Start Up of a WW2 Submarine Diesel Engine of a German U-Boat = Start Up of a WW2 Submarine Diesel Engine of a German U-Boat by HD1080ide 20,842,007 views 5 years ago 6 minutes, 22 seconds - Start up of a 6-cylinder diesel engine. The **submarine**, engine RS 34 S was used in the **Type, XXIII submarines**,. Originally, it was ...

The young machine operator begins to pre-lubricate the engine.

After reaching 2 bar oil pressure, the older machine operator turns the engine manually.

The engine is turned by compressed air with cylinder taps opened to blow out water or oil, if present.

The engine is still being pre-lubricated.

The machine operator closes the cylinder taps.

Water pump switched on (control cabinet in the background).

Fuel valve opened.

Injection pumps on filling: Probably, this means that the injection pumps are set to maximum as a basic setting (big wheel). The final fuel amount is set by the governor (small wheel in the background).

Preheating

Glowplugs are glowing.

Engine start by compressed air.

The machine operator checks the combustion by opening the cylinder taps shortly.

Finally, he raises the RPM by adjusting the governor.

Navy Ford (CVN-78) Class Aircraft Carrier Program

CVN-78, CVN-79, CVN-80, and CVN-81 are the first four ships in the Navy's new Gerald R. Ford (CVN-78) class of nuclear-powered aircraft carriers (CVNs). This in-depth illustrated volume discusses technical issues, fleet planning, budgeting, and delays in the Ford Class program.

Navy Ford (Cvn-78) Class Aircraft Carrier Program

CVN-78, CVN-79, CVN-80, and CVN-81 are the first four ships in the Navy's new Gerald R. Ford (CVN-78) class of nuclear-powered aircraft carriers (CVNs). CVN-78 (named for Gerald R. Ford) was procured in FY2008. The Navy's proposed FY2019 budget estimates the ship's procurement cost at \$12,964.0 million (i.e., about \$13.0 billion) in then-year dollars. The ship received advance procurement (AP) funding in FY2001-FY2007 and was fully funded in FY2008-FY2011 using congressionally authorized four-year incremental funding. To help cover cost growth on the ship, the ship received an additional \$1,394.9 million in FY2014-FY2016 and FY2018 cost-to-complete procurement funding. The ship was delivered to the Navy on May 31, 2017, and was commissioned into service on July 22, 2017. CVN-79 (named for John F. Kennedy) was procured in FY2013. The Navy's proposed FY2019 budget estimates the ship's procurement cost at \$11,341.4 million (i.e., about \$11.3 billion) in then-year dollars. The ship received AP funding in FY2007-FY2012, and was fully funded in FY2013-FY2018 using congressionally authorized six-year incremental funding. The ship is scheduled for delivery to the Navy in September 2024. CVN-80 (named Enterprise) was procured in FY2018. The Navy's proposed FY2019 budget estimates the ship's procurement cost at \$12,601.7 million (i.e., about \$12.6 billion) in then-year dollars. The ship received AP funding in FY2016 and FY2017, and the Navy plans to fully fund the ship in FY2018-FY2023 using congressionally authorized six-year incremental funding. The Navy's proposed FY2019 budget requests \$1,598.2 million in procurement funding for the ship. The ship is scheduled for delivery to the Navy in September 2027. CVN-81 (not yet named) is scheduled to be procured in FY2023. The Navy's proposed FY2019 budget estimates the ship's procurement cost at \$15,088.0 million (i.e., about \$15.1 billion) in then-year dollars. The Navy plans to request AP funding for the ship in FY2021 and FY2022, and then fully fund the ship in FY2023-FY2028 using congressionally authorized six-year incremental funding. The Navy's FY2019 budget submission programs the initial increment of AP funding for the ship in FY2021. The ship is scheduled for delivery to the Navy in September 2032. Oversight issues for Congress for the CVN-78 program for FY2019 include the following: whether to approve, reject, or modify the Navy's FY2019 procurement funding requests for the CVN-78 program; whether to accelerate the procurement of CVN-81 from FY2023 to an earlier year, or use a block buy contract to procure multiple aircraft carriers, or pursue a combined material buy for multiple aircraft carriers, or do some combination of these things; cost growth in the CVN-78 program, Navy efforts to stem that growth, and Navy efforts to manage costs so as to stay within the program's cost caps; whether to conduct the shock trial for the CVN-78 class in the near term, on the lead ship in the class, or years later, on the second ship in the class; CVN-78 program issues that were raised in a January 2018 report from the Department of Defense's (DOD's) Director of Operational Test and Evaluation (DOT&E); and whether the Navy should shift at some point from procuring large-deck, nuclear-powered carriers like the CVN-78 class to procuring smaller aircraft carriers.

