Principles and Practice of Gynecologic Oncology

At the turn of the century gynecology had achieved independence from surgery in most medical schools; although gynecologists were surgeons, their interests were turning toward nonsurgical aspects of their specialty. In 1900, merely two years after the Curies' discovery, radium was first used as a treatment for carcinoma of the cervix. In that day cervical cancer claimed more women's lives than any other malignancy and was described by William P. Graves, the second professor of gynecology at Harvard as follows: 'Cancer of the cervix may rightly be termed of all tumors one of the most deadly and most ghastly. It kills by slow torture, causing in later stages months of agonizing pain and producing a discharge of such a foul and nauseating character as to repel proper medical assistance. Nurses declined to care for these cases, while many public hospitals closed their wards to them as patients.' In late twentieth century parlance the dramatic results of radium therapy would indeed have been called a 'breakthrough' and radium techniques, later combined with external irradiation, were developed by gynecologists, no longer just surgeons. Pathology was the basic science of gynecology and gynecologists with a special interest in pathology served as pathologist to the departments of gynecology. As late as 1970 six months of the three-year residency program in obstetrics and gynecology at Harvard were devoted to formal training in pathology.

Recent Trends in Obstetrics and Gynecology

Comprehensive and high-yield, this text is a digestible resource for the major anatomic, physiologic, and therapeutic principles of surgical diseases. Rather than focus on clinical presentation and pre-operative management, it presents sensible algorithmic approaches to treatment for each pathology, with particular attention to operative options. This allows the reader to develop a large armamentarium of surgical options to safely treat surgical problems and aid in the decision-making process in an organized fashion, with critical steps and techniques of specific operations included in each chapter. Importantly, this book provides a concise list of steps for common surgical operations, namely those frequently encountered during the Certifying Oral Board exam after completing residency, which is uncommon in the currently available study material. Chapters also include suggested readings and summaries of pivotal studies on the specific topics, serving as an easy reference for the content provided. The topics covered begin with pre-operative evaluation and anesthesiology, then proceed anatomically across all relevant body systems and organs, as well as trauma, transplantation, pediatric surgery, and much more. Written with senior-level general surgery residents preparing for the qualifying (written) and certifying (oral) board examinations clearly in mind, it will also be valuable to all levels of trainees preparing for the annual American Board of Surgery In-service Training Exam (ABSITE) as well as medical students with an interest in surgical training and trainees in their fellowship after completing residency.

Update in Gynecologic Oncology, An Issue of Obstetrics and Gynecology Clinics - E-Book

This concise and practical guide enables the gynecologist to differentiate between benign and malignant gynecologic conditions to determine the best management options for the patient. Over the past three decades, as the specialty of obstetrics and gynecology has matured into a broad and diverse group of skills and disciplines, it has become apparent that there are diagnoses and conditions in gynecologic oncology where the obstetrician-gynecologist has a level of uncertainty, or lack of confidence in his ability or knowledge base to adequately manage the patient and therefore refers the patient to a gynecologic oncologist. This text portrays the advances in the field and reviews the current management of a number of gynaecologic conditions to give the reader the confidence

needed to deal with these issues. The distinguished Editors have crafted the book to include: Case vignettes to provide clinical context Pathology notes to aid diagnostic outcomes Management guidance for obgyn practitioners to enable the best outcome for their patients Each topic is introduced with a concise overview followed by case-based scenarios which discuss the specific management of common problems. Providing the general gynecologist with the current clinical information necessary to manage conditions and identify the situations where consultation or referral to a gynecologic oncologist would be in the patient's best interest.

In *100 to 1 in the Stock Market*, Thomas Phelps discloses the secrets and strategies to increasing your wealth one hundredfold through buy-and-hold investing. Unlike the short-term trading trends that are popular today, Phelps's highly logical, yet radical approach focuses on identifying compounding machines in public markets, buying their stocks, and holding these investments long term for at least ten years. In this indispensable guide, Phelps analyzes what made the big companies of his day so profitable for the diligent, long-term investor. You will learn how to identify and invest in profitable business models without visible growth ceilings that will quickly increase your earnings. Worth its weight in gold (and then some), *100 to 1 in the Stock Market* illuminates the way to the path of long-term wealth for you and your heirs. With this classic, yet highly relevant approach, you will pick companies wisely and watch your investments soar! Thomas William Phelps (1902-1992) spent over 40 years in the investing world working as a private investor, columnist, analyst, and financial advisor. His illustrious investing career began just before the stock market crash in 1929 and lasted into the 1970s. In 1927, he began his career with *The Wall Street Journal* where he was a reporter, news editor, and chief. Beginning in 1936, he edited *Barron's National Financial Weekly*. From 1949 to 1960, he served as an assistant to the chairman and manager of the economics department at Socony Mobil Oil. Following this venture, he was a partner in the investment firm of Scudder, Stevens & Clark until his retirement in 1970. "One of the five greatest investment books you've never heard of" -- *The Daily Reckoning* "Of all the books on investing that I've read over the years, *100 to 1 in the stock market* one was at once, the most pleasurable and most challenging to my own beliefs." -- *Value Walk* (ValueWalk.com) "For years we handed out copies of Mr. Phelps book as bonuses." -- Timothy Lutts, *Cabot Investing Advice*, one of the largest investment advisories and newsletters in the country since 1970

