Featuring coverage on a broad range of topics such as emerging economics, organizational development, and gender diversity, this book is ideally designed for entrepreneurs, policymakers, governmental and non-governmental organizations, business professionals, academics, researchers, and students seeking current research on improving the socio-economic condition of low-income households through various entrepreneurial activities.

Mountainous and rural areas throughout the world have continually been attributed with several hinderances including poverty, faulty governance, and susceptibility to natural disasters. However, with the recent development of tourism, these provinces have seen a strong rise in visitation. Despite this increase in economic sustainability, planners are still presented with many challenges as they try to balance developmental and ecological considerations. Global Opportunities and Challenges for Rural and Mountain Tourism provides emerging research exploring the integration of mountain tourism development and innovative practices for managing contemporary issues and challenges of tourism in these regions including socio-economic impacts, role of stakeholders, and promotional strategies for sustainable tourism development. Featuring coverage on a broad range of topics such as cultural heritage, marketing strategies, and value chain systems, this book is ideally designed for travel agents, tour directors, tour developers, hotel managers, hospitality and tourism professionals, industry practitioners, researchers, geographical scientists, planners, academicians, and students.

Micro-Entrepreneurship and Micro-Enterprise Development in Malaysia: Emerging Research and Opportunities

With their soaring peaks, remote locations, and majestic beauty, mountains have long been a powerful attraction for visitors from all walks of life, who are drawn by the often colorful traditions of local communities, the opportunities for sporting activities, and the spiritual solace to be found in highland landscapes. This study highlights the important role that tourism can play in valuing the natural and spiritual heritage of mountains, and the cultural diversity and traditional practices of mountain peoples. Particularly when linked to nature and rural tourism, mountain tourism can make a valuable contribution to promoting sustainable food systems and adding value to local products. Developing sustainable tourism in mountains requires reducing its negative environmental and social impacts and addressing the challenges posed by climate change. The COVID-19 pandemic has already brought about major changes in the mountain tourism sector and substantial losses for communities and businesses. However, consumer appetites for destinations that are outdoors and less crowded have increased in the wake of the pandemic, and these changes usher in new opportunities for mountain destinations to rebuild a greener and more sustainable form of tourism and rethink their products and services. For this to happen, the following measures will be critical: innovation and development of year-round tourism experiences; investments in infrastructure, particularly for the digitalization of mountain tourism services; strengthening multi-level-governance, partnerships and active community participation; and ensuring regular assessments of the impact of tourism on mountains, the effective management of waste and resources, and clearer practices for defining and managing the carrying capacity of highland destinations.

Micro-enterprise Development in Mountain Areas

Promoting rural entrepreneurship is a necessary step to limit the negative effects of classical agricultural policy based on a linear process and attracting secondary resources to the economic process. The analysis of agricultural policy and rural development in conjunction to entrepreneurship in terms of production may represent a further step in understanding the role and importance of diversifying the rural potentials in contemporary economies. The Handbook of Research on Agricultural Policy, Rural Development, and Entrepreneurship in Contemporary Economies is an essential publication of academic research that examines agricultural policy and its impact on shaping future resilient economy in rural areas and identifies green business models and new business patterns in rural communities. Covering a range of topics such as entrepreneurship, product management, and marketing, this book is ideal for researchers, policymakers, academicians, economists, agriculture professionals, rural developers, business investors, and students.

Western societies are calling for speedy change in agriculture and the agrifood industries to incorporate new quality criteria into the goods they produce. To promote these changes what scientists must develop are not universally implementable technical solutions, but self-diagnosis methods to be used

by agricultural producers and their advisors. They also need to evolve new procedures for research intervention in collective organisations. There is a need for new individual and collective learning and organisation processes based on transdisciplinarity and co-learning among researchers, development professionals, decision makers and farmers. In this book, scientists from ten industrialised countries describe and reflect on their theoretical and practical experience of the different forms of learning they experimented with.

Promoting Small and Micro-enterprises Through Training Interventions

This book contains a total of 25 unpublished research articles. In this edition, we have kept parity with each other's outcomes, concisely in a unique style to depict the trends of research in the mountain fishery sector. We have also appended a list of contributors at the end of the book. The strategies observed in fisheries and aquaculture developments in the mountain waters clearly reveal that the on-going dimensions are nothing but broad ecosystem-based approach where both subsistence and commercial expansion of the systems could be possible. The research trend also directs that several fishery components, like ornamental fisheries, recreational fisheries, integrated fish farming, freshwater crab fishery, shellfish aquaculture, etc., exist. They may also be strengthened in mountain waters to improve the economic status of the mountain regions. Thus for exploiting huge mountain aqua-resources, Arunachal Pradesh targets the ecosystem-based approach of raising native mahseers, like Tor tor, Tor putitora, Neolissochilus hexagonolepis, and exotic species of trout in its mountain waters as a preliminary endeavour.

While many scholars, governments, and corporations have expressed that they would like to play a hand in developing an inclusive and equitable society, few have achieved the goal. Vulnerable communities around the world have suffered systemically and have been left on their own to succeed economically despite decades of disadvantage. It is essential to consider these communities and their sociological and systemic factors when considering the future of work in order to succeed in developing a truly sustainable and equitable society. Socio-Economic Disparities, Vulnerable Communities, and the Future of Work and Entrepreneurship discusses the journey of vulnerable communities in the pursuit of entrepreneurship. It further investigates the strategies and action that governments and organizations can take to cultivate an inclusive environment within the future of work. Covering topics such as economic agency, equitable access, and affirmative action, this premier reference source is an excellent resource for policymakers, government officials, non-profit organizations, business leaders and executives, human resource managers, economists, students and faculty of higher education, researchers, and academicians.