Navy Ford (CVN-78) Class Aircraft Carrier Program: Background and Issues for Congress

CVN-78, CVN-79, and CVN-80 are the first three ships in the Navy's new Gerald R. Ford (CVN-78) class of nuclear-powered aircraft carriers (CVNs). CVN-78 was procured in FY2008. The Navy's proposed FY2015 budget estimates the ship's procurement cost at \$12,887.2 million (i.e., about \$12.9 billion) in then-year dollars. The ship received advance procurement funding in FY2001-FY2007 and was fully funded in FY2008- FY2011 using congressionally authorized four-year incremental funding. The Navy did not request any procurement funding for the ship in FY2012 and FY2013. To help cover cost growth on the ship, the ship received an additional \$588.1 million in procurement funding in FY2014, and the Navy is requesting another \$663.0 million in procurement funding for FY2015. CVN-79 was procured in FY2013. The ship received advance procurement funding in FY2007- FY2012, and the Navy plans to fully fund the ship in FY2013-FY2018 using congressionally authorized six-year incremental funding. The Navy's proposed FY2015 budget estimates CVN- 79's procurement cost at \$11,498.0 million (i.e., about \$11.5 billion) in then-year dollars, and requests \$1,300 million in procurement funding for the ship. CVN-80 is scheduled to be procured in FY2018. The Navy's proposed FY2015 budget estimates the ship's procurement cost at \$13,874.2 million (i.e., about \$13.9 billion) in then-year dollars. Under the Navy's proposed FY2015 budget, the ship is to receive advance procurement funding in FY2016-FY2017 and be fully funded in FY2018-FY2023 using congressionally authorized six-year incremental funding.

Navy Ford (CVN-78) Class (CVN-21) Aircraft Carrier Program

CVN-78 and CVN-79 are the first two ships in the Navy's new Gerald R. Ford (CVN-78) class of nuclear-powered aircraft carriers. CVN-78 was procured in FY2008 and is scheduled to enter service in 2015. The ship's procurement cost is estimated in the proposed FY2010 budget at \$10,846 million in then-year dollars--\$389 million (about 3.7%) more than the estimate in the FY2009 budget. Although CVN-78 was procured in FY2008, it is being funded with four-year incremental funding across FY2008-FY2011. The proposed FY2010 requests \$739.3 million in procurement funding to help complete the ship's procurement cost. The Congressional Budget Office (CBO) reported in June 2008 that it estimates that CVN-78 will cost about \$900 million more than the Navy estimates, and that if "CVN-78 experienced cost growth similar to that of other lead ships that the Navy has purchased in the past 10 years, costs could be much higher still." The Government Accountability Office (GAO) and other observers have expressed concern that difficulties in developing the CVN-78's new electromagnetic aircraft catapult (called the electromagnetic aircraft launch system, or EMALS), could delay the schedule for building the ship and increase the ship's construction cost. GAO highlighted the issue in a March 2009 report ...

Crs Report for Congress

A unique keepsake with beautiful images and interesting information about the U.S. Navy's newest aircraft carrier, CVN-78 Gerald R. Ford. A perfect gift for anyone interested in aircraft carriers, the Navy, or President Ford.