The new edition of this canonical text on male reproductive medicine will cement the book's market-leading position. Practitioners across many specialties - including urologists, gynecologists, reproductive endocrinologists, medical endocrinologists and many in internal medicine and family practice – will see men with suboptimal fertility and reproductive problems. The book provides an excellent source of timely, well-considered information for those training in this young and rapidly evolving field. While several recent books provide targeted 'cookbooks' for those in a male reproductive laboratory, or quick reference for practising generalists, the modern, comprehensive reference providing both a background for male reproductive medicine as well as clinical practice information based on that foundation has been lacking until now. The book has been extensively revised with a particular focus on modern molecular medicine. Appropriate therapeutic interventions are highlighted throughout.

United Nations projections indicate that over the next 50 years, the populations of virtually all countries of Europe as well as Japan will face population decline and population ageing. The new challenges of declining and ageing populations will require comprehensive reassessments of many established policies and programmes, including those relating to international migration. Focusing on these two striking and critical population trends, the report considers replacement migration for eight low-fertility countries (France, Germany, Italy, Japan, Republic of Korea, Russian Federation, United Kingdom and United States) and two regions (Europe and the European Union). Replacement migration refers to the international migration that a country would need to offset population decline and population ageing resulting from low fertility and mortality rates.

In today's globalized world, traditions of a national Self and a national Other no longer hold. This timely volume considers the stakes in our changing definitions of national boundaries in light of the unmistakable transformation of German and Dutch societies. Examining how the literature of migration intervenes in public discourses on multiculturalism and including detailed analysis of works by the Turkish-German writers Emine Sevgi Özdamar and Feridun Zaimoglu and the Moroccan-Dutch writers Abdelkader Benali and Hafid Bouazza, *New Germans, New Dutch* offers crucial insights into the ways in which literature negotiates both difference and the national context of its writing.

Sharepoint 2010

The shocking true story of a bizarre kidnapping and the victims' re-victimization by the justice system. In March 2015, Denise Huskins and her boyfriend Aaron Quinn awoke from a sound sleep into a nightmare. Armed men bound and drugged them, then abducted Denise. Warned not to call the police or Denise would be killed. Aaron agonized about what to do. Finally he put his trust in law enforcement and dialed 911. But instead of searching for Denise, the police accused Aaron of her murder. His story, they told him, was just unbelievable. When Denise was released alive, the police turned their fire on her, dubbing her the "real-life 'Gone Girl'" who had faked her own kidnapping. In Victim F, Aaron and

Denise recount the horrific ordeal that almost cost them everything. Like too many victims of sexual violence, they were dismissed, disbelieved, and dragged through the mud. With no one to rely on except each other, they took on the victim blaming, harassment, misogyny, and abuse of power running rife in the criminal justice system. Their story is, in the end, a love story, but one that sheds necessary light on sexual assault and the abuse by law enforcement that all too frequently compounds crime victims' suffering.

A national study of social conditions on college campuses found that college officials were concerned about alcohol and drug abuse, crime, breakdown of civility, racial tensions, sex discrimination, and a diminishing commitment to teaching and learning. In response to those findings, this book proposes that both academic and civic standards be clarified and that the enduring values that undergird a community of learning be precisely defined. Six principles are presented that provide a formula for day-to-day decision making on the campus and define the kind of community every college and university should strive to be: (1) a purposeful community, (2) an open community, (3) a just community, (4) a disciplined community, (5) a caring community, and (6) a celebrative community. Appendices present detailed results of the 1989 national survey by the Carnegie Foundation that formed the basis for this report. The survey identified campus life issues of concern, as perceived by 382 responding institutions in the National Survey of College and University Presidents and 355 responding institutions in the 1989 National Survey of Chief Student Affairs Officers by the American Council on Education and the National Association of Student Personnel Administrators. The survey also analyzed views on improving campus life, actions likely to improve campus life, and changes over 5 years in specific problem areas. Reference notes accompany each chapter. (JDD)

