Nursing Care Plans

The bestselling nursing care planning book on the market, Nursing Care Plans: Diagnoses, Interventions, and Outcomes, 8th Edition covers the most common medical-surgical nursing diagnoses and clinical problems seen in adults. It includes 217 care plans, each reflecting the latest evidence and best practice guidelines. NEW to this edition are 13 new care plans and two new chapters including care plans that address health promotion and risk factor management along with basic nursing concepts that apply to multiple body systems. Written by expert nursing educators Meg Gulanick and Judith Myers, this reference functions as two books in one, with 147 disorder-specific and health management nursing care plans and 70 nursing diagnosis care plans to use as starting points in creating individualized care plans. 217 care plans --- more than in any other nursing care planning book. 70 nursing diagnosis care plans include the most common/important NANDA-I nursing diagnoses, providing the building blocks for you to create your own individualized care plans for your own patients. 147 disorders and health promotion care plans cover virtually every common medical-surgical condition, organized by body system. Prioritized care planning guidance organizes care plans from actual to risk diagnoses,

from general to specific interventions, and from independent to collaborative interventions. Nursing diagnosis care plans format includes a definition and explanation of the diagnosis, related factors, defining characteristics, expected outcomes, related NOC outcomes and NIC interventions, ongoing assessment, therapeutic interventions, and education/continuity of care. Disorders care plans format includes synonyms for the disorder (for easier cross referencing), an explanation of the diagnosis, common related factors, defining characteristics, expected outcomes, NOC outcomes and NIC interventions, ongoing assessment, and therapeutic interventions. Icons differentiate independent and collaborative nursing interventions. Student resources on the Evolve companion website include 36 of the book's care plans - 5 nursing diagnosis care plans and 31 disorders care plans. Three NEW nursing diagnosis care plans include Risk for Electrolyte Imbalance, Risk for Unstable Blood Glucose Level, and Risk for Bleeding. Six NEW health promotion/risk factor management care plans include Readiness for Engaging in a Regular Physical Activity Program, Readiness for Enhanced Nutrition, Readiness for Enhanced Sleep, Readiness for Smoking Cessation, Readiness for Managing Stress, and Readiness for Weight Management. Four NEW disorders care plans include Surgical Experience: Preoperative and Postoperative Care, Atrial Fibrillation, Bariatric Surgery, and Gastroenteritis. NEW Health Promotion and Risk Factor Management Care Plans chapter emphasizes the importance of preventive care and teaching for self-management. NEW Basic Nursing Concepts Care Plans chapter focuses on concepts that apply to disorders found in multiple body systems. UPDATED care plans ensure consistency with the latest U.S. National Patient Safety Goals and other evidence-based national treatment guidelines. The latest NANDA-I taxonomy keeps you current with 2012-2014 NANDA-I nursing diagnoses, related factors, and defining characteristics. Enhanced rationales include explanations for nursing interventions to help you better understand what the nurse does and why.

Nursing Care Plans

This edition contains 189 care plans covering the most common nursing diagnoses and clinical problems in medical-surgical nursing. It includes four new disorders care plans, SARS, lyme disease, west Nile virus, and obstructive sleep apnea.

Nursing Care Plans

"Covering the most common medical-surgical nursing diagnoses and clinical problems seen in adults, Nursing Care Plans: Diagnoses, Interventions, and Outcomes, 9th Edition contains 217 care plans, each reflecting the latest best practice guidelines. This new edition specifically features three new care plans, two expanded care plans, updated content and language reflecting the most current clinical practice and professional standards, enhanced QSEN integration, a new emphasis on interprofessional collaborative practice, an improved page design, and more"--Publisher.

Nursing Care Plans

A comprehensive compilation of care plans specific to patient problems requiring hospitalization. Timely information assists the nurse in the development, deliverance, and documentation of patient care.

Nursing Care Plans

Features more than 200 care plans covering the common medical-surgical nursing diagnoses and clinical problems. This title offers a collection of 68 nursing diagnosis care plans to use as starting points for creating individualized care plans and a library of 143 disease care plans for medical - surgical conditions encountered in nursing practice.

Pathophysiology and Pharmacology in Nursing

Pathophysiology and Pharmacology in Nursing provides an integrated introduction to both the biology of disease and the therapeutic agents that are used to manage them.