Cvn-78 Gerald R. Ford, U.s. Navy Aircraft Carrier

The Navy is developing the Ford-class nuclear-powered aircraft carrier to serve as the future centerpiece of the carrier strike group. The Ford class is introducing a number of advanced technologies to the fleet in the areas of propulsion, aircraft launch and recovery, weapons handling, and survivability. These technologies are intended to create operational efficiencies while enabling a 25% increase in sortie rates as compared to legacy Nimitz-class aircraft carriers and will enable Ford-class carriers to operate with reduced manpower. The lead ship, CVN 78, has been under construction since 2008, and early construction on CVN 79 is underway. In 2007 Congress established a cap for procurement costs -- which has been adjusted over time. In Sept. 2013, GAO reported on a \$2.3 billion increase in CVN 78 construction costs. This report assesses (1) the extent to which CVN 78 will be delivered within revised cost and schedule goals; (2) if CVN 78 will demonstrate its required capabilities before ship deployment; and (3) the steps the Navy is taking to achieve CVN 79 cost goals. Tables and figures. This is a print on demand report.

Ford-Class Aircraft Carrier

" Ford-class aircraft carriers will feature new technologies designed to reduce life-cycle costs. The lead ship, CVN 78, has been under construction since 2008, and early construction on CVN 79 is underway. In 2007 Congress established a cap for procurement costs-which has been adjusted over

time. In September 2013, GAO reported on a \$2.3 billion increase in CVN 78 construction costs. GAO was mandated to examine risks in the CVN 78 program since its September 2013 report. This report assesses (1) the extent to which CVN 78 will be delivered within revised cost and schedule goals; (2) if CVN 78 will demonstrate its required capabilities before ship deployment; and (3) the steps the Navy is taking to achieve CVN 79 cost goals. To perform this work, GAO analyzed Navy and contractor data, and scheduling best practices. "

Ford-class Aircraft Carrier

The Navy plans to spend over \$43 billion to produce three Ford-class aircraft carriers. The lead ship, CVN 78, is under construction, and preparation work is underway for the second, CVN 79. These ships will feature new technologies designed to increase capability and reduce crew size. This report evaluated the progress of the Ford class. It examines (1) technical, design, and construction challenges to delivering the lead ship within budget and schedule estimates; (2) the Navy's test strategy for demonstrating CVN 78's required capabilities; and (3) actions the Navy is taking to improve CVN 79 cost outcomes. Tables and figures. This is a print on demand report.

Ford-Class Carriers

The Navy is investing over \$3 billion to develop technologies for a new type of aircraft carrier-the Ford class-and it expects to spend almost \$11 billion to design and construct the USS Gerald R. Ford (CVN 78)-the lead ship of the class. New technologies are to improve the carrier's performance and reduce crew size. The Navy requested authorization of CVN 78 in its fiscal year 2008 budget. GAO was asked to assess the Navy's ability to meet its goals for developing the new carrier. Specifically, this report assesses (1) the extent to which technology development could affect the capability and construction of CVN 78, (2) the status of efforts to achieve design stability, and (3) the challenges to building CVN 78 within budget. To accomplish this, our work includes analysis of test reports, development schedules, and ship progress reviews; interviews with Navy and other officials; and examinations of cost estimates and our own past work.

Defense Acquisitions

This book provides background information and potential oversight issues for Congress on the Columbia-class program, the Gerald R. Ford (CVN-78) class aircraft carrier program, the Navy's FFG(X) program, on the Navy's Littoral Combat Ship (LCS) program and on three new ship-based weapons the Navy is developing that could improve the ability of Navy surface ships to defend themselves against missiles, unmanned aerial vehicles (UAVs), and surface craft: the Surface Navy Laser Weapon System (SNLWS), the electromagnetic railgun (EMRG), and the gun-launched guided projectile (GLGP), previously known as the hypervelocity projectile (HVP).