It all began in 1885, behind the counter at a popular drug store in rough-and-tumble Waco, Texas. When Charles Alderton mixed together his distinctive brand of flavors, he had no idea he was creating a soft drink that would become a national sensation. In 1986, Dr Pepper merged with Seven-Up, another leader in the fast-growing non-cola category. Seven-Up began life in 1929, with the unlikely name of Bib-Label Lithiated Lemon-Lime Soda. Illustrated with gorgeous advertising and photographs from the earliest days of the soft drink industry, this lavish volume tells the surprising story of ongoing battles for industry supremacy. Individually boxed. 144 pp., 141 color, 92 black & white images.

Imagine sending a magazine article to 10 friends-making photocopies, putting them in envelopes, adding postage, and mailing them. Now consider how much easier it is to send that article to those 10 friends as an attachment to e-mail. Or to post the article on your own site on the World Wide Web. The ease of modifying or copying digitized material and the proliferation of computer networking have

raised fundamental questions about copyright and patent—intellectual property protections rooted in the U.S. Constitution. Hailed for quick and convenient access to a world of material, the Internet also poses serious economic issues for those who create and market that material. If people can so easily send music on the Internet for free, for example, who will pay for music? This book presents the multiple facets of digitized intellectual property, defining terms, identifying key issues, and exploring alternatives. It follows the complex threads of law, business, incentives to creators, the American tradition of access to information, the international context, and the nature of human behavior. Technology is explored for its ability to transfer content and its potential to protect intellectual property rights. The book proposes research and policy recommendations as well as principles for policymaking.

The Legend of Dr Pepper/Seven-Up

This step-by-step guide to nutritional therapy and colon cleansing includes important self-help strategies for people who want to take responsibility for their own health and well-being. Author Kristina Amelong is a colon hydrotherapist and nutritional counselor who describes her own five-year battle with Irritable Bowel Syndrome and the tools she used to recover. The program that Kristina has designed includes the nutritional research work of Dr. Weston A. Price who studied the diets of fourteen traditional societies during the 1930s and 1940s. His goal was to understand what made human beings healthy and what allowed them to have perfect teeth. The food Kristina recommends to readers are the traditional foods that gave health to the populations that Price researched. When people remove accumulated waste material in their bowel, the body can regenerate with the nutrients available in the Weston A. Price diet. Detoxification and simple, nourishing foods cause people to thrive much like the disease-free native cultures that Price studied.

Lead a life of adventure, meaning and purpose—and earn a good living. “Thoughtful, funny, and compulsively readable, this guide shows how ordinary people can build solid livings, with independence and purpose, on their own terms.”—Gretchen Rubin, author of the #1 New York Times bestseller *The Happiness Project* Still in his early thirties, Chris Guillebeau completed a tour of every country on earth and yet he's never held a “real job” or earned a regular paycheck. Rather, he has a special genius for turning ideas into income, and he uses what he earns both to support his life of adventure and to give back. Chris identified 1,500 individuals who have built businesses earning \$50,000 or more from a modest investment (in many cases, \$100 or less), and focused on the 50 most intriguing case studies. In nearly all cases, people with no special skills discovered aspects of their personal passions that could be monetized, and were able to restructure their lives in ways that gave them greater freedom and fulfillment. Here, finally, distilled into one easy-to-use guide, are the most valuable lessons from those who've learned how to turn what they do into a gateway to self-fulfillment. It's all about finding the intersection between your “expertise”—even if you don't consider it such—and what other people will pay for. You don't need an MBA, a business plan or even employees. All you need is a product or service that springs from what you love to do anyway, people willing to pay, and a way to get paid. Not content to talk in generalities, Chris tells you exactly how many dollars his group of unexpected

entrepreneurs required to get their projects up and running; what these individuals did in the first weeks and months to generate significant cash; some of the key mistakes they made along the way, and the crucial insights that made the business stick. Among Chris's key principles: If you're good at one thing, you're probably good at something else; never teach a man to fish—sell him the fish instead; and in the battle between planning and action, action wins. In ancient times, people who were dissatisfied with their lives dreamed of finding magic lamps, buried treasure, or streets paved with gold. Today, we know that it's up to us to change our lives. And the best part is, if we change our own life, we can help others change theirs. This remarkable book will start you on your way.