Nursing Care Plans

"Nursing Care Plans" includes 195 care plans for commonly encountered clinical problems in medical-surgical nursing. Written for students and/or clinicians, this book reflects the most current practice and professional standards in nursing, yet its level and format are student friendly.

Nursing Care Planning Made Incredibly Easy!

The new edition of *Nursing Care Planning Made Incredibly Easy* is the resource every student needs to master the art of care planning, including concept mapping. Starting with a review of the nursing process, this comprehensive resource provides the foundations needed to write practical, effective care plans for patients. It takes a step-by-step approach to the care planning process and builds the critical thinking skills needed to individualize care in the clinical setting. Special tips and information sections included throughout the book help students incorporate evidence-based standards and rationales into their nursing interventions.

Nursing Care Plans

Designed to help students learn how to create nursing care plans and effectively document care, this practical book focuses on the nursing plans that are most important, ensuring that students learn what they need to know and that they can find the information they need easily without being distracted by irrelevant information. Packed with easy-to-understand information and focused on helping students develop critical reasoning skills, this respected text presents the most likely nursing diagnoses and collaborative problems with step-by-step guidance on nursing actions and rationales for interventions. More than 85 nursing care plans translate theory into clinical practice. This exciting revision includes special risk consideration icons called “Clinical Alert” (derived from the most recent IOM report) that integrate patient-specific considerations into each care plan. Other enhancements include a streamlined format for easier use; new care plans for maternity, pediatric, and mental health nursing.

Nursing Diagnosis Handbook and Gulanick: Nursing Care Plans, 7e Textbooks - Elsevier Care Planning Package

This money-saving Elsevier Care Planning package includes Ackley: *Nursing Diagnosis Handbook*, 9e and Gulanick: *Nursing Care Plans*, 7e Textbooks.

All-in-One Care Planning Resource

The only book featuring nursing care plans for all core clinical areas, Swearingen's *All-In-One Nursing Care Planning Resource*, 4th Edition provides 100 care plans with the nursing diagnoses and interventions you need to know to care for patients in all settings. It includes care plans for medical-surgical, maternity/OB, pediatrics, and psychiatric-mental health, so you can use just one book throughout your entire nursing curriculum. This edition includes a new care plan addressing normal labor and birth, a new full-color design, new QSEN safety icons, new quick-reference color tabs, and updates reflecting the latest NANDA-I nursing diagnoses and collaborative problems. Edited by nursing expert Pamela L. Swearingen, this book is known for its clear approach, easy-to-use format, and straightforward rationales. NANDA-I nursing diagnoses are incorporated throughout the text to keep you current with NANDA-I terminology and the latest diagnoses. Color-coded sections for medical-surgical, maternity, pediatric, and psychiatric-mental health nursing care plans make it easier to find information quickly. A consistent format for each care plan allows faster lookup of topics, with headings for Overview/Pathophysiology, Health Care Setting, Assessment, Diagnostic Tests, Nursing Diagnoses, Desired Outcomes, Interventions with Rationales, and Patient-Family Teaching and Discharge Planning. Prioritized nursing diagnoses are listed in order of importance and physiologic patient needs. A two-column format for nursing assessments/interventions and rationales makes it easier to scan information. Detailed rationales for each nursing intervention help you to apply concepts to specific patient situations in clinical practice. Outcome criteria with specific timelines help you to set realistic goals for nursing outcomes and provide quality, cost-effective care. NEW! Care plan for normal labor and birth addresses nursing care for the client experiencing normal labor and delivery. UPDATED content is written by practicing clinicians and covers the latest clinical developments, new pharmacologic treatments, patient safety considerations, and evidence-based practice guidelines. NEW full-color design makes the text more user friendly, and includes NEW color-coded tabs and improved cross-referencing and navigation aids for faster lookup of information. NEW! Leaf icon highlights coverage of complementary and alternative therapies including information on over-the-counter herbal and other therapies and how these can interact with conventional medications.