United States Navy

The Navy plans to spend over \$43 billion to produce three Ford-class aircraft carriers. The lead ship, CVN 78, is under construction, and preparation work is underway for the second, CVN 79. These ships will feature new technologies designed to increase capability and reduce crew size. GAO was asked to evaluate the progress of the Ford class. This report examines (1) technical, design, and construction challenges to delivering the lead ship within budget and schedule estimates; (2) the Navy's test strategy for demonstrating CVN 78's required capabilities; and (3) actions the Navy is taking to improve CVN 79 cost outcomes. GAO analyzed documents related to mission requirements, acquisition plans and performance, and testing strategies, and interviewed Department of Defense (DOD) and contractor officials. GAO recommends the Secretary of Defense take several actions aimed at ensuring Ford-class carrier acquisitions are supported by sound requirements and a comprehensive testing strategy, including conducting a cost-benefit analysis of required capabilities and associated costs. GAO is also recommending actions to improve the Navy's knowledge about CVN 79 capabilities and costs before beginning contract negotiations. DOD concurred with one recommendation, partially concurred with three others, and did not concur with the recommendation to defer CVN 79's detail design and construction contract award. GAO maintains that DOD's current schedule for awarding this contract undermines the government's negotiating position.

Ford-class carriers

" The Navy intended for the Ford Class aircraft carrier to improve combat capability while reducing acquisition and life-cycle costs. However, as GAO has reported on extensively since 2007, the lead ship has experienced cost growth of nearly 23 percent, with a reduced capability expected at delivery. CVN 78 is estimated to cost \$12.9 billion, while the next ship, CVN 79, is estimated to be \$11.4 billion. The Navy plans to buy 1-2 more ships in the coming years. The Senate Armed Services Committee Report accompanying the National Defense Authorization Act for Fiscal Year 2016 included a provision that GAO review Ford-class cost estimates, among related issues. This report assesses: (1) the extent to which the CVN 79 cost estimate is a reliable basis for meeting the cost cap and addresses known cost risks from the lead ship, and (2) the extent to which oversight mechanisms provide Congress with insight into ship costs. To do this work, GAO compared the CVN 79 cost estimate with GAO's Cost Estimating and Assessment Guide, analyzed cost reports, and interviewed relevant officials. "

Ford-Class Aircraft Carrier, Follow-On Ships Need More Frequent and Accurate Cost Estimates to Avoid Pitfalls of Lead Ship

This is a print on demand edition of a hard to find publication. Contents: (1) Introduction; (2) Background: Proposed 313-Ship Fleet; FY 2010 Shipbuilding Request; (3) Oversight Issues for Congress: Adequacy of Proposed 313-Ship Fleet: Adequacy of Shipbuilding Plan for Maintaining 313 Ships; Shortfalls Relative to 313-Ship Goals; Affordability of Shipbuilding Plan; (4) Legislative Activity for FY 2010: FY 2010 Defense Authorization Act; FY 2010 DoD Appropriations Act; Resolution Directing Submission of FY 2010 30-Year Shipbuilding Plan; Legislation on Individual Shipbuilding Programs. Appendixes: (A) December 2009 Press Reports About Draft FY 2011 30-Year Shipbuilding Plan; (B) Adequacy of Planned 313-Ship Fleet; (C) Size of the Navy and Navy Shipbuilding Rate. Charts and tables.

Defense Acquisitions: Navy Faces Challenges Constructing the Aircraft Carrier Gerald R. Ford within Budget