Clinical Guidelines and Care Protocols

Practice Nurses play an important and pivotal role in healthcare providing a range of interventions and services to patients in General Practice and Primary Care settings. While most Practice Nurses work in GP surgeries and doctor led clinics, others are working as autonomous practitioners in community practices and nurse led centres. Practice Nurses are presented with an ever increasing range of conditions and patient needs as the role is constantly changing and evolving. The extended roles and range of clinical skills which may be provided by a Practice Nurse depend on the needs of the patient and the qualifications, skills, competencies and scope of practice of each individual Practice Nurse (NMBI, 2015). Practice Nurses have a responsibility to ensure that they are suitably qualified, skilled and competent in carrying out each clinical procedure and intervention that they undertake. Developing guidelines for clinical practice is an important part of the Practice Nurse role, but the task of researching, developing and producing guidelines is time-consuming, and it can be difficult to find the information required as and when needed. Practice Nursing: Clinical Guidelines and Procedures in Practice written by a Practice Nurse, and based on local and national guidelines, provides a comprehensive overview and a step by step guide for nurses carrying out a wide range of clinical procedures in practice. The book contains over 100 clinical guidelines and procedures with illustrations, tables, charts and diagrams. In producing these clinical guidelines, the author hopes that this book will prove useful as a resource and reference guide for other nurses in general practice and primary care settings.

There is a secret language that all children speak. It is a language beyond words. It is revealed in your child's body movements and facial expressions, in their voice, in their art, in their play, even in their stories and dreams. It is a language that reveals their deepest fears and conflicts. It is a language quite familiar to professional therapists, but as a parent, you hardly know that it exists. In *HOW TO UNDERSTAND THE SECRET LANGUAGE OF CHILDREN*, Dr Lawrence E. Shapiro provides the keys that will open the door to a whole new way for you to relate to your children. This secret language is too important in the understanding of children to be the exclusive province of mental health professionals: it should be a tool that you can use to enrich your relationship with your child. Learn how to: * Interpret your infant's cries * Observe and interpret your child's body language * Use art activities to reassure your child in times of trouble or conflict * Learn how to play on your child's terms * Enhance your child's ability to exercise self-control and co-operate * Boost your child's social skills In this innovative book, grounded in the science of parenting, Dr Shapiro teaches you the crucial and practical tools you need to understand - and speak - the secret language of your child.

Nursing Procedures

Nursing is an evolving profession that requires continued knowledge updates in formulating a foundation for practice. In order to promote patient safety and satisfaction, it is imperative that nurses monitor publications and increase their knowledge base. Each patient is different; each care management situation requires an individualized plan of care. These require the nurse to develop a personal framework for practice that continually develops from this information. This mandates an evolving knowledge base which this edition will supply for nurses who work to deliver care that is research based and protocol driven. This issue of *Nursing Clinics* will be both timely and relevant as it will combine two clearly important topics for nurses in care management, pathophysiological updates as well as research based protocols that are important to continuity of validated evidence based care delivery. This will give nurses across organizations the opportunity to see care from a perspective of patient wholeness and not truncate care in order to address total components. With care reimbursement dependent on outcomes, it is important for the nurse to see care as a continuum and not finite. This issue will give nurses this perspective.

Clinical Practice Protocols in Oncology Nursing

Named a 2013 Doody's Core Title! "The evidence-based protocols are designed as a primary reference and are useful, substantive, and timely...The broader contributions of useful format and succinct review of the evidence make it likely that this text will continue to be the leading resource in nursing education and practice."--The Gerontologist "Now more than ever, nurses are called upon to lead efforts to embed evidence-based practice in daily operations. As the IOM report states, 'nurses have key roles to play as team members and leaders for a reformed and better-integrated, patient-centered health care system.' The process of implementing sweeping change in health care will likely take years; however, nurses must start pragmatically and focus on these critically important protocols that have demonstrated improved outcomes for older adults. Simply stated, 'Pick this book up and use it.'" From the Foreword, Susan L. Carlson, MSN, APRN, ACNS-BC, GNP-BC, FNGNA President, National Gerontological Nursing Association "As a gerontological clinical educator/research nurse, I will often use this as a reference. A systematic method in compliance with the AGREE appraisal process was used to rate the levels of evidence for each protocol. ACCCN's Critical Care Nursing

"[This book] speaks against thinking [that] we can only understand nursing from a traditional, logical, empirical approach, suggesting we need a contemporary process for exploring nursing. I can't agree more." --Journal of Christian Nursing "Nurse scholars from across the globe contribute essays to this unique philosophical exploration of today's nursing. This book presents an emerging view that requires nursing to look at its work through a broader and less structured lens. Challenging the structure of the traditional nursing process, the book considers nursing as reflective and thoughtful." --Doody's A Contemporary Nursing Process re-envision the practice of nursing by configuring caring in terms of the person the nurse cares for. Locsin and Purnell stress the importance of knowing the patient, and differentiating the person from the disease. This text addresses this highly relevant issue, and provides a wealth of insight on how to care for the patient on a personal level, while still professionally administering clinical treatment. Chapters discuss: How to appreciate persons as participants in their care, rather than as objects of care The ideal of care versus the practical demands of care Technological advancements shaping human life and nursing The consequences of "not knowing" the patient on a personal level

Exam Policy, Exam Regulations, Test Guidelines, Academic Assessment, Exam Administration
An exam policy defines the rules and regulations governing the conduct of examinations. It outlines procedures for test administration, acceptable behavior during exams, consequences for violations, and processes for appealing grades or challenging exam results. Understanding exam policies is crucial for students and educators to ensure fair and equitable assessment practices, academic integrity, and a clear framework for handling any issues that may arise during the examination process.