Clinical Pocket Reference for NURSES

Clinical Pocket Reference for Nurses Third Edition Updated, expanded version of this “essential resource” (Nursing Standard 2016). Nursing students, mentors, newly qualified nurses and practice

educators will find that this resource enables and eases the move into real life practice. It provides:

- Rapid access to key information in mobile optimized format
- Promotes safe, confident nursing and an holistic approach
- Universal reference tool
- Comprehensive guide to assessment of adult patient

1: Assessment 2: Physiological monitoring 3: Biochemistry 4: Infection control 5: Nutrition 6: Drug administration 7: Intravenous therapy 8: Resuscitation 9: Terminology

Patient Assessment and Care Planning in Nursing

This book introduces nursing students and novice practitioners to different stages of the assessment process. It covers a range of issues including the nurse's role in assessment, how to make sense of patient information, using assessment tools, nursing diagnosis, care planning principles and nursing models, ethical dilemmas in assessment and decision-making in delivering nursing care. The book encourages the development of a person-centered, critical approach rather than an overreliance on assessment tools.

Nursing Care Plans

Care plans in outline format arr. systemically emphasize ongoing assessment & therapeutic interventions.

Nursing Care Plans for Newborns and Children

This is a new edition of a well-established textbook which demonstrates the theory and practice of one of the most popular models used in both university and clinical practice settings. Fully updated throughout, Karen Holland, Jane Jenkins and their colleagues explain how the Roper-Logan-Tierney Model can help today's student learn how to care for patients in a variety of health care contexts and use it as a framework for their nursing practice. Helpfully presented in two parts, the book initially shows how the model can be used to identify the factors which affect the human lifespan and how health and illness work to influence the dependence-independence continuum. The second part then examines each of the 'activities of living', clearly demonstrating their interconnectivity and how they are influenced, in turn, by biological, psychological, sociocultural, environmental and politico-economic influences. Discussion and 'real-life' examples throughout show how this helpful framework can be used as a basis for nursing assessment, planning, delivery and evaluation of care. Rich with thought provoking exercises, Applying the Roper-Logan-Tierney Model in Practice, third edition, retains its helpful problem solving approach which strongly encourages further learning and reflection. The volume will be ideal for all pre-registration nursing students, as well as others such as Nursing Associates, who wish to improve their knowledge and understanding of evidence-based nursing care. New edition of a successful textbook which explains the theory and practice of one of the most popular models of nursing Structured approach to a core range of 'activities of living' clearly illustrate how they interconnect and may be promoted, or compromised, by health and illness, and influenced by external factors Explains the theory to show how it can be applied in practice to assess, plan, deliver and evaluate individualised nursing care A helpful case study approach enables readers see how the model works in 'real life' Written by experts who actively encourage a problem-solving approach to nursing care and practice Additional exercises are designed to encourage further learning and reflective practice, as well as develop skills in literature searching and evidence-based care Helpful appendices include a range of reference material such as the Care Plan Documentation and Audit Tool, Laboratory Reference Values, the Roper-Logan Tierney Assessment Schedule and other commonly used nursing documentation Ideal for use in a variety of contemporary health care delivery environments including the acute and community-based settings Presents the latest evidence-base for safe and effective nursing practice Ideal for use in a variety of contemporary Health Care Delivery settings, both in the UK and overseas

Applying the Roper-Logan-Tierney Model in Practice

Designed for the Diploma of Nursing, Foundations of Nursing, Enrolled Nurses, Australia and New Zealand edition is mapped to the HLT54115 training package competencies, and aligns to the revised Standards for Practice for the Enrolled Nurse. Written to equip the enrolled nurse with current knowledge, and basic problem-solving and critical-thinking skills to successfully meet the demanding challenges of today's health care, the text clearly explains concepts and definitions, and scaffolds knowledge. The student-friendly text provides a clear and fresh approach to the study of nursing; it is straightforward and heavily illustrated with colour photos of procedures.

Foundations of Nursing: Enrolled Nurses

Contains a Nurse's Pocket Minder, which lists nursing diagnoses through the latest NANDA Conference. Make sure your students use the best pocket guide to plan patient care! This handy pocket guide helps nursing students identify interventions most commonly associated with nursing diagnoses when caring for patients. It's the perfect resource for hospital and community-based settings.

