children, cataracts – even Alzheimer's. Quite simply, our excess intake of sugar, from the spoonfuls we tip into our tea to the high levels of fructose hidden in packaged foods, is making us fat and sick, and is prematurely ageing our skin. In Sugar Detox nutritionist Brooke Alpert and dermatologist Dr Patricia Farris provide a revolutionary plan which will limit excess blood sugar, slim your waistline and increase your energy levels. It will help you to recapture youthful skin and good health. The secret? * A three-day detox sugar fix to rid your system of sugar and a three-day skin fix to pamper you on your journey to looking and feeling great * A four-week eating plan, delicious recipes and menus to help you to lose – and keep off – unwanted pounds now and in the future * A four-week skincare regime to fight the ageing process and keep your skin looking as youthful as ever. This is an easy-to-follow plan for looking and feeling your best – and most importantly, it will break your sugar addiction once and for all.