Fully illustrated and updated for 2017, this massive report provides details about hundreds of U.S. Navy systems - patrol craft, carriers, ships, aircraft, nuclear submarines, transports, helicopters, electronic systems, and much more. Every major ongoing project of the Navy is comprehensively described in the 2017 Navy Program Guide. Here are some of the systems covered (space limitations prevent a complete listing): SECTION I: NAVAL AVIATION * AIRCRAFT CARRIERS * CVN 68 Nimitz-Class and CVN 78 Ford-Class Aircraft Carrier Programs * AIRCRAFT * AH-1Z and UH-1Y Helicopter Upgrades * AV-8B Harrier 11+ Vertical/Short Take-Off and Landing (V/STOL) Aircraft * C-2A Greyhound Logistics Support Aircraft * C-40A Clipper Navy Unique Fleet Essential Airlift (NUFEA) * C-130T Hercules Intra-Theater Airlift Aircraft * CH-53E Super Stallion Helicopter * CH-53K King Stallion Heavy-Lift Replacement (HLR) Helicopter * CMV-22B Osprey Tilt-Rotor Aircraft * EA-6B Prowler Airborne Electronic Attack (AEA) Aircraft * EA-18G Growler Airborne Electronic Attack (AEA) Aircraft * F-35 Lightning II Joint Strike Fighter (JSF) * F/A-18A-D Hornet Strike-Fighter Aircraft * F/A-18E/F Super Hornet Strike-Fighter Aircraft * KC-130J Hercules Tactical Tanker and Transport * MH-60R/S Seahawk Multi-mission Combat Helicopter * MH-53E Sea Dragon Airborne Mine Countermeasures (AMCM) Helicopter * MQ-25 Carrier Based Aerial Refueling System * MV-22B Osprey Tilt-Rotor Aircraft * P-3C Orion Modification, Improvement, and Sustainment. * P-8A Poseidon Multi-mission Maritime Aircraft (MMA) * Naval Aviation Training Aircraft * Service Secretary Controlled Aircraft/Executive Airlift (SSCA/EA) * VH-92A Presidential Replacement Helicopter * AVIATION WEAPONS * AGM-88E Advanced Anti-Radiation Guided Missile (AARGM) * AGM-154 Joint Standoff Weapon (JSOW) * AIM-9X Sidewinder Short-Range Air-to-Air Missile (SRAAM) * AIM-120 Advanced Medium-Range Air-to-Air Missile (AMRAAM) * Joint Direct-Attack Munition (JDAM, GBU-31/32/38) * Laser JDAM (GBU-54) * Offensive Anti-Surface Warfare Increment 1 (OASuW Inc 1) * Long-Range Anti-Ship Missile (LRASM) * Paveway II Laser-Guided Bomb (LGB) * Dual-Mode LGB (GBU-10/12/16) and Paveway III (GBU-24) LGB * AVIATION SENSORS AND SYSTEMS * Airborne Electronic Attack (AEA) Next-Generation Jammer (NGJ) * ALQ-214 Integrated Defensive Electronic Countermeasures (IDECM) * ALR-67(V)3 Advanced Special Receiver (RWR) * APG-79 Active Electronically Scanned Array (AESA) Radar System * AAQ-24 Department of the Navy Large Aircraft * Infrared Countermeasures (DoN LAIRCM) System * ASQ-228 Advanced Targeting Forward-Looking Infra-Red (ATFLIR) Sensor * Joint Mission Planning Systems (JMPS) * SECTION 2: SURFACE WARFARE * SURFACE WARSHIPS * CG 47 Ticonderoga-Class Aegis Guided-Missile Cruiser Modernization * DDG 51 Arleigh Burke-Class Aegis Guided-Missile Destroyer * DDG 51 Arleigh Burke-Class Aegis Guided-Missile Destroyer Modernization * DDG 1000 Zumwalt-Class 21st-Century Destroyer Frigate (FF) * Littoral Combat Ship (LCS) * PC 1 Cyclone-Class Patrol Coastal Modernization Program * SURFACE WEAPONS * Mk 15 Phalanx

Department of Defense Authorization for Appropriations for Fiscal Year 2014 and the Future Years Defense Program: Seapower

The Navy intended for the Ford Class aircraft carrier to improve combat capability while reducing acquisition and life-cycle costs. However, as GAO has reported on extensively since 2007, the lead ship has experienced cost growth of nearly 23 percent, with a reduced capability expected at delivery. This report assesses: (1) the extent to which the CVN 79 cost estimate is a reliable basis for meeting the cost cap and addresses known cost risks from the lead ship, and (2) the extent to which oversight mechanisms provide Congress with insight into ship costs. The Navy should develop a new, reliable cost estimate for CVN 79 validated by cost reviews and obtain an independent cost estimate before requesting funding for future ships.

