Deep Energy Retrofit Guide for Public Buildings

This book provides detailed information on how to set up Deep Energy Retrofits (DERs) in public buildings, and shares in-depth insights into the current status of the major technologies, strategies and practical best practice examples of how to cost-effectively combine them. Case studies from Europe are analyzed with respect to energy use before and after renovation, reasons for undertaking the renovation, co-benefits achieved, resulting cost-effectiveness, and the business models employed. The building sector holds the potential for tremendous improvements in terms of energy efficiency and reducing carbon emissions, and energy retrofits to the existing building stock represent a significant opportunity in the transition to a low-carbon future. Moreover, investing in highly efficient building materials and systems can replace long-term energy imports, contribute to cost cutting, and create a wealth of new jobs. Yet, while the technologies needed in order to improve energy efficiency are readily available, significant progress has not yet been made, and “best practices” for implementing building technologies and renewable energy sources are still relegated to small “niche” applications. Offering essential information on Deep Energy Retrofits, the book offers a valuable asset for architects, public authorities, project developers, and engineers alike.

The Wellington Experience

This study examines the observations of U.S. military personnel who attended India's Defence Services Staff College (DSSC) at Wellington. Although the DSSC is a tri-service professional military education institution, this study focuses primarily on the Indian Army, the largest and most influential military service in India. Collectively, U.S. personnel at the DSSC had sustained interaction over an extended period of time with three distinct groups of Indian Army officers: senior officers (brigadier through lieutenant general), senior midlevel (lieutenant colonel and colonel), and junior midlevel (captain and major). The study focuses on the attitudes and values of the Indian Army officer corps over a 38-year

period, from 1979 to 2017, to determine if there was change over time, and if so, to understand the drivers of that change.

Police Communications Technician

This book is open access under a CC BY-NC-ND 3.0 IGO license. The Early Years analyzes the development of Latin American and Caribbean children and makes a compelling case for government intervention in what is instinctively a family affair. Spending on effective programs for young children is an investment that, if done well, will have very high returns, while failure to implement such programs will lower the returns on the hefty investments being made in primary, secondary, and higher education. Policies for young children belong at the core of a country's development agenda, alongside policies to develop infrastructure and strengthen institutions. However, if the services provided (or funded) by governments are to benefit children, they must be substantially better than what is currently being delivered in the region. This book offers suggestions for improving public policy in this critical area.

Can good governance be exported? International development assistance is more frequently being applied to strengthening governance in developing countries, and in *Exporting Good Governance: Temptations and Challenges in Canada's Aid Program*, the editors bring together diverse perspectives to investigate whether aid for good governance works. The first section of the book outlines the changing face of international development assistance and ideas of good governance. The second section analyzes six nations: three are countries to which Canada has devoted a significant portion of its aid efforts over the past five to ten years: Ghana, Vietnam, and Bangladesh. Two are newer

and more complex “fragile states,” where Canada has engaged: Haiti and Afghanistan. These five are then compared with Mauritius, which has enjoyed relatively good governance. The final section looks at challenges and new directions for Canada's development policy. Co-published with the Centre for International Governance Innovation