Obstetric and Gynecologic Nursing

Create individualized nursing care plans with ease and confidence! Ackley and Ladwig's Nursing Diagnosis Handbook, 13th Edition uses an easy, three-step system to guide you through client assessment, nursing diagnosis, and care planning. Step-by-step instructions show how to implement care and evaluate outcomes, and help you build skills in diagnostic reasoning and critical thinking. To make care planning easier, this handbook allows you to look up nursing diagnoses and care plans for more than 1450 client symptoms, as well as interventions from NIC (Nursing Interventions Classification) and outcomes from NOC (Nursing Outcomes Classification). Edited by noted nursing educators Mary Beth Flynn Makic and Marina Reyna Martinez-Kratz, this reference provides everything you need to write nursing care plans in just one book! Easy-to-follow Sections I and II guide you through the nursing process and selection of appropriate nursing diagnoses. Step-by-step instructions show how to use the Guide to Nursing Diagnoses and Guide to Planning Care sections to create a unique, individualized plan of care. UNIQUE! Care plans are provided for each NANDA-International(c) (NANDA-I(c)) -approved nursing diagnosis. Evolve website includes a care plan template, case studies, review questions, and more! Evidence-based interventions and rationales include research studies and references supporting the use of each intervention. Examples of and suggested NIC interventions and NOC outcomes are presented in each care plan. Quality and safety content emphasizes what must be considered to provide safe patient care, and includes QSEN content in Section I. Pediatric, geriatric, multicultural, and home care interventions are included as appropriate for plans of care. Index of NANDA-I(c) Diagnoses on the inside back cover of the book provides quick reference to page numbers. Alphabetical thumb tabs allow quick access to specific symptoms and nursing diagnoses. NEW! Updated content is based on the 2021-2023 NANDA-I(c)-approved nursing diagnoses and reflects new diagnoses, revised diagnoses, and retired diagnoses. NEW! Updated nursing diagnoses include class and domain information as consistent with the current NANDA-I.

Nursing Care Plans

A reference to help nursing students and practising nurses select a nursing diagnosis and write plans of care with ease and confidence. The book provides care plans for every NANDA diagnosis and provides a quick access index of appropriate nursing diagnoses for over 1200 clinical entities.

Nurse's Pocket Guide

An outstanding resource for students and practicing nurses, the Ninth Edition of Lippincott's Manual of Psychiatric Nursing Care Plans contains 52 nursing care plans that address the most commonly encountered behaviors in psychiatric-mental health nursing. An excellent tool to introduce students to clinical psychiatric experience, the Manual demonstrates use of the nursing process in psychiatric nursing and gives suggestions for specific interventions--with rationale--to address particular behaviors, giving the student a sound basis on which to build clinical skills. Covering a range of problems and a variety of approaches, the care plans are meant to be adapted and individualized in planning nursing care for each client. The Ninth Edition has been thoroughly updated and includes new information on complementary and alternative medicine and using the internet; as well as new or expanded appendices on psychopharmacology; side effects of medications and related nursing interventions; and schizoid, histrionic, narcissistic, and avoidant personality disorders.

Ackley and Ladwig's Nursing Diagnosis Handbook

Approx. 978 pages 61 patient problem care plans include the most common/important patient problems, providing the building blocks for you to create your own individualized care plans. 164 disorder care plans cover virtually every common medical-surgical condition, organized by body system. Patient problem care plan format includes a definition/explanation of the diagnosis, related factors, defining characteristics, expected outcomes, ongoing assessment, and therapeutic interventions. Disorder care plan format covers synonyms for the disorder (for ease in cross referencing), a definition, common

related factors, defining characteristics, expected outcomes, ongoing assessment, and therapeutic interventions for each relevant nursing diagnosis. Prioritized care planning guidance internally organizes care plans from "actual" to "risk" diagnoses, from general to specific interventions, and from independent to collaborative/interprofessional interventions, to help you select the most important, priority interventions for your particular patients. NEW! Updated care plans are now based on the evidence-based, complete, and internationally accepted International Classification of Nursing Practice (ICNP®) nursing diagnoses. NEW! 19 all-new care plans are featured in this edition. NEW! Updated content throughout reflects the most current evidence-based practice and national and international guidelines. NEW! Online Care Planner on the Evolve website allows you to easily generate customized care plans based on the book's content. NEW! Improved focus on core content includes several care plans that have been moved from the book's Evolve website.

Nursing Diagnosis Handbook

Part of the skill of nursing and healthcare involves being able to decipher and understand the meanings of results and abbreviations. Fully updated, this second edition is a handy survival guide which will supply you with up-to-date information and help you understand this language, so that you can provide appropriate holistic care to your patients.