Navy Force Structure and Shipbuilding Plans

The U.S. Navy is currently designing the next generation aircraft carrier, the CVN 21. This class of carriers will use the same basic hull form as the current Nimitz class but will include a substantial redesign of the interior of the ship for improved weapons handling and stores management functions. It will also incorporate several new technologies including a new propulsion system and new aircraft launch and recovery systems. These improvements not only will increase the operational capability of the ship but also are anticipated to lower the ship's manpower requirements and maintenance costs. Under current force modernization plans, new ships of the CVN 21 class will be introduced every four or five years as the ships of the Nimitz class reach the end of their planned 50-year operational life. Under this strategy, Nimitz class carriers will be operating for over 50 more years and it will take decades to transform the aircraft carrier fleet to ships of the new class. On the basis of some preliminary calculations that appeared promising, RAND proposed to the Program Executive Office (PEO) for Aircraft Carriers an examination of a way to accelerate the transformation of the carrier force: replacing Nimitz-class carriers as they reach mid-life instead of refueling them. In this report we identify specific fleet management options for building new instead of refueling, and we evaluate their advantages and disadvantages. This report should be of interest to Navy and Office of Secretary of Defense planners examining fleet modernization options, especially those organizations addressing the costs of alternative force structure options.

2017 U.S. Navy Illustrated Encyclopedia of Weapons, Ships, and Equipment

The authors assess several one- and two-deployment cycles, assuming a deployment length of six months and a time-between-deployments length equal to twice the duration of the previous deployment. Among many findings, RAND concludes that shorter cycles can increase the forward presence of the carrier fleet and help level shipyard workloads. Longer, two-deployment cycles can increase forward presence, but may result in shipyard workload complications and deferred-work backlogs."--BOOK JACKET.

Ford-Class Aircraft Carrier, Follow-on Ships Need More Frequent and Accurate Cost Estimates to Avoid Pitfalls of Lead Ship

Navy's Force Structure Assessment (FSA) was developed in an effort to determine the right balance of existing forces, the ships we currently have under construction and the future procurement plans needed to address the ever-evolving and increasingly complex threats the Navy is required to counter in the global maritime commons. This FSA assumes that the future plans for our Navy, in ship types and numbers of ships, continues to replace the ships we have today with ships of similar capability and in similar numbers as we transition to the future Navy - it does not address potential options that may come out of the ongoing review of the potential Future Fleet Architecture studies that were directed by Congress and completed in October 2016. As we evaluate the options presented in these studies

and move to include them in our plans for tomorrow's Navy, this FSA will need to be updated to reflect those changes that are determined to be most beneficial to meeting the Navy's missions of the future. The FSA, released at the end of 2016 by the outgoing Obama administration, recommends a 355-ship fleet including 12 carriers, 104 large surface combatants, 52 small surface combatants, 38 amphibious ships, and 66 submarines. The assessment will be one input to the Navy's FY-2018 30-year shipbuilding plan. The current proposed Navy budget is seen as a bridge to this larger Navy, with shipbuilding on an upward glide slope towards 308 ships. Navy leadership is confident that, if funded, this plan is executable, as each ship class called for in the FSA has an active shipbuilding line already up and running. "To continue to protect America and defend our strategic interests around the world, all while continuing the counter terrorism fight and appropriately competing with a growing China and resurgent Russia, our Navy must continue to grow," said Secretary of the Navy Ray Mabus. "All of the analysis done to date, inside and outside of the Navy, recognizes, as we have for nearly the last eight years, the need for a larger Fleet. That is why, working with Congress and our partners in industry, we have successfully reversed the decline in shipbuilding that occurred from 2001-2009, putting 86 ships under contract over the last seven years. Maintaining this momentum, and the cost-saving business practices we have established, will be critical to ensuring the Navy is able to achieve the FSA-recommended fleet size and is positioned to maintain the global presence the Navy and Marine Corps uniquely provide our nation." Part of this reproduction includes the Congressional Research Service report on the FSA and shipbuilding. This report presents background information and issues for Congress concerning the Navy's force structure and shipbuilding plans. The current and planned size and composition of the Navy, the rate of Navy ship procurement, and the prospective affordability of the Navy's shipbuilding plans have been oversight matters for the congressional defense committees for many years. The Navy's proposed FY2018 budget, as amended on May 24, 2017, requests the procurement of nine new ships, including one Gerald R. Ford (CVN-78) class aircraft carrier, two Virginia-class attack submarines, two DDG-51 class destroyers, two Littoral Combat Ships (LCSs), one TAO-205 class oiler, and one towing, salvage, and rescue ship. On December 15, 2016, the Navy released a new force-structure goal that calls for achieving and maintaining a fleet of 355 ships of certain types and numbers. The issue for Congress is whether to approve, reject, or modify the Navy's force structure and shipbuilding plans. Decisions that Congress makes on this issue can substantially affect Navy capabilities and funding requirements, and the U.S. shipbuilding industrial base.