Lippincott's Manual of Psychiatric Nursing Care Plans

The most comprehensive psychiatric nursing care planning text available assists students and practitioners in providing effective care in a variety of settings. Clear presentation of information, consistent use of the nursing process, correlation of nursing and medical diagnoses, and prioritization of interventions make this text an invaluable resource. Grounded in the latest classification of the Diagnostic and Statistical Manual of Mental Disorders (DSM-IV-TR) and the most current list of NANDA-approved nursing diagnoses, this text covers a wide range of disorders, their psychopathology, and appropriate nursing interventions with rationales. Care plans use real clinical situations and include therapeutic and nontherapeutic dialogue examples to familiarize nurses with likely scenarios and equip them with the tools they need to feel confident in any clinical setting. The first chapter, The Nursing Process, effectively describes the central principles of psychiatric nursing practice in detailing the ANA's six-step nursing process along with additional information on therapeutic nurse-client communication skills, client history and assessment tools, NIC and NOC, and more. The six-step nursing process format is maintained throughout to emphasize a practice-oriented, problem-solving approach to psychiatric care. Major psychiatric disorders are reviewed consistently and completely with sections including Etiology, Epidemiology, Assessment and Diagnostic Criteria, Interventions, and Prognosis and Discharge Criteria. With this basis of knowledge, relevant care plans are offered in the second section of each chapter. Care plans based on DSM-IV-TR medical and NANDA nursing diagnoses are logically and consistently organized with Assessment Data, Outcome Criteria, Planning and Implementation, and Evaluation sections. Assessment Data sections include detailed related factors (etiology) and defining characteristics or risk factors as appropriate for the specific diagnosis. Outcome Criteria sections give the reader clear indications of the desired end state. Planning and Implementation sections list specific, relevant, and practical nursing interventions with rationales in a clear, comprehensible two-column format. UNIQUE! Therapeutic and non-therapeutic dialogue examples are presented throughout to promote more effective client communication. Evaluation sections state the role of outcome evaluation as a critical and ongoing step in the nursing process. Client and Family Teaching boxes include Nurse Needs to Know and Teach Client and Family sections covering all aspects of post-treatment instructions for clients and caregivers. DSM-IV-TR boxes list all related DSM-IV-TR diagnoses for quick reference. Helpful appendices contain information and strategies that are timely and useful in the care of clients with mental and emotional disorders including such topics as psychiatric and psychosocial therapies, grief and loss, spirituality, and many more.

Nursing Care Plans - Elsevier eBook on VitalSource (Retail Access Card)

The 2021 Lippincott Pocket Drug Guide for Nurses provides current, vital drug information "in a nutshell." This handy pocket guide by Rebecca Tucker gives essential information on over 4,100 medications, including 48 generic drugs newly approved by the FDA, in an easy-access A-to-Z format. The "mini" drug monographs include generic and trade names, drug classes, pregnancy risk category and controlled substance schedule, "black box" warnings, indications & dosages, dose adjustments, adverse effects, drug interactions, nursing considerations, and patient teaching. A special section

following the A-to-Z drugs provides essential Patient Safety information. Appendices cover topical and ophthalmic medications, laxatives, combination products, contraceptives, biological agents (vaccines), and more.

Nursing Care Plans

This money-saving package is a must-have for nursing students! It includes Gulanick's Nursing Care Plans 6th edition text and an electronic version of the textbook that allows students to search, highlight information, take notes, share notes and more. This package makes it simple for students to make the most of their study time and get more use out of their textbooks!

Nursing Care Plans & Documentation

Accompanying CD-ROM has nursing care plans, a customizable psychosocial assessment tool, and monographs about psychotropic drugs.

Medical Abbreviations & Normal Ranges

Confidently plan individualized care for clients in acute care, extended care, and home care environments with Ulrich & Canale's Nursing Care Planning Guides: Prioritization, Delegation, and Clinical Reasoning, 8th Edition. This in-depth nursing care planning guide features 31 detailed nursing diagnosis care plans and 63 disease/disorder care plans that are keyed to specific expected outcomes and interventions. With updated content and the most recent NANDA-I® nursing diagnoses, NIC® interventions, and NOC® outcomes, it reflects the latest nursing taxonomies and evidence-treatment protocols. The most in-depth care plans of any nursing care planning book foster clinical reasoning and promote effective clinical decision-making. 31 nursing diagnosis care plans provide detailed interventions with rationales and documentation guidelines for the most common NANDA-I® nursing diagnoses. 63 in-depth disease/disorder care plans serve as a complete reference for the most common disorders in acute care, extended care, and home care settings. UNIQUE! Care plan format with a focus on prioritized nursing interventions, interventions that can be delegated, and documentation criteria, as well as differentiation between independent and collaborative nursing actions, provides a comprehensive and practical care planning tool. In-depth patient teaching content, with each disorder care plan, concluding with a "Deficient Knowledge" diagnosis with extensive discharge teaching information, serves as a guideline for planning client education. A complete discussion of caring for older adult clients and changes that occur with aging helps you understand the unique considerations of caring for this growing population group. Nursing and collaborative diagnoses are linked to actions and rationales. Body system organization makes content easy to locate. NEW and UNIQUE! A completely new chapter on nursing-sensitive indicators features care plans devoted to "measures and indicators that reflect the structure, processes and outcomes of nursing care" (American Nurses Association, 2004), as well as financial implications for healthcare organizations. NEW! The most recent NANDA-I® nursing diagnoses, NIC® interventions, and NOC® outcomes reflect the most up-to-date nursing taxonomies. NEW! Updated content throughout reflects the latest evidence-treatment protocols and national and international guidelines.

Psychiatric Nursing Care Plans - E-Book

This is an excellent guide for students and practicing nurses for writing care plans to provide comprehensive, individualized and holistic family centered care to children. Nursing care plan in this book are divided into two parts. The first section provides generic care plans for common nursing diagnosis. The care plans in this section will be the building blocks for creating customized care plans tailored to each child's unique nursing diagnosis. The second section with nursing care plans for specifically selected health problems with corresponding medical diagnosis is an added advantage for.

2021 Lippincott Pocket Drug Guide for Nurses

Explains how to assess, plan, provide, and evaluate care for pregnancy, delivery, recovery, abnormal conditions, and newborn care. Features more than 65 of the most common and high-risk care plans for nursing care using the nursing process approach, this text includes NIC interventions, discussions on collaborative problems, key nursing activities, signs and symptoms, and diagnostic studies. --From publisher description.

Nursing Care Plans - Text and E-Book Package

Introducing a plan for success with the only nursing care planning reference book for all core clinical areas! Swearingen's All-In-One Nursing Care Planning Resource, 5th Edition, features over 100 care plans including medical-surgical, maternity/OB, pediatrics, and psychiatric mental health to help you care for patients in any setting. This new edition is the first in the market to include a unique, inter-professional, "patient problem" focus that teaches students how to speak to patients in conversational terms rather than in nursing-specific language. New non-medical-surgical care plans and updated content throughout reflect the latest evidence-based treatment guidelines for national and international clinical practice. Plus, with its clear approach, easy-to-use format, and straightforward rationales, you can use this one book throughout their entire nursing curriculum! Bolded and highlighted Safety Icons corresponds to the safety competency of the Quality and Safety Education for Nurses (QSEN) initiative for easier recognition. Care plans for all four major clinical areas include medical-surgical, OB/maternity, pediatric, and psychiatric-mental health nursing care plans. A consistent format for each care plan enables you to perform faster searches, with headings for Overview/Pathophysiology, Health Care Setting, Assessment, Diagnostic Tests, Patient Problems, Desired Outcomes, Interventions with Rationales, and Patient-Family Teaching and Discharge Planning. Prioritized patient problems are listed in order of importance and physiologic patient needs. Detailed rationales for each nursing intervention help you apply concepts to specific patient situations in clinical practice. Full-color design makes the book more user friendly and includes color-coded tabs and improved cross-referencing and navigation aids for faster information retrieval. NEW! UNIQUE! Interprofessional "patient problems" focus familiarizes you with how to speak to patients and other medical colleagues in the consistent interprofessional language of "patient problems," rather than the nursing-specific language of nursing diagnosis. NEW! Care plans helps you to support the lesbian, gay, bisexual, transgender, queer/questioning, or intersex patient. NEW! Updated content throughout reflects the latest evidence-based treatment guidelines and national and international clinical practice guidelines.