Report - Naval Ship Research and Development Center

The current and planned size and composition of the Navy, the rate of Navy ship procurement, and the prospective affordability of the Navy's shipbuilding plans have been oversight matters for the congressional defense committees for many years. The Navy's proposed FY2018 budget, as amended on May 24, 2017, requests the procurement of nine new ships, including one Gerald R. Ford (CVN-78) class aircraft carrier, two Virginia-class attack submarines, two DDG-51 class destroyers, two Littoral Combat Ships (LCSs), one TAO-205 class oiler, and one towing, salvage, and rescue ship. On December 15, 2016, the Navy released a new force-structure goal that calls for achieving and maintaining a fleet of 355 ships of certain types and numbers. Key points about this new 355-ship force-level goal include the following: The 355-ship force-level goal is the result of a Force Structure Assessment (FSA) conducted by the Navy in 2016. The Navy conducts an FSA every few years, as circumstances require, to determine its force-structure goal. The new 355-ship force-level goal replaces a 308-ship force-level goal that the Navy released in March 2015. The actual size of the Navy in recent years has generally been between 270 and 290 ships. The figure of 355 ships appears close to an objective of building toward a fleet of 350 ships that was announced by the Trump campaign organization during the 2016 presidential election campaign. The 355-ship goal, however, reflects the national security strategy and national military strategy that were in place in 2016 (i.e., the Obama Administration's national security strategy and national military strategy), while the Trump campaign organization's 350-ship goal appears to have a different origin. Compared to the previous 308-ship force-level goal, the new 355-ship force-level goal includes 47 additional ships, or about 15% more ships. More than 47 ships, however, would need to be added to the Navy's 30-year shipbuilding plan to achieve and maintain the Navy's 355-ship fleet, unless the Navy extends the service lives of existing ships beyond currently planned figures and/or reactivates recently retired ships: CRS estimates that 57 to 67 ships would need to be added to the Navy's FY2017 30-year (FY2017-FY2046) shipbuilding plan to achieve the Navy's 355-ship fleet and maintain it through the end of the 30-year period (i.e., through FY2046).

Modernizing the U.S. Aircraft Carrier Fleet

The Fleet Response Plan is a U.S. Navy program to enhance the operational availability of the aircraft carrier fleet. This report describes program modeling that varies the time between depot availabilities and the size of the depot work packages, to estimate its effect on the maintenance industrial base and the operational availability of the aircraft carrier fleet.

Procurement, Acquisition, Testing, and Oversight of the Navy's Gerald R. Ford-class Aircraft Carrier Program

This volume describes how technological and geo-political trends are rapidly transforming maritime affairs. A mix of original and previously published material, this volume describes how the 21st-century great power competition is changing the face of naval operations in general, and U.S. Navy operations in the Western Pacific in particular. The rise of an assertive China and its new anti-access and area-denial capabilities threaten the aircraft carrier-based maritime dominance of the U.S. Navy. Military and political trends in the Western Pacific and beyond suggest that the world is encountering a pivotal moment when existing weapons, tactics, and operations might be rendered obsolete by techno-strategic change. This volume considers these developments from three perspectives by describing: (1) the techno-strategic setting; (2) the institutional constraints that impede the ability of the U.S. Navy to respond to these changes; and (3) a new approach to naval force planning and strategy to cope with these developments. The volume culminates in a discussion of sophisticated strategies and operational concepts that position the U.S. Navy and its maritime allies and partners to prevail in today's techno-strategic churn. This book will be of much interest to students of naval policy, strategic studies, Asia-Pacific politics, and International Relations.

Increasing Aircraft Carrier Forward Presence

Contents: (1) Intro. and Issue for Congress; (2) Background: Nuclear and Conventional Power for Ships; Nuclear Power for a Surface Combatant; Naval Nuclear Propulsion Program; Current Navy Nuclear-Powered Ships; CG(X) Cruiser Program; Reactor Plant for a Nuclear-Powered CG(X); Construction Shipyards; Nuclear-Capable Shipyards; Surface Combatant Shipyards; 2006 Navy Alternative Propulsion Study; (3) Potential Issues for Congress: Cost; Development and Design Cost; Procurement Cost; Operational Effectiveness; Ship Construction; Shipyards; Nuclear-Propulsion Component Manufacturers; Environmental Impact; (4) Potential Options for Congress; (5) Legislative Activity for FY 2010. Charts and tables.

Building a 600-ship Navy

Today, alongside its all-important operations in direct support of the Global War on Terrorism, naval aviation also continues its now 60-year commitment to shaping the maritime and littoral environment through persistent forward presence. In the longer term, naval aviation is also adapting to a series of geopolitical revolutions which will dramatically increase the future demand for a secure sea base capable of projecting dominant power ashore in wartime against the full spectrum of possible opponents. It is adapting to these demands by exploiting technologies and operational practices developed in the last decade that will greatly increase its ability to surge and concentrate forces rapidly; protect the sea base from new air, surface, and undersea threats; and find, identify, locate, track, and strike mobile as well as fixed targets ashore, under all weather conditions, and in timely enough fashion to produce the desired effects. This report discusses the following topics: (1) Formal Alliances Provide Predictable Access, Informal Coalitions Do Not; (2) Distributed Ground Forces Require Persistent, Distributed Air Support; (3) The Sea Shield Must Be Dominant If the Sea Base Is to Be Effective; (4) Adapting; (5) The Spectrum from Presence to Major Combat; (6) Technology and the Spectrum of Threat; (7) The Value of Robust Airborne Early Warning (AEW) Aircraft; (8) No Substitute for Range in Carrier Aviation; (9) The Need for Airborne Electronic Attack (AEA) is Not Going Away; (10) Land-Based Maritime Patrol Aircraft; (11) Multimission Helicopters; (12) New Capabilities and Challenges; (13) Eliminating the Weather Sanctuary for Mobile Targets; (14) Providing a Dominant Defense of the Sea Base; (15) Shoot Archers Not Arrows; (16) Make Opposing Submarines Pay for Their Inevitable Indiscretions; (17) Get Back in the Counter-Surveillance Business; and (18) The Force of the Future.

2017 U. S. Navy Force Structure Assessment (FSA) and the Request for a 355 Ship Navy, Outline of Shipbuilding Plans for Aircraft Carriers, Submarines, Nuclear Missiles, Surface Combatants, Destroyers

"This study is a vital first step in a long overdue reassessment of the dramatic changes in the command and control of naval operations in the twentieth century. Dr Friedman's work shows how fundamental communications networks and information systems were to commanders afloat and ashore in fighting the war at sea and that victory went to the possessor of the more comprehensive picture of the maritime battlespace. The increasing complexity of the issues that navies faced in their continual struggle to exploit new developments is very thoroughly conveyed in a book whose author consistently demonstrates an understanding of both the theoretical science and the practical technology which underpinned that revolution." (Publisher's blurb)

Navy Force Structure and Shipbuilding Plans

The Navy's proposed FY2007 budget requested about \$739 million in advance procurement funding for CVN-78, the first ship in the CVN-21 class of aircraft carriers, and about \$45 million in advance procurement funding for the aircraft carrier CVN-79, the second ship in the class a total of \$784.1 million. The FY2007 defense authorization act (H.R. 5122/P.L. 109-364) authorized 4-year incremental funding for procuring aircraft carriers, established procurement cost caps for CVN-21 class carriers, increased the existing procurement cost cap for the CVN-77 aircraft carrier, permits the Navy to reduce the minimum size of the carrier force from 12 to 11 ships, and expressed the sense of the Congress that CVN-78 should be named for president Gerald R. Ford. On January 16, 2007, the Navy announced that CVN-78 will be named for Ford. The FY2007 defense appropriations act (H.R. 5631/P.L. 109-289) provides \$791.9 million in advance procurement funding for CVN-78 and CVN-79 an increase of \$7.75 million above the requested amount. This report will be updated as events warrant.