Nursing Care Plans

Get everything you need to create and customize effective nursing care plans, now with evidence-based ICNP® diagnoses! Covering the most common medical-surgical nursing diagnoses and clinical problems, Gulanick & Myers' Nursing Care Plans: Diagnoses, Interventions, and Outcomes, 10th Edition features more than 200 care plans, each reflecting the latest evidence-based guidelines and national and international treatment protocols. It also features highlighted QSEN competencies and a clear differentiation of nursing and collaborative interventions. New to this edition are ICNP® diagnoses, care plans on LGBTQ health issues and on electrolytes and acid-base balance, and a new Online Care Planner that makes it easier than ever to customize care plans. Written by noted educators Meg Gulanick and Judith L. Myers, this #1 care planning book will help you learn to think like a nurse! 61 patient problem care plans include the most common/important patient problems, providing the building blocks for you to create your own individualized care plans. 164 disorder care plans cover virtually every common medical-surgical condition, organized by body system. Patient problem care plan format includes a definition/explanation of the diagnosis, related factors, defining characteristics, expected outcomes, ongoing assessment, and therapeutic interventions. Disorder care plan format covers synonyms for the disorder (for ease in cross referencing), a definition, common related factors, defining characteristics, expected outcomes, ongoing assessment, and therapeutic interventions for each relevant nursing diagnosis. Prioritized care planning guidance internally organizes care plans from "actual" to "risk" diagnoses, from general to specific interventions, and from independent to collaborative/interprofessional interventions, to help you select the most important, priority interventions for your particular patients. NEW! Updated care plans are now based on the evidence-based, complete, and internationally accepted International Classification of Nursing Practice (ICNP®) nursing diagnoses. NEW! 19 all-new care plans are featured in this edition. NEW! Updated content throughout reflects the most current evidence-based practice and national and international guidelines. NEW! Online Care Planner on the Evolve website allows you to easily generate customized care plans based on the book's content. NEW! Improved focus on core content includes several care plans that have been moved from the book's Evolve website.

Lippincott's Manual of Psychiatric Nursing Care Plans

Practical and comprehensive, this essential resource helps you plan individualized care for clients in a variety of settings, including acute care, extended care, and home care environments. It features 33

detailed nursing diagnosis care plans and 65 disease/disorder care plans that are keyed to specific expected outcomes and interventions. This book also includes the popular Online Care Planner that allows you to edit and print standardized nursing diagnosis care plans. Offers the most in-depth care plans of any planning book, fostering critical thinking and promoting effective clinical decision-making. 33 separate nursing diagnosis care plans provide detailed interventions with rationales and documentation guidelines for the most common nursing diagnoses. 65 comprehensive care plans serve as a complete reference for the most common disorders in acute care, extended care, and home care settings. Body system organization makes content easy to locate. Nursing/collaborative diagnoses are linked to actions and rationales. Specific points for discharge teaching serve as guidelines for planning client education. A complete discussion of caring for older adult clients and changes that occur with aging helps you understand the unique considerations of caring for this population group. A new care plan format focuses on prioritized nursing interventions, interventions that can be delegated, and documentation criteria, as well as differentiating between independent and collaborative nursing actions. Features 8 new nursing diagnosis care plans on topics such as comfort, confusion, contamination, decision-making, falls/injury, unstable glucose level, risk-prone health behavior, and self-care. Includes 9 new disease/disorder care plans for Abdominal Trauma, Alzheimer's Disease, Asthma, Enteral Nutrition, Intravenous Conscious Sedation, Internal Radiation Therapy (Brachytherapy), Mechanical Ventilation, Parkinson's Disease, and Total Parenteral Nutrition. Evidence-based practice content presents the latest research findings and standards of care. Updated NANDA nursing diagnoses, NIC interventions, and NOC outcomes reflect the latest nursing taxonomies. An open, user-friendly design makes it easy to quickly locate essential information. The companion Evolve website features 71 new narrated 3D pathophysiology animations that correspond to disorders content in the text.

Ulrich & Canale's Nursing Care Planning Guides E-Book

Doenges, a clinical specialist, Moorhouse, a nurse consultant, and Geissler, a contract practitioner nurse consultant, all working out of Colorado Springs, Colorado, designed this text for both the practicing nurse and nursing student as a reference tool to use in acute care, community and homecare settings. Following introductory chapters on current issues in healthcare and care plan construction, the book is organized by body systems, presenting plans of care including information to assist the nurse in providing holistic care. The enclosed CD-ROM includes sample care plans for 172 disorders which can be customized to fit specific patient needs. Annotation copyrighted by Book News, Inc., Portland, OR
